DIRECTORY OF BRANCHES OF THE SOCIETY

CANADA

NEWFOUNDLAND

President — Mr. Albert Vivien, (B.Sc./Agr. '49), c/o Central Mortgage & Housing Corp., St. John's, Nfld.
Secretary — Mrs. W. Janes, (B.Sc./H.Ec. '48, M.Sc. '50), 8 Pine Bud Apts., St. John's, Nfld.

PRINCE EDWARD ISLAND

President — Dr. Frank MacMillan (M.D. '42), 76 McGill Ave., Charlottetown, P.E.I.
Secretary — Mr. George D. Wright, (B.Sc./Agr. '52), P.E.I. Frosted Foods Ltd., Box 576, Charlottetown, P.E.I.

HALIFAX

President — Mr. Allan F. Duffus, (B.Arch. '38), 69 Birmingham St., Halifax, N.S.
Secretary — Mr. J. W. Ritchie, (B.Sc./Agr. '51), Eastern Securities Ltd., Halifax, N.S.

EAST NOVA SCOTIA

Vice-President — Dr. Thomas W. Gorman, (M.D. '44, M.Sc. '49), P.O. Box 460, Antigonish, N.S.

CAPE BRETON

President — Mr. C. M. Anson, (B.Sc. '25), Gen. Manager, Dominion Steel & Coal Corp. Ltd., Sydney, N.S.
Secretary — Mr. J. R. Wallace, (B.Eng. '40), Dir. of Research, Dominion Iron & Steel Ltd., Sydney, N.S.

NEW BRUNSWICK

President — Dr. Willard Miles Jenkins, (M.D. '08), Gagetown, Queens Co., N.B.
Secretary — Mr. Robert G. McLeod, (B.Com. '52), c/o Irving Oil Co. Ltd., Saint John, N.B.

QUEBEC CITY

President — Mr. Lionel Roussin, (B.Com. '33), 71 St. Pierre St., Quebec, Que.
Secretary — Mr. Pierre Leduc, (B.Eng. '50), 2510 Des Hospitaliers, Quebec, Que.

ST. MAURICE VALLEY

Vice-President — Mr. W. Nelson Crutchfield, (B.Com. '34), 1102 Maple Avenue, Shawinigan Falls, Que.

DISTRICT OF BEDFORD

President — Mr. Robert Millinchamp, (B.S.A. '30), P.O. Box 11, Waterloo, Que.
Secretary — Mr. G. E. Cotter, (B.Eng. '51), 43 Elgin St., Granby, Que.

ST. FRANCIS DISTRICT

President — Rev. Donald Stirling, (B.A. '54, B.D. '58), Box 700, East Angus, Que.
Secretary — Dr. Ronald Kouri, (B.Sc. '57, D.D.S. '59), 410 Vimy St., Apt. 2, Sherbrooke, Que.

MACDONALD COLLEGE

President — Mr. D. Grant Ross, (B.Sc./Agr. '56), 592 Hubert St., Greenfield Park, Cite Jacques Cartier, Que.
Secretary — Miss Pauline A. Corby, (B.Sc./H.Ec. '57), 4750 De Courtrai Ave., Apt. 21, Montreal, Que.

MONTREAL

President — Mr. Peter Turcot, (B.Com. '47), Turcot, Wood, Power & Cundill Ltd., 360 St. James St. W., Montreal, Que.
Secretary — Mr. Thomas J. McKenna, (B.C.L. '46), Stewart, Crepault & McKenna, 507 Place d'Armes, Montreal, Que.

ALUMNAE SOCIETY, MONTREAL

President — Mrs. Hugh Hamilton, (B.Sc. '48), 5550 Place d'Aiguillon, Montreal 9, Que.
Secretary — Mrs. Richard Gilbert, (B.A. '54), 134 Beverley Ave., Montreal 16, Que.

NORANDA

Vice-President — Mr. Clayton E. Anderson, (B.Sc. '19, M.Sc. '20), Noranda Mines, Noranda, Que.

OTTAWA VALLEY

President—Mr. Ralph M. Johnson, (B.Eng. '49), R.R. No. 1, Box 390, Davidson Drive, Ottawa, Ont.
Secretary — Mr. Donald Diplock, (B.A. '42), 30 Woodlawn Ave., Ottawa, Ont.

UPPER ST. LAWRENCE

Vice-President, Canada — Mr. Thomas D. Dailey, (B.Com. '42), 107 King Street West, Brockville, Ont.
Vice-President, U.S.A. — Dr. Munroe M. Kissane, (M.D. '40), 24 Terrace Street, Malone, N.Y.
Secretary — Mr. Alan H. Hall, (B.Arch. '50), R. R. No. 3, Collins Bay, Ont.

LONDON, ONT.

President — Mr. G. M. Hobart, (B.C.L. '52), 516 Grosvenor St., London, Ont.
Secretary — Mr. Edward G. Blake, (B. Com. '49), 450 Sherene Terrace, London, Ont.

HAMILTON

President — Mr. C. V. Corbet, (B.Com. '34), 1316 Pigott Bldg., 36 James St. S., Hamilton, Ont.
Secretary — Mrs. C. L. Bates, (B.A. '30), 87 King St. W., Dundas, Ont.

SARNIA

President — Mr. George E. Bawden, (B.Eng. '50), 634 Beach Lane, Sarnia, Ont.
Secretary — Mrs. Kenneth J. Radcliffe, (Physio. '48), 742 Grove St., Sarnia, Ont.

WINDSOR-DETROIT

President — Dr. W. E. Hume, (M.D. '24), 76 London St. W., Windsor, Ont.
Secretary — Mr. J. L. Glos, (B.Arch. '55), 2193 Lincoln Rd., Windsor, Ont.

PORCUPINE

President — Mr. Wendell B. Brewer, (B.Com. '23), 217 Way Ave., Timmins, Ont.
Secretary — Mr. J. W. Thomson, (B.Eng. '38), 162 Tamarack St., Timmins, Ont.

KIRKLAND LAKE

President — Mr. Gerald V. Kearns, (B.Com. '24), P.O. Box 428, Kirkland Lake, Ont.
Secretary — Mr. J. Murphy Gamble (B.Com. '29), Caswell Construction Co. Ltd., Kirkland Lake, Ont.

SUDBURY

Secretary —Mrs. Eric G. Swaine, (B.Sc./H.Ec. '50), 452 Westview Drive, Sudbury, Ont.

NIAGARA FRONTIER

President — Mr. Donald O. D. Ramsdale, (B.Eng. '33), 157 Highland Ave., St. Catharines, Ont.
Secretary — Mr. J. K. Abel, (B.Eng. '47), 117 Glenwood Ave., St. Catharines, Ont.

TORONTO

President — Mr. A. H. Wait, (B.Com. '33), Clarkson Gordon & Co., 15 Wellington St. W., Toronto, Ont.
Secretary — Mr. C. F. Gross, (B.Eng. '51), 50 Maitland St., Toronto, Ont.

TORONTO ALUMNAE

President — Mrs. Edgar Brodie, (B.A. '36), 104 Glendora Ave., Willowdale, Ont.
Secretary — Mrs. P. L. Burgess, (B.A. '46), 26 North Hills Terrace, Don Mills, Ont.

GRAND RIVER VALLEY

Secretary — Mr. Peter H. Sims, (B.Com. '55), 130 Aberdeen Rd., Kitchener, Ont.

WINNIPEG

President — Mr. G. S. A. Bacon, (B.A. '30), Great-West Life Assurance Co., 60 Osborne St. N., Winnipeg, Man.
Secretary — Mr. Allan A. Park, (B.Eng. '49), Dominion Bridge Co. Ltd., 702 Canada Bldg., Winnipeg, Man.

NORTHERN SASKATCHEWAN

President — Dr. A. R. Byers, (B.Sc. '32, M.Sc. '33, Ph.D. '36), 661 University Drive, Saskatoon, Sask.
Secretary — Dr. M. A. Baltzan, (B.Sc. '49, M.D. '53), 408 MacMillan Bldg., Saskatoon, Sask.

SOUTHERN SASKATCHEWAN

President — Mr. Hugo R. Holland, (B.Eng. '33), 2377 Cameron St., Regina, Sask.
Secretary — Mrs. Florence Blair, Suite 3, 2700 McCallum Ave., Regina, Sask.

NORTHERN ALBERTA

President — Mr. Anthony F. Salvatore, (B.Eng. '49), 11647—72nd Ave., Edmonton, Alta.
Secretary — Mr. G. K. Greaves, (B.A. '42), Upper 12208—102nd Ave., Edmonton, Alta.

SOUTHERN ALBERTA

President—Mr. Robert W. Bion, (B.A. '53), c/o W. C. Pitfield & Co. Ltd., 534 8th Ave. S.W., Calgary, Alta.
Secretary — Mrs. Barbara Weyman, (B.A. '48), 9 Glamorgan Drive, Calgary, Alta.

TRAIL AND DISTRICT

President — Dr. F. L. Wilson, (M.D. '33), 24 Hazelwood Drive, Trail, B.C.
Secretary — Mr. G. J. Hood, (B.Sc. '48, B.Eng. '52), 2262 Thompson Ave., Rossland, B.C.

VANCOUVER

President — Dr. E. C. McCoy, (B.A. '34, M.D. '39), Cambie Medical Dental Bldg., 3256 Cambie St., Vancouver, B.C.
Secretary — Mr. Peter Abbott, (B.Com. '56), 850 Forest Hills Drive, N. Vancouver, B.C.

VICTORIA AND DISTRICT

President — Mr. R. Ian Ross, (B.A. '41), 1509 Shasta Place, Victoria, B.C.
Secretary — Mr. Brahm Wiesman, (B.Arch. '48, M.Arch. '50), Capital Regional Planning Board of B.C., 918 Government St., Room 8, Victoria, B.C.

UNITED STATES

BOSTON

President — Cmdr. Eric Parnell, USN (Ret.), (B.Sc. '21), 62 Hume Ave., Medford 55, Mass.
Secretary — Dr. Ruby G. Jackson, (M.D. '50). 1101 Beacon St., Boston, Mass.

NEW YORK CITY

President — Mr. Lew Schwartz, (B.A. '27), 12 Park Rd., Scarsdale, N.Y.
Secretary — Mr. Robert Currie, (B.A. '37, M.A. '39), New York Telephone Co., 140 West St., New York 7, N.Y.

ROCHESTER

President — Dr. John B. Feltner, (M.D. '37), 700 Main St., Rochester 11, N.Y.

PHILADELPHIA

President — Miss Sara W. Hill, (B.A. '25), Folly Hill, 423 Ithan Ave., Rosemont, Pa.
Secretary — Dr. I. Nathan Dubin, (B.Sc. '35, M.D. '39), 755 Beacon Lane, Merion Station, Philadelphia, Pa.

PITTSBURGH

President — Dr. W. W. G. Maclachlan, (M.D. '07), 1133 Wightman St., Pittsburgh 17, Pa.
Secretary — Dr. Ned J. McCague, (M.D. '40), Mercy Hospital, Pittsburgh 19, Pa.

WASHINGTON, D.C.

President — Dr. Basil Darwent, (B.Sc. '41, Ph.D. '43), Dept. of Chemistry, Catholic University of America, Washington 17, D.C.

CHICAGO

President — Mr. G. Leslie Laidlaw, (B.Com. '23), 626 Bluff St., Glencoe, Ill.
Secretary — Mr. David G. Scott, (B.Com. '32), 925 Forest Ave., Wilmette, Ill.

MINNESOTA

President — Mr. G. J. Dodd, (B.Eng. '40), 400 Roanoke Bldg., Minneapolis 2, Minn.
Secretary — Mr. James E. Kerns, (B.Eng. '50), 4336 Mackey Ave., Minneapolis 24, Minn.

CONNECTICUT

President — Dr. John K. Ormrod, (B.Sc. '40, M.D. 43B), Aetna Life Insurance Co., Hartford, Conn.
Secretary — Mrs. N. Wm. Wawro, (B.Sc. '45), 44 Walbridge Rd., West Hartford, Conn.

VERMONT

President — Dr. F. J. M. Sichel, (B.Sc./Arts '28), Dept. of Physiology, College of Medicine, University of Vermont, Burlington, Vermont.
Secretary — Dr. W. B. Durrell, (M.Sc. '48 -Mac), Dept. of Animal Pathology, Hills Agricultural Science Bldg., University of Vermont, Burlington, Vermont.

NORTHERN CALIFORNIA

President — Dr. Carroll Russell, (M.D. '38), 711 D. St., San Rafael, Calif.
Secretary — Mr. Harold A. Calkins, (B.Sc. '12), 5840 St. Paul Court, Oakland, California.

SOUTHERN CALIFORNIA

President — Dr. Arden Russell Hedge, (M.D. '38), Suite 17, Foothill Medical Bldg., 600 Foothill Blvd., Monrovia, California.
Secretary — Mr. Dennis Murch, (B.Com. '51), 3838 W. 58th Place, Los Angeles 43, California.

WASHINGTON STATE

President — Dr. John J. Callahan, (M.D. '42), 208 Cobb Bldg., Seattle, Wash.
Secretary — Dr. Frederick E. Geisert, (M.D. '53), 5211—57th Ave. S., Seattle 18, Wash.

ABOUT OUR COVER

There's very little that need be said about the cover of this issue, it's all so happily self-assertive. But we'd like to introduce the smiling group surrounding the Yates Trophy. Standing behind the trophy, in the usual left to right fashion, are Bruce Coulter, head football coach; John Moore, somewhat bruised but beaming halfback; Tom Skypeck, quarterback; and Harry Griffiths, McGill Director of Athletics. In the front are Bob Winsor, offensive end, left, and Willie Lambert, halfback, right. There's more about these gentlemen inside.

The McGill News is published quarterly by the Graduates' Society of McGill University and distributed to its members. The copyright of all contents is registered. Authorized as second class mail, Post Office Department, Ottawa. Please address all communications to: *The McGill News*, 3618 University Street, Montreal 2. Tel. VI. 4-6311.

LET'S FACE THE ISSUE

IF THE WINTER ISSUE of the McGill News reaches you late, blame it on our amazing football team (see Pages 7, 8, 9). Their performance this year was completely unnerving, shocking us all out of our complacency. Who can blame us if, after 22 years, we were comfortably resigned to our championship-less position? But how pleasant it was to be blasted out of our rut! McGill wasn't quite the same this autumn, and we daresay that coming football seasons will be different.

To do justice to this big story, we called on the talents of a graduate with a practised eye for sports and a facile typewriter. Dink Carroll, LL.B. '23, widely-read and quoted columnist for the Montreal Gazette, was delighted to accept our assignment.

ON PAGE 22, we reproduce a portion of Sen. A. K. Hugessen's address at the Founder's Day Convocation October 6, which we think you will find interesting. Sen. Hugessen, incidentally, was one of five distinguished persons honored at Convocation and he received the degree of Doctor of Laws, honoris causa. The others were Dr. Wilder Penfield, recently retired head of the Montreal Neurological Institute (D.Sc.), Dr. John Stuart Foster, former Director of the McGill Radiation Laboratory, who also retired this year (D.Sc.) and Dr. Allie Vibert Douglas, B.A. '20, M.Sc. '21, Ph.D. '26, Dean of Women at Queen's University (LL.D.). In addition, an emeritus professorship was conferred on Dr. Lorne C. Montgomery, a long-time member and former chairman of McGill's medical faculty.

Less than a month after Convocation, the Board of Governors announced the election of Dr. Penfield to the Board, along with Oxford-educated Jack Pembroke, C.B.E., president of Royal Trust Company. For three other interesting appointments to the Board, see Page 21.

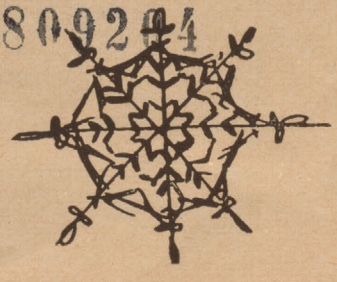

THE McGILL DAILY celebrates its 50th birthday in 1961 (see Page 5). A strong committee with Charles H. Peters, B.A. '28, as honorary chairman has autocratically voted itself into power to make plans for a suitable celebration. David M. Legate, B.A. '27, has assumed the active chairmanship of the committee and the first letter to ex-Dailyites has already gone out. Mr. Legate assures us that this will be a birthday party without equal. The date: February 24, 25.

FOOTNOTES: Colin McDougall, B.A. '40, McGill Registrar, accompanied Principal James to Mexico early this autumn to attend the conference of the International Association of Universities. His impressions of this organization and the conference which elected Dr. James to the presidency will be found on Page 10 . . . The article on R. Tait McKenzie B.A. '89, M.D. '92 (Page 27) is the first of what we hope will be a series of McGill flashbacks. Suggestions for topics which might lend themselves to "flashback" treatment will be gratefully received . . . The first Director of McGill's University Press, Robin Farr, affords us a searching analysis of an all too little understood field of Canadian publishing on Page 23 . . . The annual meeting of the Graduates' Society will be held February 21, 1960 (Page 20).

AND NOW, it remains for us to send to you the very best wishes for Christmas and the New Year, from the Officers and Staff of the Graduates' Society and the McGill News. Best of luck in 1961.

Letters

Congratulations, Team

November 21, 1960

. . . What leads me to write is that I have just heard that McGill has won the intercollegiate football championship for which I should like to congratulate the members. As a member of the Athletics Board for some years during Sir Arthur Currie's Principalship, when Dr. Simpson was Chairman, Roger French, representative of the Engineering Faculty and I, of the Arts Faculty, with "Dad" Lamb and Stuart Forbes the Athletic members, I recalled the many meetings we had to work out how to support the different activities. We won the championship once during that period, if I remember correctly.

The other item of interest is the fact that a McGill graduate, Rev. A. Leonard Griffith, BA, BD, has been appointed to the famous City Temple Church in London and is a great success. His wife (formerly Miss Cayford), is also a McGill graduate and attended my physics course during the war, in her first year. It is nice to meet some of the McGill "family".

I hope the work of the McGill Graduates' Society is going on well. I always read with interest the News and recent articles on the medical faculty history have been very enlightening. You should get Professor Shaw to write up the old days at McGill when he was an undergraduate. Those would be the times when Sir William Peterson was the Principal. There are not many living now who could do that.

David A. Keys, DSc '47

London W.C.2,
England

(EDITOR'S NOTE: Dr. Keys, well-known former McGill Physics Professor, is in London on assignment for Atomic Energy of Canada Limited.)

Enjoys Special Issue

August 31, 1960

May I thank you for The McGill News, Special Edition, August 1960. I learned a great deal from it. The section from The American Alumni Council, prepared by Editorial Projects for Education, gave me much food for thought.

I did clip Dr. F. Cyril James' article on Page 22 (Familiar Memories and New Faces). Our famed Principal has a nice flair for the rounded expression of language.

You are to be congratulated for this entire issue and its timely topics and comprehensive contents.

A. Jacob Livinson, J. P.,
BA '11, MA '16

Westmount, Que.

WHAT HEARS the MARTLET

The Great Trekker

James Banham, Information Officer at the University of British Columbia, sends the Martlet the following interesting intelligence:

A McGILL GRADUATE of 1908 who has become known as the "grand old man" of the University of British Columbia, was cheered to the rafters by thousands of U.B.C. students October 27 when he was presented with the highest honour which the Alma Mater Society can bestow.

Colonel Harry T. Logan, who took honours in classics at McGill (1908), went on to Oxford as a Rhodes Scholar, and then returned to Vancouver to become a founding father of U.B.C., received the "Great Trekker Award" at a ceremony in the War Memorial Gymnasium.

Colonel Logan, who retired as head of the department of classics at U.B.C. in 1952, began his teaching career in Vancouver in 1912 when he was appointed a lecturer in classics at McGill College of British Columbia, the forerunner of the University of British Columbia. He returned to Vancouver following World War I and took up his teaching duties at what had by then become the University of British Columbia.

The University was housed, in those days, in a collection of wooden shacks in the shadow of the Vancouver General Hospital in the Fairview district of Vancouver. In 1913 the government had begun construction of permanent buildings on Point Grey, seven miles from the shacks, but work on the buildings ended abruptly when World War I broke out.

Four years after the end of the war the skeletons of the chemistry building and the U.B.C. library were still weathering in the wind on Point Grey and it was at this point that the students decided to take matters into their own hands. They organized a publicity campaign and collected thousands of signatures on a petition which was presented to the government by a student delegation. To bolster their demands the students staged a parade through downtown Vancouver and then climbed aboard street cars which took them to the end of the rail line three miles from the campus. Then began the "Great Trek" as it has come to be known. The students marched from the end of the street car line to the campus, clambered over the unfinished buildings, sang school songs and demonstrated.

The campaign was successful. The following year the government appropriated enough money to complete the chemistry building and the library and to construct several new buildings.

Before they trekked to the campus the students built a stone cairn which still stands on the main mall of the University. Each marching student tossed a rock into the cairn when he reached the campus at the end of the trek. The cairn was sealed over and there is still an annual ceremony for freshmen at the monument when U.B.C. begins its fall term.

Col. Harry T. Logan, BA '08, receives the University of British Columbia's "Great Trekker" award from David Edgar, president of the Alma Mater Society. Col. Logan, one of the founding fathers of U.B.C., although retired, is a special lecturer in classics and wrote *Tuum Est*, the 50th Anniversary history of U.B.C., published in 1958.

The Great Trekker award is made annually by the students to an outstanding graduate or faculty member who has made a continuing and lasting contribution to life at U.B.C. The person chosen receives a replica of the Cairn to keep in perpetuity.

This is the honour which was bestowed on Colonel Harry Logan by the students of U.B.C. for the lasting service which he gave to his adopted University.

A Special Concert

WE HAVE BEFORE US the November, 1960 newsletter of the Contemporary Music Society, Inc., of New York, which contains at least one item of more than passing interest to McGill. We quote the pertinent paragraph from the section announcing the current plans of the Society:

"The distinguished Canadian pianist Ellen Ballon will give the first New York performance of the Villa Lobos First Piano Concerto".

Ellen Ballon, D. Mus. '54, whose famous career as a concert pianist is well-known to us all, is in the midst of preparations for this important performance at Hunter College, N.Y. on March 1st. In November, Dr. Ballon took time out from her busy schedule to pay one of her regular visits to McGill, and we were able to learn first-hand about the concert and her recent activities.

The Contemporary Music Society, Dr. Ballon told us, is headed by the famous conductor Leopold Stokowski, and is devoted to the encouragement and promotion of contemporary music. It is a non-profit organization which commissions new works from important composers and also makes their performances possible.

Dr. Ballon's participation in the work of this Society is consistent with her own personal desire to assist the development of music and artists in the United States but more particularly in Canada. Her marvellous work with the McGill Conservatorium over the past 10 years, through her lectures and scholarships, needs no repetition here. The Martlet Concert and Ball, which she organized in Montreal last year, resulted in a $34,500 endowment for scholarships in the McGill Conservatorium.

Last summer, we learned, Dr. Ballon and her husband, Col. T. L. Bullock, Arts '22, visited New Brunswick. It was Dr. Ballon's first visit to that province, and she was a guest of the Province of New Brunswick. During her visit, she was guest-of-honour at a government banquet presided over by the Hon. Louis-J. Robichaud, Premier of the province.

The piano concerto that Dr. Ballon will play at the Hunter College Concert was written and dedicated to her by Brazil's greatest composer, Heitor Villa-Lobos, who died a year ago. Dr. Ballon gave the world premiere of this work in Rio de Janeiro with the composer conducting.

Anniversary Gift

TWO ENTERPRISING and loyal graduates have taken the lead to inaugurate a program which, they hope, will enable McGill to maintain and increase her all-important endowment funds.

Ian Bowman, Science '09, and Ashley Colter, Science '10, are presenting the idea to their classmates to perpetuate their assistance to the University through a bequest program. Mr. Bowman has already written to the members of his class, suggesting that, wherever possible, McGill be remembered in their wills.

Both gentlemen feel that this program is a most suitable means of commemorating their respective 50th anniversaries of graduation from McGill.

It is known to them that many of the leading private universities and colleges in the eastern United States have bequest programs starting with the class that celebrates its 30th anniversary. In fact, a number of the prominent New England colleges owe more than 90 per cent of their endowment to bequests.

Principal's Assistant

WALTER KINGMAN MOLSON, B.A. '38, has been appointed assistant to Dr. F. Cyril James, Principal and Vice-Chancellor. Mr. Molson's appointment was announced early in October by Dr. James on behalf of the Board of Governors.

Mr. Molson was headmaster of Stanstead College from 1957 to 1960 and had also served as headmaster of Brentwood College, Victoria, B.C., and as assistant master of Trinity College School at Port Hope, Ont.

In announcing the appointment, Dr. James said that Mr. Molson's experience "will enable him to help considerably in the implementation of the new policy regarding admission of students, which is now under consideration.

"The rapidly growing number of applicants for admission to McGill, the late date at which the results of school leaving examinations become

available and the natural desire of the applicants for early notification of the decision regarding their admission, combine to make necessary smoother and more expeditious procedures than those which McGill followed in the past. Much of Mr. Molson's time in the immediate future will be occupied with the practical details of these new procedures," Dr. James said.

A member of one of Montreal's oldest families, Mr. Molson is the elder son of the late Walter Molson. He studied law for one year after graduation before leaving to join the Black Watch, Royal Highlanders of Canada at the outbreak of the war.

At McGill, Mr. Molson was active with the Red and White Revue for a number of years, and was its producer

in 1937. He was vice-president of the Union in 1938, and was also president of Zeta Psi Fraternity and the Interfraternity Council.

Promoting Goodwill

THE MONTREAL BRANCH of the Graduates' Society is developing a "goodwill" program which promises to play an important role in the adjustment of the foreign student to McGill and Canada. A recent letter sent out by the Branch, urging its members to extend their hospitality and friendship to McGill's students far from home, puts it this way:

"Students from outside Quebec, and particularly from other continents, become, or wish to become, thoroughly familiar with McGill, with Montreal and with Canada as a nation. When they return to their homes and countries, their lives and work will be coloured by their experiences here. More important, their feelings toward us will be determined by the measure of our goodwill or our lack of friendliness. They become ambassadors of what we are and stand for.

"The greatest single contribution we can make to mutual understanding and respect is to welcome these students into our homes. There are far too many cases where students from afar spend four years at McGill without once being invited into a Canadian home.

". . . It is the Canadian home and the Canadian host and hostess at normal times that mean most to a lonely student away from familiar surroundings . . . Nobody can determine the great influence stemming from one personal invitation; if all graduates were to adopt this idea as a regular habit, the impact in the world could be very wide."

This vital program to promote international goodwill is under the direction of a special committee of the Montreal Branch, under the chairmanship of Harry Rosen, DDS '53. Response to the letter thus far has demonstrated a great deal of enthusiasm among graduates.

The letter points out that while the great bulk of the students at McGill are Canadian, with a large majority from Quebec and Montreal, all provinces are represented, 28 other Commonwealth countries provide 7.5 per cent, the United States 5 per cent, and 48 other foreign countries 2.5 per cent of total enrolment.

THE DAILY'S 50TH BIRTHDAY

By Morris Fish

(Editor-in-Chief, 1960-61)

SEVERAL THOUSAND DOLLARS' worth of writing talent will be mobilised early next year to produce the most expensive edition of the McGill Daily ever published.

Yet the Daily will maintain its uniqueness as the only newspaper in North America to have cut its price per copy from 5 cents in 1911 to 2 cents in 1961.

How, you ask, can this be done?

Easily. Just get all onetime Daily staffers together for a weekend and invite them to inject their ability and experience into one Golden Anniversary Issue of the sheet which gave them their first bylines.

This is exactly what the present Managing Board, assisted by the Graduates' Society and a reunion committee, is planning to do.

The committee is in the process now of contacting all former staffers to invite them to the affair, scheduled for the weekend of February 25, 1961.

The idea of inviting oldtime personnel to put out a special issue is only one of the items on the projected reunion agenda. Other events include a banquet, plus several subsidiary ideas designed mainly to stimulate happy reminiscences.

So far, response from ex-staffers has been overwhelmingly affirmative. But one difficulty persists.

Our records being somewhat incomplete, we must depend on such media as this to reach those not already on our mailing list.

It would therefore be helpful if interested alumni contacted the reunion secretary, Albert Tunis, BA '48, at Martlet House, 3618 University Street, Montreal.

It would also be helpful if alumni who do read of the proposed reunion were to bring it to the attention of their co-staffers.

Only in these ways can we attract sons and daughters of the Daily to crown its first half century with a Golden Anniversary Celebration.

Man of the Theatre

JIM DOMVILLE, B.A. '54, B.C.L. '57, who will be remembered as producer of that amazing Red and White Revue called "My Fur Lady", has succumbed to the theatre — irrevocably, it would appear. Since graduation, Jim has masterminded and produced several important shows in addition to shepherding the professional Dominion-wide tour of "Fur Lady". Jim's "savoir faire" eminently qualifies him for the present task he has taken on as Administrative Director of the recently-established National Theatre School of Canada.

With headquarters in Montreal, the School has as its executive director Jean Gascon, and Powys Thomas is the Artistic Director. Both these gentlemen are well-known in theatrical circles and tops in their field in Canada.

"In September we completed a coast-to-coast audition tour," Jim told us, "during which time we interviewed and auditioned some 148 applicants for the Acting Course, which began in November. We held auditions in every major city in Canada, from Halifax to Vancouver."

Of this total, we learned, 30 students were accepted for the first course. Next year, however, the School will begin a Production course and each year it will be accepting 15 students in such disciplines as Stage Design, Costume Design, Lighting Design, Direction, Stage Management and Production.

"On our coast-to-coast tour," Jim enthused, "we found universal excitement among the professional theatre people for the establishment of such a school. It's the first of its kind in Canada, and is actually a year in advance of a similar project at the Lincoln Center in New York City."

"We were delighted by the extremely high calibre of the students who auditioned for us, and also particularly by the calibre of the staff, which is on a par with any school in Europe. By sheer good fortune, we were able to secure our staff entirely in Canada, although we were fully prepared to bring teachers for the School from England, France and the United States."

Old McGill '61

"WITH THIS VOLUME the McGill Annual makes its second appearance; and the success with which this one meets will, most probably, decide whether the publication of similar books in succeeding years will be undertaken or not."

With these words the Editors of *Old McGill* for 1897-1898 introduced their publication. Today, as the *64th* volume of Old McGill is being prepared, we need say little about the success of Volume two, or of those following. Since the appearance of Volume one, the opening page of which is reproduced along with this article, the students of McGill have been portrayed annually for 64 consecutive years in their book.

In the preface of the first edition, the editors strongly recommended that the book never become an annual publication, but rather be reserved for every second year. Fortunately, the advice had little effect, and *Old McGill* went on to become the respected and so eagerly anticipated publication that it is today.

The purpose of yearbooks, and of *Old McGill*, remains the same today as in the distant past, that of presenting a complete history of the school year, by recording activities and interpreting the spirit of the school and its students using the fascinating medium of the lasting printed word, and the photograph.

While simplicity has replaced most of the fanciness and artwork that characterized yearbooks until the mid-thirties, the main aim of successfully portraying the student in his book remains unchanged. With a production staff of 40 plus a sales staff of 50, many hands are helping to create what all hope will be the most successful annual yet.

For the past three years, *Old McGill* has operated on a balanced budget of approximately $16,000. Prior to this, higher printing costs resulted in a deficit budget. Yearbook specialists who have recently printed McGill's yearbook have been able to produce the Annual more economically than printers who are not specifically set up for yearbook production.

This year the Editor-in-Chief is Bill Hutchison, a fourth year Electrical Engineering student. Bill is the son of Les Hutchison (B.Eng. '34) and has worked as Associate Editor and Clubs

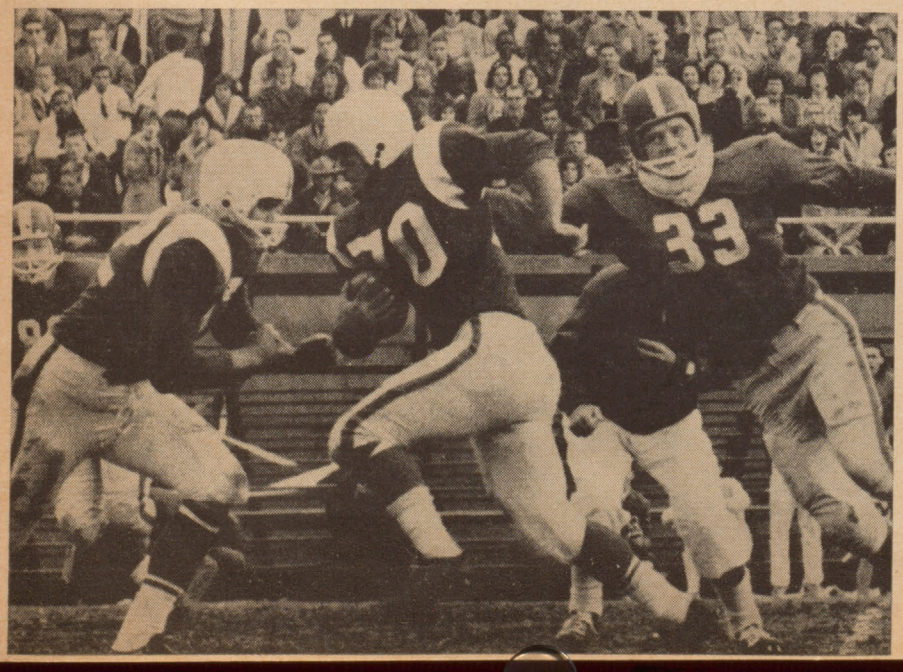

(Continued on Page 33)

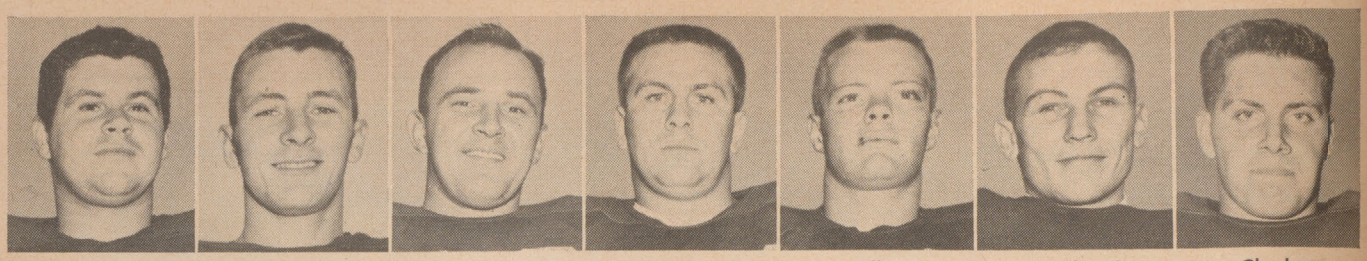

Dr. Donald Douglas, B.Sc. '42, M.Sc. '43, Ph.D. '45, presents the silver-headed cane which was the property of the late Dr. William Grant Stewart, B.A. '85, M.D. '88, to Dean Lloyd Stevenson, who accepts it on behalf of the Faculty of Medicine. This presentation took place during the annual ceremony connected with Dr. Stewart's bequest, under which a morocco-bound volume of Sir William Osler's famous essay entitled "A Way of Life" is presented to each member of the second-year class. Dr. Alton Goldbloom, B.A. '13, M.D. '16, delivered the address at the ceremony held on Founder's Day, Oct. 6. Dr. Stewart's cane was given to Dr. Douglas some years ago by the late Mrs. Stewart, and it bears the inscription "W.G.S. 1890" on the head.

A Proud McGill Football Team

We've seen this type of a photograph many times before in newspapers and magazines. But it's a safe bet that this is the first time in at least 22 years that we've seen the championship expression on the faces of a McGill senior inter-collegiate football team. The photograph was taken in the dressing room immediately after McGill's thrilling 21-0 win over the Golden Gaels at Queen's University's Richardson Memorial Stadium in Kingston. The elusive Yates Trophy is seen proudly perched on the knee of Captain Carl Hansen. Dr. F. Cyril James, Principal and Vice-Chancellor shares his delight with the team: he can be seen third from the left in the back row. Harry Griffiths, Director of Athletics, is the gentleman in "civvies" at the left; Bruce Coulter, head football coach, stands in the second row, third from the right; Vaughan McVey, line coach, sits front center on the knee of Rae Brown, star line-backer of the team; and Johnny Taylor, another member of the coaching staff is seen just right of Mr. Griffiths; Bob McLellan who also helped Coach Coulter, cannot be seen in this photograph. In the photo at the left, fullback Carl Hansen on the rampage against the University of Toronto Blues. For an explanation of how McGill did it, turn page.

A YEAR TO REMEMBER

Dink Carroll, LL.B. '23, The Gazette's well-known Sports Columnist, analyzes the success of the 1960 Redmen.

Dink Carroll

THE McGILL REDMEN waited a long time to win the Intercollegiate Rugby Football Union championship — 22 years, to be specific — but they won in such a manner as to leave no doubt that they were the best team in the college league this year. They had to play the Queen's Golden Gaels two Saturdays in a row in Richardson Stadium in Kingston and beat them both times. They won the first of these two games, 15-9, which forced a playoff, and then went on to win the playoff game, 21-0, which brought them the title.

This was a team that started slowly, losing its first two league games. But Coach Bruce Coulter and his assistants never lost confidence in the players or ran out of patience with them. It was an attitude that eventually paid off.

The team was built around Tom Skypeck, a former quarterback with Cornell University. He is the best passer ever to appear in Canadian college ranks. He has such good wrist action that he doesn't have to wind up to throw the long ball and he is accurate with it. He has fine poise, never panics, and is tall enough to spot his receivers quickly. But one of the Redmen expressed the opinion that it was because of Skypeck that the team didn't jell until the third game of the regular schedule.

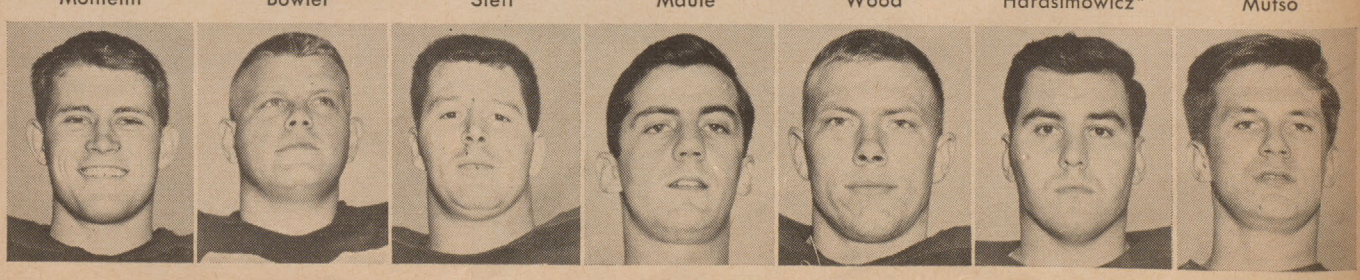

"There are four downs in the American game and only three in our game," he pointed out. "It took a couple of games before Tom started to think in terms of Canadian football."

The Redmen had been beaten by the Queen's Golden Gaels in Montreal and by the University of Western Ontario Mustangs in London before they suddenly became a winning ball club. Then they won two from the University of Toronto Blues before meeting the Western Mustangs in Montreal in a game that was to convince their supporters that they were on their way to the championship. There was a time back in the late 1940's when the Redmen were defeated by the Mustangs, 56-5, a most humiliating experience. Vic Obeck, who was coach of the Redmen at the time, tried to laugh it off, but the laugh sounded a little hollow.

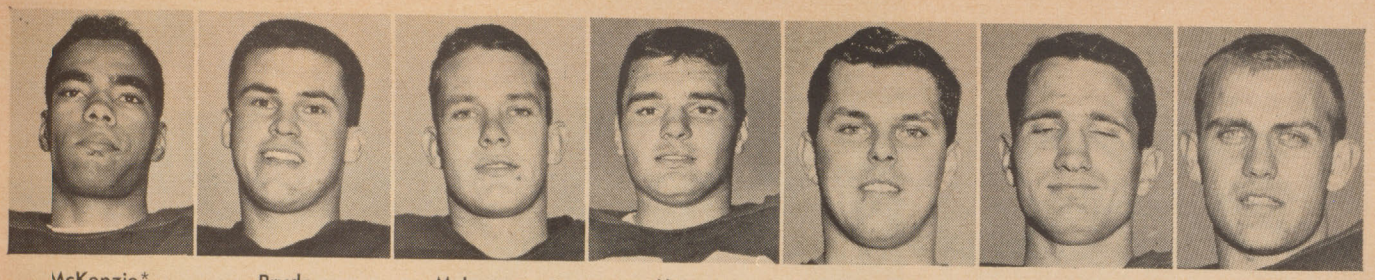

"I've just joined the MBM Club," he said, adding: "That means Murdered By Metras."

But they got their revenge in this game by beating their London rivals by a score of 57 to 6. Johnny Metras is still coaching the Mustangs, but Vic Obeck hasn't been around McGill since the 1954 season. Obeck used to allege that Metras liked to "pour it on" opposing teams when he had those high-scoring teams at Western, and maybe he did. But Coach Coulter showed

*Named to Intercollegiate All-Star Team. Not pictured on these pages are John Roberts, another All-Star, and Rae Brown.

McKenzie* Pryde McLernon Uniat Hoisak Johnson Navis

some compassion for the Mustangs. When the Redmen had a safe lead, he used everybody on the bench and rested his regulars, which was certainly the humane thing to do. But the reserves kept on scoring, anyway. The terrific scoring outburst focussed attention on the Redmen.

"They're a better ball club than the Queen's Gaels," said Dalton White, coach of the Toronto Varsity Blues. "I think they'll win the title."

His prediction was borne out when the Redmen licked the Gaels on successive Saturdays in Kingston. The Redmen were explosive on attack, but they had to be very good defensively to hold the Gaels to nine points in two games, a fact that was pointed out by Harry Griffiths, Athletics Director at McGill.

"It was the defensive team that won the game for us a week ago and forced the playoff," he said. "Tom Skypeck had a fractured thumb and sort of bluffed his way through the first half of that game. The players wanted him to pass more in the third quarter and he had to confess that he couldn't do it. Last year we didn't have any depth, but in this emergency Coach Coulter was able to replace Skypeck with John Roberts. John was our regular quarterback a year ago, but this season he's been playing a defensive halfback spot. He was able to take over and throw the pass off the fake field goal attempt that set up the big touchdown for us."

There wasn't anything wrong with Skypeck's hand in the playoff game against the Gaels.

"I'd say he played a game that was almost perfect," said Harry Griffiths. "I don't think he made a single wrong call and his passing was sharp."

After beating Queen's, the Redmen met the University of Alberta Golden Bears in an East-West playoff for the Churchill Trophy, emblematic of the national collegiate championship. The Redmen crushed their Western opponents by a score of 46 to 7.

The Redmen were much too big and powerful for the Golden Bears, who appeared to be overawed at finding themselves in a playoff for the national title. The Westerners fumbled frequently and made all the other mistakes that a team makes when it's feeling the pressure. The Golden Bears were mostly freshmen and sophomores, and several Redmen remarked after the game that they seemed awfully young. If they stay together a couple more years, they will present a much stiffer challenge.

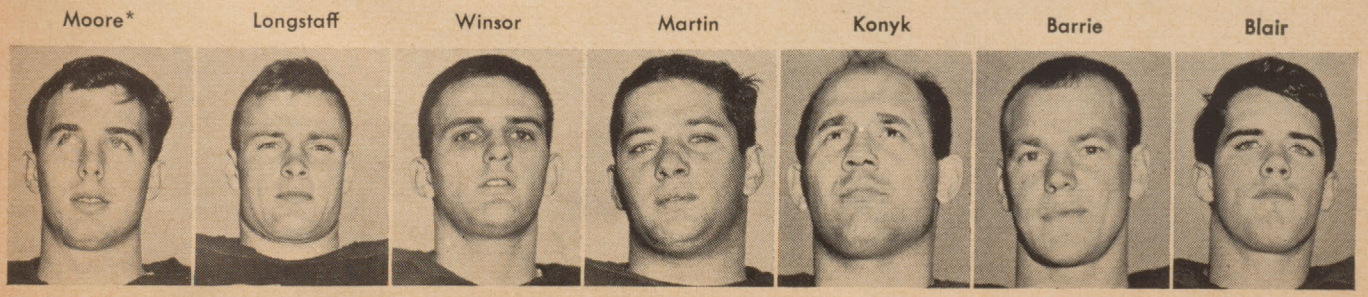

"We were outclassed and there's no doubt that some of our young players suffered from stage fright," commented Murray Smith, coach of the Golden Bears. "But we have never encountered a passer like Skypeck. We couldn't 'defense' him."

It's one thing to have a good passer, but he needs the rest of the cast to be able to function at his best and the Redmen had it. They had a big line that gave him good protection and good receivers to catch his passes. They also had a good running attack that kept the defense honest and took some of the pressure off Skypeck.

Skypeck's favorite targets were Don Taylor and Bob Winsor, offensive ends, and the two halfbacks, Willie Lambert and John Moore. He also threw short screens and swings to the fullbacks, Bob Milligan and Carl Hansen. The sure hands of the pass receivers was a big surprise. As a rule, the pass catchers drop a good percentage of passes in college football, but the Redmen dropped fewer than is the case in pro football.

The Redmen had a strong rushing attack to go with their passing. Carl Hansen and Bob Milligan, the hard-running fullbacks, carried up the middle and on slants off tackle while speedy John Moore was used mostly on end sweeps. They were given excellent blocking by Tom Stefl, Al Braekvelt, Paul Harasimowicz and Bob Milligan. But the Redmen had it everywhere. It was John McLernon, an offensive end, who threw the big block in the playoff game against Queen's, taking out two of the Gaels.

Colin McDougall, Registrar, Reports on Dr. James' Election As President of the International Association of Universities

Dr. James accepts the presidential gavel and congratulations from Jean Baugniet, former rector of the University of Brussels and president of the International Association of Universities since 1955.

A Well-Earned Tribute

AT THE THIRD General Conference of the International Association of Universities held in Mexico last September the assembled universities of the world voted into office as their President for the next five years, Dr. F. Cyril James, Principal and Vice-Chancellor of McGill University.

This was a well-earned tribute to Dr. James personally who has, after all, played an outstanding role of leadership in the international affairs of universities during the past two decades, but it was also proclaimed throughout the academic world as a signal honour for Canada. In choosing a Canadian as their executive head the universities of the world at the same time paid tribute to Canada itself.

What is the International Association of Universities? Despite its importance, despite the value of the work it performs, the purpose and activities of the Association are not as widely known in this country, the home of its new President, as they deserve to be.

Nearly all the great universities of the world are members. At the beginning of 1960 more than 300 universities and other institutions of higher learning were represented, and the membership grows steadily each year. The Association was founded only in 1950, but its creation fulfilled the hopes of many years of planning and endeavour. The impetus for its founding was given by the General Conference of Unesco in 1947. Then the first conference took place at Nice in 1950, the second at Istanbul in 1955, and the Third General Conference in Mexico in September 1960. The next conference will be held in Tokyo, probably in 1965.

The major purpose of the Association has been defined as "to promote academic cooperation at the practical level and in this way to provide useful services to university institutions throughout the world, as well as to other bodies concerned with higher education and scientific research".

In the first years of the Association's existence this purpose was principally achieved through the day to day work of its very able secretariat, located in Paris. The secretariat operates such important services as the following: Central Administrative Office, Reference Library and Documentation Centre, Research and Information Service, Centre for Cooperation in Higher Education, and a Publishing House. Works like the *International Handbook of Universities* are standard reference material in every Canadian Registrar's office.

In addition to these secretariat activities, the Association is now able to give leadership in matters of academic policy. To quote again: "Commission meetings, studies and reports, organized in cooperation chiefly with Unesco, with other international agencies, with government services, and with private bodies such as philanthropic foundations, enable the Association to exercise a growing influence on the evolution of university life in nearly all areas of the world. In all its activities, the Association seeks to contribute to the advancement of knowledge and the growth in international understanding, and to promote the interest of university institutions in the cause of human progress . . ."

Worthy purposes and activities, indeed!

The Conference at the National Autonomous University of Mexico was attended by some 350 delegates, representing more than 300 member universities and institutions. The three themes discussed were: Higher education and public service; The interplay of science and the humanities; and The expansion of higher education. From these discussions, and from debate in plenary sessions, it became quickly evident that every delegate believed the decade ahead to be the era of essential

(Continued on page 31)

The Rising Tide of Students

By F. Cyril James

YEAR AFTER YEAR, in speeches, statistical reports and educational conferences, emphasis has been placed on the fact that the number of young Canadians seeking admission to universities would increase sharply during the 'sixties. We are now in 1960, and the prophecy is already justified.

This autumn the freshman class at McGill in Science, in Arts and in Engineering is one-fifth larger than the entering class in the autumn of 1959, and the figures published by the Dominion Bureau of Statistics in its recent report on school enrolment indicate that this is but the first wave of a surging tide. The picture is substantially the same for all ten provinces of Canada but, since the greater portion of McGill students come from homes in the Province of Quebec, it may suffice to cite the enrolments of the Protestant Schools in this Province. During 1959-60 the enrolment in grade XI, from which the 20% increase in our freshman enrolment has in large measure come, was 4,236. The enrolment in grade X — which has moved up to grade XI this year in substantial part — was one-third larger at 5,772, and the enrolment in grade VII (which will be taking School Leaving Examinations in 1965) was 10,425. In 1939 the enrolment at all Canadian universities amounted to 38,000. In the autumn of 1960 it exceeded 100,000, and it is probable that, by the autumn of 1965, the number of young Canadians in search of a university education will exceed 200,000. The simple fact is that up to now the growth in the number of applicants has exceeded all of the figures expressed by the prophets. We know the exact numbers of children in our schools: we have consistently underestimated the increase in the proportion of those youngsters who are eager to go on from school to university.

Until a few years ago, the enrolment at McGill University represented approximately one-tenth of the total number of students at all Canadian universities. If we should attempt to maintain that ratio McGill would grow to 20,000 or even 25,000 students during the next decade.

Delegates to the third general conference of the International Association of Universities in Mexico last autumn hear Dr. James deliver his address following election to the presidency of the Association. The scene is the Lecture Hall, Building of the Faculty of Medicine, on the new campus of the National Autonomous University of Mexico.

Such rapid expansion would be difficult, if not impossible. Many new universities have come into existence in Canada during the past ten years and many of the smaller universities that existed long before 1950 are today expanding rapidly. The maximum enrolment at McGill—the figure of 9,500 that was publicly announced some years ago — is now under review. There may be slight modification. The aim of the University is not, however, numbers but quality. *McGill should aim to provide for a carefully selected body of students the best possible educational opportunities.*

This ambition raises many problems in regard to the appointment of additional members of faculty, the construction of new buildings and the acquisition of more elaborate scientific equipment. Each of these problems demands — and is receiving — careful study. There is, however, another problem, entirely separate from all of these: How is McGill to select its students from among the increasing number of applicants?

For more than four years, the Registrar's Office and a Senate Committee have been collecting the information necessary for an answer to this question and, a few months ago, a *Commission on Admissions Policy* was set up to study the whole question and make official recommendations. Members of the Board of Governors, members of the Senate and representatives appointed by the McGill Graduates' Society are included in its membership, and discussion has been lively at each meeting. Even though its work is not yet finished, certain general lines of policy are implicit in the interim report that it presented to Senate and Board of Governors in November, and

(*Continued on page 30*)

Foreign Students

STUDENTS FROM SIX continents, dedicated to mutual international understanding, were received by the McGill committee for World University Service on October 26. The students, who came from such diverse places as Yugoslavia, Hong Kong, and Indonesia, expressed their enthusiasm for this type of informal reception and said it really gave them an opportunity to appreciate how interested Canadian students are in them. Among the students were several Canada Council Scholars, who expressed their opinion that meeting young Canadians was as valuable an experience for a student from abroad as that obtained in the classroom.

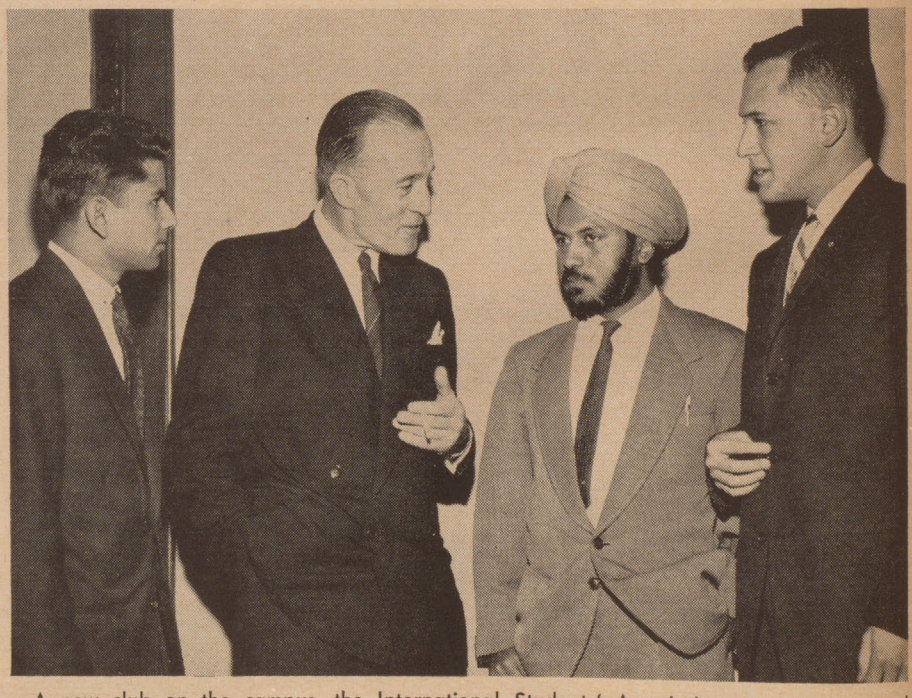

Two days later, a new student body at McGill, the International Students' Association, was inaugurated by Dr. F. Cyril James, who called it one of the most significant institutions of the University. The Association will act as a liaison group between foreign and Canadian students on the campus, with the express purpose of seeing to the needs of national clubs and acquainting the students at large with life in foreign countries. The chairman of the Association is Zafar Khan, last year's president of the Students' Union. Mr. Khan said that the campus has needed such an organization for many years to provide an ideal meeting ground for foreign students, and for Canadians with students from abroad.

Executives Must Pass

A MINIMUM ACADEMIC standard for all students in senior posts on the campus has been recommended by the McGill Students' Executive Council. The recommendation urged that the 10 top posts on campus be restricted to students with a minimum average of 65 per cent, and that students with a lag in some subject be required to obtain authorization from the Dean of their faculty in order to hold office. In addition, the resolution calls for any elected student who fails, to tender his resignation, and states that repeating students should be ineligible to stand for election.

The officials of the University reminded students that there already exists a set of regulations, passed by the University Senate in 1950, which restricts elected posts on the campus to students with healthy academic standings. This set of regulations was passed at the request of the Students' Council in office at the time, and enforcement of the rules was placed in the hands of the Council. The Senate resolution states that all students participating in activities sponsored by the regular and special committees of the Students' Society, and all students seeking election to office or to positions in the Society be in good academic standing, and that any student on probation or repeating his year because of academic failure be eligible for participation only when reinstated as a student in good standing by the University.

The new Students' Council resolution would apply to the positions of Scarlet Key President, Red Wing President, editor of the Year Book, producer of the Red and White Revue, chairman of the McGill Conference on World Affairs, president of the Debating Union, chairman of the union board of management, the McGill Daily managing board, the winter carnival chairman and all Students' Executive Council members. This resolution was expected to be in effect for the November elections.

A new club on the campus, the International Students' Association, was inaugurated late in October. Dr. F. Cyril James, Principal and Vice-Chancellor, second from left, chats with, left to right, Zafar Khan, chairman of the association; Sant Parkash Singh, a member of the new group; and Stuart Smith, president of the Students' Society.

New Students' Union?

PLANS FOR MCGILL'S long-awaited new Students' Union moved nearer completion with the announcement on November 7 that the University had acquired the site of Presbyterian College, across from the University Library on McTavish Street, in a property exchange. The new property will most likely be used for the construction of the Union building and for the provision of additional facilities for teaching in the field of the humanities and the social sciences. The added facilities will provide for much-needed expansion by Arts and Science, which has felt the impact of McGill's rapid enrolment increase.

In exchange, Presbyterian College received the present site of the Arctic Research Institute, at the corner of University and Milton Streets. New quarters for the Institute will be found near the campus.

The urgent need of the students for a new headquarters to replace the present union building, which is now over 50 years old, has been given high priority. At the beginning of the year it was announced that drawings for a new Union had been prepared by architects and had been given approval by a special committee of students, graduates, staff, and governors. The committee recommended a four-storey building with all the features of the present Union on a larger and much more modern scale. Plans will have to be altered somewhat to accommodate the new site.

The construction date of the Union will be largely determined by the College's decision on whether to remain in its present quarters while its new building is being constructed, or to move to a different location, thus enabling demolition of the College to begin immediately.

A familiar McGill landmark, the Presbyterian College, will make way for the expansion of the University's Faculty of Arts and for a new Students' Union.

Operation Africa

A 22-YEAR OLD FIRST year divinity student at McGill, Phyllis Smyth, spent her summer in Africa as a member of "Operation Crossroads Africa", organized in 1958 by James H. Robinson, director of Morningside Community Church in New York. The project this year brought 180 Canadian and United States students to Africa, where they divided into work parties and were assigned to 10 West African countries. All members of the group paid at least half their own expenses and the rest of the money was contributed by individuals and businesses in the United States.

Miss Smyth's group of 12 students spent approximately a month in the former French trust territory of Togo. They were assigned to a school construction project in Wome, a village of about 1,200 people. At first, Miss Smyth reported, the villagers tended to regard the group as guests, and wanted to serve them rather than become friends. But the students insisted on joining native volunteers in building a six-classroom secondary school, and in the evenings joined in local dances and took part in informal discussions with the townspeople, who were very interested in life in other countries.

Miss Smyth said that it delighted the Africans to act as hosts in their own right to foreign visitors. She felt that Canadians need to know a great deal more about the problems of new African nations, and she and the other students have pledged themselves to speak about their trip to interested groups at least once a week during the coming year.

Feather in their Caps

TWO MONTHS of concentrated planning paid large dividends when over 750 McGill students raised $5,392.55 towards this year's Red Feather Campaign total. The newly-formed Youth Division of the campaign met on the lower campus on the evening of September 26, where they were addressed by Howard Ross (BA '30), chairman of the Red Feather Drive for 1960, Dr. F. Cyril James, former Montreal Mayor Sarto Fournier, and Verdun Mayor George O'Reilly. Later, buses took the students to the Cote des Neiges and Verdun areas, where they spent two hours in a door to door canvass. It was the first mass canvass ever attempted by McGill students, who visited approximately 30,000 homes in the area assigned to ask for voluntary contributions. They carried long white tubular receptacles, wrapped in a large red feather, rather than the standard collection tins, and succeeded in raising 60% over the expected amount.

The annual assembly held at Macdonald College early in November honored a number of students for academic achievement. Two of the students who received medals were pictured above with Dr. H. G. Dion, left, Dean of Agriculture and Vice-Principal of Macdonald College and Dean D. L. Thomson, Vice-Principal of McGill, who addressed the assembly. The medal recipients are Anita Patton and Andrew Lee.

Higher Blood Count

ANOTHER PUBLIC SERVICE performed annually by the McGill student body, the Blood Donor Clinic, this year netted a record 2,814 pints, an increase of 597 over 1959. The opening ceremonies of this year's drive, held in mid October, were attended by Dr. F. Cyril James, Dr. C. D. Solin, assistant dean of Arts and Science, Sam Guwurz, chairman of the McGill drive, and C. H. Pigot, president of the Montreal branch of the Red Cross. The slogan for this year, "Make a Pint of Giving", together with colourful posters strategically placed around the campus, a procession of horse-drawn caleches, and a helicopter landing on the campus, were the main features of an intensive promotion drive which attracted a record number of McGill people to the clinic.

The Faculty of Commerce won the "Bloody Mary" trophy for finishing first in the percentage blood donations with 74 per cent. In the graduate groups, physiotherapy finished first with 80 per cent donating.

Macdonald Assembly

AT THE MACDONALD COLLEGE Assembly, which honours students of extraordinary academic achievement, major awards were presented by Dean David L. Thomson, Vice-Principal of McGill and Dean of Graduate Studies and Research, who addressed the gathering. In all, 49 prizes, bursaries and scholarships were awarded during the ceremony, held November 1. Two Jamaican girls, Gail Hoyt and Madeleine Mitchell, were presented with Stewart Medals for obtaining highest standing in their respective years in the home economics course, while James Thong and Reginald Laventure received Macdonald Medals for highest standing in the B.Sc. in agriculture course. Lieutenant Governor's Medals were won by Anita Patton, Andrew Lee and Wesley Larocque.

Hong Kong Scholars

TEN OF MCGILL University's leading students in engineering last session came from Hong Kong. This number constitutes approximately 20 per cent of the students from Hong Kong in engineering. These facts were made known with the publication of the "Dean's List", which includes the names of all those students who obtained a minimum of 80 per cent in last spring's examinations. There were over 60 students who obtained this distinction, many of whom are Montreal residents, while others come from as far away as Ghana, Nigeria, and Shanghai. Faculty officials described the students from Hong Kong as being outstandingly capable and extremely hard-working.

Extension Enrolment

AN OVERFLOW ENROLMENT in the increasingly popular evening courses at McGill, particularly those in languages, has been reported this year by Professor H. R. C. Avison, head of the Extension Department. A total of 190 courses, including a number at Macdonald College, are offered, with a registration of more than 10,000 expected.

Lectures are conducted by regular staff members at McGill, and by other qualified lecturers from Montreal professional circles. The extension department services to residential areas outside Montreal include a travelling library, farm broadcasts, film library and adult night schools.

Moments Musicales

FOR ITS 21ST consecutive season, the McGill Chamber Orchestra has planned a series of unusual interest. The orchestra, which consists of Montreal's foremost professional string players under the direction of Alexander Brott, is giving six concerts, each devoted to a different composer, and highlighting renowned soloists. The composers featured will be Bach, Vivaldi, Mozart, and an all-Canadian concert in memory of Lapitsky, featuring a new work commissioned by the Canada Council, by Robert Turner, and "Songs of Contemplation" by Alexander Brott.

REUNIONS-1960

THERE WAS SOMETHING for everybody at this year's annual reunion, judged unanimously one of the finest yet. More than 55 individual classes, plus a number from Physical Education, all graduates in the School of Social Work, and Macdonald College classes, got together in late October. There was the thrill and excitement of football — and a championship team at that; there was something for the intellect in the First Graduates' Reunion Seminar, and in the School of Social Work's professional sessions; there was the traditional dining and conviviality as old friends met and reminisced.

The First Reunion Seminar, on the topic of Contemporary Trends in Architecture, points to a pattern which, it is hoped, will be repeated with greater success in the years ahead. This year's event was in the nature of an experiment, and the organizers have every reason to envision the Seminar as an integral part of future reunion programs.

Participants this year were Prof. Paul Rudolph, head of the Architecture Department at Yale University; and Prof. John Bland, head of McGill's School of Architecture. Excerpts from their brilliant lectures are presented on the next two pages.

Prof. Rudolph:

We, in truth, do not know how to do many things which other great periods of architecture have known. Foremost is our lack of a coherent theory with regard to how to relate one building to another, and to give meaning to the spaces between.

We need desperately to relearn that art of disposing our buildings to create different kinds of space: the quiet, enclosed, isolated, shaded space; the hustling, bustling space, pungent with vitality; the paved, dignified, vast, sumptuous, even awe-inspiring space; the mysterious space; the transition space which defines, separates, and yet joins juxtaposed spaces of contrasting character. We need sequences of space which arouse one's curiosity, give a sense of anticipation, which beckon and impel us to rush forward to find that releasing space which dominates, which acts as a climax and magnet, and gives direction. Most important of all, we need those outer spaces which encourage social contact.

The new scale given by the quickly moving vehicle (it will double in fifteen years), and the whole relationship of vehicle to the space between buildings, to the building itself, and to the human, presents a complex problem which cries for understanding. The architect's unique contribution has been the manipulation of inner and outer space. Our traditional concepts of space have been shattered by the automobile and the sheer bulk of our building requirements, but we should not retire to nostalgic, romantic admiration of the European square, which it is currently so fashionable to do. We have something to contribute, and our current abdication to every new specialist is demoralizing and unworthy of our profession. We must find ways of rendering our cities fit for humans, and develop the aesthetics of change.

We must search for more eloquent relationships between the conceptual aspects of building and techniques. The range of concepts is limited now to goldfish bowls, buildings on stilts, and the efforts of the structural exhibitionists. The feeling and respect for materials eludes most students and, one fears, some architects. The unique forms inherent in any given material and the construction process must become more clear. During the next decade the question of whether or not the ultimate form for the steel frame has indeed been found must be considered anew.

We have almost everything, including the industrialized structure which was such a romantic favorite of the theorist of the International Style, but we seldom know what to do with our wealth. Driving down Park Avenue is rather like flipping through the pages of Sweet's Catalogue. Structure has caught our imagination, but the mechanical equipment has ruined many a fine scheme, turning our buildings into Swiss cheese. There is perhaps too much concern in architectural circles about peripheral matters and too little understanding of age-old concepts, such as fine proportions, how to get into a building, relationships of volume to volume, how to relate a building to the ground, the sky, and so forth.

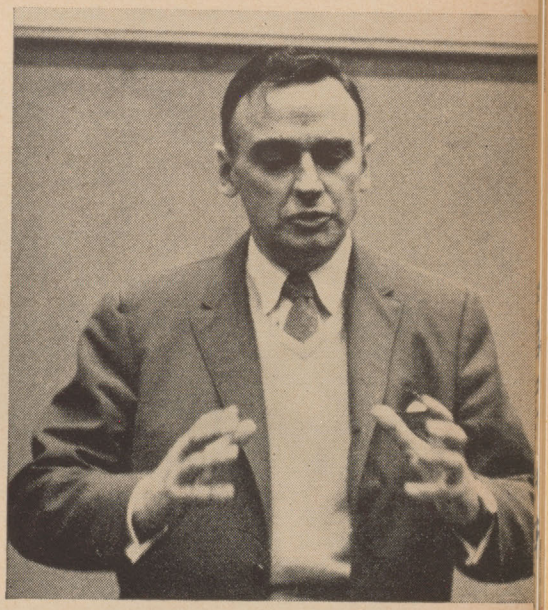

Prof. Bland:

Municipal stupidity reaches peaks in matters of planning, which is the area where foresight and a generous feeling for the future come face to face with expediency and greed. In some physical works bad planning can be so intolerable an outraged public quickly demands greater efficiency, but in less obvious spiritual matters, which may be far more significant, public inertia allows a regrettable tolerance. The beauty of Mount Royal is such a consideration and its maintenance has so far depended upon a small group alerted by any proposal affecting it.

It seems inevitable that tall buildings will be built on the slopes . . . but surely it can be required that they be well designed, possibly with roof gardens and a consciously reduced scale to merge with the medley of surrounding forms.

From the lookout one cannot fail to see the hubbub of new buildings near Dominion Square where Montreal is changing more profoundly than anywhere else.

But what will happen to the street traffic is everyone's anxiety. Such development will require an underground railway because it is obvious the streets can carry no more than they do now at office-closing time. Hoping that this matter will resolve itself is risking the temper and convenience of thousands of citizens.

An underground burrowed below St. Catherine Street from one end of town to the other or below St. Lawrence Boulevard from the river to river directly under the greatest number of pedestrians and thus more likely to pick up fares at every block might be the more profitable enterprise but it seems at this stage when passenger traffic on the railways is declining, a portion of their facilities might usefully be adapted to an urban mass transit system at far less cost and perhaps with the possibilities of being very well managed.

Housing and mass transit are the major problems facing the city. Both are dependent upon each other because without an adequate means of getting people in and out of the Central Area, great blocks of flats will be required downtown within short distances of working places. Such a solution is being forced upon us, yet it need not be unpleasant if space can be provided about buildings to insure their privacy and light, and sufficient room can be left on the ground for play and shade trees. Building in this fashion requires to be undertaken on a large scale, and needs to be designed with imagination.

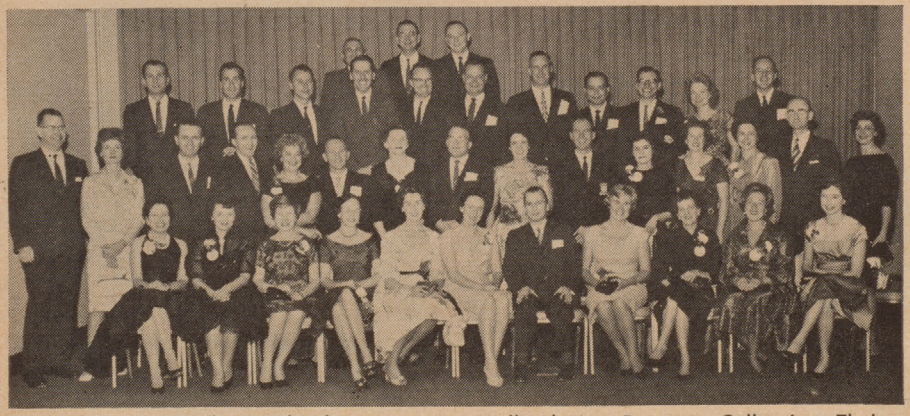

Montreal is a fascinating city and its people are lively if a little prone to dispute. Where else could there be hockey riots, public demonstrations over the name of a hotel, a housing bureau with the same power as a city executive, or, I understand, a Notre Dame de Grace Kosher Meat Market? Its taste is mixed up as everyone can see, yet it seems only necessary for a bit of its energy to be diverted from the restless pursuit of fashion or something entirely novel, to the examination and improvement of the best of the manners it has inherited or adopted from its neighbours. Its climate, its purse and its complex traditions suggest to me that something quite wonderful and unique would result from such an effort.

Medicine '10 and '11 — Left to right: R. H. McGibbon, T. A. Robinson, J. W. Richardson, Wesley Bourne, A. D. Campbell, W. A. G. Bauld, George T. Wilson, W. G. Fraser, A. Russell Moodie, E. E. W. Walker, Dean Lloyd Stevenson, Percy J. Frost, Harry S. Peabody.

Commerce '25 — Left to right: John Thomas, Bruce Davis, Hymie Stein, Charlie Seaton, Walter Potter, Phil Wait, Grant Glassco, Ralph Shackell, "Pash" Pashley, George Grimson, Guy Caldwell, George Woolcombe, Fred Fairman, Jack Quinlan, Bob Parker, Harry Hayes, Walton Blunt, Don Patton, Harve Cotnam, Keith Owens, Lovell Mickles, John MacLeod.

Engineering '45 — Left to right, front row: Ann Kielland, Ann Peterson, Collet Joy, Thelma Bilodeau, Emma Lou Walter, Margaret Crowther, Sam Tilden, Ingrid Hellstrom, Jean Heuser, Marcia Gans, Patricia Slader; second row: Dick Joy, Eileen Hashim, Axel Kielland, Glen Cooper, Wendy Hershman, Hy Hershman, Doris Galbraith, G. H. Galbraith, Marion Dawson, Bill Dawson, Anna Gurdian, Betty Chinn, Virginia MacKay, Geoff Slader, Louise Lalonde; third row: Bob Hashim, Bert Lalonde, Klas Hellstrom, Ed. Crowther, Don MacKay, Ken Walter, Derek Edwards, Rodolfo Gurdian, Norm Chinn, Hazel Tilden, Eric Heuser; back row: Nathan Gans, John Peterson, Don Bilodeau.

SOCIAL WORK'S FIRST REUNION

DURING HOMECOMING WEEKEND, the McGill School of Social Work Alumni Committee held its first reunion in the 42 years of the School's existence. To mark the School's past achievements and its present and future contributions to human welfare, the weekend program stressed the theme "Social Change — A Concern of Social Work".

First item on the program was a public meeting in the Montreal High School Auditorium, when the Hon. Onyango Ayodo, Member of the Legislative Council of Kenya, delivered an address on the subject "Africa in a New Age".

Over 90 social workers attended the Saturday-morning seminar on the role of social work in rapidly-developing societies. Professor C. E. Hendry, Dean of the School of Social Work, University of Toronto, led the seminar, which featured a group of African students as resource persons in the workshop discussions. Conclusions and recommendations of the seminar will be made available in the next newsletter to Social Work Alumni.

The culminating event of the weekend was a gala dinner in the Lasalle Hotel. Some 80 graduates and guests were present to mark the inaugural presentation of the Distinguished Alumnus Award to an outstanding graduate who has made a notable contribution to social work. The award, a gift of $100 to the School of Social Work in her name, was presented to Miss Esther W. Kerry by Mr. Justice J. G. Nicholson.

A generous gift to the school will make it possible for an annual program of this nature to be held in collaboration with the McGill School of Social Work.

RUTH TANNENBAUM,
MSW '58
Reunion Chairman

From the window of her home
overlooking University Street

Mrs. D. L. Thomson,
wife of McGill's Vice-Principal and
Dean of Graduate Studies and Research,
has seen students come and go.
Here are some, however, who have been
lucky enough to qualify for

THE EXTRA KEY

THIS EXTRA KEY is a duplicate of the key which opens the outside door at the foot of long stairs that lead to the upper flat which is our home. In Scotland the door of my parents' house was always open because home and music studio were within the same walls and the pupils for piano and singing streamed through its door from early morning to night. It was easy therefore to keep to an open door pattern when settled in Montreal near the McGill Campus: the only difference being that we gave extra keys to many of the young students who entered our home.

For many years we have lived opposite a student residence and the Divinity Hall and close to several fraternities. The habits of students throughout the years have become a familiar and always interesting pattern. Seasonal activities give us quiet nights when exams loom and noisier evenings when the football dances give release to high spirits, whether the game be lost or won. One evening a laughing girl passed under my window at 2 a.m. and her escort, older and more aware, exclaimed: "Pipe down, pipe down. Don't you know the Dean lives here?" I longed to put my head out of the window and reply: "Yes, and the Dean's wife is wide awake", then I remembered my own student days and went back to sleep.

Our son was a student at McGill and it was natural to find we had open house for his friends. Of course an upper flat made us more conscious of our academic friends in the lower one. The telephone number 9919 was invaluable during student parties because our bedroom phone rang in the hall and John knew this meant — less noise please and goodnight soon! The goodbyes were not always too quiet but our good friends in the flat below understood.

The first issue of extra keys given out was to four music students during the War, when lack of space and lack of pianos were problems for the Conservatorium. The old music building was so near that students found our home only an easy distance away. At nine sharp I would hear the key turn and quick steps run up our long stairs and a cheery voice call "good morning". Sometimes it was a tall dark girl from Guatemala, a most promising pianist, far from home. Two others were singers, a fair soprano and a dark contralto concentrating for a performance of the first Beggar's Opera produced by Dean Clarke. The solos and duets of "Polly" and "Lucy" in rehearsal gave me, as a musician's daughter, many moments of happy listening.

Our fourth student was an American G.I. who had seen action on Guam but left New York to try and live more freely in the cosmopolitan atmosphere fostered at McGill. I remember that a sympathetic group from the West Indies helped me to settle him in a home. He looked like a very young Paul Robeson and his voice showed all the easy natural melodic qualities of his musically gifted race.

His rebellion against the scales of discipline was all too frequent because a melody such as "Smoke gets in your Eyes" replaced his more serious studies oftener than it should and I could not help sympathising!

These four are ships in the night and have vanished into maturity.

Our fifth key man was another veteran from America — anxious to join the French Summer School. He wished to have two weeks holiday before term opened. He arrived weary and tense, due to having been transferred from the Air Force to the Infantry and the exchange had given him no satisfaction at all.

Of Italian parents, he was friendly and would not be separated for one moment from his small radio — continually in use. He became a sympathetic older brother to our son and before the term began he was heavier and happier and did well in his fearless French.

It was, however, the summer of '53 when our keys really came into their own. Our son was the youngest member of the Baffin Island Expedition led by Col. Baird. They left in May and returned in September. Our first news came as a call from Quebec and an excited young voice said, "Hi Mum, we're back and will be home this evening. How many may I bring home to sleep?" Though startled I replied, "Don't worry. All welcome!"

(*Continued on page 30*)

Graduates' Society Nominations

THE FOLLOWING NOMINATIONS have been submitted by the Nominating Committee, and approved by the Board of Directors of the Graduates' Society for consideration by the membership at large.

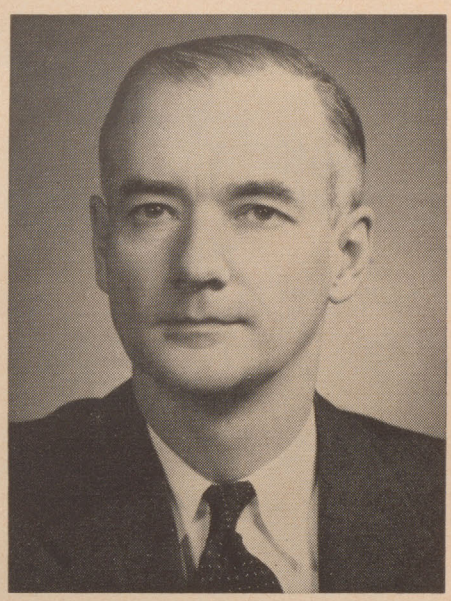

Additional nominations for any office, signed by at least fifteen members of the Society entitled to vote, shall also be placed on the ballot by the Secretary if received by him on or before December 31st, 1960.

For President — term 1 year:

THE HON. MR. JUSTICE G. MILLER HYDE, B.A. '26, B.C.L. '29, Judge of the Court of Queens Bench, (Appeal side), Province of Quebec; Member of the Board of Management, Montreal General Hospital; Governor, Trinity College School; First vice-president, Graduates' Society, 1960;

For 1st Vice-President — term 1 year:

CHARLES H. PETERS, B.A. '28, President of The Gazette; President, Canadian Press, 1958-1960; Director of Canadian Daily Newspaper Publishers Association; Delegate to Commonwealth Press Meetings held in Great Britain, 1946, and Australia, 1955. Second vice-president, Graduates' Society, 1960.

For 2nd Vice-President — term 1 year:

NEWELL W. PHILPOTT, M.D., C.M., '26, Emeritus Professor of Obstetrics and Gynaecology, McGill University; Fellow of the Royal College of Surgeons (Canada); Fellow of the Royal College of Obstetrics and Gynaecology; Honorary M.D. Degree, Laval University; Honorary Fellow of the Royal College of Surgeons (Edinburgh).

For Regional Vice-President — Ottawa Valley and Northern Ontario — term 2 years: CHARLES G. GALE, BCom '39, Resident Ottawa Partner, Touche, Ross, Bailey and Smart, Chartered Accountants; Chairman, Board of Governors, Ashbury College, Ottawa; Member of the Board, Royal Ottawa Golf Club; Royal Canadian Navy, 1943-45; Formerly Chairman, Alma Mater Fund, Ottawa Valley; A former vice-president and president of the Ottawa Valley Graduates' Society.

The following Regional Vice-Presidents have been re-nominated for a period of two years:

Maritime Provinces — Cyril F. Horwood, BCom '23

Quebec (exclusive of Montreal) — H. C. Monk, BCom '38

Central Ontario — A. H. Galley, BCom '24

Prairie Provinces — Hon. Mr. Justice Hugh Farthing, BA '14

British Columbia—Harry M. Boyce, BCom '30

Great Britain — T. A. K. Langstaff, BCom '32

U.S.A. East — Basil C. MacLean, MD '26

New England — David P. Boyd, MD '39

U.S.A. Central — G. Leslie Laidlaw, BCom '23

U.S.A. West — Arthur A. Dobson, BSc '10

For members of the Board of Directors of the Graduates' Society —term 2 years: FRANK B. COMMON, Jr., Q.C., BCL '48; Lawyer, partner in Howard, Cate, Ogilvy, Bishop, Cope, Porteous & Hansard; President and Chairman of the Board, Verdun Protestant Hospital; Governor, Montreal General Hospital; Alderman, City of Westmount.

Three More Graduates Named Governors

GORDON A. COPPING, MD, CM '30; Senior Physician, Montreal General Hospital; Associate Professor of Medicine, McGill University; Lieutenant-Colonel, R.C.A.M.C., 1940-46; Former member of the Editorial Board, McGill News.

R. J. A. FRICKER, BEng '40; Vice-President, Western Region, Dominion Bridge Company Limited; Former president of the Vancouver Branch, Graduates' Society; Lieutenant (E), R.C.N.V.R.

DAVID C. TENNANT, BEng '38; Director of Operations Planning, Trans-Canada Air Lines; During the Second World War, served as Flight Engineer with Royal Air Force Transport Command; President, McGill Society of Montreal, 1958, 59.

J. STEPHEN WALLACE, BEng '34; General Works Manager, St. Lawrence Sugar Refineries Ltd.; Served four years in the Royal Canadian Air Force, with final rank of Wing Commander; Class Agent, Engineering '34 and Chairman, 25-year anniversary class gift.

Annual Meeting

Notice is hereby given that the Annual General Meeting of the Graduates' Society will take place as follows:-

DATE: Tuesday, February 21, 1961

TIME: 5:30 p.m.

PLACE: Redpath Hall, McGill University
(Formerly the reading room of the Redpath Library).

The work of the Society during the past year will be reviewed and audited financial statements will be presented. The newly elected officers will be installed.

ROBERT F. SHAW,
Honorary Secretary.

GRADUATES' SOCIETY REPRESENTATION on the Board of Governors of McGill University has increased to five with the appointment of three prominent alumni, announced last September. The three new governors are: Stuart M. Finlayson, BSc '24; Drummond Giles, BSc '27; and E. P. Taylor, BSc '22. Their graduate colleagues, already serving on the Board, are: D. W. Ambridge, BSc '23 and Howard I. Ross, BA '30.

Mr. Giles and Mr. Finlayson are both former Presidents of the Graduates' Society: the former in 1958, the latter in 1959. Mr. Taylor was the first chairman of the Alma Mater Fund in 1948, and he is now serving his second term as a McGill Governor. He was Graduates' Society representative on the Board from 1949-52.

E. P. Taylor

A well-known Canadian industrialist and financier, Mr. Taylor was born in Ottawa in 1901, and was educated at Ashbury College and Ottawa Collegiate Institute before entering McGill. He is chairman of the board of Canadian Breweries Limited and holds key positions and directorates in a number of other Canadian companies and corporations.

During the last war Mr. Taylor served on the executive committee of Canada's Department of Munitions and Supply. In 1941 he was named president of Wartime Supplies Ltd., Washington, D.C., and was appointed by Prime Minister Churchill as president of the British Supply Council in North America. In 1942 he served as director-general of the British Ministry of Supply Mission and Canadian chairman of the Joint War Aid Committee.

He was created Companion of the Most Distinguished Order of St. Michael and St. George in July, 1946.

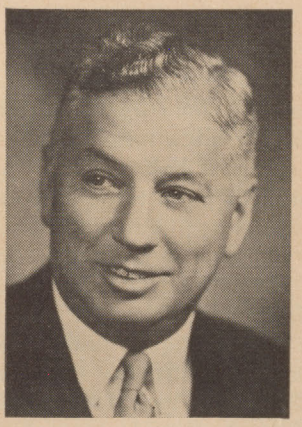

Drummond Giles

Mr. Giles, who now lives in Cornwall, Ont., was born in Montreal in 1903. Following graduation from McGill he became chief engineer with Canadian SKF Co. Ltd. In 1932 he was appointed Montreal district manager of the company; from 1938-43 he served as vice-president.

Drummond Giles

S. M. Finlayson

WHITHER OLD McGILL?

During his Convocation Address
Last Autumn, Sen. A. K. Hugessen,
Distinguished Graduate
(B.A. '12, B.C.L. '14, LL.D. '60)
McGill's Senior Governor,
Gazed into the Future.

THE QUESTION THAT faces us now, the question to which I want to direct your thoughts for a few minutes, is — what about the next half century? All the present signs point to an ever-increasing pressure upon our universities, not only by reason of the natural growth in the population, but also because of the higher proportion of our young people who — rightly and reasonably — demand a university education. Is McGill then to look forward, in the year 2010, to a student population of between 15 and 20 thousand?

The answer to that is clear. Lack of elbow room would make it impossible. Like many other universities, McGill is mewed up in the middle of a large and growing city. We have no hundreds of free acres set aside for us in the midst of magnificent scenery, as is the fortunate lot of the University of Alberta at Edmonton, of U.B.C. at Point Gray in Vancouver, or of Laval at its new Cité Universitaire on the outskirts of Quebec.

But, quite apart from that, a student population of 20,000 would, I think, be a monstrosity. It would turn the McGill that we know into a huge amorphous degree factory. There must be a limit to the size of any university, beyond which it should not allow itself to grow and still expect to retain its peculiar character and identity.

After much consideration, that limit for McGill has been tentatively fixed by the Board of Governors at a figure of 9,500 students, of whom 8,000 are to be undergraduates and 1,500 in the graduate school. By all appearances we shall reach that limit within a very few years.

When that limit is reached, problems will begin to appear. You will appreciate the nature of these problems when you reflect upon the dual nature of this University.

First, it was in its origins, and has always since remained, a place to which the English-speaking population of this Province could look for a university education for their children.

Second, since the days of Sir William Dawson and the training in the sciences that he so firmly established, it has attracted and welcomed an increasing number of students from outside the Province and indeed from other countries.

In other words, McGill is a national as well as a local university. This shows up in last year's student registrations, which disclose that about 25% of the student population comes from outside the Province of Quebec, of whom 11% are from other Provinces in Canada and 14% are from outside Canada.

Up to the present time we have had no trouble about filling both functions, the local and the national. There has been no conflict between the two. There has been room for both. But in the near future, with the limitation in total numbers, the time will come when a definite policy decision will have to be made. Are you going to favour the national aspect at the expense of the local? In other words, are you going to try to create a university whose basic object will be to attract the cream of the student body from all over Canada and from outside countries as well, at the cost of reducing the number of places that will be available for the students of average ability from our own population?

I suppose an extreme example of this sort of process is to be found in the case of Harvard College. The other day I read an extremely interesting and very recent report on the admission policy of Harvard. That university attracts students from all over the United States and from abroad. It maintains an elaborate machinery, headed by a Dean of Admissions, for the sole purpose of deciding who shall — and, what is probably more important, who shall not — be admitted to the ranks of its undergraduates. One of the most striking things about that

(Continued on page 31)

McGill's Publishing Arm

Robin Farr, Director, McGill University Press,

explains the role and function of the press as an instrument for education through the publication of scholarly works and non-fiction of a wider general appeal

TWO WEEKS AFTER our arrival in Montreal, my wife was called to the door by a census taker. "And what is your husband's occupation?" was one of his questions. When she told him about the McGill University Press, the young man looked up with interest (he was a McGill student, incidentally, on a summer job). "Oh", he said "Is that to be a daily?" Now I suppose it is illogical for anyone in university press work to wonder why everyone else does not know all about the function and purpose of a university press. What *is* a university press and what job does it exist to do? Before attempting to answer these two questions, we should know something of university press publishing generally on this continent and of the background of the Press at McGill in particular.

There are forty university presses in America of which the McGill University Press is by long odds the newest. Although many American presses can trace histories of respectable proportions (the earliest use of the term "university press" was at Cornell under a date of 1869), it is really within the last two decades that the university press has become a significant economic factor within the publishing industry. The volume of press publishing has been growing steadily and impressively, particularly in the post-war years, until now something more than $8 million in sales is recorded by the university presses annually and better than 15% of new titles published each year bear a university press imprint. However, it is not so much the amount of publishing that is done by these presses as it is the important nature of this publishing that sets the university press apart as something unique in the strange and chaotic world of publishing.

A university press at McGill has been actively considered for two years. A Press Committee, which was chaired by Dean S. B. Frost and whose members were Dean Stevenson, Professors Scott, Dunbar, and Hemlow and Mr. Pennington, carefully examined the many problems connected with scholarly publishing in Canada. Consultation with the University of Toronto Press, the American Association of University Presses, commercial publishers, and a variety of sources peripheral to the publishing industry, led this Committee to recognize two basic facts. First, there was a need in Canada for a second university press. Second, a press properly authorized and supported is an enterprise of importance to the university for the part it can play in stimulating and recording research. Accordingly, the Committee recommended to the Board of Governors that a Press should be established at McGill as a department of the University.

The McGill University Press will function in the fullest sense as the publishing arm of the University. If the University has a dual responsibility for teaching and research, then the Press will be the means of reporting and distributing this research (and research becomes useful in direct proportion to the extent that it is known and read). In this, the Press's contribution to the basic purpose of the University cannot be exaggerated. From the University it receives funds, housing, and a variety of other services, not to mention an illustrious name and a rich tradition of humane learning and scientific achievement.

The primary responsibility of the Press will be its programme of scholarly publishing. Much of this programme will be subsidized by the Press because many scholarly books, by reason of their limited circulation and the high costs which prevail in book manufacture, will never recover their costs. Although unremunerative to the Press, these are works of intrinsic worth and such publishing remains the core and heart of the Press's activities.

Around its programme of scholarly publishing, the Press will build a programme of general (or as the industry knows it "trade") books. These will be important works of non-fiction which will have a wider appeal to the growing audience of general readers. Books of this type represent a publishing investment for the Press as they will be

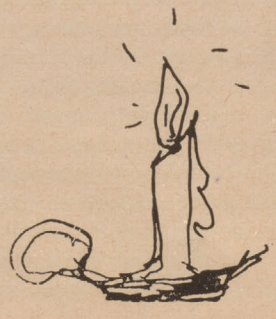

expected to recover their costs and often to provide a profit part of which will be used to help underwrite a constantly broadening programme of scholarly publication. Broadly, the first group of books defined — the scholarly — advances knowledge and the second — the general — diffuses it. One measure of the Press's success will be its ability to develop a balanced programme of publication between these two types of books.

There is ample evidence that the market for both parts of a university press programme is increasing steadily. An extensive survey just completed by the Book Manufacturers' Institute of the United States which projects sales forward over the next seven years, reveals that university press books should enjoy the largest percentage increase in sales apart from the two explosive markets of paperbacks and text books. Also, an ever-increasing number of specialized scholarly publications are today being sold in book stores throughout the country. This reflects the general growth in the universities which annually graduate an increasing audience for university press publications. Nevertheless, the Press will depend fundamentally for sales return on small market books that sell slowly, but steadily, over many years. A university press is obliged to keep books in print longer than the commercial publisher and the corollary of this is, of course, to maintain in stock a backlist of books far greater both in number of titles and copies than any commercial house can tolerate. However, whether the audience for a book is estimated to run to 300 individuals and institutions, or to 15,000, the Press will consider itself responsible for reaching that audience in full. Probably there is no better definition of a university press's mission in this regard than the words of Chester Kerr (Director of the Yale University Press), "The University Press in this age has an obligation to make meaningful and available to the greatest possible number of citizens the best products of scholarship".

The fact that the McGill University Press operates as one of only two university presses in Canada places an added responsibility upon it. It must serve as a university publisher in a national sense, providing a publishing outlet for the Canadian university community. Although the United States is well served by its thirty-nine presses, an average of 40% of university press output in the United States is drawn from outside the parent institution (and outside sources account for more than half the list of the University of Toronto Press).

What happens, then, to a manuscript which has been given into the tender mercies of the Press? After due acknowledgement has been made, the work is read by the Press; an estimate is made of production costs; alternate methods of manufacture are explored and any special problems of marketing and distribution are analyzed. In the case of the scholarly work which the Press will subsidize, the manuscript is then read by expert readers in the field who submit reports (which are kept strictly anonymous) on the scholarly qualifications of the work. These evaluations often contain criticisms important to the author in making revisions to the manuscript. All this varied information—readers' appraisals, cost estimates, production problems — is next assembled into a report which is submitted to the Editorial Committee of the Press.

This Committee (whose Chairman is Dean S. B. Frost) is composed of nineteen members of the Faculty of McGill and is advisory to the Press in recommending publication. Because the Committee broadly represents all fields and disciplines within the University, it is of great importance to the Press as a bond between it and the University. Members of the Committee are appointed by the Senate for terms ranging from one year to five years. The Press will be aided also by a Management Committee which will regularly review policy. This Committee comprises two Governors of the University, the Principal, the Chairman of the Editorial Committee and the Director of the Press.

If the manuscript we have been pursuing now receives a favourable publishing decision, it moves next into the editorial stage (and, at the same time, the Press concludes a contract with the author for publication). The manuscript has now reached a process of critical importance to the Press because any book carrying a university press imprint must withstand the most careful scrutiny and reflect the highest standards of copy editing. The editor's task carries special responsibilities. Editing is a delicate craft and very often it is the sensitivity of the editor that brings ideas successfully to print. Readability (and all that that implies in terms of usage and construction) is also part of the editorial function. The successful editor becomes in the fullest sense the author's friend and advocate and a rather unique bond of understanding is established between the two although they may, in fact, be separated by a continent.

At this time, as the manuscript is being edited, more definite steps toward manufacture are taken. All McGill University Press manufacturing will be let out on a contract basis and the Press will choose carefully the printers and binders who can offer the services that it requires appropriate to each production. A high standard of craftsmanship will be maintained to bring a consistent quality and production to all Press books. Each day offers examples of good books published badly and bad books published well. Good printing is never a matter of chance.

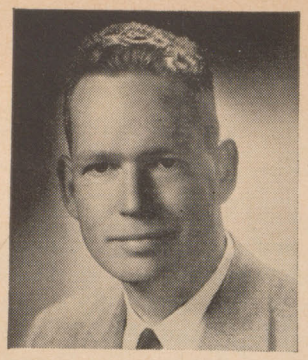

At this point, therefore, the Press's production and design departments begin their work — reviewing the cost layout and format, and writing every specification for the proposed book from type size to line length. As well, any special problems involved in composition or in the reproduction of illustrations are studied. The Press has a pool of Canadian graphic art talent which will ensure that each publication is handled with taste and professional skill.

At this time, too, the Press will be preparing a promotion and advertising budget in order to launch a vigorous campaign on behalf of the book. The

Press's responsibility by no means ends on publication day. A responsibility of equal importance remains in getting each book known and read ("no book is useful unless it is read" runs the cardinal principle of the publisher) and there will be just as much challenge to the Press in selling 500 copies of THE THEORY OF TRANSPORT PHENOMENA IN SOLIDS as in selling 5,000 copies of a trade title with general appeal.

How will the Press sell its publications? In the first place, it will use all the usual techniques of the trade publisher — commission representatives and the retail outlets, book exhibits, reviews in newspapers and periodicals, space advertising, seasonal catalogues, and display posters. It will also undertake extensive direct mail advertising, particularly on behalf of its scholarly publications. For these, mailings will be made to all scholars in the appropriate fields throughout Canada, the United States and often the United Kingdom and other countries. Because of the nature of its programme, interest in Press publications will have no national limits.

Certain initial costs, then, have already accrued to the book and it may not yet be on press. There have been the costs of general overhead (costs connected with the submission of the book, negotiations with the author, etc.); editorial and design expenses; and the advertising budget which has been allocated to the many channels of promotion. As manufacture (broadly, composition, press work, and binding) begins, cost information becomes relatively complete. The Press is now in a position to establish what publishers like to call a "break even" point or, even more appropriately, a "get out" point. This sometimes mythical point (dear to the publisher's heart) represents the number of copies produced and sold which are sufficient to recover the direct and indirect costs and move the book into a profit position. Unfortunately such theorizing cannot be divorced from the hard realities of the market and so, after recourse to a reasonably reliable crystal ball, the Press now estimates the market and sets a list price taking into consideration its discount arrangements with the many and varied types of customers which exist for any book.

THE FIRST DIRECTOR of the McGill University Press was born and educated in Vancouver, where he graduated from the University of British Columbia. While an undergraduate, he attended the first post-war conference of the International Students Service at Cambridge University as a member of the Canadian Universities' delegation.

Mr. Farr returned to U.B.C. for post-graduate work in Education following graduation from the Provincial Normal College in Vancouver. He taught secondary school in British Columbia.

In 1950, Mr. Farr joined the head office of The Copp Clark Publishing Company, Limited in Toronto with duties for editorial and sales. He returned to Vancouver in 1956 to open the first branch office of that company and to become Western Canada manager.

He is married to the former Margaret Anne Fullerton, and they have two children.

If mention of "costs" seems to recur frequently in the discussion above, there is good reason for it. Publishing is a chronically sick industry, bedeviled by rising costs and falling profits. In fact, it is a measure of the regard the publisher has for his responsibility that the price of books — although high — has not at all kept pace with costs of production, a fact easily demonstrated by current statistics for the industry. Publishers like to refer to their trade as a "special" business. They probably use the term because they are at a loss to explain otherwise how such an erratic and indefinable business really succeeds at all. Nevertheless, publishing *is* special. In an age of mass stereotype production, the publisher produces a series of unique products. Each book is new and alone. And each has its own special set of problems and conditions which are never met in that exact proportion again. For the new publisher, the pitfalls are many and because a special blend of determination and foolhardiness is a prerequisite, only a few starts are recorded each year in the publishing world. This intricate and delicate business, strangely personal in nature, is fraught with constant surprises — not always pleasant — for those associated with it. There is no magic raiment which will protect the McGill University Press from all the vagaries and risks connected with publishing. The Press will need a tight organization which operates efficiently and without waste, and a sure sense of its purpose, in order to meet its many challenges.

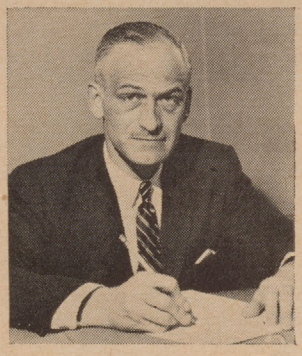

The short period of operation of the McGill University Press to date has been busy and rewarding. The Press opened its doors for business on July 1st, with a telephone (connected, thankfully) and four bare walls. Now its business and production procedures are established and its committees formed. It has a reciprocal sales arrangement with its sister press at the University of Toronto for trade accounts in the Montreal and Toronto areas and in addition will represent the Yale University Press in Canada after January 1st next. The first original publication of the Press is currently in editorial preparation and a flow of manuscripts has begun to reach the Press which is both gratifying and challenging to so young an enterprise. All parts of the publishing operation are now in motion — the Press is advertising, promoting and selling books for which it has acquired North American or Canadian rights, it is processing a manuscript for publication and negotiating with a number of authors who have manuscripts at various stages of development. In establishing this Press, McGill has embarked on an ambitious project. The beginnings are small indeed, but who can foresee the ultimate usefulness of the Press for the University and for the nation?

THE FACULTY

The Department of English has a new director of Dramatic Productions in the appointment of FRANK FARAGOH, a graduate of the University of California, Berkeley, and Yale School of Drama, where he received his degree of Master of Fine Arts in Playwriting and Dramatic Literature. He replaces Harry Ritchie.

DR. ROGER W. REED, Bacteriology, and DR. F. C. MACINTOSH, Physiology, are two of 15 top Canadian medical authorities serving on the recently-established Medical Research Council. The council will take responsibility for all medical research and for policy concerning the support of such research. These functions had formerly been carried out by the National Research Council's medical research division.

McGill Registrar COLIN MCDOUGALL was awarded first prize of $1,500 for his novel "Execution" at a literary and

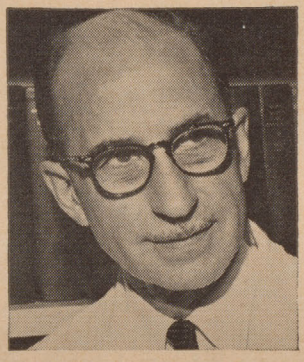

scientific contest sponsored by the Quebec government.

PROF. HELMUT BLUME, Faculty of Music, has been appointed music consultant to the International Service of the Canadian Broadcasting Corporation.

The new chairman of the Department of Animal Science at Macdonald College is DR. LEWIS EWAN LLOYD, Montreal-born and McGill educated scientist and teacher. The Department of Animal Science was created this year from four previously existing departments — animal husbandry, nutrition, poultry husbandry and animal pathology — due to a shift of emphasis from husbandry to science in modern agriculture.

The University has been awarded a grant of $90,500 by the National Science Foundation, Washington, D.C.,

for the support of basic research entitled "Neuro-physiological Mechanisms of Attention and Learning", under the direction of DR. HERBERT H. JASPER, Montreal Neurological Institute. The grant became effective in October and will be five years in duration.

DR. D. EWEN CAMERON, director of the Allan Memorial Institute of Psychiatry has been appointed a member of the Honorary Editorial Board of the International Alliance of Hospital Auxiliaries and was elected a Corresponding Fellow of the Indian Psychiatric Association. Another member of the Institute, DR. BRUNO CORMIER has been elected vice-president of the recently-formed Quebec Correctional Association.

An assistant professor at the McGill Institute of Islamic Studies, DR. CHARLES J. ADAMS has received a

$6,000 grant from the Rockefeller Foundation. Dr. Adams will conduct research on the political theory of Mawdudi, a leading Pakistani writer and political organizer.

Two senior professors of the Faculty of Dentistry were honored by their colleagues in mid-October on the eve of their retirement from active teaching. DR. W. C. BUSHELL, associated with McGill for 36 years, retires from the professorship of crown and bridge prosthetics and the chairmanship of that department. DR. GERALD FRANKLIN, chairman of the Department of Orthodontics, first came to McGill in 1922 and he leaves after 38 years continuous service which was interrupted for a brief period during the Second World War.

A group of specialists from the Faculty of Dentistry presented "the McGill approach" to the Northeastern Dental Society's 47th convention at Swampscott, Mass., last autumn. Those participating were DR. PHILIP GITNICK, DR. RICHARD DAGG, DR. MERVYN A. ROGERS, DR. ERIC P. MILLER, DR. LYMAN FRANCIS, DR. ERNEST AMBROSE and DR. HARRY ROSEN.

The Competitor (1906)

MAN FROM KINTAIL

By Ben Shek

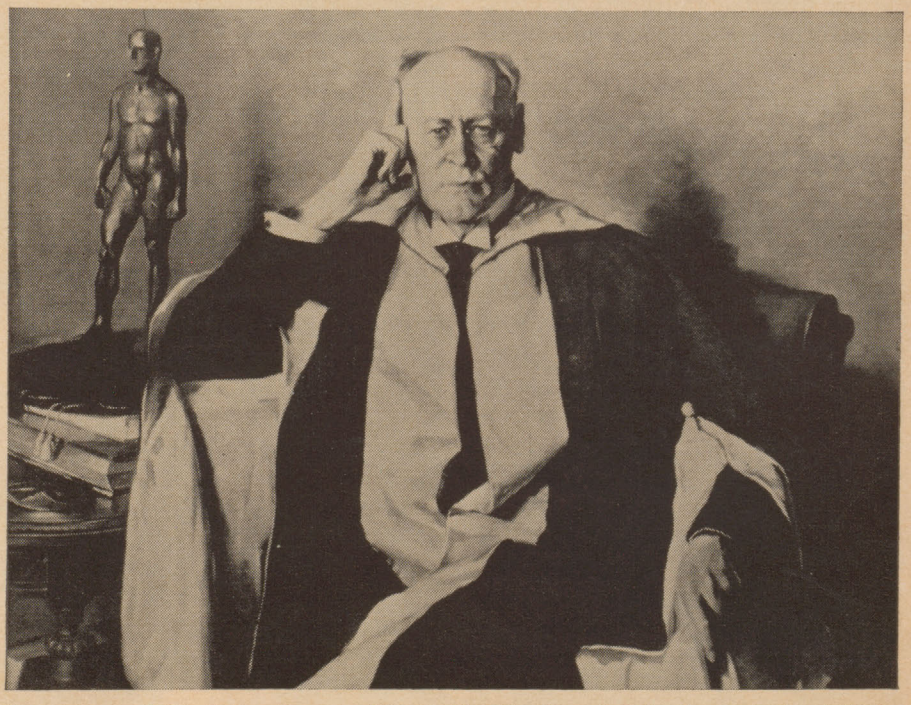

TWO YEARS AGO last April, a hush fell over Franklin Field stadium at the University of Pennsylvania just before the running of the annual Penn Relay. The huge crowd stood in silence to commemorate the twentieth anniversary of the death of a great Canadian, who had left an indelible mark on that campus and its activities: Robert Tait McKenzie.

A few months later, in September 1958, at the Mill of Kintail, about 35 miles from Ottawa, the Historic Sites Board of Ontario unveiled a plaque honoring this renowned doctor, sculptor and physical educationist. The old mill, bought by McKenzie for use as a summer home and studio in 1930, lies on the same road as his birthplace, on the 8th concession line of Ramsay Township. Today it serves as a museum keeping alive the memory of a unique and gifted personality, and one of McGill University's most illustrious graduates.

Tait McKenzie belonged to the lofty, humanist traditions of Canadian medicine, which includes the honored names of Osler, Grenfell, Banting. In his lifetime of 70 years, he not only gave of himself to heal the sick and wounded in peace and war, but also achieved an international reputation as an athletic sculptor, a creator of war and other memorials, and a talented and inspired contributor to physical education and recreation.

Dr. McKenzie came to McGill after completing his high school education in Ottawa. He got his B.A. and then graduated from medicine in 1892. At McGill he was champion gymnast and high jumper, and took part in boxing, swimming and football as well. He took the silver and gold medals in the Wicksteed Gymnastic competitions in 1888 and 1889 respectively, and won the running high jump for five consecutive years. A favorite tumbling team partner of his was his high-school chum, Dr. James Naismith, who later became famous as the inventor of basketball.

As a practising surgeon in Montreal, Dr. McKenzie contributed to the treatment of scoliosis — curvature of the spine — and specialized in children's deformities. Before long he was back at McGill again, as an instructor of anatomy, and as the first medical director of physical education, a pioneer appointment in this position in Canada.

This portrait of Dr. McKenzie, attired in his McGill robes of LL.D., hangs in the Athletics Department at the University of Pennsylvania.

BEN SHEK, a graduate of the University of Toronto, is a freelance writer and broadcaster interested in Canadian history and personalities. His CBC-TV documentary on McKenzie, "Man of Kintail" was given a prize at the annual Canadian Film Awards, 1960.

The modeling of masks for his anatomy classes, showing athletes undergoing great stress, led the doctor into the field of athletic sculpture. Before long his early works such as The Athlete and The Sprinter were exhibited in London, Paris and later athletic figures were shown at Rome, New York and other cities. "The Sculptor of Youth", as he became known, found beauty in the Greek ideal of "the human form in perfect health seen in graceful movement".

In November, 1901, he formed McGill's first university basketball squad. Before this he had fought for and won a new regulation requiring all athletes to be medically examined before they were allowed into competitions. He campaigned arduously in his day for a new gymnasium for McGill which, after his death, was realized in the Sir Arthur Currie Memorial gym. In exposing the inadequacy of the facilities in 1894, he wrote:

"The ceiling is in such a condition that frequently large pieces of plaster drop and endanger the men exercising beneath. The roof is so leaky that on a rainy day the floor is covered with pools of water, which, besides the inconvenience when many are on the floor, are dangerous to the health from dampness and wet feet."

In 1904, McKenzie accepted an invitation from the University of Pennsylvania to become director of its new department of physical education. He remained a faculty member of that school until his death in 1938. In Philadelphia he continued his sculpture while directing the manifold activities of his department. He introduced intramural athletics at the school ("sports for all", he called it) set up training courses for physical education teachers, and campaigned with others for a broad network of public playgrounds in that city. He also dotted the university campus and the city with numerous and imposing monuments.

An ardent advocate of amateurism in sports and strong supporter of the Olympic Games, McKenzie's advice was often sought by Baron de Coubertin, the reviver of the modern Games. Tait travelled to Stockholm, Paris, Rome and Amsterdam to the Olympic contests and his athletic figures were often on display at these events. In 1912, his plaque, "The Joy of Effort" was imbedded into a wall of the Stockholm Olympic Stadium.

The First World War found McKenzie hurrying to Britain to join the Royal Army Medical Corps. During those troublous times he helped set up mass rehabilitation of wounded soldiers through remedial exercises and devised special masks of thin copper for the faces of those who had been mauled by the violence of war. War to him was a "monstrous thing, an appalling waste, an outpouring of the chalice of youth", and he did his utmost to lessen the suffering.

The coming of peace saw McKenzie designing memorials to the fallen in his native Almonte and Ottawa, in Edinburgh (the famous Scottish-American War Memorial) and Cambridge, and in several U.S. cities. He also created historical statues of Benjamin Franklin (Philadelphia) and General James Wolfe (Greenwich), and the Confederation Memorial in the Parliament Buildings, Ottawa.

Although he lived in Philadelphia for nearly half of his life, he was always a frequent visitor to his homeland, to work on commissioned sculpture, to give talks and lectures, to visit old friends at McGill and elsewhere and, from 1931 to 1938, to spend his summers at the Mill of Kintail. In 1921, at the centennial celebrations of McGill University, he was given its most coveted award — an honorary degree of Doctor of Laws.

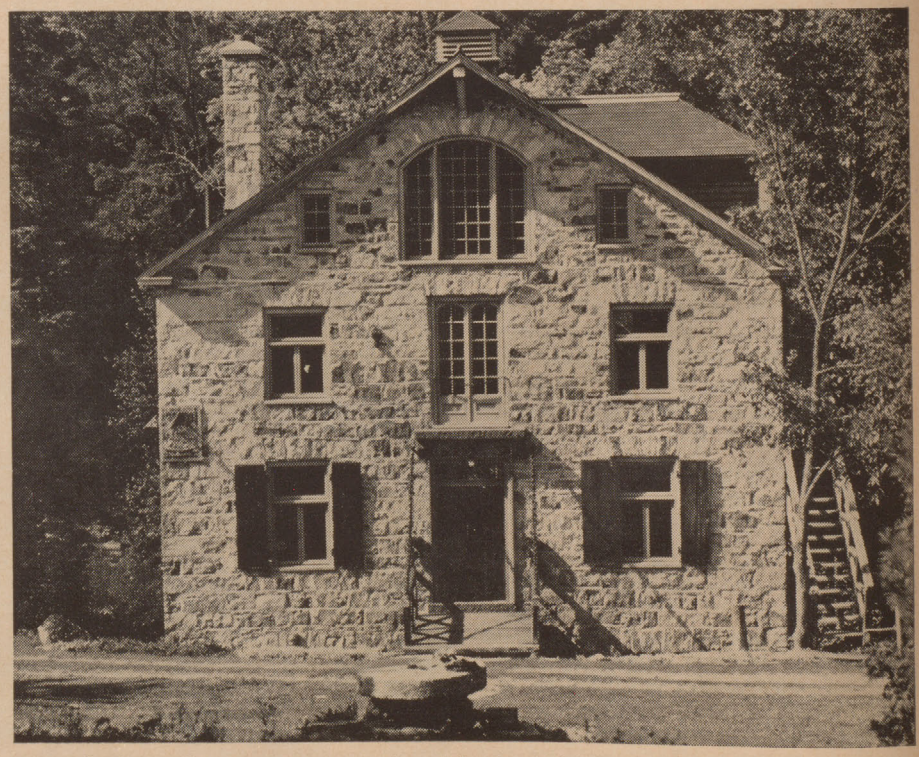

In 1905 the students of McGill presented his "The Sprinter" to the Canadian Intercollegiate Athletic Union as the R. Tait McKenzie Trophy for this sport, and it is still so today. Also, his football study, "The Onslaught", is the championship trophy for that game in the Ivy League across the border.

Many of McKenzie's works are on display at McGill, the University of Pennsylvania and the Mill of Kintail; his piece, "The Competitor", is currently on view at the National Gallery in Ottawa.

Dr. McKenzie once said, at the unveiling of a memorial cairn to Scottish pioneers in the United States, that:

"It is a mark of high civilization to hold in respect those who have acted their parts nobly and well in the face of difficulty and we do well to honor them."

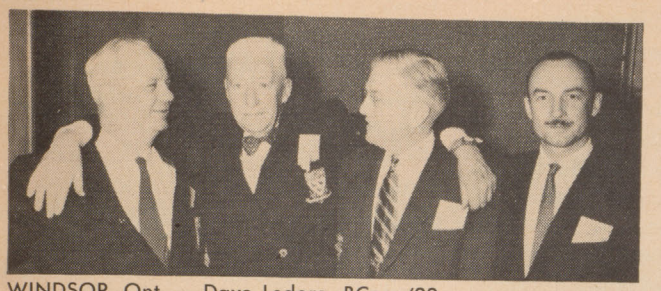

So let it be with him, for his exemplary life of artistic endeavor and deep humanism.

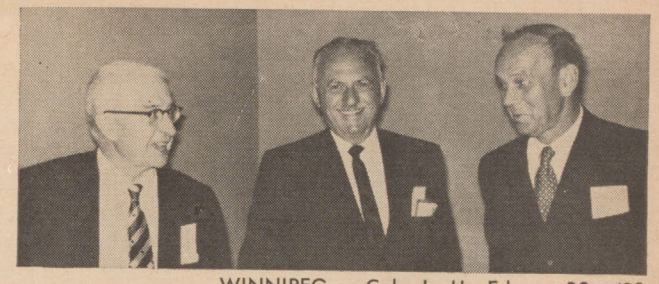

The Mill of Kintail, near Ottawa, purchased by Dr. Mckenzie in 1930 for a summer home and studio, has been recognized by the Historic Sites Board of Ontario.

The Extra Key . . .

(*Continued from page 19*)

That evening I was the only woman amidst a circle of eight young men and the reunion was a wildly hilarious one. Professor Wynne-Edwards of the Baffin Island's team met his son Hugh just out from Labrador and they shared our spare room. John returned to his own and the Swiss team of Jorg, Hansi, Hans and Fritz unrolled their beautifully blue coloured light sleeping bags. We gave them a supper of all kinds of food, not eaten during four months in icy tents. Replenished and relaxed, out came a small well-worn polyglot student song book and soon, led by Hans, we were all singing in chorus. It was an evening I shall never forget because this natural harmony of enthusiastic young voices gave one a splendid feeling of unity — considering the varied homelands of the singers.

In Zurich two years later we renewed our friendship with Jorg and Fritz and we had had Hansi and Jorg as repeaters for our key. Fritz alone remains in Zurich for Hansi is in Western Canada and Hans lives in Chicago and Jorg in New Jersey. It was Jorg, however, the slightest and smallest of the Swiss team, who climbed to the top of Everest — one year after Hunt's successful attempt for Britain. As a reward Jorg was given a "round the world" honeymoon trip so that he could show his beautiful coloured photographs. His young wife was as much admired as his photographs!

Hugh Wynne-Edwards still retains his key and now that he is established at Queen's University with Scotch wife and two children we hope he will use it very often.

Our friends in the lower flat keep our key too and we have theirs and this exchange has helped us both in many emergencies — such as frigidaire breakdowns in temperatures over 80°. I find it a cheery, friendly sound to have running footsteps climb the stairs to our home — especially if we are alone and a duplex seems to become, suddenly, a large family unit. If my bell rings three times I know it may mean my young fair neighbour needs a book or perhaps the loan of my short white fox jacket. Its real owner no longer gives it the number of outings it deserves.

Some keys have become lost and some have been retained but the memory of the temporary owners still remains vivid. To us it has meant a great deal of fun and a feeling of being a part still of a young and lively world.

A Year to Remember . . .

(*Continued from page 9*)

Paul Harasimowicz, the huge tackle, was the leader of the defensive line, batting down passes and piling up the interference. Wally Barrie, Tony Blair, Chuck Wood and Dan Uniat were standout linebackers. Al MacKenzie and Pete Hoisak, the defensive ends, put constant pressure on opposing passers and either smeared them or hurried their throws. John Roberts, Doug Maule and Bob Winsor intercepted many passes as defensive halfbacks. The interior of the line was well taken care of by Rae Brown, Leo Konyk, Dave Martin, John Cleghorn and John Bowler. Doug Pryde, Ian Monteith, Gord Navis, Steve Longstaff and Rian Mutso all made valuable contributions.

The Redmen had the best placement kicker in the league in Harry Haukkala and one of the top punters in Wally Barry.

The material was there, of course, but this was a well-coached team. Head Coach Bruce Coulter, the former Montreal Alouette, had both the respect and affection of his players, a rare combination. They certainly gave him 100 per cent efforts. Vaughan McVey, an old Redman, was the line coach and Coach Coulter called on a couple of his old Alouette teammates, Bob McLellan and Johnny Taylor, to give him a hand. The work of this coaching staff could hardly have been improved upon.

This was a McGill team that compared favorably in its era with the championship teams of other eras. Frank (Shag) Shaughnessy coached championship teams at McGill in 1912, 1913 and 1919. The 1919 team went through the season undefeated, but who is to say it was better than this one? Shag also coached two others, the 1914 and 1920 teams, that lost in sudden-death playoffs. Flin Flanagan coached the championship team of 1928 and Pop Kerr another in 1938. Before Shag came to McGill, the Redmen hadn't won a title since 1906.

There was a resurgence of that often lampooned thing called college spirit around McGill this fall. Approximately 2,000 undergraduates and graduates accompanied the Redmen to Kingston for each of the last two games against the Golden Gaels. A similar interest has been evident in other college activities. Harry Griffiths was asked if he thought football was the rallying point.

"There's no doubt that football dominates athletics at the university," he replied. "Maybe it's because it's the one sport that the grads watch. When we have a good team like this one I've noticed that the players seem to be proud of representing McGill. When we have a weak one some of them can't find the time away from their work to play.

"I think we're embarked on a winning cycle. Only about 10 of this year's squad of 30 will be graduating next spring. We have some good young players coming up, though it will be hard to replace some of those who are leaving."

The Principal's Page . . .

(*Continued from page 11*)

steps are now being taken to implement these proposals.

In the first place, the whole business of admissions to Arts, Commerce, Engineering, Nursing, Physiotherapy and Science is to be centralised in a single office. It is proposed that a full-time Director of Admissions should be appointed to administer this office, with the advice and assistance of an Admissions Committee composed of representatives of the faculties concerned and of the Royal Victoria College. Such a procedure will make possible a great saving of time, both for members of the University and for applicants for admission, and it is hoped that it will also facilitate closer relationships with the schools from which our students come.

Secondly, it is proposed that all applicants from Canada and the United States shall be required to sit for standard aptitude and achievement tests in March if they seek admission to McGill in the following September. A detailed study by Professor Ferguson has shown that these tests, for all practical purposes, are just as good predictors of an individual's academic ability as the Quebec School Leaving Examination or the McGill Matriculation, so that if the tests are taken in March the University will be able to

inform the applicant *before June 1st* as to his admission to McGill and also as to the amount of financial assistance that he will receive if his academic record indicates that he is worthy of a scholarship. This "early admission" procedure will remove the uncertainty that now beclouds the student during the summer months and, in the case of an applicant who is not admitted to McGill, gives him ample time to apply to another institution. He may even make a second attempt to get into McGill by attaining a high mark in the traditional School Leaving Examination — since this procedure will still remain as an alternative — but it is expected that when the new scheme is in full operation more than 75% of the first year students will be selected on the basis of the March tests.

The third part of the programme concerns the qualifications for admission. All candidates must clearly meet the minimum academic requirements of the faculty to which they seek admission but, as the trustees of the Rhodes Scholarship have proved, examination grades are not in themselves an adequate criterion by which to select outstanding students. Qualities of character and personality are equally important, so that the work of the Admissions Office will require a more complete record of the applicant's school career and confidential reports from his teachers. We are also hoping to work out procedures whereby each applicant will be personally interviewed before admission, and a joint committee of graduates and faculty members is at present trying to work out a procedure whereby committees of graduates in areas distant from Montreal can interview applicants and report on them to the Director of Admissions.

These procedures are not new. Each part of the general programme — which we hope to put into full operation in 1962 — has been used by some universities in England and in the United States. This is, however, the first time that such a comprehensive programme for the early selection of outstanding students has been put into effect in Canada and its success will depend in no small measure on the contribution of the graduates committees in all the major centres outside of Montreal.

Whither Old McGill . . .

(*Continued from page 22*)

report was the statement, made by its authors with many expressions of regret, that the proportion of its students which Harvard draws from its own State of Massachusetts has been steadily declining over the years and has now reached an all time low of 21%.

I think that for McGill to adopt a policy which would have such radical results as that would be a great mistake. By all means let us continue to attract brilliant students from outside, but don't let us make a fetish of that at the expense of our obligations to our own community. Remember that our roots lie in the Province of Quebec and that we exist largely by reason of the great contributions made from time to time to our Endowment Funds by residents of this city. Remember, too, as a very practical consideration, the large contributions which the Government of this Province is now making, and the even larger contributions which we hope it will make in the future, to the support of this University.

On the other hand, it must be realized that, in the future, McGill will be unable alone to supply the whole of the growing demand for a university education from what might be described as our local constituency. There will have to be help from other sources. Fortunately, that help seems to be on the way.

Sir George Williams University is already doing a magnificent job and is taking part of the load off McGill's shoulders, and I saw very recently, in the local Press, that Loyola College is applying to the Provincial Legislature for permission to assume the status of a university.

These are promising developments, and I think it should be the policy of McGill to help and encourage these other institutions by every means in our power. That, may I remind you, is the policy that is being followed by the University of Toronto which, faced with a similar problem, is actively supporting the establishment of the new University of York.

But, I submit, it would be wrong for McGill to throw too much of the local burden onto these other institutions, and then to retire to its ivory tower on the hill to which, for the future, it would only admit those students with the highest of I.Q's and the most unexceptionable of backgrounds.

It cannot be our policy to try to make of McGill the Harvard of Canada.

I have mentioned these problems, my friends, because, as I have said, they seem to me to be very basic problems which McGill will have to face in the not too distant future. But, after all, life without problems would be no life at all.

You will remember, perhaps, the fundamental theory that underlies Arnold Toynbee's monumental History of World Civilizations — the theory of challenge and response. According to that theory, a civilization will survive only so long as it can meet the challenges by which it is from time to time confronted. I have no doubt whatever that, when the time comes, McGill will meet, and meet successfully, the challenge of the problems to which I have referred; and that when the old familiar question is asked once again — the question that my generation of students asked fifty years ago and the question that is still asked by the students of today—"What's the matter with old McGill"—the answer will still be "She's all right".

"A Well-earned Tribute".

(*Continued from page 10*)

change and challenge. Every delegate present, coming from the pressing concerns of his own institution, his mind engrossed with building programmes, enrolment projections, staff and curriculum planning, etc., must have found it exciting to discover that these were the common, fundamental problems throughout the entire world of higher education; and that resolutions to those problems are as urgently sought in Bangkok and Bombay as they are in Birmingham and British Columbia. The delegates returned home with the knowledge that universities in all parts of the world faced the same problems, and were working toward the same, essential solutions.

To Canadians, especially, it will be a comfort to know that the affairs of this Association, so vital to the future of the world's universities, and indeed to the world itself, will reside for the most critical half of the challenging decade ahead in the hands of their own colleague, Cyril James.

Obituaries

W. R. "Doug" Kerr

W. R. Douglas "Doug" Kerr would have been proud of this year's senior intercollegiate football team at McGill. But the victory came a little too late for the man who coached McGill's previous championship team 22 years ago.

"Pop" Kerr, as he was known to his McGill and Montreal friends, died after a lengthy illness in Montreal May 20, 1960 at the age of 58.

Mr. Kerr, who was born in Montreal and educated at the High School of Montreal, was named freshman football coach at McGill in 1935 and led that squad to a championship. He coached the senior McGill Redmen to the intercollegiate title in 1938, two years after his appointment to that post. During the Second World War, he directed intra-mural football at the University. He retired in 1947.

He first became associated with football as a player with the Westmount AAA Juniors. Following a spinal injury, he coached the Westmount Juniors to the eastern football championship in 1923, and in 1929 directed the Westmount Intermediates to the Dominion Championship.

Doug Kerr was recognized as a popular coach among his players and one who could get the most out of his men. A number of players were sent up to the senior ranks after schooling with junior and intermediate teams under his direction.

His association with football in Montreal totalled 27 years. He also took an active interest in the revival of lacrosse in Westmount in the 1930s and was an enthusiastic tennis player. In 1939, members of the old Westward AAA and its predecessors, the Westmount AAA, paid tribute to Mr. Kerr for bringing McGill its first grid championship in 10 years.

"The club spirit kept the organization alive in those hard days when players had to provide practically all their own equipment," it was recalled at that event. "And Doug Kerr, whom we are honoring, had a lot to do with instilling that fine Westward spirit."

In business, Doug Kerr had been associated with Chase and Sanborn, later known as Standard Brands, for more than 35 years.

George Boyd Webster

George Boyd Webster, one of Canada's outstanding mining engineers, who recently donated $350,000 to McGill for the establishment of a Chair of Mining Engineering, (The McGill News, Autumn, 1960), died in Toronto October 22 at the age of 77.

Mr. Webster, who was born in Brockville, received his early education there and at Ottawa College. He graduated in mining engineering from McGill in 1904.

He was a member of a group which founded and financed several gold mines including Central Patricia, Broulan, Omega and Kerr-Addison. He was the first president of Kerr-Addison.

Following graduation from McGill, Mr. Webster worked for mining companies in the western United States, British Columbia and Alaska. In 1909 he moved to Cobalt to work in the mines. During the First World War he served overseas with the First Canadian Company of Engineers. He was wounded at Ypres and later served as captain with the Canadian Forestry Corps in France.

After the war he entered the mahogany business in West Africa, returning to Canada in 1932 to become associated with the T. A. Richardson Company in mining exploration and finance. At the outbreak of the Second World War, he resigned as president of Kerr-Addison and was appointed assistant oil controller of Canada. Later he returned to mining and oil exploration in western Canada.

Mr. Justice Walsh

Mr. Justice Joseph Charles Walsh, who retired from the Appellate Division of the Court of Queen's Bench in December, 1946, died at Ayerscliffe, Que., August 30 at the age of 91.

He was educated at Ste. Marie College, and studied law at Laval University in Montreal (now the University of Montreal), and McGill University, where he graduated in 1894. He was admitted to the Bar in July, 1895.

Mr. Justice Walsh practised law with his brother and, from 1910 to 1925, was joint Crown Prosecutor for the District of Montreal. Appointed to the Bench of the Superior Court on Sept. 6, 1926, he was elevated to the Appeal Court six years later.

In his youth, Mr. Justice Walsh was a reporter for the Montreal Star and later the Montreal Herald. During an active political career, he was elected to the House of Commons in 1906, representing St. Ann's division of Montreal. He was defeated in the general election of 1908, and was re-elected in 1926.

Miss Isabel M. Hurst

Miss Isabel M. Hurst, who graduated from McGill in 1899, died in Montreal September 19 in her 82nd year.

Born in Montreal and a life-long resident of the city, she taught for 40 years under the Montreal Protestant School Board, the last 30 in the High School for Girls.

After graduation from McGill, Miss Hurst maintained a keen interest in the University. In 1952, she was made an Emeritus Member of the Graduates' Society. She was interested in the formation of the University Women's Club of Montreal and became one of the first life members of the club.

During the Second World War she worked for the Canadian Red Cross, and later was instrumental in founding the Women's Auxiliary of the Reddy Memorial Hospital, of which she was honorary vice-president at the time of her death. A member of the Women's Auxiliary of the Montreal General Hospital, she was also a Governor of the hospital.

Miss Marcia G. Shaw

Miss Marcia G. Shaw, who graduated from the McGill School of Physical Education in 1927 and who went on to become a widely-known and respected physical therapist, died in Victoria, B.C. August 10 at the age of 53.

Born in Montreal, Miss Shaw went from McGill to the Boston Children's Hospital where she graduated in Physical Therapy and remained on staff for the maximum period. She then took the position of head Physical Therapist at Sigma Gamma Hospital School, conducted by the Detroit Orthopedic Clinic, an association which lasted for 25 years.

From 1952 to 1957 she was superintendent of the hospital school and after closing it down, she became a staff member of the Clinic. Earlier, she was sent to John's Hopkins University for a special course in cerebral palsy and spastics and this became her special field.

Miss Shaw was a teacher and lecturer, a former national committeewoman of the Physical Therapy Association, a past president of the Michigan chapter and had been an officer of the Michigan Cerebral Palsy Association. But her greatest work was accomplished in the teaching and treatment of children with cerebral palsy.

Dr. Beverly C. Leech, OBE

Dr. Beverley C. Leech, O.B.E., one of the first four qualified specialists in anaesthiology in Canada, died at Nanaimo, B.C. last March at the age of 81. He received his M.D. degree at McGill in 1925.

Dr. Leech practised in Regina for 26 years and moved to Nanaimo three years ago, continuing his practice there.

During the First World War, Dr. Leech served in France with the 28th Battalion at the age of 18, and he was severely wounded. At the outbreak of the Second World War he went to England in command of the 10th Field Ambulance, later becoming officer in command of No. 5 Canadian General Hospital in Clievdon. He finished his military career as A.D.M.S. of the 2nd Canadian Division in France after service in Italy.

His decorations included the Order of the British Empire and the Legion d'Honneur, and he was Honorary Aide-de-Camp to His Excellency the Governor-General from 1952 to 1957.

T. H. Harris

Theodore Herbert (Ted) Harris, B.A. '26, M.A. '28, B.C.L. '29, well-known Montreal newspaperman, died in Montreal September 29 at the age of 55.

A native of Manchester, England, Mr. Harris did post-graduate work at Yale University under a Strathcona Memorial Fellowship. His extensive education served him well in later years as a newspaper analyst and commentator on international and municipal affairs.

He joined the editorial staff of The Herald in 1937, having been its McGill University correspondent. From a reporter — where City Hall coverage was one of his specialties — he rose to become executive editor, the position he held when The Herald ceased publication in October, 1957.

Three More Graduates . . .

(*Continued from page 21*)

He was named vice-president and general manager of Courtaulds (Canada) Ltd., in 1943 and became president in 1949. Mr. Giles is also vice-president and director of Courtaulds (Alabama) Inc. and president of T.C.F. of Canada Ltd. He is chairman of the board of Courtaulds Moulded Products of Canada Ltd.

Stuart Finlayson

Mr. Finlayson was born in Montreal in 1901 and attended Strathcona Academy prior to entering McGill. He first became associated with the Canadian Marconi Co. as an engineering apprentice in 1919. He was appointed factory manager of the company in 1928, assistant to the general manager in 1934, general manager in 1945 and president in 1951.

Mr. Finlayson is still president of Canadian Marconi and is also a director of John Inglis Co. Ltd. From 1936-45, he served with the Reserve Army in "B" Corps Signals and was promoted to Command Unit in March, 1943. He retired from the service with the rank of Lt. Col. in 1945.

He is a former president of the Montreal Board of Trade and alderman of the Town of Mount Royal and he has also served as a member of the Committee of Administration of the Montreal Children's Hospital, and as governor of Royal Victoria Hospital.

Old McGill '61 . . .

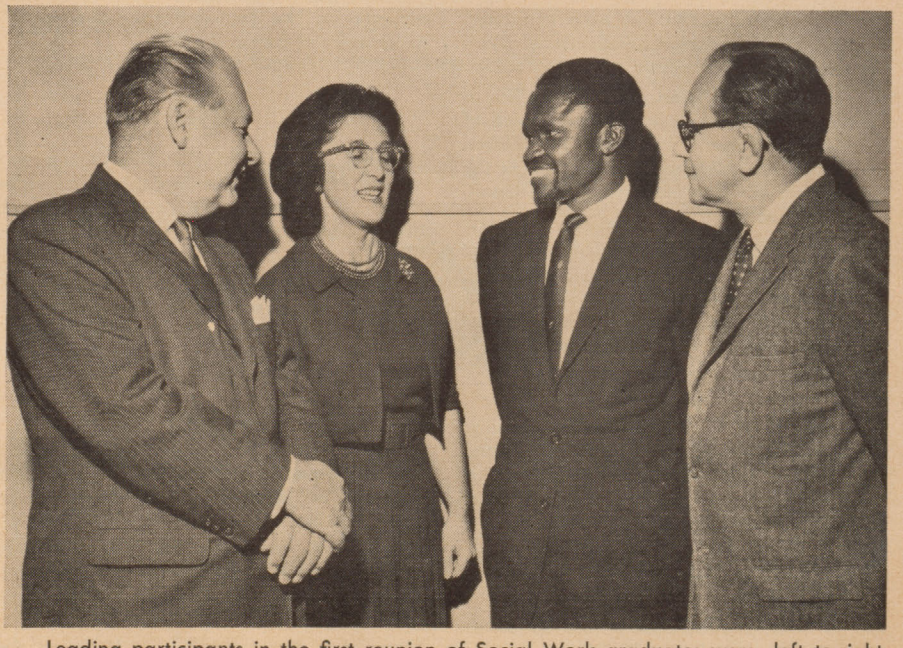

(*Continued from page 6*)

& Societies Editor on previous Annuals. Doug Craig is the Associate Editor of *Old McGill '61*. A fourth year Science student, he is working on the Annual for the third consecutive year. Patrick Mars, the Managing Editor, and the third member of the managing board is a third year Commerce student. Pat was Sports Editor for last year's Annual.

Graduates will be especially interested to know that, for the first time, they are being offered the opportunity to obtain a copy of *Old McGill* by mail. This will enable them to revisit McGill from the comforts of their favourite armchair. A cheque or money order for five dollars sent to: Old McGill '61, 690 Sherbrooke Street West, Montreal, will bring *Old McGill '61* to your mailbox shortly after publication day, early in May. And oh yes, please add 15 cents to out-of-town cheques to cover service charges.

Page 1, Vol. 1, 1896-97

Leading participants in the first reunion of Social Work graduates were, left to right: Prof. C. E. Hendry, Dean of the School of Social Work, University of Toronto; Ruth Tannenbaum, Reunion Chairman; the Hon. Onyango Ayodo, Member of the Legislative Council, Kenya; and Dr. J. J. O. Moore, Director of the McGill School of Social Work.

WHERE THEY ARE
and what they're doing

Being a compendium of what has reached us since the last issue. *The McGill News* would like to be more complete in its coverage and would be grateful to branch secretaries, and other graduates, for collecting and forwarding any worthy news items they see.

'18

Hugh A. Crombie, BSc '18, of Montreal, has been named honorary treasurer of the Canadian Chamber of Commerce.

'22

Harold Griffith, BA '14, MD '22, of Montreal, has been awarded the American Society of Anaesthesiologists' "Distinguished Service Award" for his many contributions to the practice of anaesthesia.

Harold L. Humes, BSc '22, MSc '23, of Princeton, N.J., has been reappointed president of the Building Research Institute, a unit of the Division of Engineering and Industrial Research of the National Academy of Sciences in the United States.

Hon. George C. Marler, BCL '22, has been appointed to the Quebec Legislative Council and is to be brought into the Cabinet of Premier Jean Lesage. Mr. Marler will also act as government leader in the Provincial Upper House.

'23

David Cowan, BA '23 has been appointed a manager of Shearson, Hammill & Co.'s office in New York.

William F. Macklaier, Q.C., BCL '23, of Montreal, has been given the first award of the Canadian Council for Crippled Children and Adults for outstanding leadership in the development of better services for the handicapped in Canada.

'24

George McK. Dick, BSc '24, received an honorary doctorate from the University of Sherbrooke at their autumn convocation held in October.

'25

Frederick W. Bradshaw, BSc '25, of Montreal, has been elected a vice-chairman of the executive council of the Canadian Chamber of Commerce.

'26

E. D. Gray-Donald, BSc '26, of Montreal, has been elected an honorary member of the Canadian Transit Association for outstanding service to the Canadian transit industry.

Charles H. Pigot, BSc '26, of Montreal, has been appointed assistant chief engineer of the Power Development Division of Hydro-Quebec.

'27

Carson Morrison, MSc '27, of Toronto, represented the Engineering Institute of Canada at the sixth convention of the Union Panamericana de Asocoaciones de Ingerieros held in Buenos Aires in September.

'28

David Boyd, O.B.E., BSc '28, has been appointed vice-president and deputy general manager of Rolls-Royce of Canada Ltd., Montreal.

Lydia Giberson Deane, MD '28, assistant vice-president of Metropolitan Life Insurance Co., received the 1960 award for "The Outstanding Professional Woman of the Year" given by the Business and Professional Women's Clubs of New York.

Russell Bruce Spears, BCom '28, of Toronto, has been named assistant general manager of the transportation and supply department of Imperial Oil.

'29

Edwin C. Jahn, PhD '29, was the opening speaker at the 15th Plastic-Paper Conference of the Technical Association of the Pulp and Paper Industry held in October at Syracuse, N.Y.

William H. Mueller, MSc '29, PhD '30, has been appointed assistant to the general manager, at head office in Montreal, of Shawinigan Chemicals Ltd.

'30

Gordon Rennie Addie, BA '30, has been appointed a Canon of Christ Church Cathedral, Montreal.

Thomas R. Jopling, BSc '30, has been named general manager of the Etobicoke Works of Dominion Steel and Coal Corp., Ltd.

Howard I. Ross, BA '30, of Montreal, has been appointed to the Royal Commission which will investigate the former government of the National Union of Quebec.

'31

Eugene A. Joliat, BA '31, of Toronto, taught in the French Section of the Banff School of Fine Arts this summer.

'32

John Scott Nixon, BA '32, has been appointed merchandise manager of the Holt, Renfrew & Co. Ltd. stores in Winnipeg, Calgary, Edmonton and Quebec City.

E. David Sherman, MD '32, of Montreal, was appointed a member of the Council of Geriatrics and Gerontology for the Congress of the Pan-American Medical Association held in Mexico City in May.

Donald C. Turner, BA '32, of St. Lambert, is now personnel assistant to the secretary-treasurer, Canada Starch Co. Ltd.

'34

P. Robb McDonald, BSc/Arts '30, MD 34, of Philadelphia, has been appointed national consultant to the U.S. Air Force as well as visiting professor at the University of the Far East (Manila).

Maurice Morton, BSc '34, PhD '45, has been named recipient of the Akron Bar Association's Naturalized American Award for 1960. Dr. Morton is professor of Polymer Chemistry and director of the Institute of Rubber Research at the University of Akron.

'35

Anthony H. Cardwell, BA '35, has been named general products sales manager of Burroughs Adding Machine of Canada Ltd., with headquarters in Toronto.

'36

Stewart A. Charters, BEng '36, of Montreal, has been named assistant manager of the eastern division of Westeel Products Ltd.

'37

Roger DeSerres, BCom '37, of Montreal, has been elected to the Canadian Advisory Board of Holland Life Insurance Society Ltd.

'38

H. Roy Crabtree, BSc '38, of Montreal, has been elected a director of Sun Life Assurance Co. of Canada.

'39

John H. McDonald, BA '36, BCL '39, has been appointed a director of the Renfrew Aircraft and Engineering Co. Ltd. of Renfrew, Ont.

'40

G. Valois Bourbonnais, BEng '40, has been named chief engineer of the Quebec division, with headquarters in Montreal, of The Pigott Construction Co.

J. David Kennedy, BCom '40, of Guelph, has been appointed a member of the international service consultative group of Rotary International for 1960-61.

'42

H. A. Nelson Holland, BEng '42, has taken the position of research engineer with Centriline Corp., a subsidiary of Raymond International Corp., at Oakland, N.J.

'43

Gordon M. Pitts, BA '43, has been appointed to the staff of West Virginia University, at Morgantown, West Virginia, as assistant professor of English.

Frank D. Wolever, BEng '43, has incorporated Hydro Dynamics Ltd., a sales engineering firm based in Montreal, representing manufacturers of pumping machinery for industrial and municipal services.

'45

Martin D. Burrow, BSc '45, MSc 46, PhD '53, has been appointed to the teaching staff of New York University.

Richard J. Joy, BEng '45, has joined the Industrial Development Bank as an investigating officer, attached to the Montreal office.

'46

Vivian Harold Cullen, BEng '46, has joined Donald Douglas as vice-president and sales manager to form a new company, D. Douglas Steel Fabricators Ltd. in Montreal.

J. Bruce Goodfellow, BEng '46, has been elected an alderman of the city of Dorval, Que.

'47

W. H. Beaton, BEng '47, of Montreal, was one of the Canadian engineers who represented the Engineering Institute of Canada at the sixth convention of the Union Panamericana de Asocoaciones de Ingerieros held in Buenos Aires in September.

'48

Catherine A. Aikin, BA '48, BN '49, has been appointed acting dean of the School of Nursing of the University of Western Ontario.

Germain Joseph Brisson, MSc '48, of St. Jacques, Que., has been appointed superintendent of the experimental farm at Lennoxville, Que., by the Federal Agriculture Department.

Glenn C. Ritcey, BEng '48, of Pembroke, Ont., is now vice-president and general manager of Radar Pneumatics (Eastern) Ltd.

Sam Roth, BEng '48, of Montreal, has been appointed manager of the newly-created research development department of Canadian Aviation Electronics Ltd.

Richard F. Sharratt, BCom '48, has been posted from Natal to Calcutta, India, with the Aluminum Co.

Howard E. Whiting, BCom '48, has been appointed vice-president and manager, Montreal office, of Leo Burnett Co. of Canada.

'49

Francis P. Brady, BCL '49, of Montreal, has been appointed assistant to the vice-president, manufacturing, of Dominion Textile Co. Ltd.

John D. Howe, BA '49, a research analyst with the Canadian National Railways, has accepted an assignment in Indonesia under the Colombo Plan, to advise the government on the development of transportation statistics. Mr. Howe will also lecture at the Indonesian Academy of Statistics in Djakarta.

Allan E. Risk, BEng '49, of Montreal, has been appointed manager, pump department sales, of Canadian Allis-Chalmers.

Gerald Shklar, BSc '47, DDS '49, has been named professor of Dental History and chairman of the new department of Oral Pathology at Tufts University School of Dental Medicine, Boston, Mass.

William McK. Wood, BA '42, BCL '49, has been named Acting Consul General for Canada in Leopoldville, The Congo.

'50

Donald R. Atkin, BCom '50, has been named a vice-president of the London (England) office of the Morgan Guaranty Trust Co.

John Bryson, BCL '50, has been promoted to the position of Western Canada real estate manager, with headquarters in Vancouver, of Zeller's Ltd.

David C. Hogg, MSc '50, PhD '53, of Fair Haven, N.J., was a member of the Bell Telephone Laboratories scientific and technical team participating in the "Project Echo" communications - via - space - satellite experiment.

'51

Bernard Lyman, MA '51, has been named associate professor of psychology and chairman of the department of Education and Psychology of Washington College, Chestertown, Md.

Archie M. Miller, BA '51, has accepted a position at the University of Rochester as assistant professor in the department of Fine Arts, and an instructorship in sculpture at the Rochester Memorial Art Gallery.

Kasmer Vidruk, BSc/PhyEd '51, of St. Vital, Man., was awarded his Master of Arts degree by the University of Minnesota in August, 1960.

Ian Waterlow, BEng '51, has been appointed acting plant superintendent of the Foundry in the Engineering Division of The Consolidated Mining and Smelting Co. at Trail, B.C.

'52

Iwouha Edozie Aligwekwe, MA '52, has been granted the degree of Doctor of Philosophy by Ohio State University, Columbus, Ohio.

Mrs. Barbara Henneberry, BSc/Agr '52, of Montreal, will undertake a year of advanced graduate work along with teaching duties on an award given her by the University of Pittsburgh. She plans to specialize in regional economics.

Jacques-Yvan Morin, BCL '52, of Montreal, has been appointed a member of the Canadian National Group in the Permanent Court of Arbitration.

'53

Joseph E. Daccord, BEng' 53, has been named sales manager, structural products, Montreal district, for Dominion Structural Steel Ltd.

Gerald J. McGee, BEng '53, has been appointed assistant sales manager, structural products, Montreal district, for Dominion Structural Steel Ltd.

W. B. Siebrasse, BSc '53, has been promoted to group service manager of the Montreal group service branch of the Sun Life Assurance Co. of Canada.

'54

Mrs. Stanley W. Angrist (nee Shirley Bloomstone, BA '54, MA '55), has been awarded the degree of Doctor of Philosophy by Ohio State University, Columbus, Ohio.

Frederick G. Wilmot, BCom '54, of Calgary, has been appointed manager, contract development, of Mannix Co. Ltd.

Elizabeth Worthy, BN '54, has been appointed lecturer in nursing at the University of Saskatchewan.

'56

Alistair Catterson, BSc '52, MD '56, has been awarded a research fellowship in psychiatry by the Nuffield Foundation of England. Dr. Catterson has been in England for the past year, studying psychiatry at the Nethern Hospital, Coulsdon, Surrey.

Philip E. Coulter, BEng '56, of Toronto, has been appointed Canadian design and sales engineer for Waterman-Waterbury Co., Minneapolis, Minn.

Timothy A. Rutley, BEng '56, has taken a two years' leave from teaching at Selwyn House School, Montreal, to travel. He spent some time this summer teaching Conversational English at Nippon University, Tokyo.

Leonard Barry Torobin, BEng '56, PhD '60, has joined the staff of Esso Research and Engineering Co., the major scientific and engineering affiliate of Standard Oil Co., New Jersey.

'57

Trevor B. Davey, MEng' 57, is now assistant professor of Mechanical Engineering at Sacramento State College, California.

James deB. Domville, BA '54, BCL 57, has been named administrative director of the National Theatre School of Canada.

D. Ross Halliday, MD '57, has been appointed a fellow in surgery in the Mayo Foundation at Rochester, Minn.

Douglas L. Hay, BSc/Agr '57, of Lethbridge, Alta., received his Masters in Business Administration from Michigan State University in September.

Monroe L. Neuman, MD '57, is taking his residency in Psychiatry at the Georgetown University Hospital in Washington, D.C.

Marian R. Passmore, MA '57, of Sarnia, has been awarded a Rotary Foundation Fellowship for advanced study abroad during the 1960-61 academic year. She will study nineteenth-century literature at the University of Aix-Marseille, France.

'58

M. Murray Butler, BA '58, is now product director of Johnson & Johnson Ltd. in Montreal.

Louis Donolo Jr., BEng '58, of Montreal, has been appointed a director and administrative assistant of Louis Donolo Inc.

Earl G. Isbister, BSc '54, MD '58, has been appointed a fellow in urology in the Mayo Foundation at Rochester, Minn.

S. M. Lyle, BEng '58, of Montreal, has been selected under the Athlone Fellowship plan for study in British universities and engineering firms.

P. Michael Pitfield, BCL '58, of Montreal, has been appointed secretary to the Royal Commission on Publications.

'59

Jean Paul Branchaud, BCL '59, is in Geneva for one year attending Centre d'Etudes Industrielles.

Sidney Goloff, BEng '59, has completed the graduate training course at Allis-Chalmers, and has been assigned as an engineer in Canadian Allis-Chalmers at Lachine, Que.

Mrs. Nicholas Herscovics (nee Annette Gelbert, BSc '59), of Montreal, has been awarded a $1500 Union Carbide fellowship for research in cancer.

'60

David Elliott, BSc '60, of Montreal, has been awarded a scholarship by the University of Glasgow to pursue geological studies.

Angus S. Taylor, BEng '60, of Lachute, has won an Athlone Fellowship to study in British universities and engineering firms.

W. Robert Tucker, BEng '60, of Montreal, is one of the 40 Canadian engineers selected under the Athlone Fellowship plan to study in British universities and engineering firms.

Marriages

Alexander: At Farnham, Que., on Oct. 8, 1960, M. Jane Alexander, BA '54, and Clement Christie.

Allenby: At Toronto, on Sept. 10, 1960, Ralph Gordon Allenby, BEng '56, and Ann Lorraine Hart.

Ashfield: At Montreal, on Aug. 26, 1960, James C. Ashfield, BEng '58, and Hana V. Schneider.

Ashwin: At Toronto, on Sept. 10, 1960, James G. Ashwin, PhD '53 and Myrtle Foss.

Avison: At Toronto, recently, Inez A. Avison, BA '52, and Paul Graber.

Bales: At Montreal, on Sept. 10, 1960, Gordon George Bales, BA '57, and Joan Patricia Street.

Barlow: At Montreal, on Oct. 1, 1960, Judith Ann Barlow, BSc '58, and Thomas James Piper.

Beauprie: At Douglas, Ont., on Aug. 6, 1960, Donald J. Beauprie, BSc '51, DDS '56, and Jean MacGregor.

Birkett-Davison: At Dorval, Que., on Aug. 6, 1960, Richard Harris Birkett, BCom '50, and Barbara M. Davison, MD '58.

Bouskill: At Montreal, on Oct. 1, 1960, Brian Keith Bouskill, BCom '59, and Margaret E. G. MacRae.

Brierley: At Montreal, on July 29, 1960, John E. C. Brierley, BCL '59, and Jane Bartlett.

Bruneau: At Red Deer, Alta., on July 9, 1960, David G. Bruneau, BEng '57, and Janet Amy Smith.

Bush: At Montreal, on Oct. 8, 1960, David Henry Bush, BEng '60, and Barbara Alayne Hanna.

Butler: At Montreal, on Oct. 15, 1960, M. Murray Butler, BA '58, and Hilda Margot Wright.

Campbell: At New Richmond, Que., recently, Jane Elizabeth Campbell, BSc/HEc '57, and John E. Kean.

Canning: At Lachine, Que., on July 9, 1960, Lloyd R. Canning, BCom '37, and Eleanor Jean Colton.

Cherun: At Ottawa, on May 29, 1960, Carol Ann Cherun, BA '58, and S. George Bromberg.

Climan: At Detroit, Mich., recently, Zave M. Climan, BCom '55, and Sandra Dawes.

Davies: At Ste. Anne de Bellevue, Que., recently, Susan Alice Davies, BEd '60, and Gordon Richard Irving Nicholson.

Desrochers: At Montreal, on Aug. 30, 1960, Serge Desrochers, BCL '59, and Patricia Nolin.

Deskin: At Montreal, on Sept. 13, 1960, Eric Deskin, BEng '60, and Claudia Hazell.

Douglas: At Montreal, on Aug. 27, 1960, Bruce Douglas, BCom '59, and Shirley McKenzie.

Ducros: At Montreal, on Sept. 10, 1960, Jacques F. Ducros, BCL '56, and Patricia M. McCoshen.

Eberts: At Montreal, on Sept. 16, 1960, Edmond Gordon Eberts, BSc '60, and Daphne M. Louson.

Etherington: At Hamilton, on Sept. 24, 1960, Barbara Jane Etherington, DipPT '60, and Robert O. Dowie.

Fairbairn: At Kingston, Ont., on Oct. 8, 1960, David Ray Fairbairn, BCom '59, and Elizabeth M. Panet.

Faris-Azan: At London, England, on Aug. 26, 1960, Mohammed A. Faris, BEng '59, and Yulanda M. Azan, BA '60.

Feher: At Montreal, recently, Peter J. Feher, MD '59, and Hedy Szirmai.

Fisher: At Austin, Que., on Aug. 6, 1960, Donald R. Fisher, BA '49, and Shirley-Anne Sigrid Stamp.

Friedman: At Montreal, in Sept. 1960, Mona Friedman, BA '59, and Sol J. Polatshek.

Gauthier: At Montreal, on Aug. 27, 1960, Helene Gauthier, DipPT '59, and Gerry J. Wilson.

Gewurz: At Montreal, on June 14, 1960, Nundi F. Gewurz, BA '58, and Dov Izraeli.

Gold: At Montreal, on Aug. 21, 1960, Philip Gold, BSc '57, and Evelyn Katz.

Goldman: At Montreal, on Aug. 7, 1960, Sol E. Goldman, MD '22, and Mrs. Edith Beck.

Goldstein: At St. John, N.B., on Aug. 21, 1960, Roslyn Goldstein, BA '58, and George Avery.

Goodman: At Winnipeg, on Aug. 28, 1960, Martin Goodman, BA '56, and Janis Ripstein.

Guthrie: At Montreal, on Aug. 20, 1960, A. Derek Guthrie, BA '57, BCL '60, and Monique Piette.

Hankinson: At Montreal, on Oct. 15, 1960, Kathleen C. M. Hankinson, DipP&OT '52, and Peter Henry Stuckey.

Heal: At Montreal, on Oct. 8, 1960, Judith Anne Heal, BA '58, and Philip Edward Johnston.

Henstridge: At Gananoque, Ont., on Oct. 1, 1960, Charles O. C. Henstridge, BEng '50, and Marion Joan Symons.

Hicks: At Cornwall, Ont., on Oct. 8, 1960, Douglas Gordon Hicks, BSc/Agr '57, and Cynthia Dunlop.

Wright: At Philadelphia, recently, Donald Wright, BCom '58, and Sheila Cohen.

Zinck: On Aug. 27, 1960, Nancy L. Zinck, DipPT '58, and J. Douglas Court.

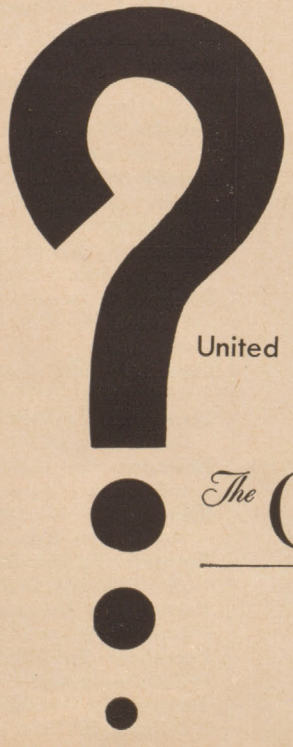

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

Hubscher: To Paul, BCom '57, and Beth (Jacobs, BA '59), a daughter.

Hungate: To John C., BEng '51, and Mrs. Hungate, a son.

Irwin: To Fred W., BEng '58, and Mrs. Irwin, a son.

Irwin: To Peter J., BEng '55, and Mrs. Irwin, a daughter.

Isaacs: To Natalie (Fochs, BA '50, BCL '54), and Ross Isaacs, a daughter.

Jeffery: To W. Gordon, PhD '59, and Cynthia (Scott, BSc '51), a son.

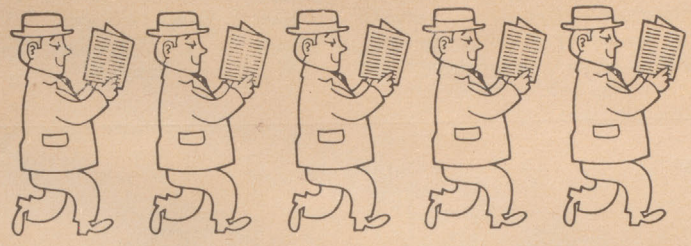

Jones: To J. Hubert, DipAgr '52, and Mrs. Jones, a daughter.

Jones: To Frances (Magor, HMKR '54), and Robert Jones, a son.

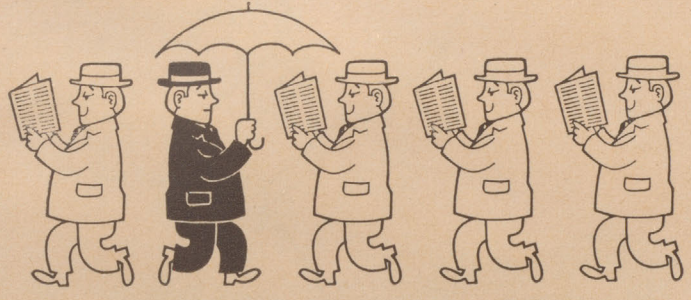

Kaegi: To Gerda (Thomas, BA '54), and Hans P. Kaegi, twin sons.

Kane: To J. Alphonsus, BEng '52, and Mrs. Kane, a daughter.

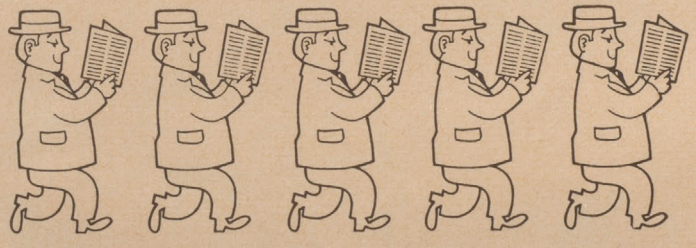

THEY'RE ALL OUT OF STEP

BUT SMITH...

That's according to Smith, of course. Actually it's Smith who's 'way out of step — all the others know the value of reading the B of M Business Review from cover to cover. This concise monthly spotlight on the business scene is invaluable in keeping you abreast of Canadian economic affairs. Make it a point to read it every month. There's a personal copy available for you — even if your name *is* Smith. Just drop a line today to: Business Development Department, Bank of Montreal, P.O. Box 6002, Montreal 3, P.Q.

Thuswaldner: To Heather (Anderson, HMKR '54), and Andreas Thuswaldner, a son.

Troughton: To John, BSc '51, and Mrs. Troughton, a son.

Valois: To George, BSc '51, and Mrs. Valois, a son.

Vasey: To Sherle (Perkins, BA '57), and Michael Vasey, a daughter.

Walton: To John S., BEng '53, and Joan (Watson, BA '52), a son.

Ward: To Charles K., BCom '47, and Mrs. Ward, a daughter.

Waterston: To Thomas, BSc '49, and Patricia (Davis, BA '50), a son.

Watson: To G. Joslin, BCom '47, and Mrs. Watson, twin daughters.

Waugh: To Theodore, MD '53, and Frances (Patch, BA '50), a daughter.

Whitaker: To George, BEng '54, and Mrs. Whitaker, a daughter.

Wilansky: To Judy (Guberman, MacTeach '54), and Graham Wilansky, a daughter.

Williamson: To David F., BCom '59, and Mrs. Williamson, a son.

Wilson: To William, BEng '51, and Mrs. Wilson, a son.

Wolfe: To Ilene (Riddell, BA '58), and Irwin Wolfe, a son.

Wynn: To Esther (Yellin, P&OT '56), and Laurence Wynn, a daughter.

Deaths

Charles H. Benning, MD '17, former health commissioner for the Wilmington, Del., Board of Health, at Elsmere, Del., on Aug. 2, 1960.

John Eugene Brooks, MD '03, at Eastport, Me., on Sept. 9, 1959.

Rev. Cornelius Bulzan, BD '56, at Montreal, on Sept. 2, 1960.

Arthur F. Chaisson, MD '38, of Fredericton, N.B., on Sept. 9. 1960.

Mrs. Ashley W. Cooper (nee Ellen Louise Swindlehurst, BA '19), at Montreal, on Aug. 23, 1960.

A/V/M Arthur T. Cowley, BSc '10, at Victoria, B.C., in July, 1960.

Frank C. Davison, BA '13, retired head of the B.B.C. West European Service, at Ibiza, Balearic Islands, on March 30, 1960.

Donald Gray Dunbar, BSc '19, of Stellarton, N.S., on March 7, 1960.

Beatrice M. Hadrill, BA '12, GradNurse '31, at St. Andrews East, Que., on Aug. 13, 1960.

Theodore H. Harris, BA '26, MA '28, BCL '29, well-known Montreal newsman, at Montreal, on Sept. 29, 1960.

Robert Harvie, BA '05, BSc '06, MSc '09, geologist for many years with the Geological Survey of Canada, at Montreal, on Sept. 30, 1960.

John C. Hindson, MD '19, of Viscount, Sask., in July, 1960.

John H. Holleran, MD '32, of Wakefield, Mass., on July 17, 1960.

Everett E. Holmes, BSc '22, at Kentville, N.S., on Oct. 14, 1960.

Isabel M. Hurst, BA '99, for 40 years a teacher under the Montreal Protestant School Board and an Emeritus member of the Graduates' Society, at Montreal, on Sept. 18, 1960.

Thomas H. Kirby, BSc '13, president of Filer-Smith Machinery Co. Ltd., at Winnipeg, on Oct. 17, 1960.

Arthur B. Lamb, BSc' 40, distinguished Canadian bacteriologist, at Marville, France, on Oct. 15, 1960.

Percy L. Lavers, MD '10, of Vancouver, in July, 1960.

Beverley C. Leech, O.B.E., MD '25, one of the first four qualified specialists in anaesthiology in Canada, at Nanaimo, B.C., on March 10, 1960.

Victor J. Lidstone, LLB '22, BCL '24, at Waterloo, Ont., on Sept. 26, 1960.

Raymond J. Mahoux, BEng '37, at Val David, Que., on Aug. 9, 1960.

Kenneth B. Martin, BSc '22, at Baie d'Urfe, Que., on Oct. 6, 1960.

Clifford G. Menzies, MD '26, former director of Michigan State University's Olin Memorial Hospital, at East Lansing, Mich., on Oct. 4, 1960.

Gerald M. Merritt, BSc '25, at Detroit, Mich., on Aug. 10, 1960.

William D. Monahan, MD '36, of Whitefield, N.H., on April 21, 1960.

Wesley Gardiner Morris, MD '13, at Burnaby, B.C., in 1960.

Kathleen M. O'Meara, BA '15, at Vancouver, on Sept. 19, 1960.

Rene Papineau-Couture, BA '10, BCL '13, at Montreal, on Oct. 16, 1960.

Thomas M. B. Payne, BSc/Agr '50, chairman of the department of microbiology at the University of Manitoba, at Winnipeg, on Aug. 12, 1960.

Mrs. Wilbur M. Philpott (nee Annie Ruth Goodwin, BA '18), at Toronto, on Oct. 5, 1960.

Herbert E. (Ted) Pope, BA '48, of Toronto, on Aug. 13, 1960.

Frank Ernest Rogers, MD '97, at Denver, Colo., on Feb. 27, 1960.

Marcia Shaw, PhyEd '27, at Sidney, B.C., on Aug. 10, 1960.

George K. Stevenson, BSc/Agr '49, at Pembroke, Ont., on May 6, 1960.

Henry Black Stuart, BSc '92, at Portland, Ore., on Sept. 10, 1960.

Bertram W. Taylor, BSc/Arts '28, MSc '30, at Montreal, on Aug. 26, 1960.

Helen Hawthorne Taylor, BA '14, of Lewisburg, W. Va., on Oct. 16, 1960.

Hugh Thompson, PhD '54, of Hamilton, Ont., on June 6, 1959.

Rev. Oliver Thorne, BA '10, MA '12, at New Westminster, B.C., in 1959.

James O. Twinberrow, BSc '20, in England, in 1959.

Amoury Charles Voisard, DDS '27, at Montreal, on Sept. 5, 1960.

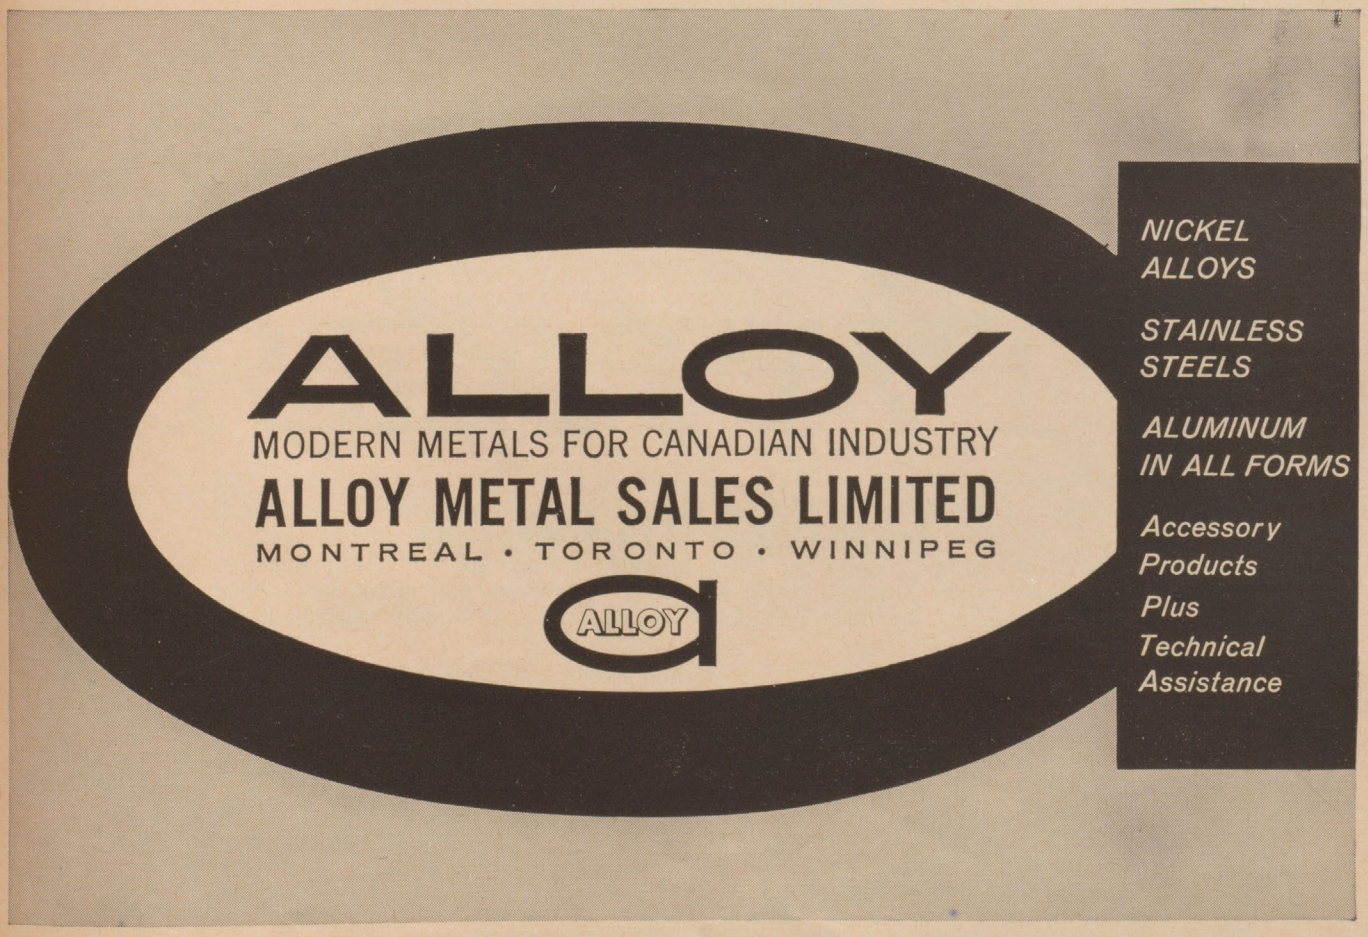

Hon. Mr. Justice Joseph C. Walsh, BCL '94, formerly with the Appellate Division of the Court of Queen's Bench, at Ayerscliffe, Que., on Aug. 30, 1960.

John E. A. Warner, BSc '12, at New York City, on Oct. 17, 1960.

George B. Webster, BSc '04, widely-known Canadian mining engineer and financier, who endowed the George Boyd Webster chair of mining engineering at McGill, at Toronto, on Oct. 22, 1960.

Alexander Wilson, BSc '09, BSc '10, at Montreal, on Sept. 16, 1960.

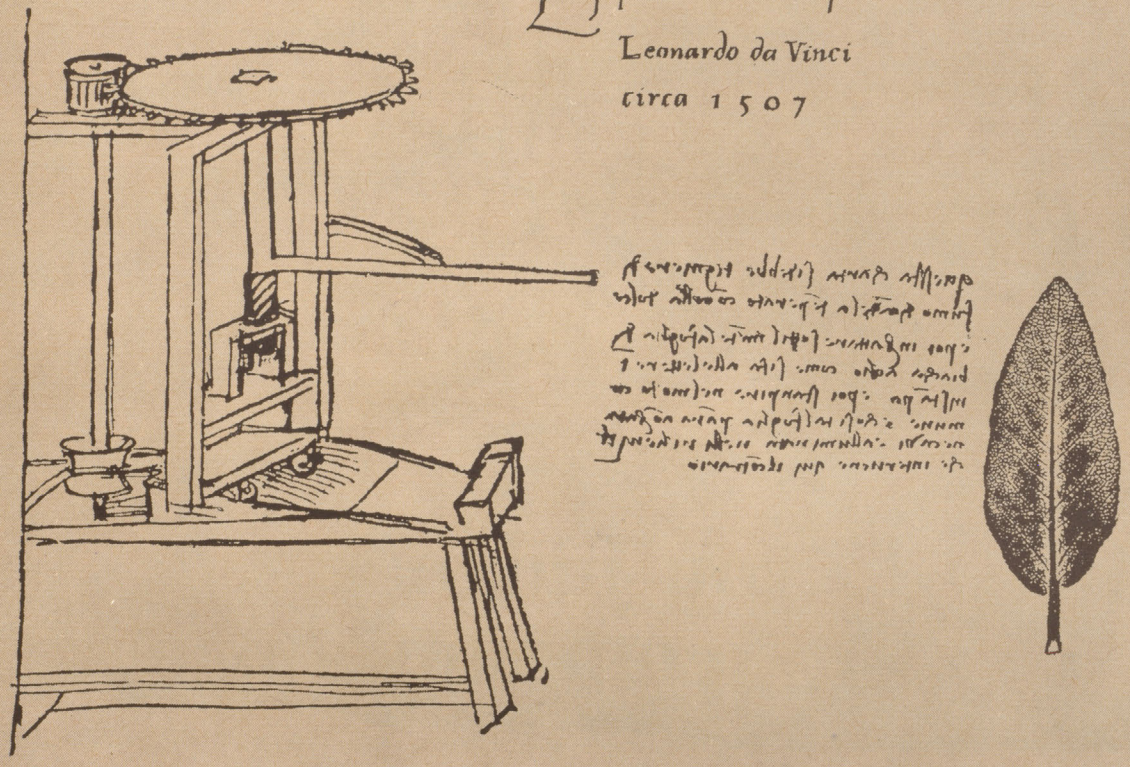

John S. H. Wurtele, BSc '04, retired vice-president and director of the Southern Canada Power Co., at Montreal, on Aug. 6, 1960.

Season's Greetings

MACDONALD TOBACCO INC.

LEONARDO DA VINCI, *artist, engineer, inventor, was one of the truly creative men of all time. Reproduced here are original sketches of a leaf, printed by a process of his own, and a press used in this printing operation.*

CREATIVITY

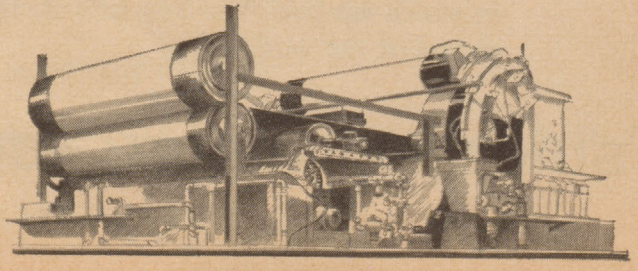

In building fine quality paper-making machinery, Canadian Vickers employ the creative skills and manufacturing experience of engineers, designers, and craftsmen whose versatility and imagination place them in the forefront of their professions and trades. Only by calling upon the diversified talents of such key personnel can Canadian Vickers fulfil their pledge: "If Industry Needs It . . . Canadian Vickers Builds It . . . Better."

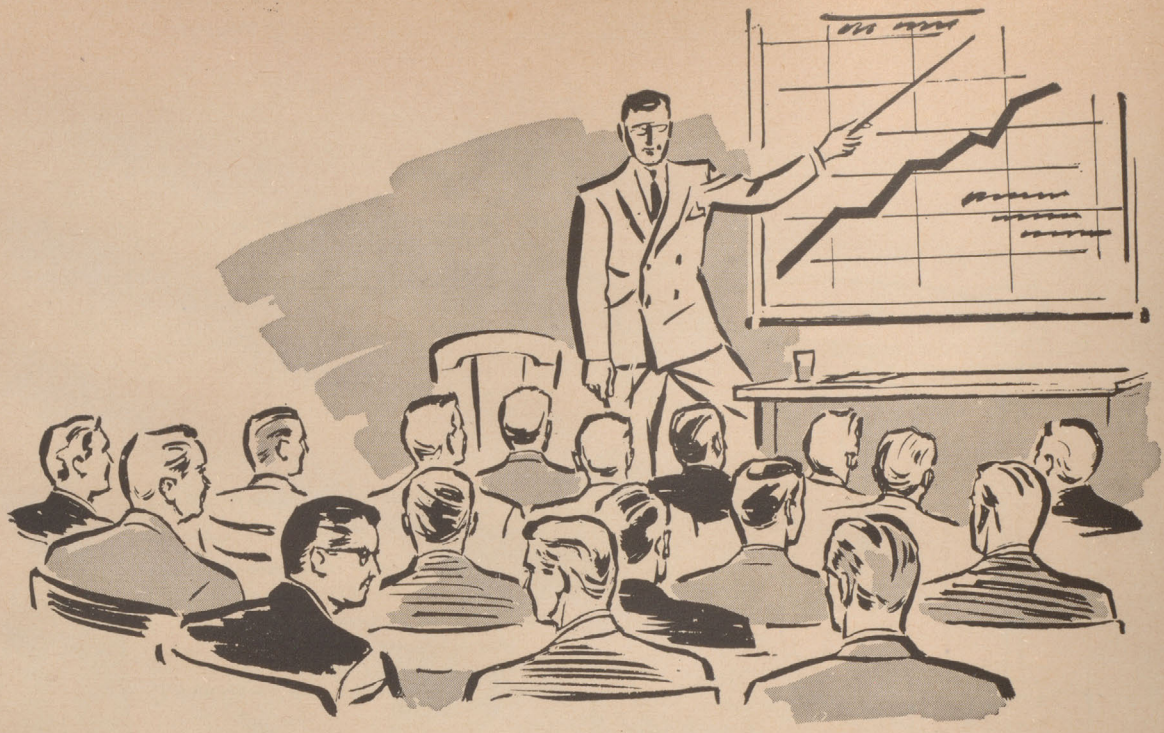

Chemical Process Equipment • Industrial Boilers • Ships • Hydraulic Machinery
Special Machinery Equipment • Pulp and Paper Plant • Mining Machinery • Marine Equipment

How do you judge a company's progress?

Generally speaking, a company's progress is judged by the sale of its product. But a life insurance company is somewhat more complex than others. Its product is intangible and it is not for the moment, but often for the remainder of life and beyond.

There are many things to consider in measuring the progress of a life insurance company. Its sales, of course, and the growth of its insurance in force . . . its assets . . . the way its policy plans meet current needs . . . the efficiency and training of its sales force . . . the completeness of the service which it can offer its policyholders . . . the enthusiasm and company loyalty that extends throughout the entire organization.

Measured by any of these standards, the Sun Life of Canada has been successful ever since its first policy was issued in 1871, and its progress continues to be sure and steady today. Its $9 billion of life insurance in force protects the holders of well over two million policies and group certificates; 150 branch offices from coast to coast in North America provide the finest of life insurance service, and its policy plans are modern and up-to-date in keeping with the changing times in which we live. The Sun Life is, indeed, one of the great life insurance companies of the world.

SUN LIFE ASSURANCE COMPANY OF CANADA

"That's why you should study maths, son"

A close look at Canada today will quickly convince any young man that mathematics will play an important part in his future. Everywhere about him he will see the handiwork of the professional engineer whose training, based on mathematics, is contributing to this country's vast expansion. For wherever big things are going on, there you will find the engineer . . . whose vision and initiative make him a key man in Canada's progress.

In the coming years, Canada's continuing development will offer the challenge and reward of engineering careers to thousands of young men. For them there will be the satisfaction of participating in an important and skilful profession and the deeper satisfaction of contributing to the strength and prosperity of our nation.

For over 65 years, Canadian General Electric has engineered and manufactured much of the electrical equipment that has played such a vital role in making this country one of the most highly electrified in the world.

Progress Is Our Most Important Product

CANADIAN GENERAL ELECTRIC COMPANY LIMITED

Manufacturer of equipment that generates, transmits and distributes electricity
... and the wide variety of products that put it to work in home and industry

ABOUT OUR COVER

Ed McNally's lively cartoon, drawn especially for the 50th anniversary issue of *The McGill Daily*, gives our cover a change of pace. Frankly, we were captivated by the technique: the drawing reminds one of a wood cut. Actually, the resemblance is achieved by using a "scratch-board" — a special white board with a heavy clay surface. The artist first paints it black, then scratches his drawing out through to the white base. The cartoon appears on our cover against a red, rather than a white, background. We hope we haven't given away any trade secrets. It's certainly no secret, however, that Mr. McNally is editorial cartoonist for *The Montreal Star*.

Authorized as second class mail, Post Office Department, Ottawa. Please address all communications to: *The McGill News*, 3618 University Street, Montreal 2. Tel. VI. 4-6311.

Letters

Needs Song Book

I am very anxious to obtain a copy of the McGill Song Book printed about 1928, for a friend of McGill in the State of Texas, and hope that through your columns I can find someone who is willing to sell a copy, or who can give me information where one can be purchased.

Rodney A. Patch, BA '36, BCL '39

215 St. James Street West,
Montreal, Que.

(Editor's Note: While recognizing Mr. Patch's claim to the first positive response to his request, the Graduates' Society would also like to discover several copies of the '28 Song Book, or earlier ones. The assistance of our readers will be greatly appreciated.)

Premature Unveiling

Reading of the hilarity following the recent football triumph (of the McGill Redmen) prompted me to recall a similar occasion, back at the turn of the century, an era when McGill teams often came out on top.

The statue of Queen Victoria had been sitting in front of the Royal Victoria College for several months, shrouded from sight and awaiting its overdue unveiling.

It occurred to some bright mind to unveil it, and this was done with all due deference: heads uncovered, at attention, the National Anthem and cheering. The Sunday afternoon strollers on Sherbrooke Street thoroughly enjoyed seeing the result of the prank and Montrealers flocked to have a look-see.

Unfortunately, good old Lord Strathcona, for whom the students had a high regard, failed to see the humour of the affair, and expressed his displeasure in no uncertain terms.

However, by the time the official unveiling was accomplished, our caper had been pretty well forgotten.

R. J. Harper, BA '01

Port Perry, Ont.

A tribute to "McGill: The Story of a University"

Please permit me a slightly nostalgic reaction to Hugh MacLennan's *McGill: The Story of a University*. It is a wonderful book, written with grace and understanding and conveying the excitement of a great university that is going to be still greater. I can assure the friends of McGill everywhere that, having picked it up, they will not readily put it down.

I have only one criticism. It was slightly unfair to ask David Thomson and Cyril James to assess a period of history which they are still in the process of making. Being British, and being Montrealers, they obviously could not claim the place in history which they deserve. Hugh MacLennan should have used those chapters as notes, and then scrapped them and written the story without the constraint of modesty.

Principal Dawson is undoubtedly McGill's hero, and in Chapter III Mr. Collard brings him to life as the great man he was. In Chapter IV he also brings Principal Peterson to life; a great achievement. My father (Arts '99) was kindlier in his assessment of Peterson — his students had lots of anecdotes about him—but Mr. Collard has given me for the first time a picture of Peterson as a real person.

Sir Arthur Currie was Principal during my undergraduate days. He was terribly military, and was the butt of a good deal of undergraduate humour. I shall never forget the time when, as a very junior sessional lecturer, I was summoned in to receive Sir Arthur's standard lecture on the importance of good teaching. At the end of it I resisted the temptation to stand up and salute. In retrospect, however, it was rather good, and I think he deserves more than a little niche in the history of McGill.

My main point, however, is that, great as Dawson was and great as Peterson might have been, McGill's most significant forward steps have been during the past two decades. With Dawson and Peterson, McGill became good; with Cyril James and David Thomson, McGill has become great. In the next edition of McGill's *Story*, I hope that Mr. MacLennan will himself write the story of the past few decades. James and Thomson may stand in the wings to take their bows, but the story itself should be told by the best story-teller of our generation.

Robert B. MacLeod, BA'26

Department of Psychology,
Cornell University,
Ithaca, New York.

Athletic Humour

As Lorne Gales may have told you, I have suggested to him that a collection of humorous stories about past athletic events at McGill might appeal to our graduates.

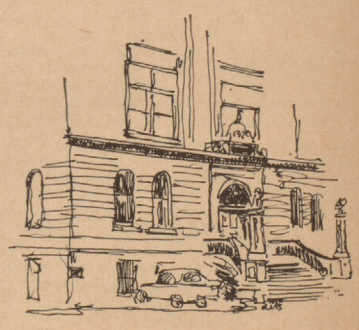

My proposal is that the stories be published under one cover by the Graduates' Society and the proceeds of their sales placed in a fund to provide a scholarship.

I offer my services as editor but will not be offended if a more capable one comes forward. I have been using the title "The Sportive Martlet" in discussion with Lorne. To me it implies the refreshingly amateur approach to athletics which has become so rare. Alternate titles will, of course, be considered.

As a start I would like to hear, either directly or through you, from graduates who are willing to contribute stories. These may be submitted in rough form. The editor can be entrusted with the polishing.

W. L. Ball, PhD '35

Ottawa, Ont.

WHAT HEARS the MARTLET

"Dear Old McGill"

THE OTHER DAY, we approached Robin M. Farr, the personable director of the McGill University Press, for an interim report on the reception of the university's latest book, *McGill, The Story of a University*. The University's infant publishing house has had North American sales rights to the book and has handled distribution in North America since its publication.

"The sales for the book have exceeded all our expectations," Mr. Farr told us. "It made its appearance in bookstores across the country last October and McGill graduates have responded well to an announcement of the publication which was sent to them through the mail in December."

Had the Press received any written reactions to the book?

"Typical of the kind of comment which we have received is the following: 'I think it is a splendid book and I want to take the opportunity of congratulating each and every person connected with creating such a volume...'"

The Press, Mr. Farr added, had even received letters about the book addressed to 'Dear Old McGill'.

A Med's Observations

BRYCE WEIR, MD '60, was the leading graduate in medicine at McGill last May. Among other prizes and awards, Bryce won the Woods Gold Medal for highest standing in the final year. He also found time to fill the office of President of the Students' Society. While he was preparing for his final examinations last Spring, Mrs. Weir presented him with their first child, a daughter. It was no wonder that his class accorded him a standing ovation when he received his degree at Convocation.

Last July, before taking up his internship at the Montreal General Hospital, Bryce was off to a two-week student seminar in the Crimea as a delegate of the National Federation of Canadian University Students. He was invited to talk about his Soviet trip at the 21st annual meeting of the McGill Associates in Montreal early in December. Here are some of his observations:

1. The Soviet government offers the student maximum encouragement because it realizes the future of the world may be won through a struggle of minds.

2. Russia has gained a wide reputation with the uncommitted nations by bringing in students from these nations. "This is their first contact with a major civilization and this initial impact can prove the turning point for their country."

3. Education must be accessible to more people in Canada and the West if "we are to maintain our position in this East-West struggle."

4. The Russian government has adopted some of the best aspects of other countries. "We would do well to adopt some of the good things from them."

* * *

THE MCGILL ASSOCIATES is an organization of prominent men who are interested in the work of the University. At their annual meeting last December, they reelected Col. O. H. Barrett president, J. M. McAvity, vice-president, and Ross T. Clarkson, BA '42, BCL '48, secretary.

Other members of the executive are: W. G. Attridge, J. Lovell Baker, W. E. Bickley, R. A. Emerson, E. F. Erzinger, Ludvig Firing, F. Lawson Glasgow, E. H. Heeney, J. M. Jackson, M. Levitt, BCom '20, N. J. MacMillan, QC, Eric S. Morse, J. M. G. Scott, Gordon S. Small, Rielle Thomson, and F. H. B. Tippet.

The immediate past-president of the Associates is W. Earle McLaughlin, who was elected president of the Royal Bank of Canada in December.

A Happy Reunion

FROM BEVERLY HILLS, California, comes news about Arthur S. Abramson, M.D. '37, a paraplegic veteran of the Second World War. His classmate, Reuben R. Lewis, writes to tell us that on February 17, Dr. Abramson, who is Professor of Physical Medicine and Rehabilitation at Albert Einstein College of Medicine, was guest speaker at the Los Angeles Society of Neurology and Psychiatry.

This meeting was sponsored by the Spinal Cord Lesion Research Association and Dr. Abramson spoke on the topic "Changing Concepts in Management of Spasticity."

Dr. Lewis also points out that Dr. and Mrs. Abramson were entertained at his home and the large gathering included a group of classmates whom Dr. Abramson had not seen since graduation. Dr. Lewis kindly enclosed a snapshot of the reunited Meds.

Looking through the pages of the McGill Annual for 1937 are, left to right: Dr. Arthur S. Abramson, Dr. Robert L. Davis, Dr. Reuben R. Lewis, Dr. Don R. Richard, and Dr. Kenneth B. Jacques. The group of classmates, who had not met since graduation, gathered at Dr. Lewis' home in Beverly Hills, California.

Unique Engineers

REUNION WEEKEND for 1961 isn't really that far off. Ted Taylor, our Field Secretary, and his assistant Miss Janet Almond, are already at work planning for the big week-end October 20, 21 and 22. You'll be hearing more about this later, but we can't help passing along to you some interesting facts and figures about what is probably the most exemplary class, as far as reunions are concerned.

The class in question is Engineering '35. At their 25th Reunion last October (see photo) 49 out of the 77 living members of the class were in attendance. Moreover, as far as is known, this is the only McGill class to ever have had an *annual* reunion *every year* since graduation.

Here are some additional facts about this unique class:

It's the only engineering class with its own padre: Rev. Ralph M. Carmichael, BEng.

Though less than one-third of the class lives in Montreal area, more than 60 per cent and their wives attended the last reunion. Some came from as far away as Vancouver.

In the 1960 Alma Mater Fund total, it was *top contributor* among the 25-year classes ($16,915).

All members of the class are accounted for and their record maintained in an official printed Class Directory published and distributed every five years.

This distinguished record as a class is reflected in the individual successes of its members: seven own their own businesses; five are presidents; 11 are vice-presidents; four are general managers; six are district or sales managers; two are in university or high school teaching; and practically all the rest are in positions of senior administrative responsibility.

Class president during the earlier years was Jason Ingham. For the past 10 years or so, Lorne Rowell has presided. The vice-president is Ken Reynolds and the Secretary-Treasurer is Gordon Auld.

This is truly a class with class.

Honours for Hughes

HONOURS AND AWARDS have been showered in recent months upon Dr. John Hughes, who will be remembered by graduates as Macdonald Professor of Education and Chairman of the Department from 1935 until his retirement in 1954.

The St. David's Society of Montreal, at a "surprise" meeting, presented Prof. Hughes with a lettered wallet containing a cheque for $300. McGill University was represented at this meeting by the former bursar, William Bentley.

Three weeks later the St. David's Society of the State of New York, at its annual banquet in the Waldorf-Astoria Hotel, presented him with the Hopkins Medal for distinguished service in the field of Education.

In July of 1960, the University of Wales at its annual convocation at Bangor made Prof. Hughes an Honorary Doctor of Laws, an award he shared with a lifelong friend, former fellow student and professional colleague, Sir Thomas Parry-Williams,

Prof. John Hughes

and Sir Arthur Fforde, former Headmaster of Rugby and now head of the B.B.C.

To top it all off, Dr. Hughes received a fine tribute from William Katz of Montreal. Mr. Katz has endowed two John Hughes University Scholarships to the value of $250 each at McGill's sister university of Sir George Williams.

Prof. Hughes was invited to come to McGill in 1935 when the late Sir Fred Clarke left to succeed Sir Percy Nunn at the University of London. He was at Rhodes University, South Africa, at the time.

This photograph of Engineering '35 was taken at the 25th anniversary reunion October 21, 1960. Seated on the floor, front centre, is Jason Ingham. Front row, left to right: Henry Wong, Jim Leahey, Gordon Auld, Ross Dunlop, Bill Swift, Alex Ross, Gordon MacLeod, David Bloom, Louis Rivett, Alan Reid, Russ Palmer, Alf Zion. Rear, left to right: Lou Christie, Geoff Kimpton, Jim Ferguson, Gaylen Duncan, John Taylor, Maurice Mace, Ian MacKay, Lucien L'Allier, Harold Morris, Bill Purves, Bob Schofield, Jack Kazakoff, Lorne Rowell, Dick Herzer, Charlie Paton, Phil Malouf, Rev. Ralph Carmichael, Claude Robillard, Jack Houghton, Doug MacLeod, Dr. John Riddel, Paul Frankel, Carl Jamieson, Lawrence Beath, Bob Thompson, Frank Pope, Nes Dobson, John Angel, Harlowe Wright, Ralph Morgan, Jim Jeffrey, Ken Reynolds.

Public Speaking

A 17-YEAR OLD Montreal high school girl, Shannon Flynn, was chosen winner of this year's Public Speaking Contest, sponsored by the McGill Alumnae Society. Miss Flynn, a student at Montreal West High School, is the daughter of Mr. and Mrs. F. G. Flynn (Dora Wright, BA '39).

Miss Flynn's high school will keep the Rose Bowl Trophy for the next year, while she received a miniature of the bowl, a $50 Canada Savings Bond and a McGill crested spoon.

Miss Mae Laduke of Chambly County High School placed second, while Miss Doreen Fisher of Sunnyside High School, Stanstead, Quebec, was third.

In all, there were 10 finalists. Mrs. C. H. Hulme (Eleanor Townsend, BA '36) was chairman of the committee which sponsored the contest.

An Outstanding Award

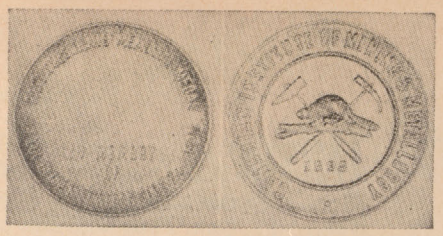

DR. GERALD G. HATCH, B. ENG. 1944, has been awarded the Past President's Gold Medal by the Canadian Institute of Mining and Metallurgy at its Annual Meeting in March 1961, in recognition of his outstanding achievements in the field of the Mineral Industry. This

Dr. Gerald G. Hatch

award was instituted recently to encourage and suitably recognize the younger members of the Institute and Dr. Hatch is the first recipient. The award was established by Janet C. Cole as a memorial to her late husband Lt. Col. George Edwards Cole, B.A. McGill 1902, B.Sc. McGill 1906, and President of the C.I.M. in 1936-37, and is in recognition of his interest in the younger members of the profession.

Dr. Hatch was born in Brockville, Ontario on July 30, 1922. He graduated from McGill University with the Bachelor of Engineering Degree with Honours in Metallurgy in 1944.

Past President's Gold Medal

He later studied at the Massachusetts Institute of Technology and received the degree of Doctor of Science in Metallurgy in 1948. He was employed by the Armour Institute on titanium research from 1948 to 1952, after which he joined the Quebec Iron and Titanium Corporation as Director of Research. He was made Plant Superintendent in 1954.

In 1958 he joined W. S. Atkins and Associates Ltd., a firm of consulting engineers, as President.

His wife is the former Sheila Baillie, B.Arch., McGill 1946, an architect in her own right. They have three children and reside in Toronto.

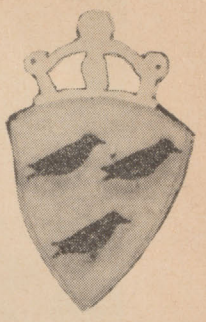

Our congratulations go to Dr. Hatch on this recognition of his ability.

An Unusual Crest

EVERY NOW AND THEN, an item from McGill's past comes to our attention, opening up a story of warm human interest. Late last year, a letter arrived at Martlet House from Elizabeth T. Drysdale, of Pompano Beach, Florida. Enclosed in the letter was a faded McGill crest, the like of which we had never before seen.

Mrs. Drysdale explained that it had been worn on a football jersey for many years by her husband, George Arrowsmith Drysdale, BASc '98, MSc '11, who had played on the McGill team. Mr. Drysdale, we learned, had passed away in 1926 and his wife, a proud mother and now grandmother, wished to present the crest to her grandson as a Christmas gift. Age, of course, had taken its toll on the crest, and she wondered whether it would be possible to get a new one like it.

Truth to tell, we could not fulfill her request in detail. The crest, as will be seen in the photograph, obviously dated from a time before McGill had standardized her insignia and emblems.

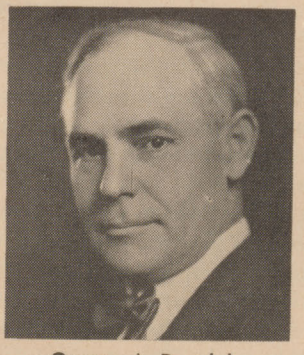

Of particular significance in this connection is the fact that the martlets, in black on a red field, face right, instead of left. We were able to procure a modern version of the McGill crest, and sent it off to Mrs. Drysdale, with what we hoped she would consider a reasonable suggestion:

In view of the crest's historical interest to us, would Mrs. Drysdale mind if we kept it here, so that it could be suitably framed and inscribed and hung in the office of the Director of Athletics, among his souvenirs of McGill's sports past?

To our delight, Mrs. Drysdale replied affirmatively after discussing the matter with her son and daughter.

"They join with me in deep appreciation for the honour to their father which you have suggested," she said. "We are indeed happy to have you keep the emblem . . . Thank you again for your gracious courtesy, and for the new McGill University emblem, which I know my little grandson will be proud to wear."

The photograph of Mr. Drysdale

George A. Drysdale

which accompanies this story was taken shortly before his death in 1926. Mrs. Drysdale recalls attending Convocation exercises at McGill when her husband was awarded his Master's degree in 1911.

We've also seen fit to include a photograph of her handsome son, a graduate of the University of Michigan in Engineering, Physics and Mathematics. A former collegiate swimming champion, he was a member of the U.S. team at the 1936 Olympics. He is

Col. Taylor Drysdale

now Colonel Taylor Drysdale, Air Attaché at the United States Embassy in Djakarta, Indonesia.

More Scholarships

McGILL UNIVERSITY will increase the number of entrance scholarships to students entering in September, 1961. The board of Governors and Senate of the University has approved a proposal that the number of entrance scholarships, which last year totalled more than 200, should be increased as much as funds would permit.

McGill's entrance scholarships are designed to enable good students from all parts of Canada to attend the University. McGill now offers the most generous and comprehensive system of entrance scholarships of any university in Canada.

At the same time, a major change in policy has been announced affecting present and future holders of University Scholarships. The University has decided to return to a system of granting a nominal sum of $100. to each holder of a University Scholarship as a tangible mark of recognition regardless of financial need. Where financial need does exist, the Student Aid Office is empowered to grant amounts up to the cost of tuition fees, board and lodgings to students who are not Montreal residents.

In recent years, holders of these scholarships had not received any stipend at all unless they could prove to the University that they were in financial need, in which case the amount awarded had depended on the decision of the Student Aid Office.

Every High School in Canada has been sent a statement concerning the award of entrance scholarships, together with details which govern them.

WHERE ARE THEY NOW?

Faculty of Arts

Anyone having information which may help to trace these lost graduates is invited to fill out the form below and return it to Records Department, The Graduates' Society of McGill University, 3618 University Street, Montreal 2, Que. Your help and co-operation will be appreciated.

1889: Euphemia MacLeod.

1894: Rev. Morley O. Lambly.

1896: Rev. James Craig Watts.

1897: Charles Kingsbury Ives, Arthur Kinsley Trenholme.

1898: Muriel Bothwell Carr, Annie Louise Shaw.

1900: Mrs. C. A. Eggert (Helen Rorke), Mrs. Harold F. Hall (Frances B. Perley), Mrs. H. B. Willmot (Jessie F. Lundie).

1902: Mrs. Fred Lambart (May Bickerdike).

1903: Alan Dale Harris.

1904: Mrs. W. H. Jackson (M. K. McCally), Mrs. Herbert J. Love (Ruth Bell).

1905: George Alexander Fraser.

1906: Mrs. Harmon L. Laughlin (Mabel L. Rorke).

1907: John Coles Belyea, Rev. Howard Parsons.

1908: Frank A. Patrick.

1909: Mrs. G. J. Penning (Gertrude Schafheitlin).

1910: Mrs. B. Richardson (A. Winnifred Murphy).

1912: Miss Margaret H. Pennington, Mrs. G. P. Preston (Mary A. McLean Braeuer), Mrs. Ross Stone (Susan Viola MacDonald).

1913: Eleanor Shanly.

1914: Mrs. Ray Elson Husk (Elizabeth C. Black) & Mr. Husk — BSA '14, Mrs. J. A. MacKenzie (Margaret E. Hay), Charles Hugh McTavish.

1915: Dr. Doris Murray Barlow, Mrs. F. McWilliams (Muriel A. Brockwell), Mrs. F. Jarvis Morris (D. Lachance) & husband, BSc '15.

1916: G. G. Burton, Mrs. Rachel H. Weinfeld.

1917: R. J. Clark, Moses Jampolsky, A. J. R. Parkes.

1919: Mrs. A. L. Hughes (Alice J. Patterson-Smyth).

1921: Maxwell I. Raphael, Mrs. D. I. Shvemar (Malca Silverman).

1922: Sidney G. Murray.

1923: Henri Edmond Bourgoin, Rev. G. H. Craik, Rev. Arthur Radmore, Arnold Strange.

1925: William Harvey Gardner.

1926: Bernard William Wall.

1927: Rev. Selby Wilson Francis, Pauline Dorothy Levitt, Patrick L. C. Purcell.

1928 Archibald Roy Chesley, Philip Senky, Willard Jack Weber, Dr. Lawrence Grange Woolley.

1929: Thomas Harvey Adney, H. Elizabeth Archdale, Ida Cecil Greaves, Julie Jack Harris, Dr. Frances Elba M. Read, Mrs. Jack Young (Josephine McMaster Ullock).

1930: Mrs. A. A. Letovsky (Zelda Jean Zuck), Mrs. William J. Logan (Eileen Fosbery), Mortimer Z. Mordeckai.

1931: George Henry Dunlop, Mrs. L. Malus (Florence Garmaise), Mrs. Ezra Barrett Mason.

1932: Dwight Webb, Mrs. Frank Hugh Rand (Marjorie B. Wass) & Mr. Rand, MA '32.

1933: Robert Alex Hamilton, Ruth Ysabel Kronman, Frances Hayes Phelps, Sydney Don Quong.

The General B.A. Degree: A Searching Analysis

Editor's Note: This is the first of two articles on McGill's new B.A. curriculum, written for The McGill News by Professor H. Noel Fieldhouse, Dean of Arts and Science. In his second article, to be published in the Summer Issue, the Dean will describe the new curriculum against the background of his analysis as presented here.

I SHOULD LIKE to thank "The News" for the opportunity to say something about the new B.A. general curriculum. It has created a great deal of interest in other universities, both inside, and outside, Canada, and it is good to be able to talk about it in the McGill family.

In making a curriculum, as in anything else, we are likely to do better if we are clear about our purpose, and I should like, therefore, before describing the new curriculum, to say something on this matter of purpose.

A system of education cannot (I should be inclined to say should not) be a completely independent thing. If its ends should not be prescribed to it from outside, they also cannot be entirely self-originating. The shape which it will take depends both on what the supporters of the system want and on what they can do: i.e. it will depend on their philosophy and on their resources. It follows that the lower and more negative the aim, the easier it is to devise a system to meet it. If our only purpose in providing education is to keep young people off the labour-market, our task will be easy. If our aim is to find an infallible means of detecting and training the future leaders of Canada, our task will be much more difficult.

If this is true, it is worthwhile asking whom we expect to train. A not very helpful headline recently asked whether admission to universities should be 'by scholarship or by family pull'. For myself, I think it should be by both, if, by 'family pull', we mean that respect for family ties, the loss of which would, I think, weaken the bonds which help to make a university such as McGill an independent society. We have to train, not only the future dons and members of professions, but also many men and women who will play parts, of every degree of importance, outside the university and outside the professions: and this means, I think, that we should try to get a student body which is many-sided. We should neither dilute the academic standards which mark a university off from a finishing school, nor, in looking for present competence, overlook past connections and future promise.

General B. A. Training

Given such a student body, to what end is a general B.A. training directed? The usual answer is that it provides a general or liberal education, but this answer, of itself, begs the question unless we know what we mean by a 'general' or a 'liberal' education. Too often, the idea of getting a 'general' education is confused with 'taking' a scattered selection of courses in a variety of subjects. To think that a student who takes one course in each of four subjects is getting a more 'general' education than one who specializes, is to confuse the content of courses with the training received in them. I am inclined to think that a student only begins to derive mental training from a subject when he has gone sufficiently far into it to have become aware of the kind of questions which the subject exists to answer; of the difficulties which its methods have been shaped to meet; and of what it can not do as well as what it can: that general education should be contrasted, not with specialized education, but with professional education.

As its name implies, professional education is vocational. It aims at imparting the knowledge and skill which will be required in a particular profession. (This does not mean, of course, that a particular professional training may not, incidentally to its main purpose, serve the purpose of general education.) General education is not aimed at preparation for any particular vocation, but at developing critical and analytical ability, at widening the scope of intellectual enquiry and tolerance and at both stimulating and disciplining intellectual curiosity.

Now, if we are to direct training in a general degree towards this end, I suggest that we must reconsider two or three assumptions which, in North America, have been taken for granted. The first is that the place to supply a 'general education' is in the junior years of the university course. Almost everywhere in North America, we say to the incoming freshman in Engineering that he is lacking in 'cultural background' and that he must, therefore, do some further freshman work in the humanities: and we say to the incoming freshman in Arts that, given the importance of modern science, he must continue with introductory

"The place for general education is in the later stages of an undergraduate training, not at its beginning."

courses in the sciences. I can only say that forty years of teaching in universities has convinced me that this process seldom has the results which are proposed for it.

Student Resistance

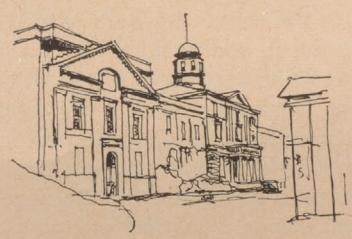

The student tends to regard it as a post-matriculation trick which you have played on him; and he brings (to your attempt to make him a 'rounded man') a resistance which defeats anything except the most gifted and devoted teaching. If, on the other hand, you will let him have his fill, as a junior, of his special interests, he will, as a senior, ask you to help him to find the things which, as a junior, he discounted. The better the Engineering student, the more likely he is, in his senior years, to recognise the limitations of his applied science, and to ask that room be found, in his curriculum, for the humanities and social sciences. The better the Arts student, the more likely it is that, as a senior, he will perceive the limitations of some of the more esoteric parts of his training, and will ask for help in broadening it. The place for 'general' education, in this sense, is, I suggest, in the later stages of an undergraduate training, not at its beginning.

Similarly, with the term 'liberal education'. It would seem that a liberal education cannot be defined in terms of any particular combination of courses. What gives a subject a place in such an education is the purpose with which it is given and the method by which it is taught; and it follows that, in principle, almost any subject can be an instrument of liberal education, if it is taught with liberal purposes in mind, and that the purportedly 'Liberal Arts' can be professional or, worse, pedantic exercises if they are not so taught; and, if this is so, by what criterion do we include a subject in, or exclude it from, our general degree curriculum?

Compulsory Courses

Closely allied to this question is that of compulsory courses: and, here, we must distinguish. It is clear that some courses must be compulsory for particular purposes. A student cannot usefully study senior biochemistry when he has had no biology or chemistry. He cannot usefully make a special subject of the origins of the First World War, if he knows little or nothing of European history of the nineteenth century. But this is the sort of thing for which it is easy to provide. It is another matter when we assert that every candidate for the degree should be (to use the unfortune cant term) 'exposed' to a particular subject, and when we go on to say that this aim is fulfilled by making the freshman course in that subject compulsory.

We may all agree, in principle, and in the abstract, that every educated man should have some 'Thaumaturgy'. But when we translate this, in the particular university of X, into making the freshman course in Thaumaturgy (given by Mr. B.) compulsory, this is

another matter. Mr. B. may, or may not, be an example of that rare kind of academic who can transcend the limits of his own subject and make it an instrument of general education as we have defined this, above. Or, again, Mr. B. may be such a person but, on his retirement or resignation, the course may fall to Mr. C. who has many other academic virtues but not this particular one. There must be few of us whose abiding interest in a particular subject has not been maintained in spite of, and not because of, our having been forced to 'take' a course in it when we were freshmen.

This is a matter (or so I believe) in which none of us can tell where the tinder will strike. The identity of the particular course which most frequently opens up, to students, a glimpse of what is best in a liberal education, will vary, as between different universities, and, in the same university, at different times, with the identity of the instructors. And it is common enough for particular students to acquire, from the study of one subject, what, formally, they might have been expected to have found in another subject.

Remedial Courses

This issue has sometimes been clouded by the tendency to use the freshman year to correct deficiencies in the student's pre-university preparation. In some American universities, this had led to the setting up of Remedial courses and then of pre-Remedial courses and even of pre-pre-Remedial courses. Quite apart from other considerations, this practice means the use of University resources (none too plentiful) to do work which is not the University's business. The place at which to secure that the would-be entrant is properly prepared is, surely, at the point of matriculation; and, if this precaution should prove inadequate in the case of some students, the common sense of the matter would seem to be to require such students to do extra work outside the curriculum proper, rather than to allow their particular deficiencies to determine the shape of the curriculum. When, in the light of this experience, we turn to the question of curriculum, we are faced with what I have ventured to call 'curricular elephantiasis'. A reading of the calendars of North American Universities, as the years go by, will usually reveal a large increase in the number of courses 'offered' (the choice of verb is, in itself, significant) to the student and among which he may choose. There are many reasons for this increase and not all of them are, in themselves, reprehensible.

Increase in Knowledge

The sheer increase in our knowledge and the opening up of what can, reasonably, be called new fields, have compelled departments to undertake instruction in these fields, and it is not always easy to see which, of the older courses, can be dropped as new ones are added. This aspect of the matter is, perhaps, to be seen most clearly in

Served as Chairman of
The McGill Daily's
Fiftieth Anniversary
Reunion Committee.
He reviews activities
At the historic event:

The Daily has a Birthday

50 years on the campus

IN THE BASEMENT *of the McGill Union on the evening of Friday, February 24, 1961, it would have been hard to believe that The McGill Daily was really celebrating its fiftieth birthday, or that it was the oldest college daily newspaper in the Commonwealth. For, flitting about in the ancient quarters of this students' journal, there were exhuberant youths in the septuagenarian category. Ranged alongside these were others five decades younger. The difference, however, was only in point of chronology. Spiritually speaking there was no distinction.*

Something in the nature of spontaneous combustion occurred at the opening luncheon in the Mount Royal Hotel that day. Even one of Montreal's worst winter storms in years thirty-six hours later failed to dampen the conviviality of the golden jubilee reunion.

The best g . . . d . . . fraternity on the campus" was together again — a diversity of undergrads united with old-timers drawn from all walks of life. Lawyers, doctors, professors, corporation executives, housewives — even some working newspapermen! — had flocked back to their Alma Mater to participate in an unique ceremony. The common bond was service at one time or another between 1911 and 1961 in the cause of The Daily.

This variegated assembly helped to put out the 48-page anniversary issue, which was then promptly mailed to all those lesser graduates who had never experienced the blessing of being a Dailyite.

The publishers of The Gazette and The Montreal Star staged a reception for the one-hundred-and-fifty-strong turnout. McGill's Board of Governors were hosts at a nostalgic banquet in Redpath Hall. And at this culminating event the highlight was the presence (complete with a meaty speech) of the founding editor, W. E. Gladstone Murray.

Speeches were short, drinks were long, reminiscences unending. The whole affair simply substantiated what all McGill Daily men (and women) know: separated by times and climes they may be, but ever McGill Daily men (and women).

The Founder Speaks

W. E. Gladstone Murray, BA '12,
Founding Editor, The McGill Daily

I CONSIDER IT a unique privilege to respond to the toast to "The McGill Daily" on this memorable occasion.

Recalling McGill of 1910 and 1911 is for me an emotional experience. I was born and brought up on a fruit farm in the Fraser River Valley of British Columbia. The nearest village was Maple Ridge where my father taught school for half a century. In my earliest recollections my father frequently spoke of McGill always in terms of enthusiasm and respect. I recall how he emphasized that James McGill was a member of a Scottish family of special distinction. Moreover, there was believed to be some remote connection between our families in Scotland early in the 18th Century. It was indisputably clear that I was destined for McGill if it became possible.

After graduating from King Edward's High School in Vancouver I was admitted to the McGill College of British Columbia where I did my first year in Arts. That was in 1909. In the next year, 1910, a scholarship made it possible for me to come to McGill for the remaining three years with the class of Arts 1912. Afterwards McGill nominated me for a Rhodes Scholarship at Oxford.

Meets Stephen Leacock

The first time I wandered across the campus of McGill I had the good fortune to encounter Stephen Leacock, who, observing that I was in a state of gloom, handed me $2.00. Thus began a friendship that lasted for the rest of Stephen's life. Academic achievement is not always accompanied by humour but Stephen Leacock was not only a great teacher of economics but also the greatest humorist of the English-speaking world of his time. The most abstruse problems of economics and political science were illuminated by his superb humour.

Here is a sample of Stephen Leacock's humour, written after a brief visit to the boarding house where I had lodgings. This is an extract from "Boarding House Geometry" —

(1) Some definitions,—

A single room is that which has no parts and no magnitude.

The landlady of a boarding house is a parallelogram — that is, an oblong angular figure which cannot be described but which is equal to anything.

All the other rooms being taken, a single room is said to be a double room.

Stephen Leacock's encouragement was an important aid in transforming the weekly "Martlet" into "The McGill Daily".

McGill's leadership has become a vital factor in Canada's progress. And it augurs well for the future that those who control and administer McGill today are leaders of exceptional vision. Mr. R. E. Powell, the Chancellor, Dr. Cyril James, the Principal, Dr. David Thomson, the Assistant-Principal, and their colleagues, are not only outstanding citizens, they are conscious of McGill's vital role in a tremendous future for Canada.

Daily Still Effective

"The McGill Daily" continues to be an effective, indeed an indispensable organ of undergraduate opinion reflecting the ideals that have always characterized McGill. The staff of "The Daily", under the able direction of Mr. Morris Fish, Mr. Dennis Coupland, Mr. David Angus, and their associates, not only carry forward and strengthen the tradition of McGill but also instil inspiration for a future so wonderful as almost to baffle the imagination of today's prophets.

Many "McGill Daily" staff members go on to develop Canadian newspapers. Two contemporary examples are Mr. Charles H. Peters, President of "The Gazette" and Mr. David Legate, a senior member of the editorial staff of "The Montreal Star".

Looking forward to the 21st Century I am confident that McGill will remain in the forefront of constructive leadership. The British Commonwealth provides a working model for a Commonwealth of all free peoples throughout the world. McGill will point the way in this as she did in the evolution of the British Commonwealth. Moreover, the emergence of a world commonwealth on the model of the British Commonwealth will lead inevitably to the end of Communist tyranny by internal change and not by world war.

A Different World

Those of you who manage to attend the 100th Anniversary of the founding of "The McGill Daily" in February 2011 will be living in a world so different from ours that you will regard the middle of the 20th Century as we regard the Mediaeval period in Europe. Space travel will be routine. Holidays on planets will be easy to arrange. Contact will have been established with the inhabitants of other planets where growing interest in McGill will guarantee a warm reception for all who can claim association with this University. And I prophesy with confidence that "The McGill Daily" will keep abreast of all developments.

The Paper We Loved So Well

ONE SIGN OF encroaching age, I think, is the frequency with which you find yourself doing things that once you swore you wouldn't be caught dead doing. Back in the days of stern high-principled youth I — and most of the people I spent last weekend with — said over and over again that we certainly wouldn't go in for any of this corny re-union nonsense. Not us. We were unsentimental, clear thinking, and nostalgia had no part in our plans. Of course, we didn't have anything to be nostalgic about. Not then. Nostalgia, like moss, takes a while to accumulate but time has done its work and, when the trumpet sounded for the 50th anniversary of the McGill Daily, a good many of us came running. Others who couldn't make it were there in spirit — and in print — with contributions to the anniversary issue of the paper none of us knew we had loved so well.

The usual barriers of age and position crumbled completely. It was perfectly easy to pitch into a discussion with a dignified gentleman who will not see 70 again, just as it was easy to find a contemporary and compare the number of children each of us has had.

Festivities began Friday morning when the first arrivals registered at Martlet House, the headquarters of the Graduates' Society, on University Street, — then on to lunch, which was a sorting out time during which long separated friends found each other again, exchanged basic information and filled in gaps. "Whatever happened to so and so?" She's living in British Columbia with six children. "Not six!" "Do you ever hear from what's his name?" And so it went. There were two two-generation families among the delegates — a father and son and a father and daughter. Two married couples were on hand as well. A pre-World War I managing editor had married the paper's first Women's Editor and a World War II editor-in-chief came arm in arm with his wife, who looked both familiar and unfamiliar to me. I figured it out after awhile. She has exchanged the glasses she wore as a cub reporter for contact lenses and she just isn't the same girl.

The luncheon was interminable and as disorganized as a children's birthday party — and for the same reason. It was impossible to get the over-excited guests to settle down in one place and eat. It was late in the afternoon before we broke up finally, only to meet again within a few hours to edit the anniversary issue of the Daily.

Marion McCormick, radio station CBM's popular morning commentator, was a member of The McGill Daily staff while attending McGill in the early 1940's. This article is made up of excerpts from her broadcast about the 50th Anniversary Reunion.

The office was noisier and more crowded than it usually is but otherwise unchanged. It seems to have always been shabby, almost as if the architect had planned it that way. Maybe the walls have been painted since my time — or maybe some special kind of paint has been developed that immediately takes on the patina of age and the scrawled comments of generations. The chairs were as splintery as ever and as hard on the stockings and the tables wobbled under the shuddering typewriters.

The windup event took place on Saturday night in the teeth of the gale. We met again for dinner in Redpath Hall, which all but the youngest of us remembered as the Library. One contemporary of mine remembered it so well that she had brought a sweater to wear over her elegant little black dress. "This place was always drafty," she said reminiscently.

The highlight of the evening was the appearance of the anniversary issue, which even the least sentimental of us will fold away carefully. My last recollection was of the rustle of pages, as everybody looked for his own story.

I turned to the present editor, a serious young man who thinks that he will probably become a lawyer although he is already doing part time newspaper work, and asked him if all the sentiment and enthusiasm that had been shown made any sense at all to him. "We're too close to it now," he told me. "But 50 years from now we'll all be back too." I expect they will — and I hope to be able to make it myself.

Morris Fish, second from right, Editor-in-Chief, 1960-1961, shows the Anniversary Issue to Founding Editor Gladstone Murray, BA '12, third from right. Looking on, left to right: C. H. Peters, BA '28, first vice-president of the Graduates' Society and Honorary Chairman of the Reunion Committee; Dean D. L. Thomson, Vice-Principal of McGill; and D. M. Legate, BA '27, Reunion Committee Chairman.

Montreal's Beauty Spot

BY DR. W. H. BRITTAIN
Curator, Morgan Arboretum

McGILL'S MORGAN ARBORETUM, *at Senneville, 25 miles to the west of the city, is one of the beauty spots of the island of Montreal, especially in spring when flowering trees and shrubs are in bloom, and again in the autumn, when the woods are a blaze of colour from the red maples. There are miles of roads, trails and bridlepaths, and it is a very pleasant place at all seasons and attracts many visitors.*

"Those who enjoy the Arboretum should be protected from those who do not appreciate the privilege."

It was established in 1946 as a study centre for the problems of woodlot management, and as an out-of-door laboratory for the course in Woodlot Management. It contains 90 acres of natural woods; 80 acres of reforested area, mass plantings of economic species; 60 acres of sugarbush and a small forest nursery.

The woods contain most of the species characteristic of the region, and these have been supplemented with specimens of other native forest trees from all sections of Canada. In addition, exotic species have been added to this collection when there appeared to be a chance that they might prove of value for either lumber, pulpwood, or landscaping purposes. All these are set out in such a way as to be readily observed, and their growth characteristics, hardiness, and general adaptability noted. All species have been attractively labelled with both their common and scientific names.

No attempt has been made to establish a complete shrub collection, but representatives of the different botanical groups, both native and exotic, have been set out on suitable sites as a matter of interest to our members. For the same reason we have established a small, wild fruit garden, and a demonstration nut orchard — the only one in this part of the world. In addition to all this there is a small forest nursery. The whole area of the Arboretum proper and the adjoining woods are comprised within the boundaries of a bird sanctuary.

The cost of upkeep is, of course, considerable, and, while the University makes an annual grant, the bulk of the financial support is supplied by contributions from the Morgan Arboretum and Woodland Development Association. This organization in turn derives its support from contributions received from wood-using industries, various business corporations, and from many public-spirited, private citizens interested only in supporting this project in woodland conservation. It is the generous support of this body which is responsible for the development of the Arboretum to its present state.

It should be clear that the financial support received from the Morgan Arboretum and Woodland Development Association was not provided to set up a public park and playground, and there was and is no idea of using the area for this purpose. It was designed as a place for study and experiment. Nevertheless, it was hoped that the general public could be permitted to enjoy the facilities of the Arboretum without detriment to the serious purpose for which it was set up. This hope has proved vain.

> Carelessness and outright vandalism has resulted in increasing damage to trees and equipment. Smoking in the woods constitutes a constant fire hazard. Some of the plant species have been brought within danger of extermination from ruthless picking of flowers. Great annoyance has been caused by picnickers scattering litter. It is clear that the liberal policy heretofore followed is no longer feasible. We have now reached the point where we have had to consider the imposition of restrictions, though this is done with great reluctance.

It is appropriate that those who enjoy the Arboretum should be protected from the action of a small minority of visitors who do not appreciate the privilege. It is also considered that our interested visitors should be prepared to contribute to the cost of controlling and policing the area. All those who sympathize with and desire to support the programme of woodland conservation qualify as members of the Association by making an appropriate contribution. All regular members are supplied with cards which entitle them to all the privileges of the Arboretum, including that of attending Arboretum functions, bringing their friends with them on these and other occasions. Family members may receive on request additional permits for each member of their immediate family. Members are urged to bring their cards with them and to co-operate with us by displaying them on request.

ARBORETUM MEMBERSHIP

THOSE ELIGIBLE for membership shall be those who desire to support the work of the Arboretum and who are accepted by the Directors of the Association. There is no membership fee, but classes of membership with suggested contributions are as follows:

(1) Associate ($5.00); (2) Single ($10.00); (3) Family ($25.00); (4) Sustaining $100.00); (5) Company ($200.00); (6) Benefactor ($500.00); (7) Patron ($1,000.00); Life—lump sum ($5,000.00). On receipt of such a donation, the donor will be admitted to the appropriate class of membership as indicated above.

For all others a special category of membership has been set up, to be known as "Visiting Member". As a contribution for a single visit, the sum of 50¢ will be assessed. Those who desire to make more frequent visits will be furnished with a season permit for the period May — October inclusive, for a contribution of $3.00 per person. Visiting members enjoy the right of entry only, but without the privileges accorded regular members. Minor children are admitted free if accompanied by their parents.

These restrictions are applied for the purposes of protection only and not for financial gain. The sums collected in this way have never met the cost of collection and policing. Various groups have special interest in the Arboretum, but it is the firm view of the College authorities, as well as of the Directors of the Association, that entry should be by card only since it has become clear that only in this way can this priceless asset be properly preserved and used.

The Theatre and the University

Frank Faragoh, McGill's Drama Director, Views the Theatre as an Invaluable Aid To Education and Personal Development

THE ROLE PLAYED by the theatre within the university framework, since the time of the student plays in Elizabethan England, has resulted in a repeated history of deadly academic combat between two mighty forces of administration, each championing miniscule ideas. They range from the "rogues and vagabonds" conception, applied to all who are in the theatre or are studying it, to the idea of a campus factory of specialized skills, novelties, and notions, awarding degrees in pottery making and basket weaving. What the theatre was meant to be in a university was left to chance.

Any university not embroiled in this academic death struggle either has no theatrical activity at all, but occasionally sits up and begs for an endowment to build a theatre, or has a theatre group uncomfortably situated on the periphery of a liberal arts curriculum and confined to an aesthetic limbo. Such an organization, in this all too familiar university predicament, is maintained by a skeleton crew, consisting of the loyal, the inspired, the fanatical, the eccentric, the escapist, the esoteric, the original, the creative, the curious, the charlatan, the mysterious, the wonderful, and the accidental. And somehow the show manages to go on.

Quite often, what remains unfulfilled is what the drama, when placed in the college setting, can accomplish. For the students it could begin to form a theatrical background by means of classroom study and active participation in campus productions. In short, it can be an invaluable part of their education and personal development. There has been a great danger in relegating the study of drama to the level of a literary exercise elevating an arid textual analysis, far above the aliveness and emotional impact of an actual performance. Plays have never been writen for reading; they are meant to be performed.

The contribution of the drama should not end here. The students working in an active production ought to have a chance to gain valuable experience in all phases of the theatre. There is no such thing as specialization. All active professionals, though perhaps prominent in one particular capacity, have participated in many branches of the theatre. There are at least 30 positions per show to be filled. The actors comprise one-half to one-third of this number. Depending upon how complex the production is, at least 20 persons are needed to work backstage, on costumes, set design and construction, lighting, properties, publicity, stage-management, etc. There is no reason why a student cannot learn

Photo by Colin Gravenor II

A "cunningly contrived" serpent speaks with Michelle Beausang, as Eve, in a scene from the McGill English Department's latest production "Adam", presented in Moyse Hall March 8 to 11, directed by Frank Faragoh.

the fundamentals of play production in college.

In addition, there should be the opportunity for students interested in playwriting, to have a chance to see their plays produced. Too often it is the custom of theatre groups to neglect the writing talent around them, and instead, to produce outdated commercial plays of little cultural value.

The colleges have a unique chance placed before them — to be both the training ground and starting point for a professional career. The one danger to this scheme of thinking is that there may be an ill-advised attempt at what is considered an "all-professional" show. In all likelihood it will be an imitation, and a poor one at that. This attempt may spring from the perfectly reasonable desire to do the best job posisble. It certainly could contain elements which are truly professional. It is, nevertheless, a college show; of the college, by the college, for the college community. It is not intended as a vehicle for commercial theatre status in academic clothing.

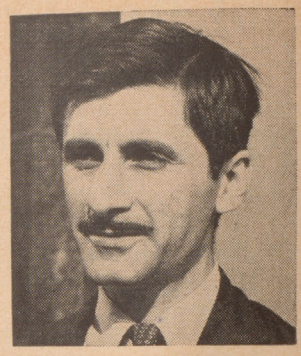

If the fate of theatre in the university is left to chance, then chance determines the success or failure of each enterprise upon its own merits. It determines whether the opportunities particular to a college setting will be taken advantage of. There is the chance to see original plays. There is the chance to see outstanding plays, not done anywhere else. For the students, there is the chance to try to be different, to try to do something never done before, to experiment, to be controversial. After graduation, there may be little opportunity to be original, whether it be in the theatre, or any other chosen field. It could possibly be the last chance, these four years, to be an individual.

If there is any solution to the academic war, raging over the role of the theatre, it is to be found in the talent of these participating individuals. The question of expanding the existing facilities to meet these needs can only be realized in terms of the university's objectives. Will the chances and opportunities of the theatre be expanded? As it now stands, the theatre on campus is an extra-curricular activity that isn't just an extra, it is essential to an education.

Photo by Colin Gravenor II

Jesse Dickson, left, as Abel and Jim Khazzam, right, as Cain, struggle in this scene from the McGill English Department's production of the French mystery play "Adam".

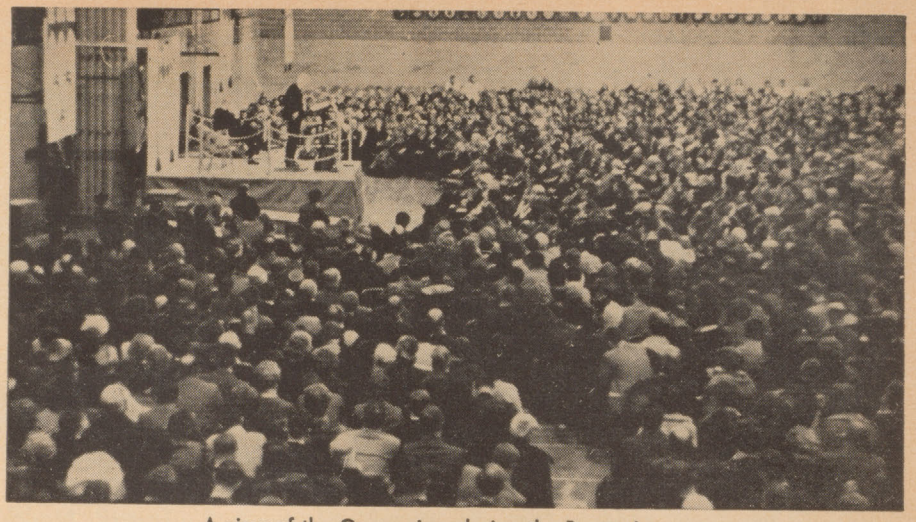

FRANK FARAGOH, the director of Dramatic Productions for the 1960-61 session, has had wide experience in University Theatre. He graduated from the University of California where he belonged to all three theatrical Honour Societies, representing acting, directing and technical work. He directed plays for all three groups and at the same time managed to act in most of the Drama Department's major productions. He also produced two full-length musical comedies and for three years he directed and wrote sketches for the University's annual Mask and Dagger Revue.

In 1955 Mr. Faragoh submitted two plays to the Yale Drama School, plays written while he was with the U.S. Army in Korea, and on the basis of these he was awarded the J. Walter Thompson Fellowship and made a teaching assistant to John Gassner, Sterling professor of playwriting. While at Yale he wrote three more plays, one of which has been tentatively scheduled for publication in an anthology being published by the Yale University Press this Autumn. He holds the degree of Master of Fine Arts in Playwriting and Dramatic Literature from Yale.

Although majoring in playwriting, Mr. Faragoh continued to direct and act, both at Yale and for semi-professional groups. Upon receiving his degree, he joined the staff of the Yale Drama Library where, for the year before his McGill appointment, he was completing the first draft of a play and doing research on Western Americana for a proposed novel.

Toynbee at McGill

A view of the Gymnasium during the Beatty Lectures

McGill University and Montreal will not soon forget Professor Arnold Toynbee, the noted British author and historian. Prof. Toynbee came to the city early in January to deliver the annual Sir Edward Beatty Memorial Lectures. His three brilliant discourses, on January 12, 17 and 19, filled the Sir Arthur Currie Memorial Gymnasium with capacity crowds of 4,000 people on each evening.

While in Montreal — he remained until February 1 — Professor Toynbee graciously fulfilled the terms of the lectureship by participating in a number of meetings with students and faculty of various university departments. One of his meetings was at Hillel House, home of the official Jewish campus organization. Professor Toynbee's remarks at this meeting were to result in a debate with international repercussions.

But first, to the Sir Edward Beatty Memorial Lectures. These will be published by the University at a later date; for the present, it might be appropriate to provide a capsule digest. The entire series fell under the general heading of "The Present Day Experiment in Hellenization".

Lecture 1 — "The Experiment in Hellenization": The experiment in civilization which throws the greatest light on Western civilization is the ancient Greek, or Hellenistic; the rise and decline of Greek empire and culture may foreshadow trends in our society. But mankind can change the course of events if he uses the past to plan intelligently for the future. "History is certainly not bound to repeat itself".

Lecture 2 — "The Attraction of the Western Way of Life": A key point in the development of our Western civilization was when natural science consummated its marriage with technology: this endowed the Western minority with a material power since felt by one non-Western nation after another. People of the modern world must resign themselves to mass suicide or learn to live together as a single family. "I am optimistic the masses will choose the second alternative, but this will be possible only if there is total abolition of existing barriers between nations, races and ideologies."

Lecture 3 — "Parliamentary Democracy on Trial": Humanity needs a world government immediately to save itself from annihilation; it will have difficulty in forming one because the experience of even the most democratic peoples is limited to parliamentary democracy on the national scale. World government will be achieved through a measure of autocracy to counter-balance the inexperience of people in international government; or else through the spirit of a man — like Mahatma Gandhi — a great statesman. "We must start building a world state now on the most practical design that is desirable."

It was on January 25 that Prof. Toynbee laid the basis for the now-famous Hillel debate. On that day he spoke to several hundred students in Hillel House. He told his listeners that the Jewish treatment of the Arabs in 1947 was a "tragedy" comparable, from a moral point of view, to the Nazi slaughter of 6,000,000 Jews. He also disputed the Jews' historical and Biblical claim to Israel as their homeland. The meeting was reported in the local press.

Immediate reaction came from Israel's Ambassador to Canada, Yaacov Herzog. He challenged Professor Toynbee to a "public discussion". The professor's remarks at Hillel, he said, bore "no relationship to morality or to the facts. The truth will not tolerate distortion at the hands of anyone, no matter how eminent."

Professor Toynbee accepted the challenge. The date was set for January 31; the locale again was Hillel House. The historian and the ambassador squared off for the debate before an overflow crowd of students, who jammed the halls, corridors and stairways of Hillel House. Neither man retreated from his stand in the two-hour debate, which attracted a host of local and international newspapermen and every available radio station in Montreal.

The debate covered war crimes, treatment of Arab refugees, the Jews' historic right to Israel, and Professor Toynbee's "the Jew as a fossil" theory of history. It ended with Ambassador Herzog's appeal to Dr. Toynbee to come to Israel to "see the vitality of life and survival without rancor."

This was the last of Professor Toynbee's public appearances in Montreal. He left the city, as he had originally planned, on February 1. It had been a lively month — for McGill, for Montreal and for Hillel House. —A.A.T.

THE CAMPUS

Enrolment? Up, of course

ENROLMENT AT MCGILL for the current school year is nine per cent higher than it was in 1959-60, the University has announced. There are 8,713 students at McGill this year, compared with 7,986 last year.

Of McGill's additional 727 students this year, 542 are in the Faculty of Arts and Science. The next sharpest increase was in the Faculty of Graduate Studies and Research, which enrolled 85 more students this year. Other faculties which noted an increase of students were Engineering, up 52; Physical and Occupational Therapy, up 21; Graduate Nursing, up 13; B.Sc. in Nursing, up 11; Divinity, up five; and Music, up five.

McGill students from Quebec province in degree courses numbered 6,490, or 74.4 per cent of the total, with 899 students from other provinces in Canada, 692 from elsewhere in the Commonwealth, and 632 from the United States and other foreign countries.

There is an overall increase of 11.8 per cent in enrolment in all Canadian universities this year, bringing the full-time undergraduate and graduate student total to 114,000, according to figures released by the Dominion Bureau of Statistics.

McGill's Rhodes Scholar

MICHAEL B. WALKER, 21, of Regina, a student in his last year of Engineering at McGill, has been selected as a Rhodes Scholar by the Quebec Committee of the Rhodes Scholarship Trust. He will do research work in physics at Oxford University in England.

In all, 11 Rhodes Scholars are to be chosen from across Canada this year. The Scholarships are awarded for overall excellence in all phases of school life. They last for two years, and are worth approximately $2,000. a year.

UN at McGill

EXTERNAL AFFAIRS MINISTER Howard Green delivered the keynote address at the first General Assembly meeting of the third annual University Model United Nations, held at the University of Montreal in February. The Model UN is organized by students of McGill University, the University of Montreal, Sir George Williams University and Loyola College, in co-operation with the Montreal branch of the UN Association.

Over 60 American, Canadian and Central American universities sent delegates to the session, and 90 of the 99 countries in the United Nations participated. Embassies in New York and Ottawa, and consulates in Montreal sent diplomatic advisors to assist the students representing their countries.

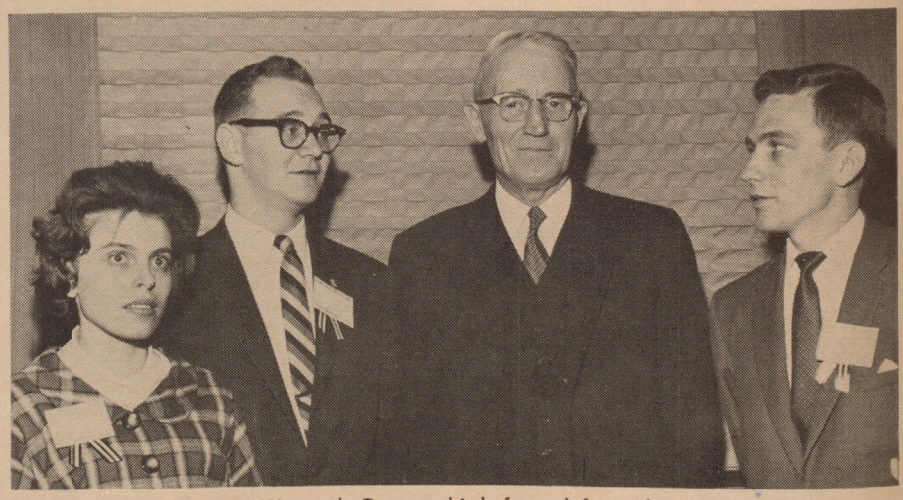

The project is under the honorary patronage of Prime Minister John Diefenbaker, and Opposition Leader Lester Pearson is honorary president. Main goals of the UMUN are to acquaint the students and the general public with the work of the United Nations Organization and its agencies, as well as to give the students an opportunity to debate international problems.

The General Assembly was addressed by a representative from the Russian Embassy in Ottawa, on U.S.S.R. policy, and by W. T. Nunley, sent by President Kennedy, on United States policy regarding the U.N. The Sessions ended with an address by Quebec Youth Minister Paul Gerin-Lajoie.

First Art Exhibit

MCGILL STUDENTS' first art exhibit was set up for public inspection at the University Library in January, and brought forth a variety of talent. Drawing in pencil, ink and charcoal, painting in oil, water colour and tempera, and sculpture were all featured in 70 selections from over 150 submissions.

The exhibition, under the auspices of SCOPE, was formally opened with judging by Alan Jarvis, national director of the Canadian Conference of

External Affairs Minister Howard Green, third from left, with Model United Nations officials. Left to right: Paula Roytmans, McGill, secretary; J. C. Lesperance, University of Montreal, treasurer; and James Hayes, Loyola, chairman.

Sam Etcheverry, former Montreal Alouette star quarterback, left, gazes at McGill's Winter Carnival Queen Nancy Cavanagh, second year Arts Student.

James H. Wilding, left, past president, Macdonald College Graduates' Society, crowns Judy Smythe, first year Education student, "Queen of the Royal".

Arts, Prof. W. O. Judkins, chairman of the department of Fine Arts at McGill, and Dr. Evan Turner, Director of The Montreal Museum of Fine Arts.

First prize in painting was won by Andre Ryerson for his "Still Life"; in sculpture by J. H. Derome, for a carving entitled "Middle Ages"; and in drawing by Morris Charney, for "The Struggle Availeth".

Our Carnival Queen

NANCY CAVANAGH, a second year arts student from Westmount, was crowned Queen of McGill's annual Winter Carnival on the opening night of the festivities, Thursday, February 16. For the first time in Carnival history, the Queen ruled over all Carnival activities which took place during the next two days.

The long weekend celebrations started at 8:00 p.m. on Thursday with a brief ceremony at the ice palace on the lower campus. Postmaster General William Hamilton, taking the place of Prime Minister Diefenbaker who was visiting Montreal but unable to get away from his duties, opened the Carnival by putting a torch to a ribbon. The students then trekked up to Molson Stadium where the Queen was crowned by football star Sam Etcheverry. The four princesses were Jenny Beck, Claudia Hulme and Wendy Laws, all from Montreal, and Roslyn Hees of Toronto.

The Stadium had been temporarily converted into a giant skating rink and was the site of a gala ice show, which included performances by McGill's figure skating club, barrel-jumping, and ice comedians. Thousands of torch-carrying students proceeded to the Chalet on Mount Royal, where a dance and fireworks display climaxed the opening night.

On Friday buses provided transportation to and from Mont Habitant at St. Sauveur, for a day of skiing, skating, and tobogganing. Those who remained in town could attend the largest student debating contest in the Commonwealth, at which contestants from 35 North American universities competed for the McGill Winter Carnival Debating Cup. The giant rink at Molson Stadium was the scene of a skating party that night, while the McGill Redmen hockey team played the University of Montreal Carabins for the Birks Trophy at the McGill Winter Stadium. This was followed by an informal dance at the Sir Arthur Currie Gymnasium, where the Brothers Four provided a musical show.

The only problem encountered by the students was lack of snow. This was partially overcome by the offer of the Governor of Rhode Island, John A. Notte, who, with the aid of two radio announcers from Providence, scooped up a boxful of snow from the south lawn of the Capitol Building and flew it to Montreal. The snow sculpture contest, despite the scarcity of the vital material, saw the usual variety of imaginative and well-constructed entries. Phi Kappa Pi fraternity won again this year, with their masterpiece called "Chug-a-Lug".

The Annual Carnival Revue at Moyse Hall on the Saturday afternoon featured a series of vaudeville acts with top college performers from Canada and the United States. The Carnival Ball, presided over by Queen Nancy, ended the celebrations that night.

Macdonald's Royal

"YOUR FUTURE . . . OUR PURPOSE", was the theme of the 14th annual Macdonald College Royal, the traditional students' winter fair, which opened February 24. The Fair is an attempt to demonstrate the various activities being carried on by the Faculty of Agriculture, the School for Household Science, the Institute of Education and the Handicraft Department of Macdonald College.

Throughout the Royal, the work of the college and all its departments was on display for visitors, many of whom were high school students. In all, there were 17 different exhibits ranging from a puppet show presented by the Institute of Education, to a chocolate cake baking contest. There were also extensive livestock judging programs and competitions in agronomy seed, plant identification and square dancing.

Dr. Ernest Mercier, Deputy Minister of Agriculture of Quebec, was the special speaker at the official opening ceremonies, held at Macdonald's Assembly Hall. During the opening of the Fair, Miss Judy Smythe, of Baie d'Urfe, a first year member of the Bachelor of Education course, was crowned Queen of the Royal by James H. Wilding, past

president of the Macdonald College Graduates' Society.

First place in the booth display was won by horticultural students, while the Home Economics department took second prize.

The Macdonald College 33rd annual Green and Gold Revue ended the day's program. Taking as its theme a South American pageant, the four-act musical revue was called "Los Politicos". Twenty-one songs and three dance numbers were featured in the show, which was produced by Peter Pegg and directed by Geoff Stewart.

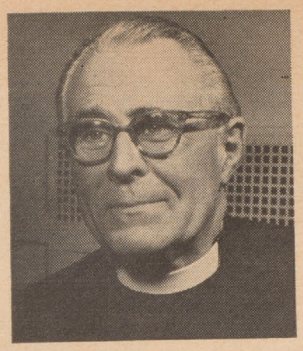

Christian Mission

A UNIQUE, WEEK-LONG Christian Mission was held at McGill in January. Catholic and Protestant students at the University conducted concurrent missions for the first time, at which visiting missioners sought to present Christianity in a form meaningful to the university community. In an extensive program of lectures, panel discussions, private talks and seminars, McGill students were exposed to frank and dynamic ideas on the widest possible variety of subjects.

Chief Protestant missioner was Dr. Donald O. Soper, President of the Methodist Conference in Great Britain since 1953, a socialist well-known for his oratory in Hyde Park, and a leading figure in Britain's Christian pacifist movement, who delivered a five-lecture series on the theme "The Necessity of Revolution in Christianity".

Rev. Eugene Burke was the speaker at the Open Mission for Roman Catholic students, which is sponsored annually by the Newman Club. A noted educator, Fr. Burke is head of the Department of Theology at Trinity College for Women in Washington, and serves as representative of Pax Romana at the United Nations on religious freedom and discrimination discussions. His basic theme was that Christianity is dead unless hope can be rekindled.

The key-note address, sponsored jointly by the Roman Catholic and Protestant mission committees, was delivered by Dr. Charles De Koninck, professor at the University of Notre Dame in Indiana, and a Fellow of the Royal Society of Canada. Dr. De Koninck is on leave of absence as

Dr. Donald O. Soper

professor of Philosophy at Laval University and is the author of several books.

Organizers of the mission were highly enthusiastic concerning its success in reaching a great number of students during the week-long "bull session on Christianity".

Dawson's Old Home

THE UNIVERSITY has acquired the former home of Sir William Dawson, principal of McGill from 1855 until 1893. McGill had bought the property at 3641 University Street, and in the search for title discovered it to be the home purchased by Sir William upon his retirement, and where he lived until his death in 1899. The home was retained by his widow and remained in her estate until 1921. It now becomes an investment property of the University until such time as another use is found for it.

Democracy at Home

DEMOCRACY IN NORTH AMERICA came under careful scrutiny as 100 students from 24 Canadian and nine American universities gathered in Montreal for the fourth annual McGill Conference on World Affairs, held in November. At the four-day conference delegates discussed their topic "Democracy in a Changing World: A Study of North American Society", at round-table sessions and panel debates, and listened to renowned speakers at plenary meetings open to the public. A number of McGill professors and leading educators from other universities guided the students in their discussions. Chairman of the Conference was Daniel Mettarlin, third year law student from Montreal, and Prof. J. R. Mallory of McGill and Prof. J. Y. Morin of the University of Montreal were faculty advisors.

Dr. Frederick Watkins, former head of the political science department of McGill, and author of "The Political Tradition of the West", delivered the keynote address in Redpath Hall. Prof. Henry A. Kissinger, author of "Nuclear Weapons and Foreign Policy", a top U.S. expert on defence and international affairs, spoke the next day on "Foreign Policy". New York Post analyst Max Lerner, a former editor of The Nation, addressed the third open session, discussing some sociological aspects of North American society.

On the last day of the Conference, a question of local interest was tackled when a panel of experts spoke on "Democracy in the Province of Quebec". Panelists were Dr. Mason Wade of the University of Rochester, a leading expert on French Canadian History; Abbe Gerard Dion of Laval University; Prof. Paul Bouchard, also of Laval; and McGill's Prof. Michael Oliver. Jean Louis Gagnon, editor of La Presse, was the chairman of the debate.

TERAR DUM PROSIM

RIDLEY COLLEGE

Residential School For Boys

Ridley College offers boys a sound academic background augmented by a well rounded programme of mental and physical development.

A Memorial Chapel, up-to-date science laboratories, modern classrooms and residences, are supplemented by a well-equipped gymnasium, artificial ice rink, and over 50 acres of playing fields, to provide year round recreational facilities.

Attractive entrance bursaries and scholarships are available for qualifying candidates.

For information and an illustrated prospectus, please write to:

The Headmaster:
J. R. Hamilton, B.A., LL.D.

RIDLEY COLLEGE

FOUNDED 1889

ST. CATHARINES ONTARIO

Play Takes Prize

THE NEWS THAT the McGill Players' Club production of "The People Are Not With Us", a one-act play written by undergraduate James Rother, won top honours in the Canadian intervarsity Drama League Festival climaxed an intense and varied programme of artistic presentations by the students during the winter session.

At the Festival, which took place in London, Ontario in February, the McGill entry won the London Free Press trophy for the best production of a one-act play. It was also awarded the prize for the best Canadian play, and at the same time, Carole Anna Dear, the only female member of the cast, was named best supporting actress.

The 1960 Red and White Revue was another highlight of the dramatic season at the University. Called "O Kennedy (We Stand on Guard for Thee)", it carried on the satire on political affairs which has been typical of the Revue in the past few years, with a light-hearted look at the cold war and Canadian-American relations. This year's show, which ran from February 2 - 8, was directed and choreographed by Brian Macdonald, well-known for his work with previous Revues, and produced by Michael Berry, fourth year Commerce student from Toronto. Book and lyrics were by Bill Lyon, Dave Mayerovitch, and Allan Shiach.

Debating Triumph

TWO MCGILL UNIVERSITY debaters defeated an inmate team at the Massachusetts Correctional Institution in Norfolk, Mass. on January 28, for McGill's first win at the penitentiary in fifteen annual tries. Gordon Echenberg and Irwin Cotler, both fourth year arts students from Montreal, upheld the affirmative of the topic "Resolved that surrender to the Soviet Union is preferable to risking the destruction of humanity in war".

Cotler is a University Scholar, majoring in philosophy and political science, and is president of the McGill Debating Union, a Gold Key debater, winner of the Papineau-Talbot Cup and co-holder of the Hugessen Memorial Trophy for excellence in intercollegiate debate. Echenberg, who is co-holder of the Hugessen trophy, is also a Gold Key debater.

Hard at work on the 1961 edition of the Red and White Revue are, Bill Lyon (with hat), script writer; Pierre Perron, musical writer; and Mike Blumenstein (at piano), assistant musical director.

Liberal Education . . .

(*Continued from page 8*)

the Physical Sciences. Another, and less admirable, but very human, factor is the wish of 'new' subjects for a place in the sun; a factor which is best illustrated, perhaps, by those Schools of Commerce or Business Administration in which a course in principles of advertising begets a course in advertising policies which begets a course in copywriting which begets a course in copy-editing — proliferation without end. Thirdly, there is the character of university departments, themselves. Departments are made up of specialists who are appointed because they are specialists; and this, in itself, is as it should be. But it is easy to pass from the position that a member of staff has an unrestricted right to pursue research in a matter of his own choice, to the practice of adding courses to the undergraduate curriculum simply because they reflect this choice. And, lastly, and before outside critics point a finger at these developments, it should be added that the non-university world is, in itself, far from guiltless in this matter. The same people who will agree, in principle, that our universities 'offer' far too many courses, will, themselves, with respect to particular subjects in which they are especially interested, press the universities to do yet more.

As with other academic trends, this anarchy in the curriculum has gone further in the United States than in Canada, but our own situation gives no ground for complacency. In our own case, there has been a curious combination of close prescription in the first year with an almost complete lack of it in the remaining three. The freshman student's curriculum has been almost entirely laid down for him, but once over that hurdle, he has had almost unlimited choice. The result has been that the general B.A. degree has represented (the Dean would say this without fear of contradiction), at once, one of the stiffest, and one of the easiest, programmes in the university. A candidate who selected certain combinations of courses has been worked to the limit in a well-articulated and demanding programme. A student who selected other combinations has had a very easy passage, indeed.

(*To be continued in Summer Issue*)

THE FACULTY

DR. F. CYRIL JAMES was elected an Honorary Fellow of the London School of Economics and Political Science (University of London) at a meeting of the Court of Governors December 8, 1960.

A former professor of mechanical engineering at the University of Malaya, DR. GERALD T. WARD, has been appointed Director of Research for the Brace Bequest. Dr. Ward is a native of London and received his education

Dr. Gerald T. Ward

at Glasgow and Durham Universities. The $2,000,000 Brace Bequest was set up by the late Major James Henry Brace, president at the time of his death in 1956 of Fraser, Brace Engineering Company. Revenue from the bequest is to be used "for the purpose of providing for and carrying on research for the development of methods or means of eliminating or reducing the salt content of sea water so that it may be used economically and effectively for irrigation; and for the purposes of research into methods of irrigation or other means for making desert or arid land available and economically useful for agricultural purposes."

PROFESSOR WALLACE E. LAMBERT, department of psychology, and his associates in the language research group, have received a grant of $45,000 from the Carnegie Corporation of New York City for study projects now under way. This is the third grant awarded for investigation into the effect upon the individual of learning another language. The other two are one of $20,000 from the United States' Office of Education, Washington, D.C. and a similar one from the Research Institute for the Study of Man, New York.

DR. IRVING J. MASSEY, assistant professor of English language and literature, has been granted an award by the American Council of Learned Societies. He was one of 42 scholars in Canada and the United States to receive a grant in a national competition in the humanities and social sciences. The grants may be used for travel necessary to conduct research in the winner's special field. Prof. Massey will continue his studies of Mary Shelley's editing of P. B. Shelley's manuscripts, with particular reference to the posthumous poems.

DR. HERBERT JASPER, physician-in-charge of neurophysiology and the electroencephalography laboratory of the Montreal Neurological Institute is head of the International Brain Research Organization, sponsored by UNESCO and established last October at an international meeting in Paris.

The chairman of the department of medicine, DR. RONALD V. CHRISTIE spent about three weeks at the University of Ibadan, Nigeria, last December. Dr. Christie went there in an advisory capacity to inspect the medical school and faculty.

On sabbatical leave from the faculty of law, PROFESSOR FRANK SCOTT left Montreal in January on a tour of Southeast Asia and Europe, made possible by a Canada Council Special Senior Award. Professor Scott will do research in human rights legislation in such countries as Japan, Ethiopia and France. He will also visit Hong Kong, Bangkok, Singapore, Djakarta, Rangoon, New Delhi and Cairo. Before he returns to Montreal in mid-May, he will visit his son Peter (BA '49, PhD '55), who is attached to the Canadian embassy in Warsaw, Poland.

DR. JOHN S. FOSTER, former Director of the Radiation Laboratory, was awarded an honorary doctorate of science at a convocation marking the opening of Dalhousie University's Sir James Dunn Science Building, late last autumn.

Four senior members of the faculty have been promoted to the rank of full professor: DR. ORVILLE F. DENSTEDT, biochemistry; DR. CECIL D. SOLIN, mathematics, assistant dean of Arts and Science; DR. JOHN S. STEVENSON, geology; DR. WILLIAM A. WESTLEY, chairman, department of sociology and anthropology. Four promotions to the rank of associate professor have also been announced: DR. K. G. TERROUX, physiology; DR. B. G. BENFEY, pharmacology; DR. J. PRESTON ROBB, neurology, who becomes director of hospitalization at the Montreal Neurological Institute; and DR. PETER G. SCHOLEFIELD, biochemistry, research associate of the McGill-Montreal General Hospital Research Institute.

Promoted to the rank of full professor, left to right: Dr. C. D. Solin, Dr. William A. Westley, Dr. Orville F. Denstedt, Dr. John S. Stevenson.

The Annual Meeting of The Graduates' Society was held in Montreal February 21, 1961. Alan D. McCall, the outgoing President, reported

Wider Participation in the Life of McGill

IN SPEAKING TO YOU at this time last year, Stuart Finlayson forecast expanded activity in the regular work of the Society. I hope to show you in my report how right his predictions were.

During my three years as an officer of the Society, I have been impressed with the value and importance of its work. I have noticed too a trend towards closer relations with the University, and I would like to thank the Chancellor, and the Principal and Vice-Chancellor for their great interest and support which is bringing about a wider participation by the Society in University matters and the life of McGill.

Let me give you three or four illustrations of what I mean:

(a) You will remember that at the suggestion of the Chancellor, a sub-committee of your Board has been studying with Donald Mordell, Dean of Engineering, the formation of a Dean's Committee for his faculty. The nomination of the graduates who are to serve on this important advisory committee have been made by the Society, and I would expect that the Dean's Committee will be constituted early this year.

(b) You will also recall that mention was made a year ago of plans to set up a sub-committee of your Board under the chairmanship of Mr. Justice Hyde to study how the Society might help the University admissions authority in its liaison with High Schools and Private Schools outside Montreal, and the members of this committee were invited to join in the deliberations of the Senate and Governors Commission on Admissions. I have no inclination to try to anticipate the findings of these bodies, but I can say that they have before them extremely important questions bearing on McGill's future. Among these are: (1) size of student body (2) enrollment among faculties (3) methods and standards of student selection (4) revision of admissions procedures. The whole subject is a highly complex one and bears upon the relationship with governments, graduate opinion, national and international recruitment of students, and major questions of University property, plant, and equipment.

We deem it a privilege to have been asked to participate in these discussions and to help where we can in matters of student recruitment. Your Board

Left to right: The Hon. Mr. Justice G. Miller Hyde, BA '26, BCL '29, President of the Graduates' Society; Dean H. Noel Fieldhouse, Faculty of Arts and Science, special guest speaker at the Annual Meeting; Alan D. McCall, BSc '24, past president.

has already agreed to form two experimental sub-committees in the branch organization, to be called Schools Committees and to act as a liaison between McGill's admissions authority and the schools in their areas, once University policy is settled.

Governors Increased

Last spring the Society received further great encouragement from the University when the Governors increased our representation on the Board by two more representatives and the term of office to five years. As a result, the Society elected E. P. Taylor and Stuart Finlayson. This was indeed another milestone along the road of ever closer relations between the University and the Society.

Significant too was Lorne Gales' appointment as Development Officer of the University.

Lorne's assumption of his new responsibilities marks the end of a marvellously successful career as the Society's General Secretary, which started back in 1946.

Lorne's total devotion to the work of the Society has been the key to its success over the past fifteen years, and his great talent and experience in all phases of Alumni work will remain available to us as he will continue to advise the Society in matters of policy and practice in the position of Secretary of the Advisory Council.

General Secretary

In November John Lafleur was appointed General Secretary and has taken over the general direction of the Graduates' Society. We are indeed fortunate in having a man of his ability and experience to follow in Lorne's footsteps.

Central File: Turning to the regular work of the Society which, like that of all Alumni Societies, is based upon the accurate maintenance of a Central File, our records system under the able supervision of Nance Common is a source and fund of information about graduates all around the world. We now maintain a record of over 30,000 graduates.

Reunions: Reunions are each year filling a more important role, and in 1960 the organization of the reunions and new graduating classes was the responsibility of Bob Shaw as Chairman of the Committee directing these matters. The reunion programme this year had two new features. Senior graduates — those from over 50 years ago—returned to McGill at the Spring Convocation and were entertained by the Governors and the Principal, and at Martlet House. In the fall over fifty classes were united, and the special feature was a seminar for graduates on contemporary trends in architecture. This was very favourably received, and our thanks are extended to John Bland, Director of the School of Architecture, for much of the organization and for his participation as one of the two speakers, along with Professor Paul Rudolph, the celebrated head of Yale's Department of Architecture. The talks were outstanding and I believe that McGill will continue the seminar idea with other faculties and departments of the University undertaking similar projects.

New Field Secretary

Branches: The appointment last March of our new Field Secretary, Ted Taylor, signalled an increase in branch activity which is still growing. He has already visited one-third of our 55 Branch Societies. Tim Durley is Chairman of the Branch Activities Committee which looks after this important phase of the Society's activities. During the year new branches in Paris and Nassau were formed and the McGill Society of Hamilton was revived.

McGill News: The McGill News, however, continues to be the main source of keeping graduates informed and, in my opinion, is a great help to the University's public relations. It is not usual to single out particular features or issues of the News in the Annual Report, but I do want to congratulate Monty Berger, Al Tunis and Lloyd Stevenson — Dean of the Faculty of Medicine — for the fine work put into the "Medicine at McGill" issue of the News which has received such wide acclaim.

Montreal Branch: It has seemed to me that graduates too often speak as if the parent Society should be credited with many of the graduate activities which take place in Montreal. I would like to remind you how much of this work is carried out by the McGill Society of Montreal of which Peter Turcot is President. Thanks to its efforts we all enjoy football luncheons — wine tastings — sugaring off parties —Red and White dinners—Christmas concerts — supporting the work of the University and the Society. We are indebted in the same way to Mrs. Hugh Hamilton, President of the Montreal Alumnae, for the very successful public speaking contests, scholarship programme, and special events, which are due to a very active Women's organization.

Student Liaison

Undergraduates Committee: Greater activity is being planned for the Undergraduates' Interests Committee which is designed to bring about a closer liaison with the student body. We feel that the Society can do a great deal for the undergraduates and that the more the students know about the work of the Society the better. Dr Gib Craig is now working out new terms of reference for this committee.

Placement Service: The Placement Board presided over by Paul Smith reports that 1960 was a record year, with the number of job opportunities available to members of the graduating class greater than in 1959 and much greater than in 1958. 1960 also showed a slight improvement in summer placement, but part-time work continues to present difficulties.

AMF Chairman

Alma Mater Fund: This brings me to a part of our work which has been so successful and so encouraging in the past year. How fitting it is that Deane Nesbitt, Lorne Gales and Betty McNab have been able to crown Lorne's fifteen years of service with a record Alma Mater Fund total of $336,939.00. Also significant in this record achievement is the fact that 1960 was the first year in the Fund's history when we were so organized in the Society that the professional fund staff were able to devote their undivided attention to the Alma Mater Fund.

The best news of all is that Deane Nesbitt has agreed to remain as Alma Mater Fund Chairman for another year. I can think of nothing which augurs better for our continued success.

Graduates' Society Awards

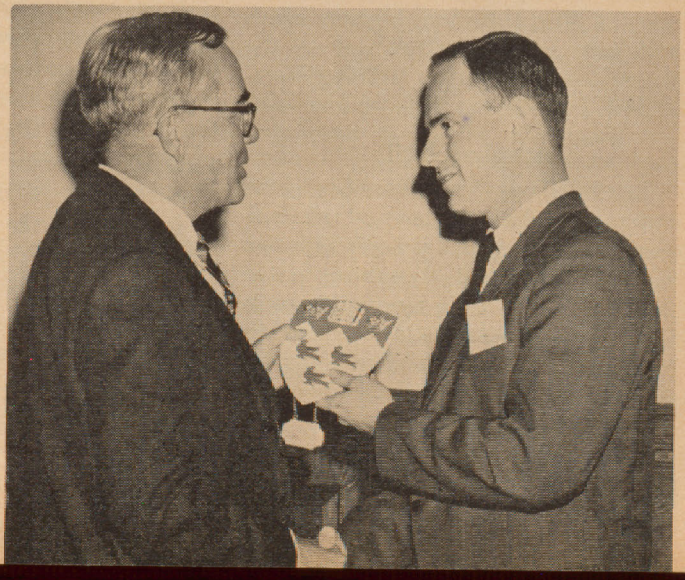

Lieut-Col. H. Harold Hemming, OBE, MC, BA '14, Honorary Life Membership: *"Not only has he served the Graduates' Society as Regional Vice-President and President of the McGill Society of Great Britain, but he has also served all Canadian university graduates in England by his activities on behalf of the Canadian University Society."*

Lieut.-Col. Charles Petch, OBE, ED, BCom '28, Honorary Life Membership: *"He introduced a number of novel features into the program (of the Ottawa Valley Graduates' Society) that have now made (the branch) one of the most active and largest in the entire Graduates' Society organization."*

Gifford Mitchell, BA '34, BMus '48, Outstanding Achievement Award: *"Through his able and sympathetic direction of the McGill Choral Society, he has brought over the years great pleasure to a host of graduates . . . and he has contributed in a major sense to the cultural development of the undergraduates . . ."*

Carl Hansen, MD '61, Outstanding Achievement Award: *". . . As captain of the McGill Redmen (he) deserves our congratulations and our gratitude for leading his team to . . . victory."*

The McGill Daily Asks:

(Editor's Note: The following is an editorial reprinted from The McGill Daily of Monday, January 9, 1961)

WE NOTED WITH INTEREST the attempts to revive the Alma Mater song last term. It was played at football games, at official ceremonies and public meetings while embarassed thousands mumbled something in keeping with the tune, not knowing the words. And why should they?

The last line of the first verse states "Fondly we love thee, our dear old McGill." But is it 'our dear old McGill' in any real sense of the word or simply something conjured up by persons emotionally involved in some facet of the University totally removed from student life?

The song and the Alma Mater itself (which we praise) have no subjective meaning for the average McGill student. The University merely is, in the minds of most students, a practical institution calling itself McGill. It is a place where one may obtain a degree and possibly even substantial higher learning. A student is registered, listens to lectures, writes exams and term papers and at the end of each year receives a slip of paper saying whether he passed or not and listing his approximate marks.

At no time is any real effort made by University officials to make the individual student feel he is an integral part of Old McGill. A University Scholarship is reputedly the highest honor a McGill student can obtain; yet what acclaim does a University Scholar receive aside from having his name printed in some obscure pamphlet printed by the University? Individual and personal attention is virtually nil at McGill. As a result the average graduating student leaves the University feeling he has had little or no concrete identity with McGill.

This is not to deny that McGill University exists as a valuable functioning entity. Besides turning out is yearly quota of graduates, McGill plays an important role in the world of scientific research and scholarly writing. It has

Wilder Penfield Replies:

(Editor's Note: The following letter, from Dr. Wilder Penfield, appeared in The McGill Daily of Thursday, January 26, 1961)

ONE ANSWER to the above question is this: McGill is a University for men and women, not a school for boys. It is a place where a man may discover what education can make of him, where he can find good fellowship, high tradition and a spirit of service — things he might seek in vain elsewhere.

This letter is addressed to the editors of the Managing Board of The McGill Daily, Morris Fish, Denis Coupland and David Angus, after reading your editorial of January ninth. It is submitted for your consideration, not because I claim any privilege as a retired member of the teaching staff but because I am a student, still enrolled at the University. I carried off this copy of The Daily on January ninth and have read it on my way to the west coast, a trip that is being interrupted by talks in three universities.

Admires Daily

Let me express my admiration of the manner in which the news of our University and the world is being reported by The Daily and then turn to the editorial. I will begin by quoting some of it. It is possible that your readers may forget your words! Perhaps those words have not kept them awake at night, as they have me.

Why Hail Alma Mater?
McGill is Impersonal.

"The song and the Alma Mater itself (which we praise) have no subjective meaning for the average McGill student. The University merely is, in the minds of most students, a practical institution calling itself McGill. It is a place where one may obtain a degree and possibly even substantial higher learning. A student is registered, listens to lectures, writes exams . . . What acclaim does a University scholar receive aside from having his name printed in some obscure pamphlet . . . Individual and personal attention is nil at McGill.

"For the University, the student's presence here has meant nothing more than an entry on its rolls; for the student the meaning goes little further. The fact is McGill expresses no interest in the individual student and apparently has no need for him. The singing of 'Hail Alma Mater' is in itself hypocritical."

In closing, the editor softened his cynicism just a little, leaving a faint hope for fellowship, loyalty, affection.

"In time," he wrote, "perhaps a remedy will be found, but this will require much effort and co-operation among students, faculty and the Board of Governors of McGill University".

It is understandable when a member of some minority group writes this way while smarting from social injustice. But those who are big minded in such groups grow out of their resentment. At McGill there is no class or religious discrimination. There is friendship for all who seek it and fellowship to be shared by all who forget themselves, and work toward our common goal in education.

Rewrite Words

If the words of the Alma Mater song are too sentimental, rewrite them; include your clever phrase "nil at McGill" if you must. But don't mope in your tent like Achilles. Enlistment does not make a soldier, nor does matriculation make a student.

One way of teaching a man to swim is to throw him overboard in the element that he must master. Those who

Why Hail Alma Mater?

a world-wide reputation for achievement, a status which it proudly maintains.

The Graduates' Society conducts its affairs with its members on the basis of this reputation and puts forth its appeals for financial assistance on the grounds that this achievement must be continually carried on and expanded. The graduate must be convinced that he is playing a role in the progress of his University although he himself was never in actuality a part of it. We agree that money must be put forward by individuals and corporations to further the cause of education in Canada, but why particularly to McGill? The only apparent reason is that if you're going to give money, you might as well give it to your Alma Mater as anybody else.

Some of the more fortunate students belong to the smaller faculties and in these, at least, some sense of personal identity with the educational institution can be maintained. The professors you meet each day are perhaps the ones who write your textbooks and conduct research; also, you will be able to watch the subsequent careers of your fellow students with some interest for they are individuals whom you have been able to meet and talk to. But this identity goes no farther than your particular faculty.

In essence, a McGill student's identity with the University is basically in name only and even this persists only for the duration of his undergraduate years. For the University, the student's presence here has meant nothing more than an entry in the rolls; for the student, the meaning goes little further. The fact is, McGill expresses no interest in the individual student and apparently has no need for him. The singing of "Hail Alma Mater" is in itself hypocritical, but this is merely a symptom of a more profound existing state of affairs. In time, perhaps, a remedy will be found, but this will require much effort and co-operation among students, faculty and the Board of Governors of McGill University.

Loyalty to a Great Cause

sink do not belong in the boat. Those who swim should be pulled aboard and given an oar. This is the way of a university. Not everyone should try for higher scholarship. The method works best at the graduate level.

I must admit that there may be some basis for your feeling of resentment when we turn to undergraduate years. Your central accusation against McGill is that it is "impersonal". If McGill were a school for boys and girls the charge would be more serious. But there is the transition to be considered. Some undergraduates are immature. The fault is sometimes attributable to feeble teaching and spoon-feeding in the final years of high school. Sometimes it is due to lack of discipline and culture in the homes.

Faculty Advisors

Because of this state of affairs a Canadian university should undertake to help students in the early years. I am strongly of the opinion that a system of providing a faculty advisor for each student (or better preceptors, or best tutors) would help McGill to make a great step forward. The Student Executive and The Daily might consult on such a plan and even help the Principal to launch the endowment campaign to make that possible, as well as more and better residences!

We want McGill to be a place for men and women to work and seek a higher education, not hoping for a shortcut to a degree, a job, a soul-mate or prestige. There are already too many men and women with college degrees who are really uneducated. They have not acquired enough culture to create a home background that is fit to start a schoolboy of the next generation on his way to intellectual maturity.

The undergraduate who discovers what a thrilling world he is entering through his books, who does more than is demanded, who askes even one sincere and searching question, will make a personal contact with the teaching staff. It is what good teachers hope for and wait for.

Your editorial makes this statement: "For the University, the student's presence here has meant nothing more than an entry on its rolls." How dreadful that would be, if true. No, the truth is that every entry represents a hope that here is a good student, one who will learn to swim and become a credit to himself and to his college.

In closing, what is the true answer to your question "Why Hail Alma Mater?" Why feel any affection for "our dear old McGill?"

Those who look at the world and the issues that face mankind today, must know that our hope of salvation lies in higher education. We are part of a private university dedicated to the greatest cause in civilization. It makes little difference what department we belong to, whether arts, science, engineering, agriculture, medicine or law — we belong to a unit in the greatest crusade of all time. Alma Mater is many things to many men — a cause, a company of scholars, a hope for the future, a romantic memory. Why not be loyal?

Human Betterment

Those who can forget themselves and seek knowledge, working toward the cause of human betterment, will always know the lifting power of university fellowship. They will feel affection for the unit in which they are enrolled. They will recognize, as years pass, that the aims of Old McGill are the aims worth working for, and that the fame of Old McGill will be a source of pride to them and to those who expect much of them because they are McGill men.

1960: A Year of Greater Achievement

By ELIZABETH B. McNAB
Director, Alma Mater Fund

> *"McGill University is thankful and proud to have such magnificent support from its graduates. We extend our warm appreciation to them for providing McGill with an important gift of unrestricted funds."*
>
> **R. E. Powell, Chancellor**

FIFTEEN DAYS AFTER December 31, 1960, the closing date of the Alma Mater Fund year, it was clear that McGill graduates had again set a new record of giving to the University. Contributions mailed in the last days of the year, some of them from thousands of miles away, reached their destination in Martlet House, and the 1960 Alma Mater Fund total was announced.

$336,939 was the grand total, almost $40,000 over the previous year; 12,939 graduates contributed, which was 729 more than the 1959 figure.

It should be made clear, however, that there were in fact 2,254 more graduates who made donations in 1960. The reason we can only report a 729 increase is because of the fact that 1,525 graduates who contributed in 1959 failed to do so in 1960. (The percentage of non-repeated gifts is about the same each year). Nevertheless, the percentage of participation figure went up slightly from 44% to 45%, in spite of the fact that the most recent graduating class, numbering 1,100, was added to the roll. As the Red Queen said to Alice, — "It takes all the running you can do to keep in the same place. If you want to get somewhere else, you must run at least twice as fast as that!"

1960 was a year which began with a serious question. The Government Grants controversy, long a source of worry and frustration, was on the verge of solution. McGill could now plan some forward steps, but only with the continued support of its graduates. Would the settlement of previous difficulties have an adverse effect on the Fund? It is a pleasure to report that this was not the case. In fact, 1,839 of the graduates who contributed increased their donations.

In Montreal, the Class Agents' Dinner in Redpath Hall on March 23 set the wheels in motion. Dr. James in his address that evening, outlined the financial situation of the University and the great importance of the unrestricted money which the Alma Mater Fund is providing. "The need for support is greater today than it was before. The opportunities of that support are infinitely greater because, so far as I can see in the future, the thing that you can do for McGill is not merely to hold her head above water, but to enable her to swim faster and to attain once again that eminence that is the envy of other universities", he said.

In November, a six-night Telethon climaxed the programme as 125 Class Agents and assistant Class Agents made calls from Martlet House in a final "clean-up" campaign.

Montreal Results

The Montreal results for the year in the major faculties were as follows:— Architecture, 63.4%, $3,290; Arts & Science (Men), 42.7%, $18,711; Arts & Science (Women), 57.7%, $15,520; Commerce, 61.4%, $16,380; Dentistry, 75.3%, $4,824, (highest participation); Engineering, 59.9%, $40,471, (highest total); Law, 55.4%, $16,289; Medicine, 64.7%, $15,927. The complete total for Montreal Men with Dr. George M. Dundass as Chairman, was $126,845 with 55.3% contributing; for Montreal Women with Mrs. George A. Winters as Chairman, $19,393 with 53% contributing.

Two other large metropolitan areas were over 50%. Toronto Men with a Committee of 100 canvassers and J. Ian McGibbon as Chairman, also held a dinner with Dr. James as speaker. They ended the year with the highest participation figure for the large areas, 58.4%, and the third highest total, $21,794. Toronto Alumnae with Miss Jean M. McNab as Chairman, achieved 52% participation and a total of $3,388.

Windsor Again

Of all regions, Windsor with Kenneth E. Fleming as Chairman, was again at the head of the list, with 88.4% of the 130 graduates in the area contributing $3,355.

As the 1961 year begins, A. Deane Nesbitt, BEng '33, continues as Chairman of the Fund for a second year, and S. Boyd Whittall, BSc '50, heads the Montreal organization.

THE 1935 CLASS GIFT

A notable feature was the 25-year class gift of '35, which amounted to a total of $47,764, and saw three new faculty records established. These were the individual totals:

Faculty		*Chairman*
ARCHITECTURE	$ 70	
*ARTS & SCIENCE	$ 4,290	Dudley B. Dawson
†COMMERCE	$ 2,667	John S. R. Payne
DENTISTRY	$ 325	Dr. Philip Gitnick
ENGINEERING	$17,165	Lorne A. Rowell
*LAW	$ 5,112	Watson Gillean
*MEDICINE	$15,555	Dr. Benjamin B. Whitcomb
R.V.C.	$ 2,580	Mrs. Robert P. Brodie

***Record 25-year gift for this Faculty**

Obituaries

Charles F. Sise

CHARLES F. SISE, BSc '97, an Honorary Life Member of The Graduates' Society, former president and later chairman of the board of the Bell Telephone Company of Canada died in Montreal November 10 at the age of 86.

Born in Boston, Mass., Mr. Sise was educated at Lincoln College, Sorel, Bishop's College School, Lennoxville and at McGill, where he graduated in electrical engineering.

He was the fourth president of the Bell Telephone Company of Canada and a son of the founder of the company, the late Charles Fleetford Sise, Sr., who came to Montreal from Boston in 1880 to lay the foundation for the Bell of Canada organization.

Prior to joining the company in 1899, Mr. Sise had worked for the Northern Electric Company, the Ottawa Electric Company, the American Telephone and Telegraph Company and the Western Electric Company. He became president of Bell in 1925.

Mr. Sise was an active worker on behalf of McGill University, which benefited a great deal from his loyalty. He was one of the chief pioneers of the project for the Montreal Concert Hall, which is about to become a reality.

William A. Mather

WILLIAM A. MATHER, BSc '08, LLD '56, chairman of the Canadian Pacific Railway Company, died in Winnipeg January 2 at the age of 75, following an illness of four months.

Born at Oshawa, Ont., Mr. Mather attended public and high schools at Kenora, Ont., before enrolling for engineering at McGill. While attending university, he worked with the CPR during the summer months in various capacities and upon graduation he took permanent employment with the company's engineering department.

Mr. Mather was elected chairman of the Canadian Pacific Railway Company in May 1955, after serving as president for seven years. Before his election as president, he had been operating vice-president at Winnipeg since 1942.

Mr. Mather was also chairman of Canadian Pacific Steamships Limited and Canadian Pacific Airlines Limited.

He was director and member of Executive Committee, Consolidated Mining and Smelting Company of Canada Limited; director Canadian Pacific Express Company; West Kootenay Power and Light Company; Canadian Marconi Company; Toronto, Hamilton and Buffalo Railway; Scottish Trust Company, and other companies.

Mr. Mather was a member of the advisory committee of Canadian Standards Association and a director of the Canadian Forestry Association. He was an honorary president, Montreal Division, Navy League of Canada, and honorary chairman, Canadian Paraplegic Association. In December, 1952, he was created Knight of Grace of the Order of St. John of Jerusalem.

Frederick M. Turnbull

DR. FREDERICK MYLES TURNBULL, Los Angeles, California, died at his home in Hollywood January 13, 1961. Born March 19, 1885 at Bear River, N.S., he graduated from McGill University in 1909 and took specialty training in Eye, Ear, Nose and Throat at New York Post Graduate Medical School Hospital from 1909 to 1912.

He practised in Duluth, Minnesota from 1912 to 1927, where he founded a clinic and attended St. Luke's Hospital. He moved to Los Angeles in 1927 where he practised otolaryngology and attended the Good Samaritan Hospital until his retirement in 1959.

He was a Diplomate of the American Board of Otolaryngology, a Fellow of the International College of Surgeons, and a member of the American Medical Association, American Academy of Ophthalmology and Otolaryngology, California Medical Association, Public Health League of California, Pacific Coast Oto-Ophthalmological Society, Los Angeles County Medical Association, Research Study Club, and Director of the Los Angeles County Physicians Aid Association.

He won wide recognition for his work and special interest in diseases of the nose and sinuses. He was the author of numerous articles relating to these problems and was a pioneer in the development of surgical techniques in the treatment of sinus disease.

Sir Charles S. Tupper

SIR CHARLES STEWART TUPPER, Q.C., BA '05, one of the few remaining Canadian holders of a British title and a well-known lawyer, died in Winnipeg July 13 at the age of 75.

Sir Charles was born in London, England, while his grandfather, Sir Charles Tupper, one of the fathers of Confederation, was High Commissioner for Canada. His father, James Stewart Tupper, an eldest son, died in 1915 leaving his son to inherit the baronetcy several months later, upon the death of the High Commissioner.

Sir Charles was educated in England and returned to Canada to attend Upper Canada College and McGill University. He practised law in Manitoba following his call to the bar in 1908 and was senior partner in the firm of Tupper, Adams and Adams. He was created a King's Counsel in 1928.

Edward C. Hart

EDWARD CHARLES HART, MD '94, who served as coroner for the city of Victoria, B.C., for 62 years, died in that city October 31 at the age of 90.

Born in Nova Scotia, Dr. Hart practised medicine in the Maritimes after graduation from McGill. He then went to Victoria as superintendent of the Jubilee Hospital. Three months later he began private practice and he was named coroner in 1898.

He had a distinguished career during the First World War, rising to the rank of Colonel and he spent nearly six years overseas. He was made a Companion of St. Michael and St. George.

Honours for a Metallurgist

Ronald R. McNaughton, B.Sc. '23
Is the first Canadian to head the
American Institute of Mining,
Metallurgical and Petroleum Engineers.

RONALD R. MCNAUGHTON, Manager of the Metallurgical Division of The Consolidated Mining and Smelting Company of Canada Limited, has received two signal honours, one the office of President for 1961 of the American Institute of Mining, Metallurgical, and Petroleum Engineers and two, the award of the Selwyn G. Blaylock Medal by the Canadian Institute of Mining and Metallurgy for 1960.

Mr. McNaughton was born in Vancouver, B.C., entered McGill University in the fall of 1919, and graduated with the degree of Bachelor of Science in Metallurgical Engineering in 1923. He joined Cominco at Trail, B.C., in January 1924 and had the good fortune to be associated with the late Selwyn G. Blaylock for many years.

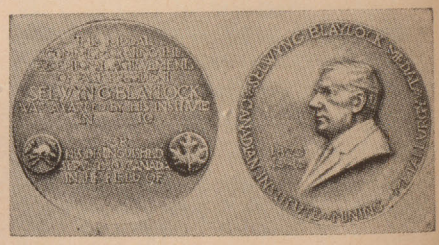

During the past 37 years Mr. McNaughton has held a series of posts of increasing responsibility and widening interests and became Manager of the Metallurgical Division of Cominco in 1946. He has been closely connected with the expansion of their large lead and zinc reduction plant, and directly responsible for the very extensive modernization programme of the past decade and a half.

He has made many direct contributions to his profession as a metallurgical engineer, and through his active interest in professional societies has built a reputation as an outstanding metallurgist and as one who is able and willing to assume positions of leadership in these societies. The many offices he has held in the various working committees of these societies and the discharge of his responsibilities has commanded the respect of the memberships at large.

Held Several Positions

With the A.I.M.E. he served as Chairman of the Extractive Metallurgy Division in 1953, Chairman of the Metals Branch in 1954, and afterwards was a member of the Executive Committee of the Institute. In February 1960 he was honoured by being made President Elect of the Institute and has taken office as the President of the A.I.M.E. on March 1, 1961. This is the first time that the honour of being President has gone outside the United States and it is a resounding tribute that the Society's 36,000 members in the metals, mining and oil industries have given Mr. McNaughton. We are sure that the Society's affairs are in excellent hands and our congratulations go to him.

In 1948, the Canadian Institute of Mining and Metallurgy established the award of the Selwyn G. Blaylock Gold Medal as a memorial to the late and distinguished member of the Society. Selwyn G. Blaylock was one of McGill's illustrious sons receiving a B.Sc. in 1899 and serving as a Governor of the University from 1942 to 1945. He was President of the C.I.M. during 1934-35. He brought the Great Sullivan Mine in British Columbia into large scale production and developed the lead and zinc smelter at Trail, B.C.

Mr. Blaylock took a personal interest in all employees and particularly those with a technical background. Mr. McNaughton was one of these and it is fitting that the Canadian Institute of Mining and Metallurgy has seen fit to recognize Mr. McNaughton's many contributions to metallurgical developments in Canada and abroad by the award of the Selwyn G. Blaylock Medal at its Annual Meeting in Quebec in March 1961.

Mr. McNaughton has a charming personality which inspires confidence and friendliness in all who meet him. He and his wife, the former Dorothy Millen, have their home in Trail. They have two sons, both married. He takes an active part in local and community affairs and when time permits obtains recreation at the golf course. —McE.

Calvin Stowe McLean, B.Sc. '10
Arrived unknown in South Africa
Just over fifty years ago.
Today, he's top in his field.

The Miner from McGill

FIFTY YEARS AGO last October — on the 10th day of the 10th month in the year 1910 — a 22 year-old Scots-Canadian joined the South African gold mining industry. Since that time, Calvin Stowe McLean, BSc '10, has held the highest offices in an industry to which he has made a considerable personal contribution.

Recognition of Mr. McLean's distinguished career came recently with his appointment as President of the Seventh Commonwealth Mining and Metallurgical Congress which will be held in Southern Africa during April and May, 1961. In this capacity, he will preside over the discussions of the leading mining men in the Commonwealth — a fitting role for a man who has given so much of himself to mining.

Arrives Unknown

Mr. McLean arrived in the Transvaal unknown, determined to seek adventure and experience, shortly after receiving his degree in Mining at McGill. In his first four years, he held four jobs, moving from one mine to another, part of a process of gaining practical experience to reinforce his outstanding academic career. After service on the underground staff, he was made a mine-overseer in 1914.

In February, 1920, Mr. McLean joined the General Mining and Finance Corporation Group, with which he has been ever since. He was the manager of the Roodepoort United from where he went to the old Meyer and Charlton. The success he made of these two appointments resulted in his joining the West Rand Consolidated mine in March, 1923, as General Manager. For 13 years he guided the destinies of that property and during the time he raised its milling rate about 400,000 tons a year to two million tons a year, increasing its profits from about £50,000 a year to £1,144,000 a year.

Dividends Increase

For many years before Mr. McLean took over, the mine did not pay dividends but by the time he left to join the head office staff as consulting engineer in 1936, the rate of dividend was 25 per cent. For a 14-year period ending in 1950, Mr. McLean was consulting engineer to the General Mining Group. He was then appointed Deputy Chairman and Technical Director, offices he still occupies today.

His services have not been confined to the technical affairs of his Group; he has given generously of his time to the industry as a whole. Since 1941 he has been a member of the Gold Producers Committee of the Chamber of Mines and on three occasions has been President of the Chamber.

His intimate knowledge of West Rand Consolidated and of the place which that mine has subsequently occupied as a major uranium producer, brought him into close association with the South African uranium project. He has been a member of the South African Atomic Energy Board since 1955; he has been chairman of Calcined Products (Pty) Ltd., since 1958, and a member of the executive, Production and Sales Committees of the Atomic Energy Board since their inception.

Interest in Safety

Safety in the mines has always been one of Mr. McLean's deep interests and since 1956 he has been chairman of the Prevention of Accidents Committee of the Chamber of Mines. His mind is constantly searching for new ideas which would promote greater safety in an industry with a worldwide reputation for its safety record.

WHERE THEY ARE
and what they're doing

Being a compendium of what has reached us since the last issue. *The McGill News* would like to be more complete in its coverage and would be grateful to branch secretaries, and other graduates, for collecting and forwarding any worthy news items they see.

'08

Roderick B. Dexter, MD '08, was recently honoured by the State of Massachusetts by the dedication of a large medical facility at Foxborough, Mass., "to be known as the Dr. Roderick B. Dexter Treatment Center in lasting recognition of Dr. Dexter's great service to the public as a humanitarian and public spirited citizen".

'15

H. Grey Massiah, MD '15, of St. Michael, Barbados, was knighted in the Queen's Birthday Honour List, 1960.

Hon. J. Arthur Mathewson, Q.C., BA '12, BCL '15, LLD '43, of Montreal, has been appointed chairman of the board of The Ogilvie Flour Mills Co., Ltd.

Errol B. Shand, BSc '15, of Corning N.Y., is the author of a technical paper which appears in the January issue of The Journal of the American Ceramic Society.

'16

Hon. F. Philippe Brais, Q.C., C.B.E., BCL '16, has been elected a vice-president of Banque Canadienne Nationale.

Charles O. Monat, BSc '16, of Montreal, has been elected chairman of the board of C. O. Monat & Co. Ltd.

'17

I. Jocelyn Patton, BA '17, MSc '24, of Montreal, has been appointed medical director, pharmaceutical division, of Paul, Phelan and Perry Ltd.

'18

Hugh A. Crombie, BSc '18, of Montreal, has been re-elected president of the Canadian Association of Machinery and Equipment Manufacturers.

Benjamin Robinson, BCL '18, has been appointed a judge of the Quebec Superior Court in the Montreal District.

'20

Hon. George B. Foster, Q.C., BCL '20, has been elected to the board of directors of Radio Station CJAD in Montreal.

'21

Kenneth A. Wilson, Q.C., BCL '21, of Montreal, has been elected to the board of directors of The Eastern Trust Co.

'22

Charles L. Brooks, BSc '22, assistant general manager, Montreal area, the Bell Telephone Co. of Canada, has retired.

Clayton Foster Elderkin, BCom '22, has been appointed a Governor of Carleton University. Mr. Elderkin is Inspector General of Banks, Dept. of Finance, Ottawa.

John Long, Q.C., BCL '22, has been appointed a judge of the Social Welfare Court of Montreal.

'23

D. W. Ambridge, BSc '23, has been elected chairman of the Canadian Council of the National Industrial Conference Board.

Thomas W. Eadie, BSc '23, received an honorary doctorate of science from Dalhousie University at the occasion of the opening of the Sir James Dunn science building at that University on Oct. 29, 1960.

Donald B. Foss, BSc '23, of Grand'mere, Que., has been appointed vice-president, in charge of manufacturing, of the Consolidated Paper Corp. Ltd.

T. R. McLagan, BSc '23, of Montreal, has been elected to the board of directors of Sperry Gyroscope Co. of Canada, Ltd.

Arthur W. Peters, BSc '23, of Montreal, has been appointed chief engineer, distribution supply planning, in The Shawinigan Water and Power Co.

Clifford P. Wilson, BCom '23, is now assistant director, National Museum of Canada.

'24

Arthur L. James, C.B.E., BSc '24, of Ile Bizard, has relinquished his appointment as vice-president of Bristol Aero-Industries Ltd., but will remain as an active member of the board of directors and as a consultant to the company.

'25

Myer Gameroff, Q.C., BCL '25, has been elected to the board of directors of the Montreal Advocates' Benevolent Association.

J. M. Sharpe, BSc '25, of Montreal, has been appointed executive assistant, production and power operations, of The Shawinigan Water and Power Co.

Herbert H. Stein, BCom '25, of Montreal, has been appointed president and managing director of Affiliated Factors Corp.

'26

Herve A. Gauvin, BSc '26, of Sillery, has been appointed Deputy Minister of the Quebec Department of Public Works.

Phillip Norcross Gross, BSc '26, of Montreal, has been appointed honorary Lieutenant Colonel of the 3rd Field Engineer Regiment, Royal Canadian Engineers (Militia).

Kathleen Jenkins, BA '26, chief librarian of the Westmount Public Library, has been granted leave of absence from the City of Westmount to become executive director of Canadian Library Week to be held in April 1961.

Willard H. Kyle, BSc '26 is vice-president of the Canadian National Railway's newly created St. Lawrence Region.

Meredith H. Moore, BSc '26, has been transferred from Shawinigan to Niagara Falls, Ont., as a consultant, by Canadian Carborundum Co. His initial assignment will be in a consulting capacity to the company's plants in Brazil.

George Beverly Puddicombe, BA 23, BCL '26, has been appointed a judge of the Quebec Superior Court in the Montreal district.

'27

Alan F. Fowler, MD '27, has been appointed a Senior Physician and director of the new sub-department of Diabetes and Endocrinology at the Montreal General Hospital.

'28

Fraser F. Fulton, BSc '28, of Montreal, has been promoted from general manager to vice-president and general manager, telephone contract division, for Northern Electric Co. Ltd.

'29

James M. Crawford, BSc '29, MEng '32, of Montreal, has been named manager of the newly formed system planning and engineering department in The Shawinigan Water and Power Company.

J. B. Handfield, BCL '29, of Montreal, has been appointed a Queen's Counsel.

Lawrence Marks, BA '29, of Montreal, has been appointed a Queen's Counsel.

'30

Murray G. Ballantyne, BA '30, MA '32, has been elected a director of St. Mary's Hospital, Montreal.

John H. Mellor, BSc '30, has been appointed assistant manager, engineering, at Canadian Copper Refiners, Montreal East.

H. H. Warren, BCom '30, CA '31, of Montreal, has been elected president of Belding-Corticelli Ltd.

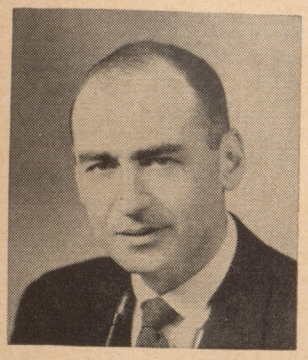

'32

S. A. Cobbett, BCom '32, has been appointed general manager of the Montreal Trust Co.

Frederick S. Hobbs, MD '32, of Vancouver, was recently elected president of the B.C. division of the Canadian Medical Association.

'33

Lawrence M. Baxt, BSc '33, MSc '34, has

Lawrence M. Baxt, BSc '33, MSc '34

been named a senior scientist at the corporate Philip Morris Research Center at Richmond, Va.

John Laing, BCom '33, of Montreal, has been appointed a director of the Wawanesa Mutual Insurance Co.

James E. Potts, BEng '33, of New York, has been appointed a vice-president of Union Carbide International Co., division of Union Carbide Corp.

'34

Morton Bloomfield, BA '34, MA '35, of Montreal, has been named to the faculty of English at Harvard University.

Esther Kerry, DipSocWk '30, BA '34, MA '39, was the first recipient of the Distinguished Graduate Award presented by the Alumni Association of the McGill School of Social Work.

William Mitchell, BCL '34, of Sherbrooke, received an honorary doctorate of civil law from Bishop's University at a special convocation held the end of October.

M. Laird Watt, BCom '34, has been appointed to the board of administration of the Montreal Children's Hospital.

'35

Peter M. Laing, Q.C., BA '35, of Montreal, has been elected a director of The Ogilvie Flour Mills Co., Ltd.

Howard J. Lang, BEng '35, has been elected to the board of directors of St. Mary's Hospital, Montreal.

R. R. McLernon, BCom '35, of Montreal, has been named to the Corporation of Bishop's University.

James G. Ripley, BEng '35, has moved to Don Mills, Ont., and is now chief editor of Engineering and Contract Record, a Hugh C. MacLean Ltd. publication.

Jack Vinokur, BA '35, of Ottawa, has been named chief of the appeals division of the Civil Service Commission.

'36

Crawford Gordon, BCom '36, is chairman of the board of Gordon & Perras Travel Development Corp. Ltd., a new subsidiary of Gordon Enterprises Ltd., Montreal.

'37

Carlos A. Hull, BA '37, of Montreal, was recently appointed general sales manager of British Titan Products (Canada) Ltd.

Donald King, BEng '37, has been named vice-president, in charge of a new department to be called system planning and engineering department, of The Shawinigan Water and Power Co.

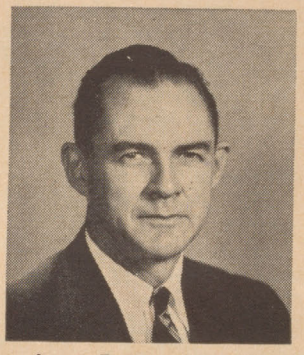

James E. Morgan, BA '37, of Fort Chambly, Que., has been named supervisor of investments at head office of The Royal Bank of Canada.

John A. Nolan, Q.C., BA '34, BCL '37, has been elected to the board of directors of the Montreal Advocates' Benevolent Association.

'38

Jesse E. Bigelow, BA '38, has moved to Edmonton to assume his new duties as minister of the Westmount Presbyterian Church in that city.

Harry E. G. Dupuy, BEng '38, of Baie

James E. Potts, BEng '33

d'Urfe, Que., has become a partner in Canapower Thermal Specialties, Ltd., (formerly F. S. B. Heward & Co., Ltd.), with the duties of vice-president and general manager.

Maurice R. Hecht, BSc '38, MSc '42, of Toronto, has been appointed vice-president, statistics and research, of the Montreal Stock Exchange and the Canadian Stock Exchange.

Grant Horsey, BCom '38, of Toronto, has been elected a director of Iroquois Glass Ltd.

James S. Houghton, BEng '38, of Montreal, has been appointed sales engineer, steel industry, of the Dominion Bridge Co.

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

Gaudet: To Gerald, BArch '53, and Mrs. Gaudet, a daughter.

Gauthier: To Beverley (Parsons, Mac Teach '54), and Jacques Gauthier, a daughter.

Giles: To Henry J., BCom '48, and Mrs. Giles, a son.

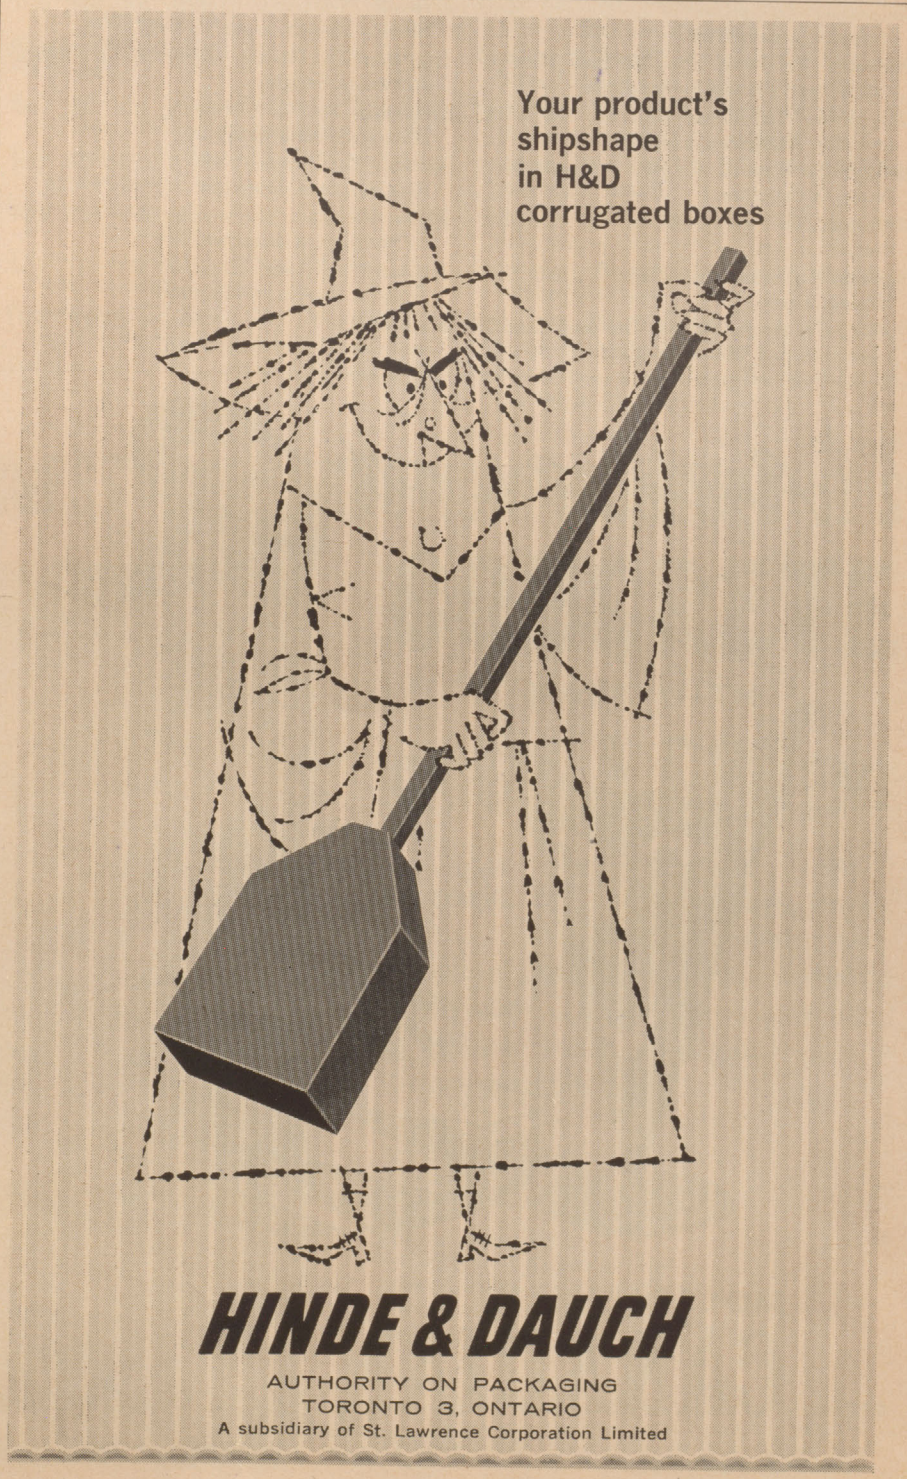

Gillingham: To Bruce, BCom '52, and Mrs. Gillingham, a son.

Glanville: To Roger, BEng '57, and Dinah (Freeborough, BA '54), a daughter.

Goldsmith: To Francine (Calp, BA '56), and A. Lloyd Goldsmith, a daughter.

Goldstein: To Stanley, BSc '56, MD '60, and Mrs. Goldstein, a daughter.

Goodeve: To A. George, BCom '47, and Mrs. Goodeve, a son.

Gordon: To Bruce A., BCom '58, and Mrs. Gordon, a son.

Gray: To Shirley (Pidduck, Physio '48), and John Gray, a son.

Gross: To Martin, BA '57, BCL '60, and Eleanor (Kaminsky, BA '59), a daughter.

Groves: To Stanley, BSc/Agr '56, and Mrs. Groves, a daughter.

Gubitz: To Irving, BA '52, and Mrs. Gubitz, a son.

Gutelius: To John, MD '55, and Mrs. Gutelius, a son.

Halperin: To Irving, BCL '52, and Mrs. Halperin, a daughter.

Harrold: To John, BSc '57, and Marilyn (McRobert, BA '56), a daughter.

Hasegawa: To James, BSc '56, DDS '58, and Mrs. Hasegawa, a son.

Henry: To Ross A. C., BCL '49, and Mrs. Henry, a daughter.

Herman: To Harvey, BCom '56, and Mrs. Herman, a son.

Heslop: To Robert, BSc/Agr '53, and Mrs. Heslop, a son.

Hollis: To Reginald, BD '56, and Marcia (Crombie, BA '58), a daughter.

Hooker: To Milt, DipAgr '56, and Mrs. Hooker, a son.

Hoyle: To Joan (Stafford, BA '48), and William Hoyle, a son.

Hubbard: To Margaret (Smart, BSc '58), and Michael Hubbard, a son.

Hugessen: To James, BCL '57, and Mary (Stavert, BA '55, BCL '58), a daughter.

Hutchison: To Eric, BA '42, and Mrs. Hutchison, a son.

Hyman: To Anne (Matthew, BA '51), and P. G. Hyman, a daughter.

Hyman: To Guita (Nadell, BA '55), and Stanley Hyman, a son.

Ingram: To Donald, BEng '56, and Mrs. Ingram, a daughter.

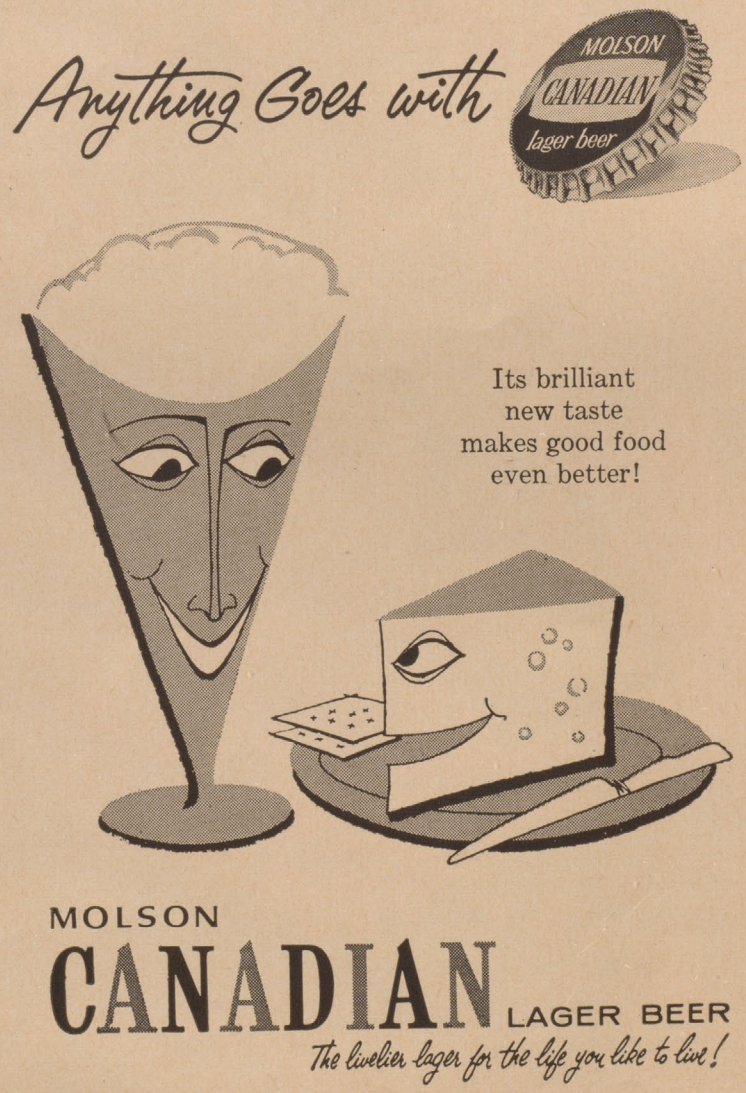

Jackson: To Pat (Johnston, BA '49), and Noel Jackson, a daughter.

James: To Clarence, BSc '52, MD '56, and Mrs. James, a daughter.

Jipp: To Lois (Newmark, BA '52), and Lester Jipp, a daughter.

Junkin: To Anne (Bascom, BA '57), and Douglas Junkin, a daughter.

Kadonoff: To Joan (Pesner, P&OT '56), and Gerald Kadonoff, a son.

Kirshnblatt: To David, BCL '54, and Mrs. Kirshnblatt, a daughter.

Laidley: To Charles, BEng '56, and Mrs. Laidley, a daughter.

Landori-Hoffmann: To Robert, BCom '56, and Mrs. Landori-Hoffmann, a daughter.

La Vigne: To Elizabeth (Flynn, BA '57), and Wilf La Vigne, a son.

Lawrence: To Donald, MD '57, and Mrs. Lawrence, a daughter.

Le Dain: To Gerald Eric, BCL '49, and Mrs. Le Dain, a son.

Le Feuvre: To Anne (Connolly, BA '53), and Patrick E. Le Feuvre, a son.

Leitch: To Malcolm, DDS '55, and Mrs. Leitch, a daughter.

Lewin: To Judith (Oelbaum, HMKR '57), and Bernard Lewin, a daughter.

Lillie: To John, BSc '57, and Gill (Cowan, BSc '56), a daughter.

Little: To Scott W., MD '58, and Mrs. Little, a son.

Logan: To James C., BA '33, and Mrs. Logan, a son.

Luby: To Thomas, DDS '55, and Mrs. Luby, a daughter.

Lugar: To Rexanne (Moore, BSc/PhyEd '54), and D. Anthony Lugar, twins, a daughter and a son.

Luks: To Sam, BEng '55, and Ethel (Hartman, P&OT '55), a son.

Lundell: To Frederick W., MD '51, and Mrs. Lundell, a daughter.

Lundon: To John R., BA '55, and Mrs. Lundon, a son.

MacDonald: To William K., BA '39, MD '43A, and Mrs. MacDonald, a son.

Mackintosh: To Anne (McKim, BA '56), and C. Douglas Mackintosh, a son.

Macklem: To Peter, MD '56, and Joy (Belcourt, BSc '51), a daughter.

MacRae: To Frank, BA '40, MD '42, and Mrs. MacRae, a son.

Mandelcorn: To Elaine (Nathanson, BSc '55), and Leonard Mandelcorn, a daughter.

Markanen: To Murray, BEng '57, and Jean (McGillivray, BA '52), a daughter.

McCallum: To John, MD '56, and Dorothy (Nichol, BA '53, DipPT '56), a daughter.

McConnell: To Gordon R., BEng '43, and Mrs. McConnell, a daughter.

McDowell: To Anne (Bagshawe, BA '53), and Michael McDowell, a son.

McFarland: To Harold, BSc '51, MD '55, and Mrs. McFarland, a son.

McGowan: To Kenneth, BSc/PhyEd '53, and Mrs. McGowan, a son.

McHaffie: To Gerald, BSc/Agr '53, and Mrs. McHaffie, a daughter.

McIntyre: To Edmund Hugh, BEng '53, and Rose (MacFarlane, BSc '55), a daughter.

McKay: To A. Ronald, BEng '55, and Mrs. McKay, a son.

McKeen: To William, MD '59, and Mrs. McKeen, a daughter.

McKim: To Anson R., BEng '57, and Mrs. McKim, a son.

McPherson: To Kenneth F., BLS '49, and Beryl (Reid, BA '48, BLS '49), a daughter.

McVey: To Vaughan, BSc '57, and Mrs. McVey, a son.

Mergler: To Leo, BSc '42, MD '49, and Mrs. Mergler, a daughter.

Mill: To Thomas, BArch '58, and Mrs. Mill, a son.

Miller: To Alec, MD '47, and Shirley (Mooney, BSc '47, BSW '48, MSW '50), a son.

Mingie: To Peter G., BA '52, MD '59, and Mrs. Mingie, a daughter.

Mitchell: To Robert, DipAgr '55, and Mrs. Mitchell, a daughter.

Morgan: To John D., BCom '52, and Norma (Dewitta, BCom '50), a son.

Nathanson: To Robert, BCom '50, and Muriel (Steinhause, BA '55), a daughter.

Nichols: To Thomas M., MD '59, and Margaret (McLetchie, BA '56, BLS '57), a son.

Nielsen: To Niels, BA '51, MA '54, and Joan (Anderson, BA '56), a son.

Nixon: To Murray, MD '60, and Mrs. Nixon, a son.

O'Brien: To Edward, MD '52, and Mrs. O'Brien, a daughter.

Ogilvy: To John, BA '52, BCL '55, and Ann (MacLeod, BA '51), a son.

Olney: To Gerald, MD '59, and Audrey Anne (Wolfe, DipPT '59), a son.

Orr: To Milton, BCom '49, and Mrs. Orr, a son.

Pajari: To George, BSc '58, and Mrs. Pajari, a daughter.

Patch: To Colin, BSc '48, and Mrs. Patch, a son.

Patterson: To Margaret (Copping, BSc '48), and John Patterson, a daughter.

Podbere: To Auron, BA '50, BCL '54, and Mrs. Podbere, a son.

Polger: To Abby, BCL '60, and Mrs. Polger, a daughter.

Polonoff: To Ethel (Waterman, BSc '43), and Irving Polonoff, a daughter.

Porteous: To Richard, BEng '54, and Mrs. Porteous, a son.

Porter: To Nelson, BCom '56, and Mrs. Porter, a daughter.

Powis: To Gordon, BCom '48, and Mrs. Powis, a daughter.

Poznansky: To Jacob, BSc '49, DDS '53, and Mrs. Poznansky, a son.

Quince: To Cliff, BEng '52, and Mrs. Quince, a daughter.

Reeves: To Robert L., BCom '52, and Jane (Farlinger, BSc '53), a son.

Riley: To William J., BEng '48, and Mrs. Riley, a son.

Roberton: To C. Jaime, BSc '55, and Barbara (Shipman, BA '57), a daughter.

Rolph: To Beverley (Webster, DipOT '56), and Frank M. Rolph, a daughter.

Rossaert: To Lucien, MacTeach '54, and Mrs. Rossaert, a son.

Rossy: To Raymond, BA '50, and Mrs. Rossy, a daughter.

Roy: To Donald, BSc/Agr '49, and Marion (Henry, BA '45), a son.

Rubin: To Marilyn (Lipsey, BA '56), and Robert Paul Rubin, a son.

Sangster: To Donald Frederick BSc '58, and Mrs. Sangster, a daughter.

Sansom: To Frederick, BEng '54, and Mrs. Sansom, a son.

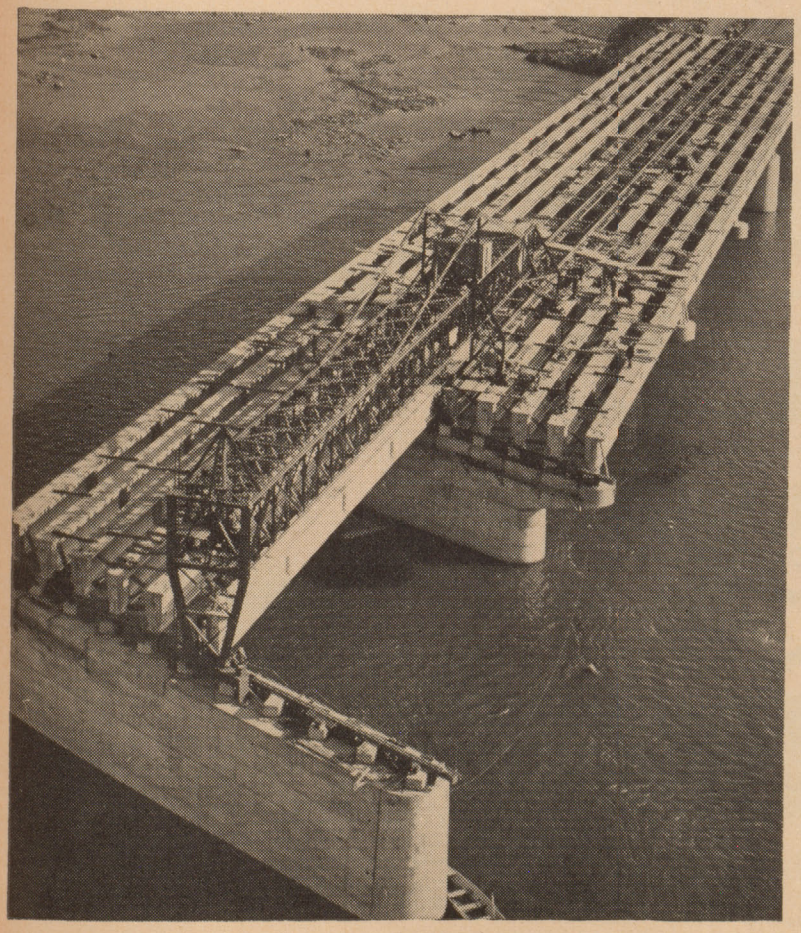

Schwartz: To Arthur, BA '53, and Mrs. Schwartz, a daughter.

Schwartz: To Harry, BEng '58, and Mrs. Schwartz, a son.

Schwartz: To Diana (Usher, Arts '54), and Irving Schwartz, a daughter.

Schwartzben: To Melvyn, BA '52, DDS '56, and Sonia Ann (Grover, BCom '54), a son.

FOR CANADA'S LARGEST CONSTRUCTION PROJECTS IT'S

CONCRETE

MADE WITH

CANADA CEMENT

Runways, Bridges, Highways, Sewer mains . . . On Canada's major construction projects, durable concrete made with Canada Cement is used to assure years of service at the lowest possible cost.

Scott: To Ruth (Fenton, BCom '58), and Bernard Scott, a son.

Scriver: To Charles, BA '51, MD '55, and Esther (Peirce, BA '53), a daughter.

Selby: To David A., BEng '49, and Mrs. Selby, a daughter.

Sendbuehler: To Michael, BA '55, MD '57, and Mrs. Sendbuehler, a son.

Seton: To Leonard, BA '39, BCL '42, and Phyllis (Duthie, BA '43), a daughter.

Shaw: To Sarah (Wright, BA '52), and Paul Bailey Shaw, a daughter.

Shetler: To Jim, BA '58, and Mrs. Shetler, a son.

Shiller: To Gerald, BCom '54, and Enid (Pottel, BA '58), a son.

Shulman: To Froma (Takefman, BA '54, MSW '58), and Norman Shulman, a son.

Sidorchuk: To Nicholas, BSc '50, DDS '54, and Rosemary (O'Connor, BA '54), a daughter.

Smith: To Donald M., BSc '46, PhD '56, and Doris (Markson, BA 52, MA '54), a son.

Smith: To Margaret (Porte, BA '47), and L. Fraser Smith, a son.

Smith: To Robert Ewing, BSc/Agr '55, MSc '57, and Mrs. Smith, a son.

Smith: To Audrey (Cliff, BA '51), and W. Alan Smith, a daughter.

Speidel: To Joseph, BEng '51, and Mrs. Speidel, a daughter.

Spevack: To Allan, BArch '58, and Lois (Caplan, BA '60), a daughter.

Stavisky: To Nellie (Lowy, BA '57), and Aron Stavisky, a daughter.

Steeves: To Willard M.C., BCL '60, and Mrs. Steeves, a daughter.

Stern: To Antony, BA '58, and Mrs. Stern, a son.

Sternfeld: To Sol I., BEng '46, and Mrs. Sternfeld, a son.

Stilman: To Harry, BArch '50, and Ruth (Ordower, BA '48), a son.

Sutcliffe: To Frank, BEng '53, and Mrs. Sutcliffe, a son.

Swanson: To Heida (Eartly, BSc '48, MSc '51, PhD '53), and Elmer Swanson, a daughter.

Tansey: To Peter, BEng '48, and Mrs. Tansey, a daughter.

Tetley: To Bill, BA '48, and Rosslyn (Abraham, HMKR '52), a son.

Tilley: To John, BEng '58, and Mrs. Tilley, a son.

Townsend: To Darryl, MD '55, and Mrs. Townsend, a daughter.

Trunkey: To Mac, MD '60, and Barbara (Francis, DipPT '57), a son.

Turner: To Beverley (Brophey, BA '53), and Peter Turner, a son.

Upton: To Frank, BSc/Agr '48, and Mrs. Upton, a daughter.

Van Royen: To Charles P., BEng '55, and Mrs. Van Royen, a daughter.

Wahlstrom: To Robert, BEng '58, and Mrs. Wahlstrom, a daughter.

Walsh: To Kenneth, BSc/Agr '51, and Mrs. Walsh, a daughter.

Watson: To Reilly, BCL '53, and Wendy (Quain, Com '55), a son.

Watt: To Donald, BA '53, and Mrs. Watt, a son.

Weston: To Barbara (Hadgkiss, P&OT '54), and Grant Ivan Weston, a daughter.

Whent: To Don, BEng '52, and Mrs. Whent, a son.

Whitestone: To Phyllis (Wood, BSc '46), and Bruce Whitestone, a son.

Wickes: To John B., BEng '55, and Mrs. Wickes, a daughter.

A. Wright Case, BCom '25, at Vancouver, on Aug. 20, 1960.

Sheldon B. Clement, BSc '01, MSc '02, at Sarnia, in October 1960.

Cecil A. Collier, BA '39, at St. Stanislaus, Que., on Nov. 9, 1960.

Dr. Albert Courville, MD '30, nose, eye and ear specialist of Albuquerque, New Mexico, at Montreal, on Dec. 19, 1960.

Louis Diner, Q.C., BA '18, at Montreal, on Jan. 2, 1961.

Dr. Arthur F. Dunn, MD '30, a greatly esteemed member of the medical profession in Ottawa, at Ottawa, on Nov. 7, 1960.

Michael Dwyer, Eng '24, at Halifax, on May 29, 1960.

Nathan L. Engel, BSc '07, at Montreal, on Dec. 31, 1960.

Dr. F. W. Fitzgerald, MD '33, former mayor of Lachute, Que., and a general practitioner in that town for 23 years, at Lachute, on Jan. 8, 1961.

Dr. George W. Gellatly, DVS '99, MD '13, at Montreal, on Nov. 24, 1960.

Dr. Robert Hamilton, MD '24, at Montreal, on Nov. 11, 1959.

Dr. Edward Hart, MD '94, who served for 62 years as Coroner of Victoria, B.C., at Victoria, on Oct. 31, 1960.

John Andrew Heaman, BSc '02, at Victoria, B.C., on Nov. 9, 1960.

Dr. Ronald Henderson, DDS '26, who practised dentistry in Eastend, Sask., for 28 years, at Eastend, on Nov. 1, 1960.

Roy Grant Henderson, BSc '14, at New Westminster, B.C., in March 1960.

Dr. James Elgin Hollingsworth, MD '02, at Avon, S. Dakota, on Nov 9, 1960.

Thomas P. Hutchinson, BEng '44, at Montreal, in the fall of 1960.

Dr. Bert Logan Jones, MD '14, at Palo Alto, Calif., on Dec. 2, 1960.

Mrs. J. M. MacAdam (nee Emma Saunders, BHS '23), at Vancouver, on Nov. 28, 1960.

Edward M. Macdonald, Q.C., BCL '24, at New Glasgow, N.S., on May 22, 1960.

J. M. F. MacKenzie, BSA '21, at Fredericton, N.B., on Nov. 21, 1960.

Dr. J. L. D. Mason, MD '02, consultant physician in charge of medicine at St. Mary's Hospital, Montreal, and one-time lecturer at McGill, at Montreal, on Dec. 14, 1960.

William A. Mather, BSc '08, LLD '56, chairman of the Canadian Pacific Railway, at Winnipeg, on Jan. 2, 1961.

Dr. Frederick L. McConnell, MD '42, of Wishart, Sask., in 1959.

Gladys E. McEwen, BA '23, of Ottawa, in 1954.

Mrs. Robert Miller (nee Ellen Hemmeon, MA '27), former Dean of Women at Mount Allison University, at Boston, on Feb. 6, 1961.

Col. R. H. Mulock, C.B.E., D.S.O., BSc '09, at Montreal, on Jan. 23, 1961.

Dr. A. T. Oberg, DDS '17, of Kansas City, on Oct. 17, 1960.

Dr. Robert Quimby, MD '39, at Boston, on Dec. 12, 1960.

Martin J. Rabin, BA '53, at Montreal, on Dec. 10, 1960.

Kenneth M. Ramsey, BSc '22, at Montreal, on Feb. 10, 1961.

Dr. Carl Ruby, MD '20, at Los Angeles, on Nov. 18, 1960.

James H. Schurman, BCom '51, at Montreal, on Nov. 20, 1960.

Prof. H. R. Scott, associate professor of Zoology at McGill, at Montreal, on Jan. 19, 1961.

Charles F. Sise, BSc '97, former president and later chairman of the board of the Bell Telephone Co. of Canada, at Montreal, on Nov. 10, 1960.

John U. E. F. Tanner, BA '92, at S. Lancaster, Ont., on Jan. 12, 1961.

Dr. Frederick C. Thompson, DDS '26, at Rochester, N.Y., on Jan. 12, 1961.

Hugh M. Thomson, BSc '48, MSc '51, PhD '57, at Ottawa, on Dec. 10, 1960.

Dr. Frederick M. Turnbull, MD '09, widely known for his work in diseases of the nose and sinuses, at Hollywood, Calif., on Jan. 13, 1961.

M. M. Walter, McGill Associate and president of the Royal Bank of Canada, at Montreal, on Dec 9, 1960.

Royal E. C. Werry, Q.C., BA '15, BCL '17, at Montreal, on Feb. 1 1961.

Complete Trustee Services

National Trust
ESTABLISHED 1898

How do you judge a company's progress?

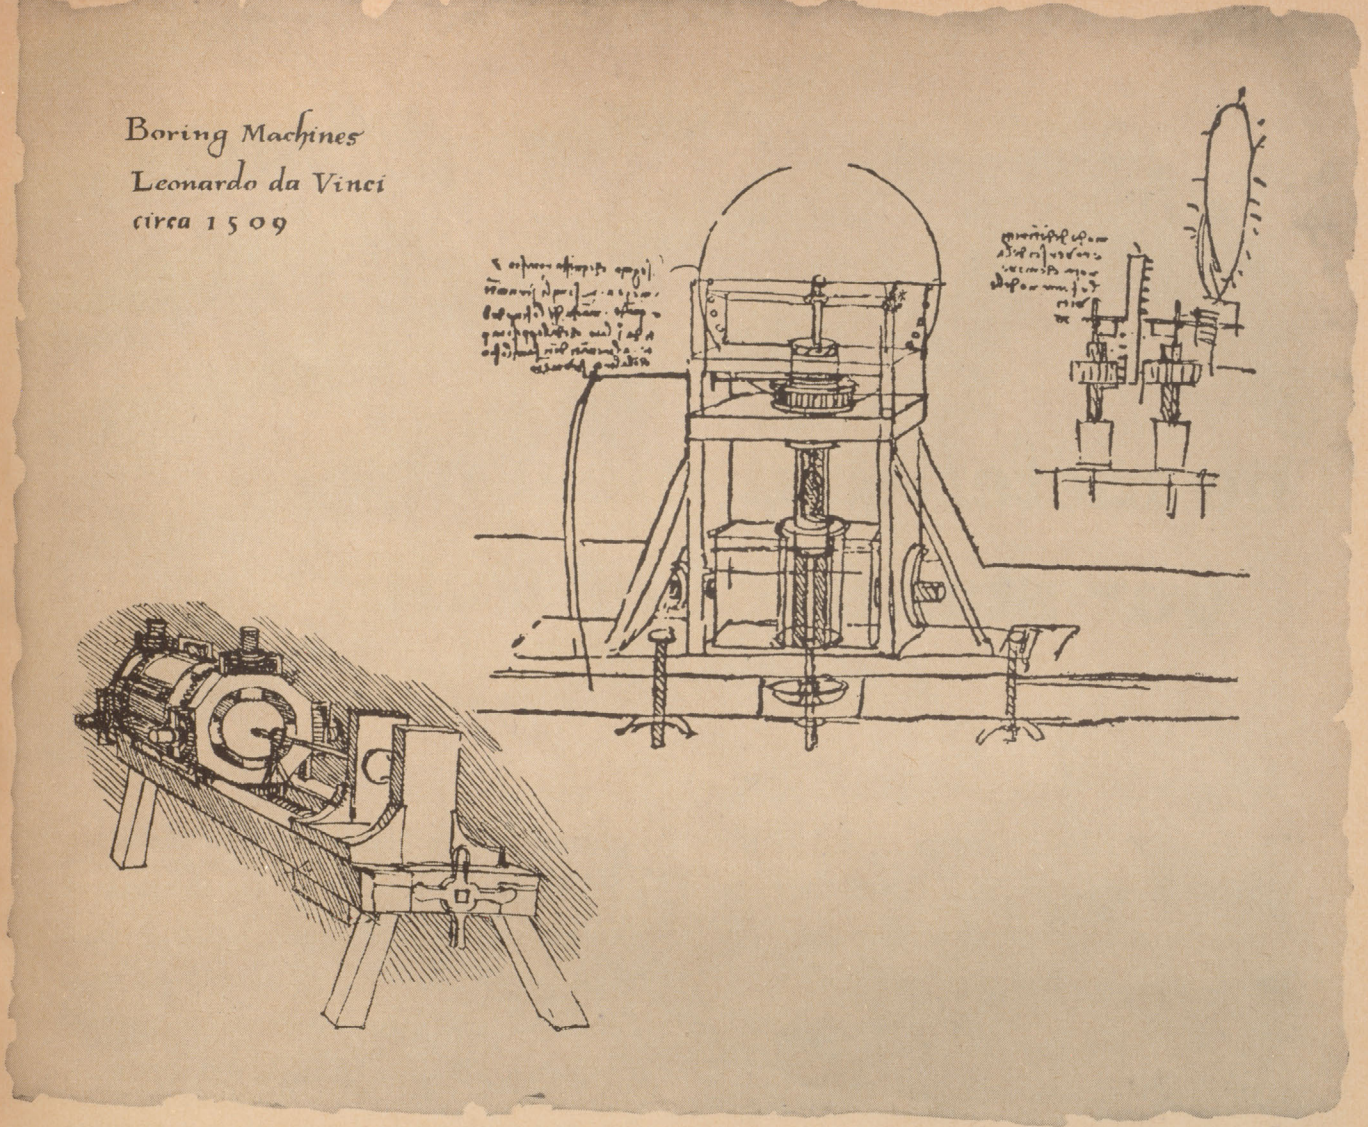

Generally speaking, a company's progress is judged by the sale of its product. But a life insurance company is somewhat more complex than others. Its product is intangible and it is not for the moment, but often for the remainder of life and beyond.

There are many things to consider in measuring the progress of a life insurance company. Its sales, of course, and the growth of its insurance in force . . . its assets . . . the way its policy plans meet current needs . . . the efficiency and training of its sales force . . . the completeness of the service which it can offer its policyholders . . . the enthusiasm and company loyalty that extends throughout the entire organization.

Measured by any of these standards, the Sun Life of Canada has been successful ever since its first policy was issued in 1871, and its progress continues to be sure and steady today. Its $9 billion of life insurance in force protects the holders of well over two million policies and group certificates; 150 branch offices from coast to coast in North America provide the finest of life insurance service, and its policy plans are modern and up-to-date in keeping with the changing times in which we live. The Sun Life is, indeed, one of the great life insurance companies of the world.

SUN LIFE ASSURANCE COMPANY OF CANADA

HEAD OFFICE: MONTREAL

LEONARDO DA VINCI, *in addition to being an artist, engineer, and inventor, was also a superb craftsman. Reproduced here are original sketches by Da Vinci of boring machines—one for boring cylinders, the other featuring a unique self-centering device.*

CRAFTSMANSHIP

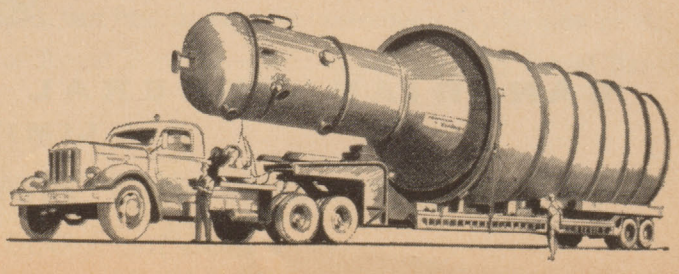

Illustrated below is a giant vacuum column used in oil refinery operations. This is a typical example of the fine craftsmanship and many sided skills demonstrated by Canadian Vickers in the manufacture of all types of petro-chemical equipment.

In their plants, Canadian Vickers also design and manufacture machines, both large and small, and equipment for every imaginable industrial need . . . thereby fulfilling their pledge: "If Industry Needs It . . . Canadian Vickers Builds It . . . Better."

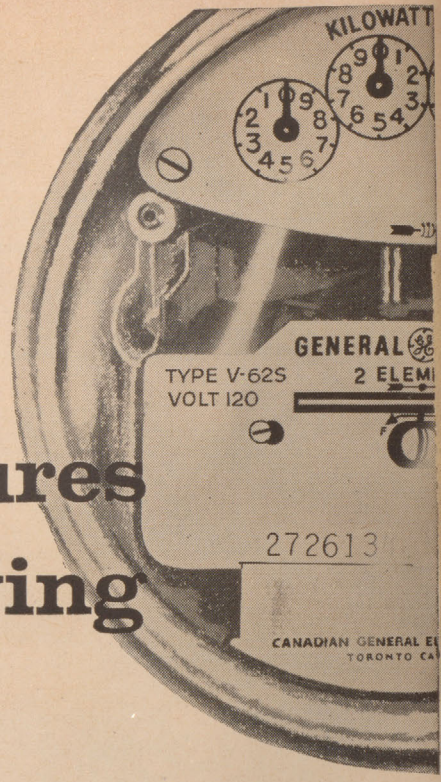

Industrial Boilers • Chemical Process Equipment • Hydraulic Machinery • Ships
Special Machinery • Marine Equipment • Pulp and Paper Plant • Mining Machinery

CANADIAN CV VICKERS LIMITED

MONTREAL • TORONTO
MEMBER OF THE VICKERS GROUP

50-ton vacuum column with overall length of 74 ft., built by Canadian Vickers for a Canadian oil refinery.

The meter that measures our standard of living

It measures kilowatt-hours ... and as the kilowatt-hours grow, it indicates the ever-greater role of electricity in making our lives easier and more enjoyable.

Abundant low-cost electricity probably contributes more to our standard of living than any other factor. It creates opportunity for industry and business ... it speeds the production of goods ... it opens the way to hundreds of thousands of better-paying jobs for Canadians.

Kilowatt-hours cost so little—but think of what they can do. In the home, low-cost electricity can bring a world of convenience, comfort and service. Planned lighting brings glare-free new pleasure and charm to every room—at the flick of a finger. In the kitchen and laundry electrical appliances save time and toil. Television and many other products contribute to our leisure and entertainment.

Are *you* making full use of inexpensive electricity?

LIVE BETTER ELECTRICALLY

To make full use of modern electrical equipment—in home, office or factory—an adequate wiring system is essential. Your local power company, provincial Electric Service League or any qualified electrical contractor will assist you in planning to "Live Better ... Electrically."

CANADIAN GENERAL ELECTRIC COMPANY LIMITED

Manufacturer of equipment that generates, transmits and distributes electricity ... and the wide variety of products that put it to work in home and industry

A PRAIRIE BRANCH MANAGER TALKS CROPS "IN THE FIELD".

The Royal Bank manager "gets the picture"

. . . because he sees your business from both sides of his desk. This manager is looking at farming from the farmer's point of view, so while he is trained in banking, he is getting to know a good deal about farming as well. He puts the two together in finding how his bank can best fit into his customer's day-by-day needs. This lively interest and practical approach is typical of Royal Bankers — and appreciated by Royal Bank customers everywhere.

UPPER ST. LAWRENCE

Vice-President, Canada — Mr. Thomas D. Dailey, (B.Com. '42), 107 King Street West, Brockville, Ont.
Vice-President, U.S.A. — Dr. Munroe M. Kissane, (M.D. '40), 24 Terrace Street, Malone, N.Y.
Secretary — Mr. Alan H. Hall, (B.Arch. '50), R. R. No. 3, Collins Bay, Ont.

LONDON, ONT.

President — Mr. G. M. Hobart, (B.C.L. '52), 516 Grosvenor St., London, Ont.
Secretary — Mr. Edward G. Blake, (B. Com. '49), 450 Sherene Terrace, London, Ont.

HAMILTON

President — Mr. C. V. Corbet, (B.Com. '34), 1316 Pigott Bldg., 36 James St. S., Hamilton, Ont.
Secretary — Mrs. C. L. Bates, (B.A. '30), 87 King St. W., Dundas, Ont.

SARNIA

President — Mr. George E. Bawden, (B.Eng. '50), 634 Beach Lane, Sarnia, Ont.
Secretary — Mrs. Kenneth J. Radcliffe, (Physio. '48), 1286 Ridgewood Drive, Sarnia, Ont.

WINDSOR-DETROIT

President — Dr. W. E. Hume, (M.D. '24), 76 London St. W., Windsor, Ont.
Secretary — Mr. J. L. Glos, (B.Arch. '55), 2193 Lincoln Rd., Windsor, Ont.

PORCUPINE

President — Mr. Wendell B. Brewer, (B.Com. '23), 217 Way Ave., Timmins, Ont.
Secretary — Mr. J. W. Thomson, (B.Eng. '38), 162 Tamarack St., Timmins, Ont.

KIRKLAND LAKE

President — Mr. Gerald V. Kearns, (B.Com. '24), P.O. Box 428, Kirkland Lake, Ont.
Secretary — Mr. J. Murphy Gamble (B.Com. '29), Caswell Construction Co. Ltd., Kirkland Lake, Ont.

SUDBURY

Secretary — Mrs. Eric G. Swaine, (B.Sc./H.Ec. '50), 452 Westview Drive, Sudbury, Ont.

NIAGARA FRONTIER

President — Mr. Donald O. D. Ramsdale, (B.Eng. '33), 157 Highland Ave., St. Catharines, Ont.
Secretary — Mr. J. K. Abel, (B.Eng. '47), 117 Glenwood Ave., St. Catharines, Ont.

TORONTO

President — Mr. A. H. Wait, (B.Com. '33), Clarkson Gordon & Co., 15 Wellington St. W., Toronto, Ont.
Secretary — Mr. C. F. Gross, (B.Eng. '51), 50 Maitland St., Toronto, Ont.

TORONTO ALUMNAE

President — Mrs. Edgar Brodic, (B.A. '36), 104 Glendora Ave., Willowdale, Ont.
Secretary — Mrs. P. L. Burgess, (B.A. '46), 26 North Hills Terrace, Don Mills, Ont.

GRAND RIVER VALLEY

Vice-President — Mr. Howard S. Matthews, (B.Com. '55), 130 Aberdeen Rd., Kitchener, Ont.
Secretary — Mr. Peter H. Sims, (B.Com. '55), 130 Aberdeen Rd., Kitchener, Ont.

WINNIPEG

President — Mr. G. S. A. Bacon, (B.A. '30), Great-West Life Assurance Co., 60 Osborne St. N., Winnipeg, Man.
Secretary — Mr. Allan A. Park, (B.Eng. '49), Dominion Bridge Co. Ltd., 702 Canada Bldg., Winnipeg, Man.

NORTHERN SASKATCHEWAN

President — Dr. A. R. Byers, (B.Sc. '32, M.Sc. '33, Ph.D. '36), 661 University Drive, Saskatoon, Sask.
Secretary — Dr. M. A. Baltzan, (B.Sc. '49, M.D. '53), 408 MacMillan Bldg., Saskatoon, Sask.

SOUTHERN SASKATCHEWAN

President — Mr. Hugo R. Holland, (B.Eng. '33), 2377 Cameron St., Regina, Sask.
Secretary — Mrs. Florence Blair, Suite 3, 2700 McCallum Ave., Regina, Sask.

NORTHERN ALBERTA

President — Mr. Anthony F. Salvatore, (B.Eng. '49), 11647—72nd Ave., Edmonton, Alta.
Secretary — Mr. G. K. Greaves, (B.A. '42), Upper 12208—102nd Ave., Edmonton, Alta.

SOUTHERN ALBERTA

President—Mr. Robert W. Bion, (B.A. '53), c/o W. C. Pitfield & Co. Ltd., 405A 8th Ave. S.W., Calgary, Alta.
Secretary — Mrs. Barbara Weyman, (B.A. '48), 9 Glamorgan Drive, Calgary, Alta.

TRAIL AND DISTRICT

President — Dr. F. L. Wilson, (M.D. '33), 24 Hazelwood Drive, Trail, B.C.
Secretary — Mr. G. J. Hood, (B.Sc. '48, B.Eng. '52), 2262 Thompson Ave., Rossland, B.C.

VANCOUVER

President — Dr. E. C. McCoy, (B.A. '34, M.D. '39), Cambie Medical Dental Bldg., 3256 Cambie St., Vancouver, B.C.
Secretary — Mrs. Isobel Merton, (B.A. '29), 4655 W. 6th Ave., Vancouver, B.C.

VICTORIA AND DISTRICT

President — Mr. R. Ian Ross, (B.A. '41), 1509 Shasta Place, Victoria, B.C.

UNITED STATES

BOSTON

President — Cmdr. Eric Parnell, USN (Ret.), (B.Sc. '21), 62 Hume Ave., Medford 55, Mass.
Secretary — Dr. Ruby G. Jackson, (M.D. '50). 1101 Beacon St., Boston, Mass.

NEW YORK CITY

President — Mr. Lew Schwartz, (B.A. '27), 12 Park Rd., Scarsdale, N.Y.
Secretary — Mr. Robert Currie, (B.A. '37, M.A. '39), New York Telephone Co., 140 West St., New York 7, N.Y.

ROCHESTER

President — Dr. John B. Feltner, (M.D. '37), 700 Main St., Rochester 11, N.Y.

PHILADELPHIA

President — Miss Sara W. Hill, (B.A. '25), Folly Hill, 423 Ithan Ave., Rosemont, Pa.
Secretary — Dr. I. Nathan Dubin, (B.Sc. '35, M.D. '39), 755 Beacon Lane, Merion Station, Philadelphia, Pa.

PITTSBURGH

President — Dr. W. W. G. Maclachlan, (M.D. '07), 1133 Wightman St., Pittsburgh 17, Pa.
Secretary — Dr. Ned J. McCague, (M.D. '40), Mercy Hospital, Pittsburgh 19, Pa.

WASHINGTON, D.C.

President — Dr. Basil Darwent, (B.Sc. '41, Ph.D. '43), Dept. of Chemistry, Catholic University of America, Washington 17, D.C.

CHICAGO

President — Mr. G. Leslie Laidlaw, (B.Com. '23), 626 Bluff St., Glencoe, Ill.
Secretary — Mr. David G. Scott, (B.Com. '32), 925 Forest Ave., Wilmette, Ill.

MINNESOTA

President — Mr. G. J. Dodd, (B.Eng. '40), Container Division, St. Regis Paper Co., 4300 Olson Highway, Minneapolis, Minn.
Secretary — Mr. James E. Kerns, (B.Eng. '50), 4336 Mackey Ave., Minneapolis 24, Minn.

CONNECTICUT

President — Dr. John K. Ormrod, (B.Sc. '40, M.D. 43B), Aetna Life Insurance Co., Hartford, Conn.
Secretary — Mrs. N. Wm. Wawro, (B.Sc. '45), 44 Walbridge Rd., West Hartford, Conn.

VERMONT

President — Dr. F. J. M. Sichel, (B.Sc./Arts '28), Dept. of Physiology, College of Medicine, University of Vermont, Burlington, Vermont.
Secretary — Dr. W. B. Durrell, (M.Sc. '48 -Mac), Dept. of Animal Pathology, Hills Agricultural Science Bldg., University of Vermont, Burlington, Vermont.

NORTHERN CALIFORNIA

President — Dr. Carroll Russell, (M.D. '38), 711 D. St., San Rafael, Calif.
Secretary — Mr. Harold A. Calkins, (B.Sc. '12), 5840 St. Paul Court, Oakland, California.

SOUTHERN CALIFORNIA

President — Mr. Arthur J. Hicks, (B.S.A. '26, M.Sc. '31), Consul of Canada, Canadian Consulate General, 510 West Sixth St., Los Angeles, Calif.
Secretary — Mr. Dennis Murch, (B.Com. '51), 3838 W. 58th Place, Los Angeles 43, California.

WASHINGTON STATE

President — Dr. John J. Callahan, (M.D. '42), 208 Cobb Bldg., Seattle, Wash.
Secretary — Dr. Frederick E. Geisert, (M.D. '53), 5211—57th Ave. S., Seattle 18, Wash.

GREAT BRITAIN

President — Lt.-Col. H. H. Hemming, O.B.E., (B.A. '14), 3 Clements Inn, London W.C. 2, England.
Secretary — Miss Julyan Fancott, (B.A. '60), 14 Campden Grove, London W. 8, England.

FRANCE

President — Mr. Georges Sahovaler, (B.A. '48), 78 Ave. Gambetta, Paris XX, France.
Secretary — Mr. Laurence R. Reusing, (B.Com. '49), 16 rue d'Assas, Paris VI, France.

MEXICO

Vice-President — Mr. Leo M. Roy, (Science '27), President, Pan-American de Mexico Life Insurance Co., P.O. Box 139 — Bis, Mexico, D.F.

WEST INDIES

BARBADOS

President — Dr. E. B. Carter, (M.D. '18), Villa Nova, St. John 2, Barbados.
Secretary — Mr. S. Ivan Smith, (M.A. '55), Bellairs Research Institute, St. James, Barbados, W.I.

JAMAICA

President — Dr. Ivan E. R. Parris, (M.D. '28), 21 Seymour Ave., Kingston 10, Jamaica.
Secretary — Mr. H. Clinton Douglas, (B.Sc./Agr. '55), Ministry of Agriculture and Lands, Hope Gardens, Liguanea, Jamaica.

TRINIDAD

President — Dr. Sam Ghouralal, (M.D. '49), 129 Henry St., Port of Spain, Trinidad, W.I.
Secretary — Miss Cynthia E. Dhein, (B.Sc./H.Ec. '47), 32 Ariapita Ave., P.O. 5, Port of Spain, Trinidad.

SOUTH AMERICA

President — Mr. Kenneth H. McCrimmon, C.B.E., (B.A. '13), Caixa Postal 4965, Rio de Janeiro, Brazil.

ABOUT OUR COVER

It's been some time since we've been able to give graduates a preview of a new building on the McGill campus. In this case, however, our pleasure is tripled, since our cover depicts one of three new men's residences which are now under construction. The story of the residence development, Pages 24 - 27, was prepared before the Principal announced Mr. McConnell's generous gift. We were able to squeeze in an excerpt from Dr. James' remarks at Convocation, bringing our story up to date.

The McGill News is published quarterly by the Graduates' Society of McGill University and distributed to its members. The copyright of all contents is registered. Authorized as second class mail, Post Office Department, Ottawa. Please address all communications to: *The McGill News*, 3618 University Street, Montreal 2. Tel. VI. 4-6311.

Letters

Tender Memories

Today I received the 1961 Spring Issue of the McGill News.

I wish there were words that would more adequately express the full meaning of a mere "thank you" for the splendid article on my husband. I am deeply touched, for it stirred tender memories of the past, especially when I recall his intense pride in his Alma Mater.

Thanking you again for your many courtesies, I remain,

Elizabeth T. Drysdale

Pompano Beach,
Florida.

Rowdy Theatre Night

The Golden Anniversary Issue of The McGill Daily was forwarded to me here by my brother in Nova Scotia. Many thanks. Its perusal brought back to my memory many incidents of bygone days, among them that rowdy Theatre Night (Page 26) when a live frog was let down by a string from the balcony upon poor Miss Hurlbatt's bare shoulder. Many good wishes to The Daily for the next 50 years.

Dr. Anna Schafheitlin, BA '11, MA '13

Minden, Westfalen,
West Germany.

Eight Happy Years

(Editor's Note: The following letter, originally written in French, was translated by the Editor.)

I don't know to whom I owe the pleasure of having received The McGill Daily (February 27, 1961) but I would like to thank the author of this gesture, which recalled to mind some eight happy years which I spent at McGill from 1900 to 1908, as Professor of French, giving my courses at Royal Victoria College for the co-eds and in a room of the Arts Building for the men students.

This took place "during the reign" of Dean Moyse (Dean of Arts) and of Dean Adams (Dean of Science) and of Dr. Peterson (Principal). After my return to France in 1908, I often had the pleasure of receiving at my home former students coming to continue their studies in Paris; and from time to time, in the province where I now live, I have visits from old "McGill friends" (and may I hope to have yours? . . .)

In looking forward to meeting you soon "in person" in France, please be assured that McGill University has meant a great deal in my life and all my best wishes for your "McGill Daily" . . .

Marie Louise Puech-Milhau, MA '08

Borieblanque par Castres,
Tarn, France.

Song Book Background

Many thanks for the Spring Issue of the McGill News, with excellent articles (and some nostalgia).

On Page 2, the Song Book request: I have the 1921 issue, well bound and in excellent condition. BUT, some 17 McGill degree-holders in the Hatcher and allied camp would "turn and rend" me. Indeed, my daughter Pat from Saskatoon, who spent the past two summers with us, used it frequently. Her favourite is "Canada, My Home" by Percy Semon who was, I have heard, a "remittance man" of the west. It is a glorious national anthem and I often joined the blue-putter men (1921 on) singing it on the second floor of the Union . . . I have seen pretty tough "hombres" singing it with tears down their cheeks. You see, I taught the first veterans of World War I, first in Edmonton and later at McGill — what a grand bunch! But my boys from 1944 were the same — good Canadians, and I can't say more than that.

To return to this song book . . . Actually this 1921 edition was sparked by Francis J. Toole, now head of the Department of Chemistry and vice-president of U.N.B. and a former graduate student of mine. He, a marvellous pianist, was "aided and abetted" by Alec P. Grigg, Q.C., on St. James Street. I well remember the pains of birth at parturition! It couldn't cost much to be microfilmed.

My compliments and (in Newfoundlandese) "May your shadows never grow less!"

W. H. Hatcher, BA '16, MSc '17, PhD '21.

Montreal, Que.

(Editor's Note: Dr. Hatcher is a well-known retired Professor of Chemistry and Assistant Dean of the Faculty of Arts and Science.)

LET'S FACE THE ISSUE

FOR ONE REASON or another, this appears to be Stephen Leacock's year. When we first read Howard O'Hagan's recollections of "Stephie" in the Spring issue of Queen's Quarterly, we were determined to reprint it in this issue of The News. It was only after the decision was taken that we discovered another man's reminiscences about Stephie in the June issue of Reader's Digest. The author of the latter is the well-known author Leslie Roberts. There's method in all this gladness about the famous McGill humorist-teacher. The year 1961 is the 60th anniversary of Leacock's McGill career; he joined the faculty as lecturer in economics in 1901.

Howard O'Hagan, a native of Lethbridge, Alberta, attended school in Vancouver and came to McGill in 1919 as a second-year Arts student. As an undergraduate, Mr. O'Hagan was President of The McGill Daily, President of the Literary and Debating Society, and vice-president of the Students' Council. He received his B.A. degree in 1922 and his B.C.L. degree in 1925, practiced law for a brief period, and has held various jobs in public relations and on newspapers. He now lives in Victoria, B.C., and has published several books, including Wilderness Men and Tay John — books which reflect his knowledge and love for Canada's western wilderness.

★ ★ ★

WE FIRST LEARNED about the fabulous career of Dr. Karefa-Smart from Percival A. Tallman, B.A. '48, who is now head of the English-language section, International Service, Canadian Broadcasting Corporation. In October, 1960, Mr. Tallman visited Sierra Leone briefly in conjunction with the Nigerian independence celebrations. In Freetown, Tallman met one of Dr. Karefa-Smart's younger brothers and in the course of their conversation, Dr. Karefa-Smart's McGill connection was divulged. Good newsman that he is, Tallman saw the possibilities for a McGill News story.

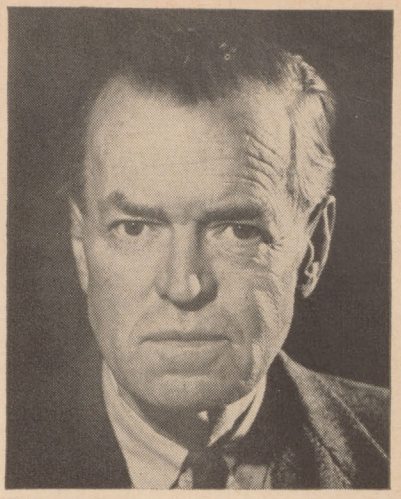

Percival Tallman was born in Toronto, went west by degrees, first to Winnipeg then to Vancouver. He attended the University of British Columbia for one year, long enough to work on the student newspaper, The Ubyssey. After service in the Second World War as a lieutenant in the Royal Canadian Navy, Tallman returned to the east and to McGill. In his student days here he served on the McGill Daily as Features Editor, after graduation he joined the staff of The Gazette, but went to the C.B.C. in 1949. He has a special interest in the "dark continent" since his International Service has recently begun short wave broadcasts to Africa in French and English to supplement its earlier transcription and relay service to African radio organizations. The photograph of a toiling Tallman was taken in Dawson City while he was interviewing an old-timer of gold rush days.

★ ★ ★

PROF. STANLEY B. FROST'S article on The English Bible (Page 11), is actually a short excerpt from a full-scale public lecture which he delivered in the New Foundation Lecture series (see Campus, Page 14). In his lecture, Prof. Frost, who is McGill's Dean of Divinity, gave a rather fascinating account of the history of the Bible and we regret that exigencies of space precluded publication *in toto*. In abridging it for The McGill News, however, we must admit that our editorial pencil was guided by recent widespread interest in the New English Version which has just been published. We trust you will find Prof. Frost's comments and criticisms stimulating.

★ ★ ★

OTHERS ITEMS of interest in this issue are the second part of Dean H. Noel Fieldhouse's description of McGill's new B.A. curriculum, which has attracted a great deal of attention in graduate, public and academic circles; and some welcome news about men's residences for the University.

O'HAGAN

TALLMAN AND OLD-TIMER

DEAN FROST

WHAT HEARS the MARTLET

The Garrulous 'Gazette'

A MONTREAL ANTIQUARIAN book-seller, William Wolfe by name, who is also production advisor to the McGill University Press, has allowed The Martlet to peruse an extremely well-preserved copy of an ancient university publication called the "University Gazette".

This particular copy, 87 years old, was obviously unread by the purchaser, since its pages are still uncut at the top. The "University Gazette" was published by the undergraduates "on the first of every month of the session" and its cost was "$1.00 per annum, in advance".

There were some interesting articles in Vol. 1, No. 5. issued February 1st, 1874. One of these was a forthright book-review of "McGill College and Its Medals" by one Alfred Sandham. Mr. Sandham, we are told, wrote the book with two objects in mind: "to furnish the friends of McGill College with a reliable account of its origin and subsequent progress" and "to supply additional information on the subject of Canadian Numismatics".

On both counts, our caustic reviewer found, Mr. Sandham's book was wanting. The section dealing with the history of McGill, he said, provides "nothing which may not be found in the calendar with greater conciseness, and adorned by no meretricious externals" save for "a few details of the life of our founder" and a list of former principals.

The subject of "Numismatics" elicited the following wry comment: "... it certainly appears to us that seven medals, designed and executed by Wyon, of London, hardly furnished sufficient grounds for a treatise on *Canadian* Numismatics; nor can a description of them, two or three pages long, even when accompanied with photographs, give sufficient 'additional information on the subject' to justify the publication of a book."

So much for "McGill College and Its Medals".

Elsewhere in the "University Gazette" there is an advertisement headed "Just Published" — The Story of Earth and Man — by J. W. Dawson, F.R.S., Principal and Vice-Chancellor of McGill University, Montreal (Hodder and Stoughton). The price was $2.00. The book was highly recommended by the copy-writer because "geology as a science must always prove attractive; its study serves the highest ends, and the facts, suggestions, and conclusions it evolves enlarge and discipline the mind".

Assuredly, it was pure coincidence that Principal Dawson's book was so enthusiastically promoted by the book-selling firm of Dawson Brothers.

Two other advertisements may be mentioned, both inserted by commercial photographers. The first bore the name of J. G. Parks, 195½ St. James Street, the second was on behalf of W. Notman, who was obviously too well-known to require a stipulation of his place of business.

Mr. Parks, we now understand, was "Photographer to the People" and this function required elaboration: "We are glad to know that through the Country the people, when they come to the City know that J. G. Parks is the man to 'secure their shadows ere the substance perish' ".

Mr. Notman, on the other hand, was "Photographer to the Queen". No further explanation was necessary.

TV and the Tots

MANY PARENTS won't have to be reminded of this, but a recently-published study of television in the lives of children brings to light the fact that the average North American child, three to 16 years of age, spends as much time watching television as he does in school.

There are other interesting and uncomfortable aspects on this subject in a volume entitled Television in the Lives of our Children, by Wilbur Schramm, Jack Lyle and Edwin B. Parker, published in April by Stanford University Press.

Ed Parker, one of the authors, now assistant professor at the Institute of Communications Research, University of Illinois, is a former McGill arts student (1953), who completed his undergraduate work at the University of British Columbia, then went on the Stanford in California for his M.A. and Ph.D.

Dr. Parker and his associates studied 6,000 children, and gathered information from 2,000 parents and 300 teachers and school officials in the U.S.A. and Canada, to compile the facts for their book. In addition to a consideration of the time spent watching television, the book tells us what children watch, their attitudes toward the medium, the content of the programs, the emotional, physical and psychological effects, and so on.

Television in the Lives of our Children is published in Canada by the University of Toronto Press and in England by Oxford University Press.

M.G.H. Honours M.G.H.

WHEN BOSTON'S Massachusetts General Hospital celebrated its 150th anniversary recently, it selected 15 medical institutions throughout the world for special recognition. One of these was the Montreal General Hospital.

Only one other Canadian hospital was so honoured, the Hôtel-Dieu du Précieux Sang, of Quebec City, said to be the oldest hospital in North America.

The Montreal General Hospital, along with the other 14 medical institutions, received a medal and a special citation. The medal depicts, on one side, the original building of the Massachusetts General Hospital, and on the other, portraits of Dr. James

Jackson and Dr. John Collins Warren, who had urged the establishment of a general hospital in Boston.

The citation reads: "The M.G.H. of the United States on the celebration of its 150th anniversary joins hands with the M.G.H. of Canada across the international boundary of goodwill that unites but never divides our common purpose."

A special souvenir brochure prepared for the occasion carries the following notes about our M.G.H.:

"Founded in 1921, the Montreal General Hospital is also known throughout the world by the initials 'M.G.H.' Academically associated with the Medical Faculty of McGill University, the Montreal General Hospital, like the Massachusetts General Hospital, has treasured and preserved many of the finest traditions of the philanthropic hospitals of England.

"At the same time, both institutions have exerted themselves to keep apace with the increasing responsibilities of clinical research and the expansion of educational duties."

Among the other hospitals similarly honoured were: Guy's Hospital, of London, La Pitie, of Paris, the Allgemeine Krankenhaus of Vienna, the Maggiore Hospital of Milan, the Karolinska Institute, of Stockholm, as well as such famous American institutions as the Johns Hopkins Hospital and the Rockefeller Institute and Hospital.

Sympathy and Patience

DENTAL TREATMENT for the mentally ill patient is the special concern of Dr. Peter W. Henderson, DDS '25, head of a six-clinic dental department at Creedmoor State Hospital in Queen's Village, New York, a public institution for the mentally ill.

Dr. Henderson's interesting and challenging task of administering to the abnormal person whose dental health, he believes, is considerably worse than would be found in average subjects, has taught him that the best formula is "sympathy and endless patience".

"We find," Dr. Henderson says, "the patients greatly appreciate kindness. They're very grateful for any kind of treatment, dental or otherwise. They may show some apprehension at first, but that happens on the outside too. As soon as it's clear that you're trying to help them, they're completely cooperative."

Although most of his patients arrive in various stages of dental neglect, 75 per cent leave Creedmoor with all their dental work completed. "We're notified when a patient will be discharged and we try to get his treatment finished before he leaves," Dr. Henderson says.

Dr. Henderson oversees six dental clinics situated in separate buildings provided for different categories of patients. Each clinic has a full-time staff of one dentist and one dental assistant.

Dr. Henderson, a dental practitioner for 35 years, has been at Creedmoor since 1938. He spends most of his time on administrative work, occasionally performing surgery. As principal dentist, he has living quarters provided for himself and his family on the hospital grounds. He and the other staff dentists are state civil service appointees.

Social Work in India

SEVERAL PRESS RELEASES have reached The Martlet's desk from Madras, India, to remind us that Professor Jacob B. Lightman, Associate Professor of Social Work at McGill completes an 18-month assignment in India this June. In one of the releases Prof. Lightman, who has been attached to the Madras School of Social Work as consultant and teacher, makes some observations about social work in India.

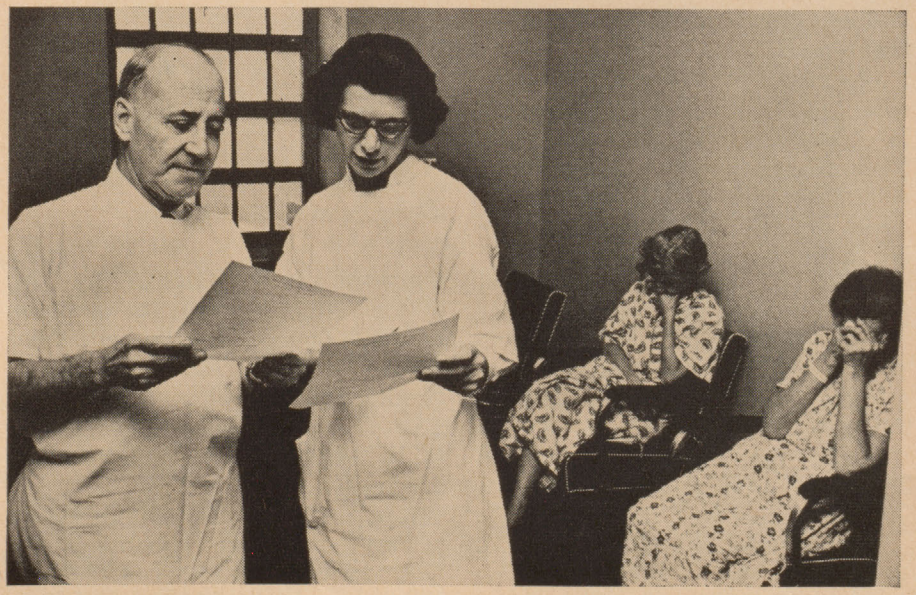

In the first place, Prof. Lightman finds India "an exciting place to work because of its high social consciousness and efforts at community development."

"I see things happen here in community development which will be of tremendous importance to the Western Hemisphere, because such development of the entire community — rich and poor, management and labour, men and women — is a new concept for us. We too have problems of family, community and industrial dislocation, and we need these kinds of community programmes."

Prof. Lightman said he believed that a social work teacher from the West had a great deal to learn from India's community development projects.

Part of Prof. Lightman's appreciation for India's social consciousness stems from the rapid development of social work education in that country, beginning with the founding of the Tata School of Social Studies in Bombay 25 years ago. There are at present some 18 schools in different parts of the country.

The McGill professor has been helping to build the curriculum at the Madras School as well as strengthening the methods of teaching through frequent seminars with teachers. Moreover, he has been active in building up a sound pattern of field work, which

Dr. Peter W. Henderson, DDS '25, left, discusses a case with hygienist Marie Maciana, as patients wait in the background.

has great priority in a profession like social work.

In addition, Prof. Lightman has been acting as consultant to the director of the school, K. N. George, on policy and administration, and has been helping with short in-service training courses held at the school from time to time for untrained as well as voluntary social workers in the city.

A Shelley Scholar

A HANDSOME BOOKLET issued by the Harvard University Press announces the publication of the first two volumes of Shelley and his Circle, part of a projected eight-volume edition of the late Carl H. Pforzheimer's collection of material pertaining to Percy Bysshe Shelley and his friends. This project is under the scholarly and meticulous editorship of Kenneth Neill Cameron, BA '31, a former McGill Rhodes Scholar.

Dr. Cameron was Editor of The McGill News for 1934-35, and as an undergraduate, he was Feature Editor of The McGill Daily from 1929 to 1931. He visited Montreal recently to participate in the 50th Anniversary Reunion of The Daily.

Mr. Pforzheimer, who died in 1957, was one of the great private collectors of his time and his library, while particularly strong in English literature from 1475 to 1700, also contains important early books, European literature of the 16th century, English books and manuscripts of the 18th, 19th and 20th centuries, and modern fine printing.

After more than 50 years of active collecting, Mr. Pforzheimer bequeathed his library to The Carl and Lily Pforzheimer Foundation, Inc. His great admiration for Shelley, Godwin and others led him to specialized collecting of the manuscripts and books of the poet and his circle, and he had intended to publish his collection.

Since leaving McGill and taking up his present position as Editor of Shelley and his Circle for the Carl H. Pforzheimer Library in 1952, Dr. Cameron has had a distinguished academic career. Oxford University awarded him a B.A. degree in 1933, a B.Litt. degree in 1934 and an M.A. in 1936. He then went on to the University of Wisconsin, where he received his Ph.D. in 1939.

Dr. Cameron served as Instructor in English at Indiana University from 1939 to 1943 and was promoted first to assistant professor, then associate professor. In 1950 he was Visiting associate professor of English at the University of Chicago, where he gave graduate seminars and taught senior English majors' courses on Shelley and Byron.

Dr. Cameron's reputation is well summed up in a 1956 publication of the Modern Language Association entitled The English Romantic Poets, A Preview of Research:

"And more recently Kenneth Neill Cameron, who has established himself as a meticulous scholar, has written a series of articles dealing with Shelley's political views . . . Cameron's interest in Shelley's reformism came to consummate expression in his The Young Shelley: Genesis of a Radical (1950), winner of the first Modern Language Association — Macmillan Award . . . Evidence of the resources of his scholarship may be found in the 1,132 notes supporting the 287 pages of his text. Often these notes are fully-wrought pieces of research. They give to the book its outstanding reputation."

From B.A. to Broadway

Gertrude L. Kerman

GERTRUDE LERNER KERMAN, B.A. '29, of Great Neck, N.Y., has had an active theatrical career as director, writer and lecturer both on and off-Broadway. She has worked with such noted producers as Leland Hayward and Gilbert Miller, and has written radio and television plays.

Mrs. Kerman graduated from McGill summa cum laude, receiving the Governor-General's Gold Medal for literature and languages and she followed this up with studies at Columbia University and New York University in writing, acting and dramatic techniques.

Recently we learned that Mrs. Kerman had published a book called Plays and Creative Ways with Children, which has been enthusiastically endorsed by well-known theatrical and educational figures. It outlines, step by step, the techniques of playmaking for children and teenagers that Mrs. Kerman developed in her work at Adelphi College Children's Centre for Creative Arts. It also contains a series of original scripts and adaptations she has written and produced.

Mrs. Kerman has been an instructor in playwriting in the Adult Program of the Great Neck Schools, and has been active as executive producer and director of the Great Neck Players. Currently, she is directing off-Broadway.

A Senior Scholar

A HAPPY WORD has reached the Martlet from Oxford University. Gordon G. Wasserman, BA '59, Rhodes Scholar for Quebec in that year, has been named senior scholar in economics at St. Anthony's College, Oxford, for the next three years.

Gordon is also remembered as the Editor-in-Chief of The McGill Daily during his senior year.

Institute President

THIS YEAR'S president of the 6,000-member Canadian Institute of Mining and Metallurgy is James Buckland Mawdsley, BSc '21, head of the Department of Geology at the University of Saskatchewan and Director of its Institute for Northern Studies.

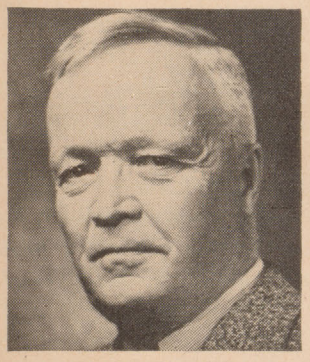

Dr. Mawdsley was born near Sienna, Italy in 1894 and came to Canada in 1904, moving out to Saskatchewan a year later, where he received most of his primary and high school training. After receiving his degree in Mining at McGill, he took his Ph.D in Geology at Princeton University, 1924.

During the First World War, Dr. Mawdsley served for four years with Princess Patricia's Canadian Light Infantry and the Royal Flying Corps. In 1918 he received the M.B.E.

After graduation from Princeton, he joined the permanent staff of the

Geological Survey of Canada and carried out geological work in northwestern Quebec. In 1929 he was appointed Head of the Department of Geology at the University of Saskatchewan. Since that time he has done much geological mapping in northern Saskatchewan for the Geological Survey of Canada and the Department of Mineral Resources of Saskatchewan, as well as consulting work in various parts of Canada and the U.S.A.

From 1939 to 1943, Dr. Mawdsley was a company commander in the C.O.T.C. and from 1943 to 1958, commander officer of the U.N.T.D. at the University of Saskatchewan. He belongs to various professional and scientific societies and is a Fellow of the Royal Society of Canada. He has published a number of memoirs, reports and papers on geological and related subjects.

James B. Mawdsley

Prof. J. U. MacEwan, seated centre, with some of his former students during the reception held in his honour in the university's Faculty Club. Left to right, standing in the rear, Phil Hamilton, '54, Lew Dempster, '44, Russ Dunn, '38, Stewart Jamieson, '41, H. H. Yates, '48 (PhD '52). Seated beside Prof. MacEwan, Bill Jeffrey, '47, left, and Tom Hirst, '44, right.

Reciprocal Pride

PROFESSOR JAMES URQUHART MACEWAN'S ardent pride in his students and their achievements was reciprocated recently at McGill. When they heard that Professor MacEwan was due to retire this year after serving as head of the Department of Metallurgical engineering for 17 years, a group of his former students decided to pay him a well-earned tribute. At a reception in the University's Faculty Club, both Professor MacEwan and his wife, the former Eleanor Smith, were honoured by the "old boys" and were presented with a cheque to be used for retirement travels.

Not long after this event, another honour came to Professor MacEwan. He was awarded the International Nickel Company of Canada, Limited, platinum Medal at the annual dinner of the Canadian Institute of Mining and Metallurgy in Quebec City in March.

The platinum medal, which is presented annually, is a mark of distinction and recognition for outstanding contributions to the mining and metallurgical industry of Canada.

An accompanying citation read in part:

> "To James Urquhart MacEwan in recognition of his many outstanding services to the metallurgical industry of Canada, and especially for his training and education of several generations of metallurgists as well as his outstanding metallurgical research, particularly for, and within, the Province of Quebec."

Born in Martintown, a village near Cornwall, Ontario, Professor MacEwan served overseas with the Canadian Expeditionary Force and upon his return entered Queen's University receiving his degree of B.Sc. in Metallurgical Engineering with honours in 1922. After several years in private industry, particularly devoted to lead smelting and refining, Professor MacEwan joined the staff of Montana School of Mines from which he received his masters degree in 1934.

He became an associate professor of metallurgy at McGill University in 1936 and was promoted to Birks Professor of Metallurgy in 1938. He became head of the department six years later.

Since 1938, Professor MacEwan has been closely associated with the Quebec Department of Mines and has carried on investigations in zinc recovery and lithium recovery. In 1958 he was appointed consulting engineer for planning and development of the present large Pilot Plant of the Department of Mines at Quebec City.

In spite of retirement, however, Professor MacEwan plans to continue teaching, on a part-time basis, in McGill's Department of Metallurgical Engineering.

Interesting Innovation

A VERY INTERESTING booklet has come to our attention from the Macdonald College Branch of the Agricultural Institute of Canada. The booklet is entitled "Employment Information — Class of 1961", and its purpose is to make available to potential employers pertinent information concerning each member of the graduating class in the Faculty of Agriculture.

Each graduating student is treated individually in the booklet, under his or her appropriate specialty. In addition to a well-reproduced photograph of the graduate, the following information is provided: Name, age, university

residence, home address, languages spoken, educational background, extra-curricular activities, hobbies, working experience, job interests and date of availability for employment.

In his Foreword to the booklet, Dr. H. G. Dion, Dean of the Faculty of Agriculture, points out that both employer and graduate "are dismayed at the dissatisfaction and economic waste involved" in trial-and-error procedures of employment. "This booklet is a very commendable effort to help graduating students and potential employers know each other better before such mistakes are made," he writes.

The Macdonald College Branch of the A.I.C. under its President Dr. R. H. Estey, which played a leading role in the initiation and production of this booklet, is to be congratulated for what is certainly a most worthwhile innovation, from the point of view of employer and student alike.

The Plucky Paupers

SUMMER THEATRE on the McGill campus? If a group of young McGill drama enthusiasts has its way, that's just what we're in for. Actually, this new group of amateur players, who go under the not inappropriate name of "The Paupers", won't be performing on the campus, but in the nearest thing to it: The McGill Union.

Some of the members of this fledgling theatre organization are well-known to the Martlet. First, there's Ottilie Douglas, BA '58, who worked with Althea Douglas in costume designing for the English department plays. Miss Douglas worked for two summers at Stratford, the Canadian Shakespearean Mecca. In 1958, she was granted the Tyrone Guthrie award for two years of study in England, where she pursued her interest in costume design at the Central School of Arts and Crafts, London. She returned to Canada in September, 1960.

Another well-known name is that of Donald MacSween, BA '56, who received his BCL degree at Spring Convocation. Mr. MacSween will always be remembered as the versatile co-author and co-producer of "My Fur Lady", in which he also acted. He received his theatrical training in English department productions as well.

Still another organizer of this group with wide experience in Montreal theatre is Neil Madden. For fifteen years Mr. Madden has worked with such companies as the Canadian Art Theatre, the Montreal Repertory Theatre and The Mountain Playhouse. He is primarily a set designer, but he writes and directs plays on the local scene. He has contributed sets for English department plays.

Most of the people participating in The Paupers' productions are either past or present McGill students, we are told.

The summer programme begins on June 21. The opening productions, to be performed in arena-style, consists of Anton Chekov's "The Harmfulness of Tobacco", George S. Kaufman's "The Still Alarm", Strindberg's "The Stronger", Eugene O'Neil's "In the Zone" and Noel Coward's "Hands Across the Sea".

This evening of one-act plays, to run from June 21-24, June 28 — July 1, will be followed by Shakespeare's "The Tempest" and "Summer and Smoke" by Tennessee Williams.

The General B.A. Degree: A New Curriculum

Professor H. Noel Fieldhouse, Dean of Arts and Science Concludes his discussion of McGill's new approach To the training of students in the general B.A. course

IN EXPLAINING the general ideas on which the new B.A. Curriculum rests, and the defects which it is intended to remedy, we suggested that the old curriculum had combined a close prescription of the student's choice of subjects, in his Freshman year, with an almost complete absence of such prescription, in the senior years.

The new curriculum deals with both ends of this matter. In effect, it liberalizes the first year and introduces more articulation and direction into the senior years. In future, the freshman will be able to choose between three Options, one anchored in the Humanities, one in the Social Studies, and one which is intended to keep open the road from the B.A. course into Medicine — a road which the two Faculties are agreed in thinking should not be closed: and, in each Option, there is a measure of prescription and a measure of free choice. The Freshman Year has not been made easier: it *has* been made easier for a Freshman to demonstrate that he has the capacity for university work, of the senior years, in a specific area of study.

Two Cognate Subjects

In the senior years, the student's work will be largely concentrated in two Cognate Subjects and in the two parts of the Faculty Course. This last represents a pioneer undertaking. There was a time when the undergraduate body was relatively homogeneous, so that the university could assume that its students, to a considerable degree, shared a common culture, a common folklore and a common background of preparation. It is clear that our incoming students, to-day, bring little such 'common' element with them, and, given the variety of departmental courses which I have described, it should be clear that we have done little to supply the lack. A student has been free to make a well-articulated selection of studies. He has not been required to make such a selection.

The Faculty Course

The Faculty Course is designed to remedy this lack by providing a common core and synthesis. It will run through the two senior years and, very briefly, it will deal with the successive conceptions of the nature of man and of the world in which he lives; with the relation between these conceptions and actual institutions, economic, political and religious; with theories of freedom and authority and their social and political implications; with the chief intellectual and imaginative works of man and with the changes in his standards in these matters; with traditional ideas of knowledge and the effects on them of the empirical findings of modern science. While it will be under the control of a director, and of a committee of Faculty, it will draw upon the teaching resources of Faculty as a whole and upon the help of members of other Faculties; so that the successful administration and conducting of such a course should have, as a by-product, the promotion of interdepartmental co-operation among members of Faculty as well as among students.

In the Senior Year

What has not been done, we believe, anywhere, is to place such Faculty Courses in the senior years. Synoptic courses have been given in some American universities and there has been one interesting experiment of this kind in England but, in all these cases, such courses are placed in the early years of the curriculum; and, as has been suggested above, it has been a long-standing and growing conviction of the Dean that the common North American attempt to identify 'general' education with the junior years of undergraduate degree courses represents a cardinal mistake in theory, and has been a demonstrable failure in practice.

All over North America, the attempt to lay 'general foundations' in the junior year takes the form of introductory 'survey' or 'orientation' courses; and no one whose office requires him to be in touch with student opinion can doubt that such courses (save where they are given by exceptionally gifted individuals) leave little mark on the student. If this is true of departmental courses, it is, *a fortiori*, still more so of Faculty Courses and of the purposes which we envisage in the new curriculum. It has been well said that "an educated person is one who is continually at work at his own enlargement"; but this spells time and maturity. The incoming freshman may deal very adequately with the concrete

All over North America, the attempt to lay 'general foundations' in the junior year takes the form of introductory 'survey' or 'orientation' courses; and no one whose office requires him to be in touch with student opinion can doubt that such courses (save where they are given by exceptionally gifted individuals) leave little mark on the student.

substance of particular subjects and, in the Dean's opinion, we should let him have his fill of such achievement. But 'general' education involves comparison and the perception of the relation of one discipline to another. It involves synthesis and abstraction and, if we would look back honestly at our own development, most of us would admit, one thinks, that we came to this stage relatively late.

If such courses are to be really synoptic, they will have to deal with many aspects of our civilization of which the incoming freshman has no knowledge, so that he would be in the position of passively receiving judgments handed down by his instructors. It seems better to give departmental instruction in his earlier years, and to attempt a synthesis, a tying together of his departmental specialties, when he has acquired something to tie together.

Central Courses

Apart from the Faculty Courses, the student's work in the senior years will be largely concentrated in two Cognate Subjects. It will not be enough, however, (given the large number of 'offerings' which we have described) merely to declare two subjects to be 'Cognate'. It is intended that Departments should decide which of their courses are central, and which peripheral, for any particular grouping; so that, for example, if a student decides upon English and History as Cognate Subjects, the two departments will prescribe which of their respective courses they will designate for this purpose. It is also intended that each student shall be placed under the guidance of his chief 'cognate' department in the same way as that in which an Honours student is under the guidance of the department in which he is reading honours.

Two other features of the new curriculum may be mentioned. Hitherto, candidates for the degree have been required to do a certain minimum of work in foreign languages and in natural science. It seems fair to say, however, that, in both cases, the requirement has been sufficient to act as an irritant and not substantial enough to be real. In future, in place of the requirement of one year of a classical, and one of a modern, foreign language, a candidate will be required to pursue a chosen foreign language to a point well above the introductory level.

Science for Arts students

Provision of instruction in the sciences, for students in the arts, is beset with difficulty. It would be foolish to introduce work, in science, which would not carry with it the full intellectual consent of the Departments which would be responsible for it. On the one hand, if they are to be worth doing, science courses for B.A. students must be courses *in* science and not *about* science; and the nature of the disciplines (one can advance quite far in French without German, but one cannot advance far in Physics without Mathematics, or in Chemistry without Physics) would seem to make it futile to do anything which is not substantial. On the other hand, the increasing blurring of the frontiers of different sciences (one thinks of Geo-physics and Bio-chemistry) and the unpredictable character of their future interrelationships, means that programmes should be flexible, and that an attempt to set up Faculty Courses in science, for B.A. candidates, might well sacrifice reality to a mere desire for symmetry. In the new curriculum, therefore, the student will be free to study some science in any one of the three first year options but, if he wishes to carry the study further, he must follow, through three years, one of a small number of what, it is hoped, are carefully selected and inter-related sequences of courses.

Scrutinize Courses

The Dean has referred above to the existence of courses which reflect the special research interests of members of Faculty, and the adoption of the new curriculum is hardly more important than the spirit in which it has been received by Faculty. If we are not to dissipate our resources, intellectual as well as financial, it is important that we should periodically scrutinize our courses. As an American colleague has put it: "There is no need to try to cover the waterfront". A number of Departments have already signified their intention to review their departmental curricula in the light of the assumptions on which the new curriculum is based and to integrate them with the common core which will be provided by the Faculty Courses.

In leaving this matter, I should like to pay tribute to my colleagues in Faculty. A recent provocative study, drawing upon American experience, has concluded that anarchy in the curriculum has reached a stage at which it is hopeless to look for reform

(Continued on page 33)

The incoming freshman may deal very adequately with the concrete substance of particular subjects and, in the Dean's opinion, we should let him have his fill of such achievement. But 'general' education involves comparison and the perception of the relation of one discipline to another. It involves synthesis and abstraction and, if we would look back honestly at our own development, most of us would admit, one thinks, that we came to this stage relatively late.

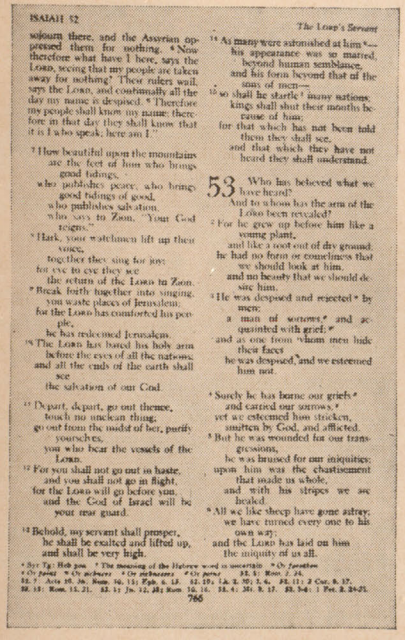

The English Bible

by **STANLEY FROST**
Dean, Faculty of Divinity

THE STORY OF the English Bible is the story of the English language. The first beginnings of a Bible in English can be traced thirteen centuries back to the Northumbrian verse-narratives attributed to Caedman the cowherd, at a time when what was later to become English was still a group of loosely-related dialects. Its early continuation is to be seen in the psalm-para-phrases of Aldelm, and in the Fourth Gospel of the Venerable Bede. The Ten Commandments and the Lord's Prayer were also translated into West Saxon by King Alfred the Great, together with Golden Rule, and issued as the surface to his law code. Then there are also the Northumbrian and North Mercian glosses to the Lindisfarne and Rushworth Gospels.

These vernacular versions, however, were all unusual phenomena and were very rarely copied. Walter W. Skeat was of the opinion that one single exemplar lay behind the half-dozen manuscripts of the Anglo-Saxon Gospels which have come down to us, and in the Latin age of the Church any such renderings were doubtless something of a curiosity. Nevertheless, these Gospels together with the comparatively more numerous Psalters and especially Abbott Aelfric's translation of the first seven books of the Old Testament made some fifty years before the Norman Conquest, have their noteworthy place in the history of the English version.

In the 12th century, the little work from Lincolnshire called the Ormulum was a paraphrase of the Gospels and Acts in the East Midland dialect, as still unleavened by the French of the Norman conquerors, and even the late 14th century version of Wyclif and Nicholas de Hereford, the first complete Bible in the English language, is

ISAIAH 52

The Lord's Servant

sojourn there, and the Assyrian oppressed them for nothing. 5 Now therefore what have I here, says the LORD, seeing that my people are taken away for nothing? Their rulers wail, says the LORD, and continually all the day my name is despised. 6 Therefore my people shall know my name; therefore in that day they shall know that it is I who speak; here am I."

7 How beautiful upon the mountains
are the feet of him who brings
good tidings,
who publishes peace, who brings
good tidings of good,
who publishes salvation,
who says to Zion, "Your God
reigns."
8 Hark, your watchmen lift up their
voice,
together they sing for joy;
for eye to eye they see
the return of the LORD to Zion.
9 Break forth together into singing,
you waste places of Jerusalem;
for the LORD has comforted his people,
he has redeemed Jerusalem.
10 The LORD has bared his holy arm
before the eyes of all the nations,
and all the ends of the earth shall see
the salvation of our God.

11 Depart, depart, go out thence,
touch no unclean thing;
go out from the midst of her, purify
yourselves,
you who bear the vessels of the
LORD.
12 For you shall not go out in haste,
and you shall not go in flight,
for the LORD will go before you,
and the God of Israel will be
your rear guard.

13 Behold, my servant shall prosper,
he shall be exalted and lifted up,
and shall be very high.

14 As many were astonished at him—
his appearance was so marred,
beyond human semblance,
and his form beyond that of the
sons of men—
15 so shall he startle[1] many nations;
kings shall shut their mouths because of him;
for that which has not been told
them they shall see,
and that which they have not
heard they shall understand.

53 Who has believed what we
have heard?
And to whom has the arm of the
LORD been revealed?
2 For he grew up before him like a
young plant,
and like a root out of dry ground;
he had no form or comeliness that
we should look at him,
and no beauty that we should de-
sire him.
3 He was despised and rejected[2] by
men;
a man of sorrows,[3] and ac-
quainted with grief;[4]
and as one from whom men hide
their faces
he was despised, and we esteemed
him not.

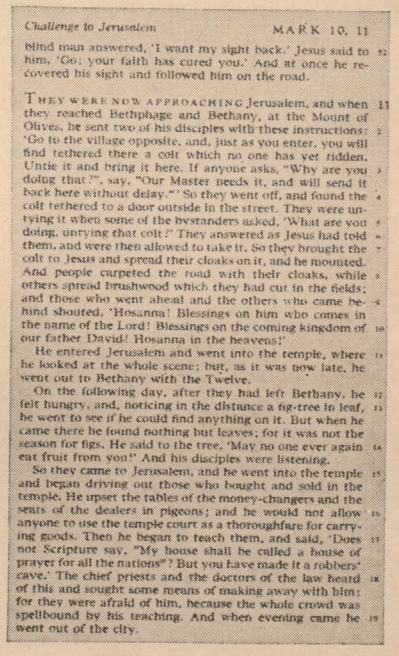

4 Surely he has borne our griefs[5]
and carried our sorrows;[6]
yet we esteemed him stricken,
smitten by God, and afflicted.
5 But he was wounded for our transgressions,
he was bruised for our iniquities;
upon him was the chastisement
that made us whole,
and with his stripes we are
healed.
6 All we like sheep have gone astray;
we have turned every one to his
own way;
and the LORD has laid on him
the iniquity of us all.

Challenge to Jerusalem MARK 10, 11

blind man answered, 'I want my sight back.' Jesus said to 52
him, 'Go; your faith has cured you.' And at once he re-
covered his sight and followed him on the road.

THEY WERE NOW APPROACHING Jerusalem, and when 11
they reached Bethphage and Bethany, at the Mount of
Olives, he sent two of his disciples with these instructions: 2
'Go to the village opposite, and, just as you enter, you will
find tethered there a colt which no one has yet ridden.
Untie it and bring it here. If anyone asks, "Why are you 3
doing that?", say, "Our Master needs it, and will send it
back here without delay." ' So they went off, and found the 4
colt tethered to a door outside in the street. They were un-
tying it when some of the bystanders asked, 'What are you 5
doing, untying that colt?' They answered as Jesus had told 6
them, and were then allowed to take it. So they brought the 7
colt to Jesus and spread their cloaks on it, and he mounted.
And people carpeted the road with their cloaks, while 8
others spread brushwood which they had cut in the fields;
and those who went ahead and the others who came be- 9
hind shouted, 'Hosanna! Blessings on him who comes in
the name of the Lord! Blessings on the coming kingdom of 10
our father David! Hosanna in the heavens!'

He entered Jerusalem and went into the temple, where 11
he looked at the whole scene; but, as it was now late, he
went out to Bethany with the Twelve.

On the following day, after they had left Bethany, he 12
felt hungry, and, noticing in the distance a fig-tree in leaf, 13
he went to see if he could find anything on it. But when he
came there he found nothing but leaves; for it was not the
season for figs. He said to the tree, 'May no one ever again 14
eat fruit from you!' And his disciples were listening.

So they came to Jerusalem, and he went into the temple 15
and began driving out those who bought and sold in the
temple. He upset the tables of the money-changers and the
seats of the dealers in pigeons; and he would not allow 16
anyone to use the temple court as a thoroughfare for carry-
ing goods. Then he began to teach them, and said, 'Does 17
not Scripture say, "My house shall be called a house of
prayer for all the nations"? But you have made it a robbers'
cave.' The chief priests and the doctors of the law heard 18
of this and sought some means of making away with him;
for they were afraid of him, because the whole crowd was
spellbound by his teaching. And when evening came he 19
went out of the city.

A page from the Popular Edition, New Testament, New English Bible (1961).

remarkably free from the French influence which is so noticeable in their contemporary Chaucer. But already this middle English Version of Wyclif, especially as revised and greatly improved by his disciple John Purvey, is beginning to display the flexibility and resilience of the remarkable language we now enjoy, and when today we read the clean, functional prose of the New English Bible, as free and unencumbered as the narrative style of C. S. Lewis or Charles Morgan, we are reminded that, as the English language has grown and developed, so the English Bible has sought to keep abreast of every new development.

The classical translation is, of course, the Authorized or King James' Version. It first appeared three hundred and fifty years ago, in the Spring of 1611, and in the Spring of this year we received the New Testament of a version which makes a radical break with the tradition in which the King James' Version stands.

★ ★ ★

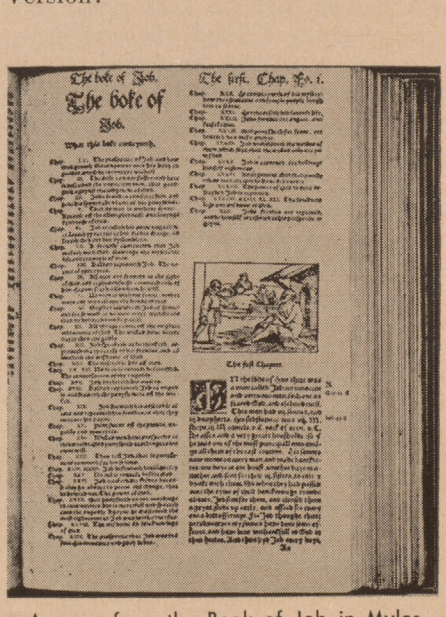

THE REVISED STANDARD VERSION, carried forward to completion in the United States, was a revision of the Standard Version issued in 1901. The New Testament appeared in 1946 and the complete Bible in 1952.

The Revised Standard Version was an immediate and remarkable success. It was, of course, open to criticism at many points, and was unmercifully berated by the Fundamentalists and is said even to have been publicly burned in some parts of the States; but in Britain, throughout the Commonwealth, and especially in North America it has steadily won its way. It is the one version which competes with King James' for being read in Churches, and it is the translation almost universally quoted by scholars. Its English is good, and remarkably free from any distinctively American turns of speech, and it has retained so much of the familiar cadences, sentence structure and vocabulary of King James' as to leave those who hear it read in no doubt that they are listening to that same book which they and their fathers have known and loved.

The Revised Standard Version New Testament had hardly appeared (and certainly had had no time to prove its worth) before a movement was begun in Scotland for a new British translation. After 13 years of concerted effort, the Translators appointed by the British Churches have now produced their New Testament, and the Old is promised in some five or six years' time. What is distinctive with regard to this version is that it has broken with 450 years of history, and has given us not a further revision of the English Bible, the Bible of Tyndale, Coverdale, Geneva, King James', of Westcott, Moulton, and the Revised Standard Version, but has produced an entirely new translation. The old familiar cadences of a leisurely mannered style have gone, and a clean, taut prose, as modern as the exterior of the Queen Elizabeth Hotel and as functional, has taken its place. Let us take a well-known passage and hear it first in King James', then in the Revised Standard, and finally in the New English Bible. Here is Matthew 11: 28-29-30 in the familiar version:

> Come unto me, all ye that labour and are heavy laden, and I will give you rest.
> Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls.
> For my yoke is easy, and my burden is light.

And here is the Revised Standard Version:

The booke of Job. The first. Chap. No. i.

The booke of Job.

The first Chapter.

A page from the Book of Job in Myles Coverdale's Bible 1535, the first complete printed Bible in the English Language. From the library of the British and Foreign Bible Society, London.

> Come to me, all who labor and are heavy-laden, and I will give you rest.
> Take my yoke upon you, and learn from me; for I am gentle and lowly in heart, and you will find rest for your souls.
> For my yoke is easy, and my burden is light.

And now the New English Bible:

> 'Come to me, all whose work is hard, whose load is heavy; and I will give you relief. Bend your necks to my yoke, and learn from me, for I am gentle and humble-hearted; and your souls will find relief. For my yoke is good to bear, my load is light.

King James and the Revised Standard are undoubtedly the same work but in the new translation the whole feel of the passage is different, and the more you read of the new version the more this impression forces itself upon you.

★ ★ ★

MOST LITERARY JUDGES would agree with the description of the King James' Version contained in the phrase 'a well of English undefiled and honoured as such wherever the language is spoken'. One criticism of the New English Bible is already widespread, that it does not read aloud so well as either the Authorised Version or the Revised Standard, which largely retains its rhythms and sentence-structure, and therefore the New English Bible is not suitable for use in Church. The answer will undoubtedly be that it was not intended for such public use, and (as the publisher's jacket says) the new version is not intended to replace the King James' Version. But this, I suggest, takes the new version out of the class of 'authorized' translations, and makes it a 'private' translation.

Moreover, looking at the New Translation from this side of the Atlantic, and from Canada in particular, there is something further to be added. For 450 years, the English Bible has been more than any other single influence the unifying factor in the development of the English language. This has probably been true from the time of Wyclif, but certainly it has been true from the time of Tyndale. Whether you lived in the north and pronounced the words

in good broad Scots, or in Wales and gave them forth with a lilt, or sailed across the sea to the New Lands and drawled them in the southern States or clipped them in New England, or took yourself off to the antipodes and produced them nasally in Australian, or even if you spoke your English with the impeccable accent of India, the words you read and the style you admired was one and the same.

Language and the Bible

Whether you were in London, England or London, Ontario, to draw a bow at a venture, to hide your light under a bushel, to cast your pearls before swine, were equally intelligible phrases. All whose native or acquired language was English went in this regard to the same school. As the English language developed so the English Bible kept pace with it, and English-speaking nations were supplied with a common classic course of phrases, idioms and allusions. What Homer was to the Greeks, the English Bible has been to the English-speaking peoples. As the American revisers of 1952 remark: 'It entered as no other book has into making of personal character and the public institutions of the English-speaking peoples. We owe it an incalculable debt'.

In our own day we have seen the gradual dissolution of the British Empire. What we do not want to see is the gradual fragmentation of the English tongue. That there should be Americanisms is healthy and desirable, just as there are distinctively Canadian, and Australian and British idioms and phrases. But written and literary English should remain one universal language, and that not merely in the sense of Esperanto, or 'businessese', but as a thing of beauty, of colour and of rhythm. Nothing could do more to encourage this than to continue to have one common English Translation of the Bible in public use among us.

That version cannot very much longer be the King James' Version. It is too far behind us in the development of our English speech. When Tyndale's Bible first came into England two men came seeking a copy from a distributor (nowadays I suppose the New Translation would call him a 'pusher') whose name was Friar Barnes. As an earnest of their good faith they showed him some manuscript copies of English translations, presumably Wyclifite, but Friar Barnes waved them on one side and said 'A point for them! For they be not to be regarded toward the new printed Testament in English. For it is of more, cleaner English'.

King James Sixth of Scotland and First of England under whose authority the King James, or Authorized, Version of the English Bible was prepared in 1611.

For Every Generation

Quite apart from the worthy Friar's exercise in salesmanship, he speaks for the succeeding generations of English-speaking peoples throughout the world. We need the English Bible, in all its magnificent history, made clean again for every generation, but if it is to be universal in its appeal, it must be the old version refurbished and constantly revised. This may in time mean that like the silk stockings of King James' illustrious predecessor, which were darned with wool so often that in the end they finished as worsted, the contribution of early hands like those of Tyndale and Coverdale may finally be revised quite away, but so long as the process in an evolutionary one, that will not matter overmuch.

My assessment of the new British translation is that it stands outside the main tradition. It is very worthy to stand alongside the translations of James Ferrar, James Moffatt, Edgar Goodspeed, Ronald Knox and J. B. Philips, and indeed it probably outclasses them. Anyone who sits down and read Paul's Letter to the Philippians in the new version cannot fail to recognise its excellence. It is a very fine translation, but essentially a private translation — in this instance not of one man but of the British Churches — and it will probably prove to be the best of such translations. But it is not The English Bible. It is to be seen (from this side of the water particularly) as a provincial British production and it bears, in places very noticeably, the marks of its origin. The 'New British Bible' would have indeed been a better name.

Latest and Best

The Revised Standard Version, American though it happens to be in origin, is the latest and best revision of The English Bible, and I venture to express the hope that it will continue to grow in favour throughout the English-speaking world, alongside the King James' Version, quietly taking its place more and more as we approach the end of the twentieth century.

By that time, we shall, however, probably need a further new revision, and it would be well to begin thinking of it now. It must necessarily be a further evolution of the traditional version, and it must be the work as it will be the heritage of all English-speaking peoples everywhere. The scholars should be set to work in all parts of the English-speaking world — in New Zealand, Australia, Africa, the United States, Canada and Britain. Probably India, Ceylon and certainly the West Indies will have rich contributions to make. Travel and communication by then will be so much facilitated that the technical difficulties arising from distance will be easily overcome, and The English Version will be renewed once again for a new century. The Christian Church will then be able to say to the English-speaking world what the Moderator of the Church of Scotland said to Queen Elizabeth on the occasion of her coronation as he handed her a copy of the English Bible: 'Here is wisdom; this is the Royal Law; these are the lively oracles of God'.

New Foundation Lectures

A SERIES OF EIGHT lectures, four open to the public, were held during the months of April and May at McGill, to commemorate the return of students to the campus from downtown quarters 100 years ago, and the construction of Molson Hall, as a significant addition to the Arts Building. The series was given the appropriate title "New Foundation Lectures".

The first lecture was given by Dean Lloyd G. Stevenson of the faculty of medicine, on "Medicine at McGill, 1860-61", the second by Marsh Jeanneret, director of the University of Toronto Press, on "The University as Publisher", the third by Prof. Kenneth Hare of the department of geography on "An Age of Re-Exploration", and the fourth lecture for the public by Dean Frost on "The English Bible".

The remaining lectures dealt with specialized topics in the medical sciences for members of the University faculty, and were given by Prof. Denton A. Cooley, associate professor of surgery, Baylor University, Houston, Texas, Prof. Paul A. Crepeau, associate professor in the faculty of law, Prof. David M. Hume, professor of surgery and head of the department of surgery, Medical College of Virginia, and Prof. Lloyd D. MacLean, associate professor of surgery, University of Minnesota, Ancker Hospital, St. Paul.

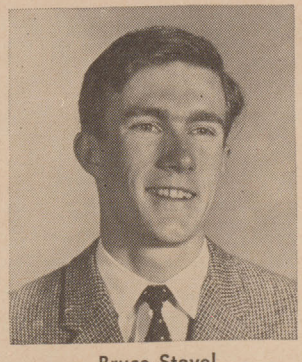

Books from Austria

A SELECTION of books in German was the gift of the Austrian government to the German Language Department at McGill recently. At a short ceremony, Austrian Ambassador Eugen Buresch presented the books to the department, which had been requested by McGill earlier in the year.

Architects on Tour

A STUDY OF URBAN development took five students from the five schools of architecture of Canada to several American cities for over a month. The tour, sponsored by the Central Mortgage and Housing Corporation of Canada, started in Montreal in mid-May where the five students studied this expanding city before leaving for the United States. Morris Charney, fifth year Architecture student, represented McGill. The tour was conducted by Stuart Wilson, assistant professor in building construction with the McGill School of Architecture.

New Daily Editor

Bruce Stovel

A SECOND YEAR Arts student, Bruce Stovel, has been appointed editor-in-chief of the McGill Daily for 1961-62. He succeeds Morris Fish. Mr. Stovel was a news desk editor during 1960-61.

Other members appointed to the managing board for next year are Judi Zeisler, a third year Arts student, executive editor, and Michael Feiner, second year Arts, managing editor.

Jordan Keeps Scrolls

THE GOVERNMENT of Jordan recently announced that the Dead Sea Scrolls would not be permitted to leave the country. Dean Stanley B. Frost of the faculty of divinity of McGill called the action "deplorable" and a "serious blow to North American Biblical scholarship". McGill had awaited the arrival of its collection since 1954, when the University signed a contract with the Jordanian department of antiquities involving $20,000 for an option on the scrolls, but had agreed to let them stay in Jordan until research scholars had completed their work on them. Jordan will return the money.

North American Biblical scholars will now have to go to Jordan to study the scrolls, found by accident near the coast of the Dead Sea, or examine them by means of photographs. McGill was to have received the most valuable collection of the scrolls, having deposited the greatest sum of money.

Industrial Relations

THE ANNUAL Industrial Relations Conference, held at McGill on June 6 and 7, dealt with technological change and its impact on both labour and management. The theme, "Changing Patterns in Industrial Relations", was expanded by Dr. W. R. Dymond, department of labour, Ottawa; Earl Hawkins, Imperial Tobacco Co.; Prof. B. M. Selekman, professor of labor relations, Harvard; Floyd Henry, managing director, CMS services, Toronto; and Prof. Jack Barbash, professor of labor education and economics, University of Wisconsin.

Bourguiba at McGill

PRESIDENT HABIB BOURGUIBA of Tunisia was welcomed, in French, to the Institute of Islamic Studies of McGill, by Dr. F. Cyril James, Principal and Vice-Chancellor, early in May. Dr. Wilfred Cantwell Smith, director of the Institute, and one of its scholars, Dr. Muhammad Rasidi, welcomed Mr. Bourguiba in Arabic. In an address, Mr. Bourguiba stressed the importance of institutes such as the one at McGill, saying that they were meeting places of scholars from the Arabic world and of the Western world, working towards peace and understanding of one another. He also mentioned that Islam should be treated as "a living thing, not as a dead historical object".

Before he left, President Bourguiba presented the Institute with a parchment dating back to 1020, containing the first verses of one of the chapters of the Koran, the work of scholar Ali ibn Ahmed Al Warraq.

President Habib Bourguiba of Tunisia, right, presented a 1020 A.D. Islamic manuscript to McGill Institute of Islamic Studies during a visit to the university early in May. Dr. F. Cyril James, second from left, and Prof. Wilfred Cantwell Smith, director of the Institute, next to President Bourguiba, inspect the manuscript.

Nuclear Disarmament

SEVERAL HUNDRED university students, many of them from McGill, staged a nuclear disarmament march along Sherbrooke Street early in April. The march, started simultaneously at Lafontaine Park and Westmount Park, met at the McGill Students' Union. The group was organized by the Combined Universities Campaign for Nuclear Disarmament, membership of which consists of 4,000 Canadian university students.

Seminar in Sweden

TWO STUDENTS will represent McGill at a six-week international seminar to be held in Sweden. They are Morris Fish and Alan Golden. The seminar, sponsored by World University Service, will study "The Well-Being of the Individual and the State". Five Canadian educators will head five study groups examining the following topics: "Co-operation and Social Welfare in Sweden", "The Cultural Life of Sweden", "Swedish Politics", "Education" and "Sociology".

Oil for Man

THE REDPATH MUSEUM was recently the scene of the first major industrial exhibition shown at McGill. Named "Oil for Man", and financed by the Imperial Oil Company Ltd., 15 panels illustrated how oil was formed, discovered, refined and distributed. Dr. Wilder Penfield opened the exhibition.

Woodrow Wilson Fellows

TEN MCGILL STUDENTS are among the 84 Canadians who have received Woodrow Wilson Fellowships this year. The awards, valued at $1,500 with full tuition costs paid by the Woodrow Wilson National Fellowship Foundation, are given annually to outstanding students in the humanities, social sciences and natural sciences. They cover the first year of graduate study and are meant to encourage the newly-elected Fellows to consider college teaching as a possible career.

The McGill winners are: Antony E. Alcock, History; Douglas S. Beder, Physics; Gerald A. Cohen, Philosophy; Lauraine H. Gold, Psychology; Barry Margulis, Philosophy; Serafina S. Murro, Romance Languages; Ronald E. Pearlman, Biochemistry; Stephen A. Scott, Political Science; Michael B. Stein, International Relations; and Irving Zucker, Psychology.

Grants for Lecturers

AS A RESULT of two Canada Council grants, McGill will be able to bring two lecturers here next Fall, one from India and the other from South Africa. Ali Akbar Khan, a distinguished musician and accompanist, will give three recital-lectures in the Fall, and Dr. Owen Williams, of the University of Natal, South Africa, will spend a year with the department of geography at McGill.

Each grant provides half the salary of the lecturer, as well as travelling expenses.

Language Fellowship

A MCGILL STUDENT of languages, Polish-born Ewa-Marie Romanowski, has been awarded the junior fellowship of $1,500 by the Canadian Federation of University Women. A graduate in honours French and English of McGill, Miss Romanowski will pursue her study of languages at Geneva, Switzerland.

Expedition to the North

TWENTY-SEVEN SCIENTISTS from Canada, England, Switzerland and Norway with student assistants picked from North American universities will spend the summer on one of Canada most northerly islands, Axel-Heiberg Island. Under the direction of Dr. Fritz Muller of McGill's department of geography, the group will study many areas of scientific research, notably glaciology, meteorology, geomorphology, permafrost, geology, geophysics, surveying and mapping.

The expedition, inspired by Dr. George Jacobsen, Montreal Arctic research engineer, gained impetus when in 1959, with the co-operation of the McGill department of geography, a base camp was established on the island. It is hoped that eventually a year-round camp will be maintained.

The Scope of SCOPE

As seen by Colin Ruthven Dobell
Its chairman for 1960-61

TEN YEARS AGO, the Students' Executive Council had $500 and nothing to spend it on. (Today such a situation would be so incredible that I should, perhaps, begin with "once upon a time . . .")

At that time, however, the S.E.C. also had a young maths-philosophy student, now a member of the university's Department of Philosophy, Professor Stoors McGill who, in turn, had a great many ideas. These the S.E.C. combined with the $500 to produce SCOPE. Within a few weeks Sir Thomas Beecham and Dylan Thomas—both now deceased — arrived at McGill. (Thomas' views on Montreal — somewhat in the Butler tradition — are given succinctly *in Dylan Thomas in America.)*

During the years following, posters appeared around McGill with a "SCOPE Presents" headline under which, though not simultaneously, were found the names of: Oscar Peterson, Pete Seeger, Ogden Nash, Stephen Spender, Emlyn Williams, Robert Frost, E. E. Cummings, the Amadeus String Quartet, the New York Brass Quintet, Philippe Entremont, pianist, and Rey dela Torre, the classical guitarist. A few blocks along Sherbrooke Street, at the Montreal Museum of Fine Arts SCOPE, together with students from the University of Montreal, has co-sponsored exhibits of Canadian watercolours, Quebec oils, and contemporary American art.

Although many outsiders insist that SCOPE stands for some significant, unending title, the committee believes that it is merely a name lifted from a medical journal found one day on the lower campus. However, to those of our alumni who remain skeptical, on the principle that the customer is always right, we offer "The Students' Cultural Organization for the Perpetuation of Erudition".

As such, this winter we brought to McGill the Royal Welsh Male Choir (in the opening performance of their North American tour), the Ted Elfstrom Jazz Octet, Brendan Behan (in "An unpredictable evening with . . .") and Alan Jarvis. With the Canadian Broadcasting Corporation and the McGill Faculty of Music, we gave two concerts, one by Johanna Martzy, the young Hungarian violinist and the other by the Chilean pianist, Claudio Arrau. The concerts, recorded in Redpath Hall, were later heard on "C.B.C. Wednesday Night".

In January, for the first time in many years, SCOPE staged an exhibit of Fine Arts by McGill students. Seventy students brought some 170 sculptures and canvasses, of which about 80 were shown. Alan Jarvis (former

(Continued on page 33)

Two members of the Jacobsen-McGill Expedition to Axel-Heiberg Island this summer demonstrate what the well-dressed young man will wear in the north. Thomas Diem, left, sports a feather-filled garment while David Terroux, right, wears a wind parka.

Karefa-Smart Of Sierra Leone

This McGill medical graduate,
Now a leader of his country,
Has had a most amazing career

BY PERCIVAL TALLMAN

SIERRA LEONE, the newest member nation of the Commonwealth, became independent last April 27th. It is a small West African country, still overshadowed in Africa and world affairs by its larger and more progressive brothers, Ghana and Nigeria. But it should not be too long before Sierra Leone's voice is heard with increasing vigor at the councils of the Commonwealth and at the United Nations. The voice doing much of the speaking for the new nation will be that of Dr. John Karefa-Smart, a graduate of McGill's faculty of medicine, a veteran of Second World War service with the Royal Canadian Army Medical Corps, a Licentiate of the Medical Council of Canada, and a member of the College of Physicians and Surgeons of Alberta.

First Trip Abroad

During his McGill days Dr. Karefa-Smart was an active member of the Student Christian Movement, the Cosmopolitan Club, the Philosophical Society and the McGill Daily. He also participated in track and fencing, and he was co-founder of the African Students' Association of Canada and the U.S.A.

An Active Student

Dr. Karefa-Smart, now Minister of Lands and Survey, and Minister responsible for External Affairs and Defense, is a member of a distinguished Sierra Leone family. He was born in 1915 in the town of Rotifunk, in the Moyamba district, the second son of the late Rev. James Alfred Karefa-Smart. His maternal grandfather was the celebrated Paramount Chief Thomas Canraybah Caulker, one of Sierra Leone's earliest leaders in its progress towards independence.

John Karefa-Smart received primary and secondary education at the Evangelical United Brethren mission school in his home town and at Albert Academy in Freetown, the capital of Sierra Leone. During this period he became one of the youngest King Scouts in the country and gained his teacher's preliminary certificate while he was still at school.

Later he entered Fourah Bay College, now known as the University College of Sierra Leone, and was graduated a Bachelor of Arts of Durham University, the British university to which many such West African university colleges are affiliated. His first post on graduation took him to the inter-denominational Union College at Bunumbu. There he taught history for two years and at the same time was ordained an elder of the Evangelical United Brethren Church.

Now Cabinet Minister

In 1938, he made his first trip abroad, entering Otterbein College, Ohio, where he was graduated Bachelor of Science. Then in 1940 he entered McGill where he studied medicine and surgery for four years, and took a post-graduate course in tropical medicine, finally qualifying M.D., C.M., D.T.M. At this point the Second World War was at its height, and the need for trained physicians and surgeons was desperate. Accordingly, Dr. Karefa-Smart enrolled in the RCAMC and was posted to the Bahamas.

Soon after the end of the war he returned to Sierra Leone to serve in a number of mission hospitals, and it was at this time that he began his career in politics, becoming a behind-the-scenes adviser to the Paramount Chiefs at the Sierra Leone Protectorate assembly at Bo. (At this time Sierra Leone comprised the Colony, a small area around Freetown, and the Protectorate, a much larger territory extending to the borders of Guinea and Liberia.) Soon he and some associates formed the Sierra Leone Organization Society, with Dr. Karefa-Smart as first president. The S.O.S., as it was called, later merged with the dominate Sierra Leone People's Party, which now forms the government under the leadership of Prime Minister Sir Milton Margai, another medical doctor.

Further Studies

In 1947 Dr. Karefa-Smart left Sierra Leone once again for further studies, this time entering Harvard under the Canadian War Veterans scheme. At Harvard he read public health obtaining a M.P.H. degree. In addition to his licentiate of the Medical Council of Canada and his membership in the Alberta College of Physicians and Surgeons, Dr. Karefa-Smart became a Fellow of the Royal Society of Tropical Medicine and Hygiene, and was a founding member of the College of General Practice.

The following year he returned to his home town of Rotifunk serving once more as a missionary doctor. But within a year he was invited to lecture in preventive medicine at the University College at Ibadan, in Nigeria. There he spent three years after which he joined the World Health Organization as Area Medical Officer for West Africa, the area spreading from Tangiers to the mouth of the Congo River. While serving W.H.O. in Monrovia, Liberia, Dr. Karefa-Smart was decorated Commander of the Order of the Star of Africa for his distinguished contribution to public health.

Elected Unopposed

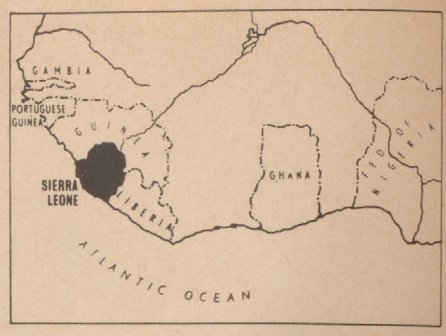

Finally in 1957, with the movement for independence gaining ground, Dr. Karefa-Smart returned to Sierra Leone and was elected unopposed as Member of the House of Representatives for the constituency of Tonkolili West. The Prime Minister quickly appointed him Minister of Lands, Mines, and Labour. In the same year, he led Sierra Leone's delegation to London which negotiated the establishment of an all-African Executive Council for the colony and protectorate. In 1960 he played a leading part in preparations for the Constitutional Conference in London which set the date for Sierra Leone's independence at April 27, 1961. By this time he had become Minister of Lands and Survey, with the added responsibility for External Affairs and Defense. In the latter roles his importance will grow steadily as he is one of the few leaders from the English-speaking countries of West Africa able to converse fluently in French with his opposite numbers in the former French territories.

During his busy medical and political career, Dr. Karefa-Smart found time to marry and raise a family. His wife is the former Rena Weller, a graduate of Yale University's Divinity School. They now have three children. Dr. and Mrs. Karefa-Smart are both widely known in international circles and are prominent supporters of the World Student Christian Federation. They have jointly published a book entitled, "The Halting Kingdom."

More Students?

With his strong connections with the medical schools of Harvard and McGill it is pretty safe prediction that McGill at least will soon be seeing more students from Sierra Leone, sponsored under the various scholarship plans now being geared to provide higher education to an ever-increasing number of Africans, particularly those from the Commonwealth member nations.

And a final sidelight on the amazing career of this distinguished McGill graduate . . . Dr. Karefa-Smart is believed to be the only African Minister to visit his own constituency handling the controls of his personal aeroplane. Could this set an air-age precedent for Parliament Hill, especially around election time? And keeping up with the times, should McGill now offer a special course in flying for its prospective politicians?

SIERRA LEONE, the newest member of the Commonwealth, is a relatively small African nation, lying north of Ghana and having common frontiers with Guinea and Liberia. It's about the same size as Ireland, with an estimated population of about 2½ million. The capital, Freetown, has one of the finest natural harbours in the world. The country was named by the Portuguese explorer, Pedro da Cintra, who discovered the mountainous peninsula around Freetown on his voyage of 1460.

The colony was first established by a group of English abolitionists, led by Granville Sharp, as a home for freed African slaves. The first such settlers began to arrive in 1787, from England, and later from Jamaica and Nova Scotia. The freed slaves were known until recently as Creoles, distinguishing them from the resident Mende and Temme tribes which still form the bulk of the population. In 1799 Granville Sharp formed the Sierra Leone Company to administer the small territory in the immediate vicinity of Freetown.

The settlement fell victim to many attacks from the neigboring tribesmen and from French naval squadrons. In 1808 the tiny settlement passed to the British Crown, just a year after the abolition of slavery in 1807. From that time on as slave ships were captured their human cargoes were freed in Sierra Leone. Gradually a British sphere of influence was created in the hinterland beyond the small colony, and in 1896 a British Protectorate was declared, judicially and administratively separate from the Colony. It wasn't until 1924 that the legislative and executive councils of the colony took over administration of the protectorate.

A new constitution of 1951 brought about the first elections held on party

(*Continued on page 33*)

Rural: *In the photo above, Sierra Leone villagers in an agricultural community are shown carrying piassava, a fibrous palm product used to make coarse brushes. Farming is the major occupation; rice is grown for local use, palm kernels, coffee and cocoa for export. There are plans for banana and rubber plantations and a tobacco project.*

Urban: *The capital city of Freetown, right, is the main centre of commerce and communications in Sierra Leone. It has an international airport and one of the finest natural harbours in Africa with anchorage for 240 ships. Some 1,200 ships call at Freetown each year.*

OUTSIDE THE WINDOWS snow fell from a grey October sky upon the grey city. Occasionally wind rattled the window panes.

It was two o'clock, the afternoon's somnolent hour, and in a classroom of the Arts Building of McGill University, Montreal, we awaited the arrival of the professor who was to give us our first lecture in Political Science 1. The subject, like the university and the professor, was new to me. This was long ago, for ours was the sophomore class of Arts '22. I was a freshman in it, just come to Montreal from a small town on the western slope of the Rockies, having taken my first year at the University of British Columbia in Vancouver. So far, none of the other students had spoken to me.

About thirty of us, including two women, sat in a semicircle of ascending benches above the lecture-platform and its lectern. The desks upon which we laid our note-books were dark and mellowed and carved with the names or initials of those who, through the years, had been there before us.

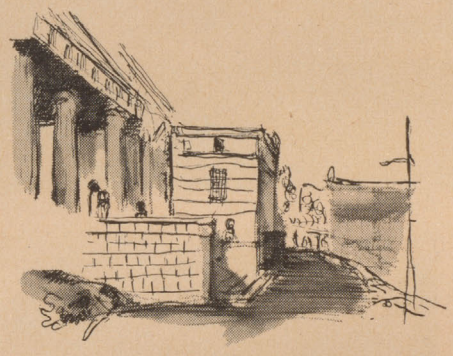

"A Gust of Wind"

Suddenly, the murmurs, the whisperings of paper, the scuffling of feet, were stilled by what I can only describe as an "irruption". The door to the right of the lecture-platform, as we faced it, burst open and, before it was as rudely shut again, a gust of wind seemed to have entered the class-room. It had material form, that gust of wind, in the figure standing momentarily against the closed door: a man in his fifties, of medium height, broad shoulders hunched forward, wearing flopping galoshes, a coon-skin overcoat and a grey fedora squashed shapeless upon his head. At first glance he appeared an unlikely receptacle for the dusty mysteries of Political Science 1.

Advancing to the lecture-platform, he tossed the hat on to the floor in the corner behind him, took off his coon-skin overcoat, threw it after the hat and followed it with his pair of unbuckled galoshes, each flung with precision and a resounding slap against the wall on to the pile in the corner. He stood before us then in a rumpled brown tweed suit.

His blue, silken tie, loosely knotted around a white collar, was askew and he fingered a heavy, gold watch-chain strung across his vest. From under a mop of smooth, brown hair that, low over his forehead, fitted him like a toque, his eyes twinkled and on his thick moustache glistened a few beads of moisture from the falling snow. The eyes were alive and observant, darting to and fro across the class. His cheeks were full and red and glowing and, as he beamed at us from over the lectern, his presence filled the sombre room as surely as a sun-rise floods a mountain valley.

The fair-haired man in front of me turned in his seat. I was to know him as Geoff MacDougall, veteran of the flying corps in the World War so lately ended, and was flattered that he, an older man, should be the first in the class to speak to me.

He had noticed that I was a stranger and, nodding towards the lecture-platform, asked in an under-tone, "Do you know who that is?"

I shook my head.

"Stephen Leacock," he answered.

When I made no response, he added, "The humorist — you know, he writes books."

Doubtless, I had seen the name in the prospectus of the course, but in the rush of registration it had conveyed little to me. Now I looked again towards the lecture-platform and slowly realized that what for months, for years, had only been a name, had taken flesh and form before me — a curious transmogrification this, like watching a shape dim in the fog approach down the street until suddenly, under the corner lamp-post, it reveals, unmistakably, its human outlines.

I HAD READ, up to that time, none of Stephen Leacock's books, though it is unlikely that I had entirely escaped reading some of his syndicated newspaper columns or magazine articles. Certainly, I was not so familiar with his work that I had ever tried to visualize the face behind the printed page. No matter — he existed without that knowledge. "Leacock" in Canada was a household word and he, himself, an institution. Like the Parliament in Ottawa, which I had never visited, I knew that he was there, somewhere beyond the horizon, and almost as enduring.

In the decade after the First World War, he stood alone as a humorist, not only in Canada, but in North America and the rest of the English-speaking world. Other humorists there were, of course — I think of Dorothy Parker and Robert Benchley in the United States, — but none of them had his international standing, nor followed so naturally in the tradition of Mark Twain. His books, the classic *Sunshine Sketches of a Little Town* and *Nonsense Novels*, were read wherever English was spoken, "leacockian" was already accepted as an adjective and his man who got on a horse "and rode madly off in all directions", was on its way to becoming part of the language.

"A More Tranquil Stream"

Mark Twain's humour was a brawling, lusty river, often spilling over its banks. Leacock's was a more tranquil stream, watering a more limited country-side. Both came, however, from the same source: the shared imaginings of common people where, in strange correspondence, the possible lives in contrast to the usual and the incongruous weighs against the decorous. Like Mark Twain, whose student he was, Leacock knew the frontier. He knew it as it was on a farm in Upper Canada, now Ontario, where his family came from England in 1876 when he was a boy of seven. Unlike Mark Twain, he had received a formal education. He had graduated as "head boy" from Upper Canada College, later became a teacher there and went on to be a professor at McGill and, finally, Chairman of the Department of Economics and Political Science.

He taught Political Science, and wrote a much-translated book about it, but when I knew him teaching had become a side-line. He said to me in the spring of 1923, when I visited him

Reprinted from the Queen's Quarterly, Spring 1961

HOWARD O'HAGAN'S

Fond Recollections of

"Stephie"

in his study on Metcalfe Street, below the University, "Of course, O'Hagan, I go up to the University and deliver lectures, but my real work, my writing, is done right here between six-thirty and nine-thirty in the morning." All his life, a habit stemming from his years as a boy on the farm, Leacock was an early riser.

I HAD GONE to his study as a part-time reporter for *The Montreal Star* to obtain his views on "how to become a writer" — a much more ambitious assignment than I then took it to be. As I look back, most of the study is dim. There are a desk and shelves cluttered with books. A yellow sun shines through the room's one window upon a straight-backed chair piled with manuscripts. It glints upon cob-webs binding the manuscripts to the back of the chair and the legs of the chair to the floor. "Stephie", as we called him, tilted the chair, spilling its contents, and invited me to sit down. The point of the interview that stays in my mind was his advice, strongly given, against any neophyte attempting to write humour.

Oddly enough, Leacock was on the defensive about humour. Most people, he thought, regarded it altogether too lightly, almost as though it were the product of a writer's idle moments, something he jotted down between drinks or between acts at the theatre. The reason for his attitude may not be hard to find. In Montreal and at McGill, his presence was taken for granted. True, he was much in demand as a lecturer and as an after-dinner speaker and, so numerous were the requests, that he began to charge a fee. In his writings he frequently pointed out his distaste for such appearances where he was no more than a "paid performer" and sometimes made to feel as such.

Of these appearances he wrote, "The public sees the lecturer step out on to the platform in his little white waistcoat and his long-tailed coat and with the false air of a conjurer about him, and they think him happy. After about ten minutes of his talk, they are tired of him. Most people tire of a lecturer in ten minutes. Clever people can do it in five. Sensible people never go to lectures at all . . ."

Further, while Leacock's royalties and other payments for literary and academic work might bring him in a given year as much as $80,000, off the campus in his social and speaking engagements — Montreal is a wealthy town — he often associated with men worth much more than that: a railroad president, bank and industry presidents, and members of their boards of directors. To such men, he may have felt, writing, especially the writing of humour, seemed to be little more than a diversion. It was what they picked up to read in their spare time, this though its author was famous internationally, while they could boast only a local or, at best, a national notoriety.

Therefore, Leacock saw himself not only as a writer of humour, but as spokesman for it. He was not modest, nor had he need to be, in the claims he made for his subject and, by implication, for himself as one of its leading exponents. For instance, he wrote in *Maclean's Magazine*, "The world's humour, in its best and greatest sense, is perhaps the greatest product of our

> *" ' . . . in its larger aspect, humour is blended with pathos till the two are one, and represent, as they have in every age, the mingled heritage of tears and laughter that is our lot on earth.' "*

civilization . . . and Charles Dickens' creation of Mr. Pickwick has done more for the human race — I say it in all seriousness — than Cardinal Newman's *Lead Kindly Light Amid The Encircling Gloom.* Newman only cried out for light in the gloom . . . Dickens gave it." Again, " . . . in its larger aspect, humour is blended with pathos till the two are one, and represent, as they have in every age, the mingled heritage of tears and laughter that is our lot on earth."

THAT FIRST AFTERNOON at McGill in Political Science 1, Stephen Leacock spoke. He spoke for an hour in a deep, sonorous voice. Yet I do not now recall a word that he said. It is unlikely that he spoke at much length on Political Science. His inclination, as shown in his lectures over the next three years, seemed to be to avoid the subject whenever he could. Nevertheless, he must have taught it at times — I have copious notes on the course in an old trunk in a basement — and, after all, most of us passed our examinations. I remember the course as having vaguely to do with the forms of government.

Imperial Preference

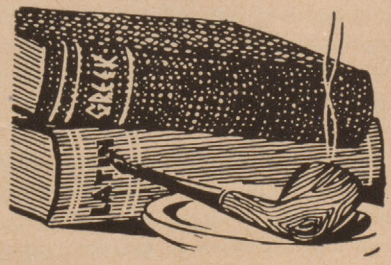

Leacock had once been around the world speaking for "Imperial Preference" between Great Britain and her possessions beyond the seas for, just below humour in the scale of man's achievement, he listed the British Empire. This gave him opportunity to point out to us how the mother country had exported her parliamentary system to various lands and equally various climes. Then, abruptly, we would return to Canada.

Most of all, Stephie liked to avoid the abstract and to deal with human values. This led him one afternoon to tell us of "the most remarkable man" he had ever known. This was none other than Edward Leacock, Stephie's uncle, his father's younger brother. I daresay he had a part in the lecture because he was a sample in a minor way of democratic government at work and he was also of the stuff of "empire builders". Leacock was to give him a place in literature in an article entitled, "My Uncle Edward".

Uncle Edward, when Stephen Leacock was about nine, suddenly appeared at the isolated farm in Ontario. A man of large ideas, as it was soon to develop, he had lately finished a cruise of the Mediterranean and a tour of the African slave markets. In that year of 1878 a general election was called in Canada. Uncle Edward, or "E.P.", decided to take part in it. Apparently in those days, newly arrived as he was, his British citizenship entitled him to stand for Canadian office.

The Personal Approach

Bearded and bronzed, about thirty years old, he approached the humble farm-hands for votes. He disdained the tedium of public meetings. His aproach was the personal one at street-corners and in bars. Hearing that the prospective voter's name was "Smith", for example, E.P. would at once exclaim that he was an intimate of a "Sir James Smith", had seen him only a few months before on leaving England for the Mediterranean and that the two "Smiths" must be closely related. The prospective voters — Smith, Jones or Brown — would demur. They had lost touch with their old country cousins but, of course, it was quite possible, even likely, that there were titled ones among them. Vote — how else could they vote, these people suddenly raised to the company of "Sirs", "Honourables" and, in a few cases, of "Baronets"?

Leacock explained to us that, like himself, E.P. was, naturally, a conservative but a conservative who could meet with the humblest on equal terms. "A democrat could not condescend. He was down already, but when a conservative stooped, he conquered."

The Top of the Heap

E.P. did not remain to exploit his victory. Times were hard in Ontario, but Winnipeg to the west was booming. In that town, employing his usual social graces, he was soon on top of the heap. He became secretary-treasurer of a railroad that had a charter to build through to Hudson Bay and the Arctic. It had no track, nor rolling-stock, and never would have, but it printed passes. In exchange for these E.P. obtained free transportation all over North America.

The boom burst and E.P., broke, returned to England. There he became financial manager of an abbey. When he was lecturing in England in 1921, Stephie had an invitation to visit him. Unable to make the journey, he never saw his uncle again. E.P., like most "empire builders", was a man of dreams and, in his case, fifty years ahead of the times. By 1930 steel had been laid to Hudson Bay and in Canada today there is already talk of the railroad that one day will reach to the Arctic.

E.P. might have been one of the characters in *Sunshine Sketches,* where, in the mythical town of Mariposa on a mythical lake in Ontario, his nephew was to create such figures as Golgotha Gingham, the undertaker, the Reverend Mr. Drone, Anglican minister, and Jos. Smith, Prop., the local hotelman. Instead, he was bone and substance who bequeathed a little of his wild fancy to his brother's son.

(Editor's Note: In the next issue of The McGill News, Mr. O'Hagan continues his personal reminiscences about "Stephie", with emphasis on Leacock as a class-room lecturer and as an extra-curricular personality.)

THE FACULTY

DR. E. H. BENSLEY, associate professor of medicine and honorary lecturer in biochemistry, has been appointed associate dean of the Faculty of Medicine, effective next session. Under the terms of the appointment, Dr. Bensley will direct graduate education in medicine and will share with Dean Lloyd Stevenson the general direction of the work of the faculty. A native of Toronto, Dr. Bensley received his education at the University of Toronto and joined the staff of the Montreal General Hospital in 1932. He is now director of the hospital's Department of Metabolism and Toxicology. He has been at McGill since 1940.

DR. MICHAEL BRECHER, associate professor of economics and political science, is the first Canadian to receive the American Historical Association's Watamull Prize, which is awarded biennially to an author for the best book written on India, which makes the most significant contribution to American understanding of India. The prize was awarded to Prof. Brecher for his book entitled "Nehru, a Political Biography", first issued by the Oxford Press in 1959 and twice reprinted. Prof. Brecher, who has been on the McGill staff since 1952, received his BA at McGill in 1946, when he was awarded the Allen Oliver gold medal and a graduate fellowship. He took his MA and PhD degrees at Yale.

PROF. DAVID MUNROE, director of the Institute of Education, has been named a member of Quebec's Royal Commission on Education. Prof. Munroe received his BA at McGill in 1928, his MA in History in 1930 and his MA in Education in 1938. He is a past president of the Provincial Association of Protestant Teachers, the Canadian Teachers' Federation, the Canadian College of Teachers, and the Canadian Association of Professors of Education. In 1959 he was a member of the Canadian delegation attending the educational conference at Oxford. The Royal Commission is headed by the vice-rector of Laval University, Msgr. Alphonse Marie Parent.

DR. D. O. HEBB, professor of psychology and former president of the American Psychological Association, has been elected an honorary member of the American Academy of Arts and Sciences, the only Canadian to be so honoured. Dr. Hebb was elected to membership in section 4, dealing with physiology and experimental psychology. A native of the Maritimes, and a graduate of Dalhousie, McGill and the University of Chicago, Dr. Hebb is the author of two books and scores of scientific papers. He is a past president of the Canadian Psychological Association and the only Canadian ever to be elected president of the equivalent American body — a professional association of some 20,000 members.

DR. S. J. FRANKEL, of the department of economics and political science, has received a $4,500 grant in aid of research from the Civil Service Association in Canada to complete a project in the field of employer-employee relations in the federal civil service. Last year, Dr. Frankel was granted the Canada Council senior fellowship to study the British experience with arbitration in the civil service and its possible adaptation to Canada.

DR. CHARLES P. LEBLOND, head of the department of anatomy, has received a grant of $25,000 from the Canadian Cancer Society to finance several cancer research projects during the next year. Among the projects being undertaken by Dr. Leblond's department is one by DR. N. J. NADLER, endocrinologist, who has been studying various aspects of cancer of the human thyroid.

A TOTAL OF 11 staff members and researchers have been awarded Canada Council grants for research work in the humanities and fine arts. The grants range from $300 to $1,200, providing maintenance and travel expenses for short-term research projects. Among those receving awards were PROF. RALPH S. WALKER, chairman of the department of English language and literature; PROF. JOYCE HEMLOW, in the same department; PROF. RAYMOND KLIBANSKY, department of philosophy.

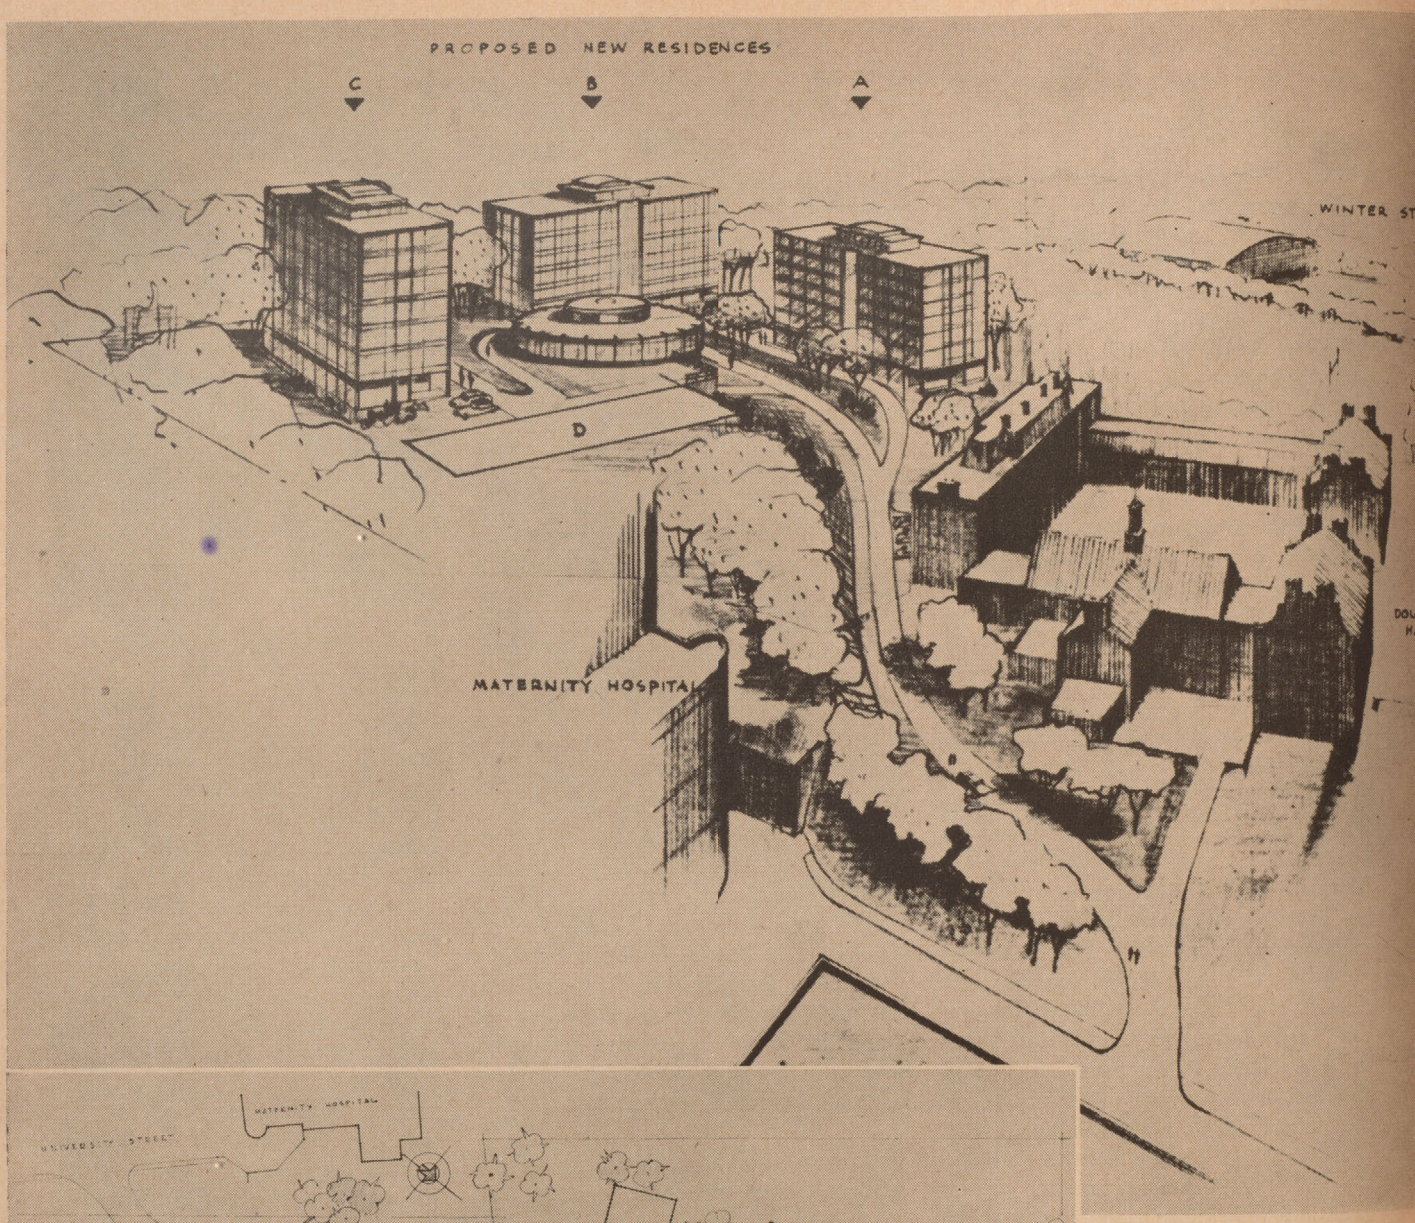

Other staff members receiving grants: CURTIS D. CECIL, assistant professor of English; ALTHEA C. DOUGLAS, research assistant, Burney project, department of English; SLAVA KLIMA, assistant professor of English; IRVING MASSEY, assistant professor of English; MILOS MLADENOVIC, associate professor of History; MARTIN PUHVEL, assistant professor of English; MARGOT SMITH, assistant, Burney project, department of English; ISTVAN ANHALT, assistant professor of Music.

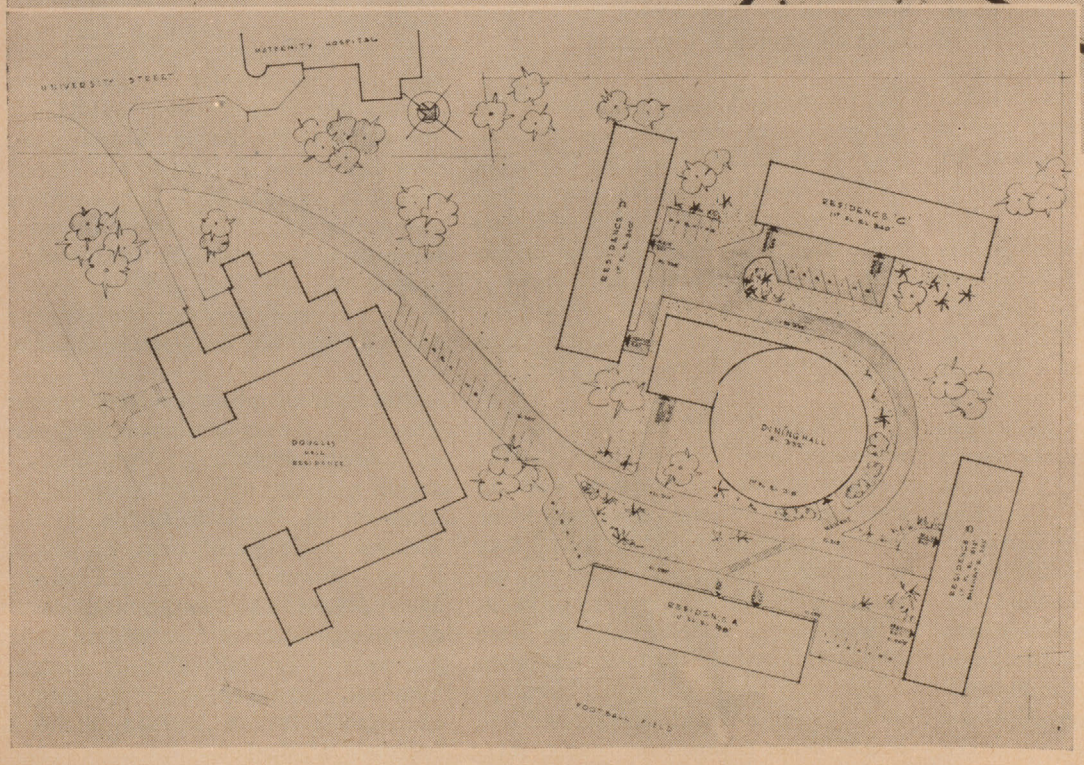

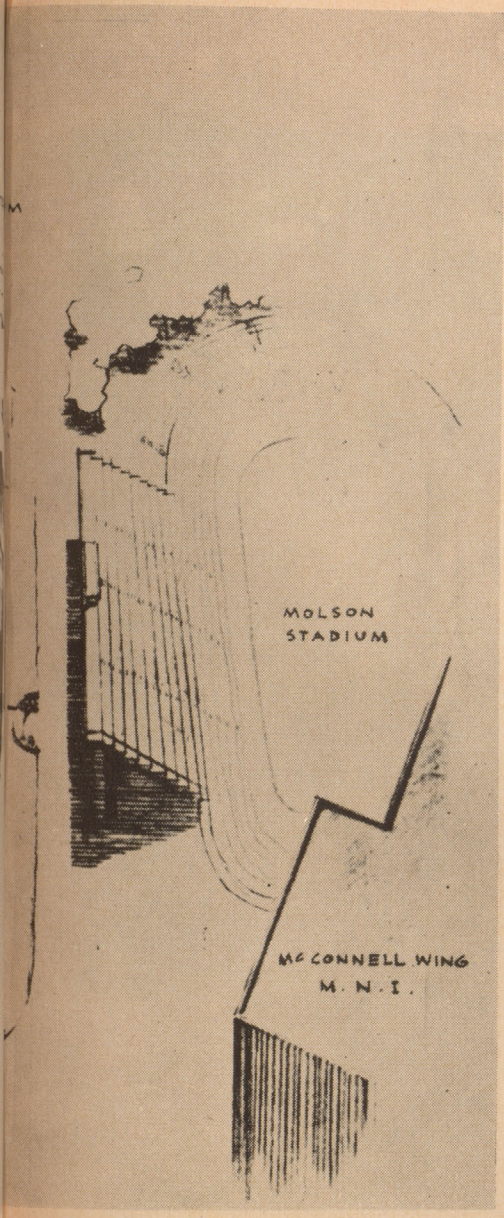

PROF. FRANK R. SCOTT, who has been a member of the Faculty of Law since 1928, has been appointed Dean of the Faculty, succeeding the late W. C. J. Meredith, Q.C. Prof. Scott, who holds the chair of Macdonald Professor of Law, has just returned to the university following travels in the Middle East on a Canada Council grant.

Born in Quebec City in 1899, Prof. Scott won his BA degree from Bishop's University in 1919 and was named Rhodes Scholar for Quebec in 1920. He studied at Magdalen College, Oxford, and was awarded the BA and BLitt degrees.

Prof. Scott came to Montreal and took his law training at McGill, receiving his BCL degree in 1927. He was called to the Quebec Bar the same year and joined the McGill law faculty the following year. He is both a scholar and a poet and he has taken an active interest in international and Canadian affairs.

McGill's Residence Development

McGill University *is taking a major step toward the establishment of a substantial residential centre for men students. Shortly after the Board of Governors had approved the immediate construction of two new men's residences and a central dining hall, Dr. F. Cyril James, Principal and Vice-Chancellor, announced that a third hall of residence would be started following a handsome gift from Mr. J. W. McConnell.*
(See principal's announcement, Page 27).

The first three buildings will house over 675 students and it is expected that they will be available for occupancy in the autumn of 1962. A fourth residence will be added at a later date and the entire project will ultimately provide living accommodation for a total of 904 students.

At the present time, the two existing University residences, Douglas Hall, opened in 1937, and Wilson Hall, formerly the United Theological College which was converted into a men's residence in 1946, accommodate together a total of 225 students, only eight percent of the male student population of over 2,800 from outside Montreal.

A unique location has been selected for the new residence centre immediately to the north of Douglas Hall at the head of University Street on university property which is now being cleared. This situation, on the southern slope of Mount Royal, combines a quiet, attractive rural setting only five minutes removed from the classroom and downtown Montreal.

McGill's Residence Development

Rapidly increasing student enrolment at McGill over the past decade has dictated the pressing need for additional university residence accommodation, but a lack of funds for this purpose has prevented the university from taking action. The project which has now been undertaken has been made possible through the gifts of benefactors of the university, supplemented by generous grants from the Canada Council.

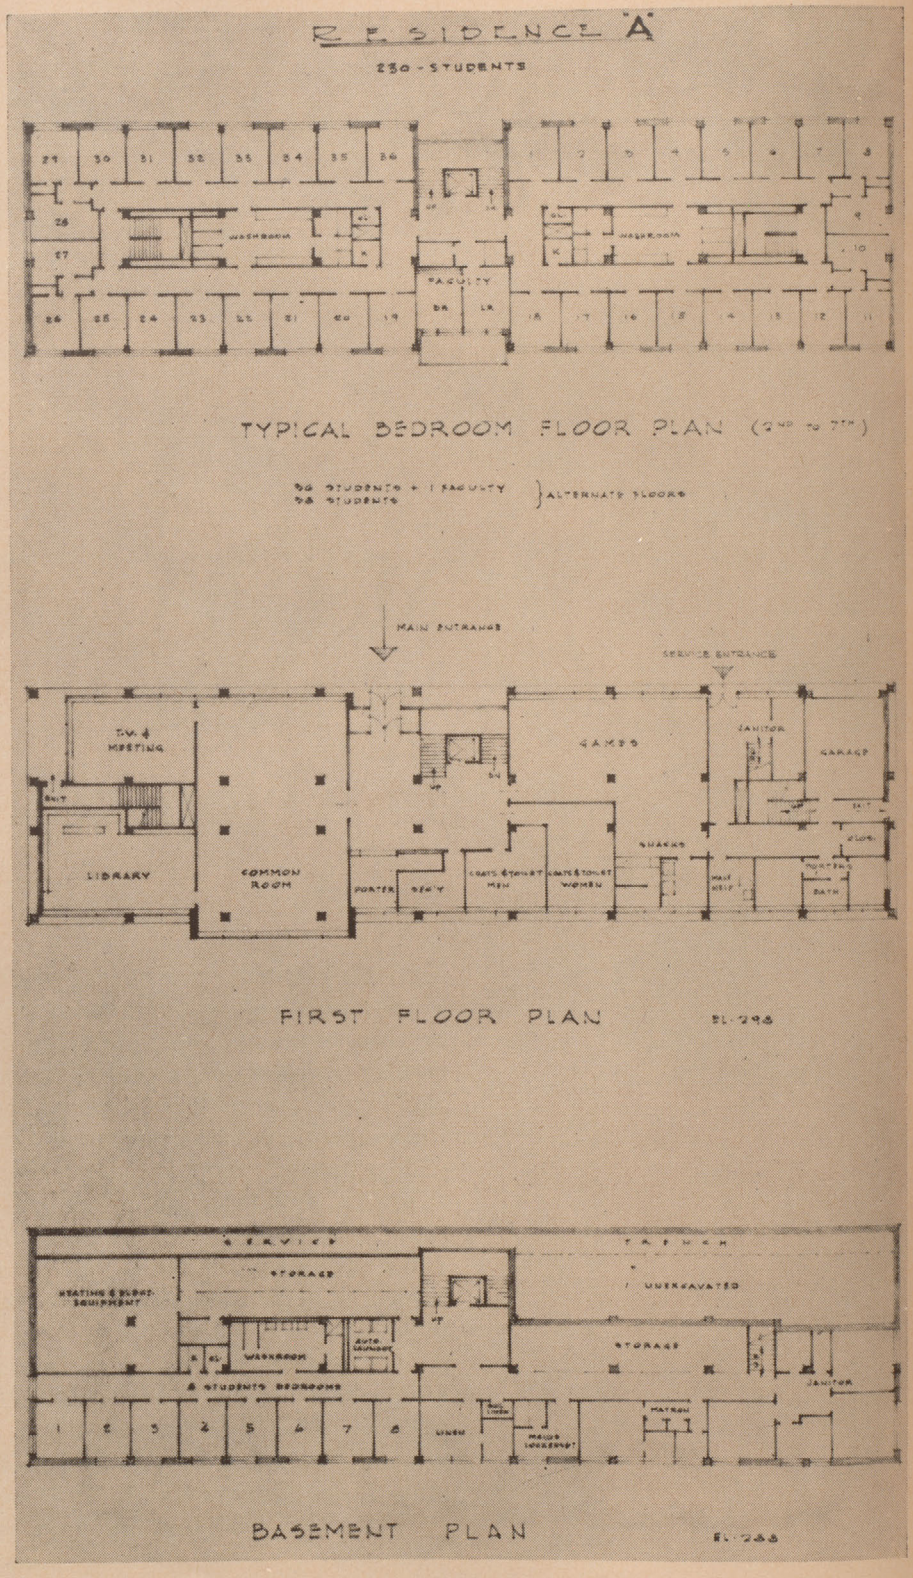

Total cost for the first phase — the three residences and the completed dining hall — is estimated at just over $4,500,000. The entire centre, when completed, will involve an expenditure of close to $6,000,000. Durnford, Bolton, Chadwick and Ellwood of Montreal, are the architects for the project.

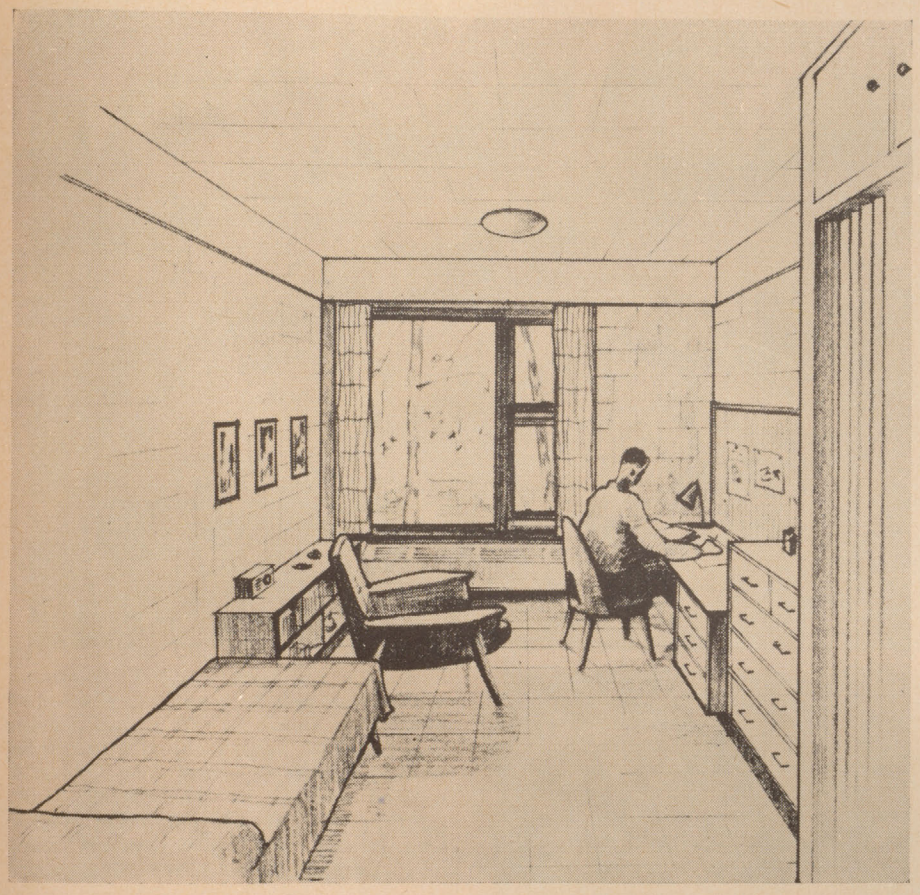

Residence Committee

The University's need for men's residences has been the subject of intensive investigation by a committee set up in October, 1957, by the University's Board of Governors, with Prof. W. Stanford Reid, Warden of Douglas Hall, as chairman. Recommendations put forward by this committee form the basis of the present undertaking.

In its report to the governors in April, 1959, the committee suggested that anticipated increased enrolments at McGill over the next 5 to 10 years, made up largely of students from outside the city, coupled with a declining number of rooms available within the University area required immediate consideration. The committee also stressed the fact that the Board of Governors had recently increased the

(*Continued on page 32*)

Typical Bedroom

Third Residence Planned

WITHIN THE NEXT five years this University will have to spend more than $40,000,000 on the construction of new facilities. The first project, two new residences that will house 450 male students, has already begun and I am happy to announce that the Canada Council has already approved a grant that will cover one half of the costs of construction. This is, I think the first capital grant that the Canada Council has been able to make to any university in the Province of Quebec and the first fruits of the legislation recently enacted by the provincial government.

I am happy, too, to announce this morning that Mr. J. W. McConnell has offered the University a gift of $1,307,270 in order that a third hall of residence for men can be started this year. The older members of McGill University realise that Mr. McConnell's benefactions have been so numerous that I dare not prolong these ceremonies by enumerating them. You engineering graduates who have enjoyed the facilities of the McConnell Engineering Building have a sense of great value of those benefactions to McGill, as have all of you who have benefited from McConnell Scholarships. All of you will, I know, join with me in expressing to the great man who was for so many years the Senior Member of the Board of Governors our deep appreciation of his continuing interest in the University that he has served so long, and with so much understanding.

DR. F. CYRIL JAMES
Principal and Vice-Chancellor

(From the opening remarks at Spring Convocation May 31, 1961)

What Sees the Martlet

Opposite Page

Top: When the Athletics Board of McGill University tendered its testimonial banquet for the McGill Redmen, 1960 Canadian Senior Intercollegiate Football Champions, last February, a large number of old-timers of past championship teams turned up to toast their younger colleagues, A group of McGill football greats out of the past, making up the 1919 championship team posed for the photographer. Left to right: Frank Shaughnessy, coach; F. L. Parsons, BSc '26; Judge J. G. Nicholson, BCL '21; R. B. Anderson, Eng '23; John O'Neill Gallery, BCL '21; T. M. Hall (past student); J. Cyril Flanagan, DDS '23; J. Geoffrey Notman, BSc '22, chairman of the Athletics Board; D. E. Ross, MD '21, MSc '27; J. P. Gilhooley, MD '20; W. P. Seath, BSc '20; and L. C. Montgomery, MD '20, captain.

Centre: During his visit to Mexico last autumn, Dr. F. Cyril James was entertained at a dinner given by graduates living in that country. Seated with Dr. James at the head table are, in the usual order, Rowland Chun, BCom '52; Mrs. Walter M. Hamer (Harriet Noad) PhysEd '32; Dr. James; Fred L. Denton, BCom '36; Mrs. H. L. B. Hollingsworth (Marella Smith, past student); and Claude Butlin, BSc (Arts) '30, BEng '32.

Bottom: Honoured at a reception in New York early in March was Dr. Ellen Ballon, DMus '54, fourth from left. Lew Schwartz, BA '27, president of the New York branch of the Graduates' Society, addresses a few words to the guest-of-honour during the reception, which took place immediately after Dr. Ballon's concert at the Manhattan School of Music under the sponsorship of the Contemporary Music Society. Others in the photo are, from the left, Mrs. John Brownlee, Harry Scott, Canadian Consul in New York, Dr. Ballon, and John Brownlee, Director of the Manhattan School of Music.

Right: When the McGill Band marches out on to the football field this autumn, its musicians will be sporting new uniforms, one of which is modelled for the McGill News by Douglas Craig, BSc '61. When this photograph was taken, the cape which will be worn over the shoulders was not available.

Bottom: McGill's Alma Mater Fund Dinner, the annual gathering for all A.M.F. workers, was held in Redpath Hall April 13. A. Deane Nesbitt, general chairman of the A.M.F., third from left, chats with S. Boyd Whittall, BSc '50, Montreal chairman; Mrs. Joan Winters, BA '46, Alumnae Chairman; and Elizabeth McNab, director of the fund. Dr. Wilder Penfield, O.M., was special speaker at the Dinner. In his speech on "The Offensive of the Mind", Dr. Penfield told the gathering that private institutions like McGill offer the greatest hope of salvation in the struggle for freedom, because they offer the greatest freedom, independence and opportunity to seek the truth, unhampered by bureaucratic interference.

From coast to coast: Three doctor-graduates chat with Dr. Lloyd Stevenson, Dean of the Faculty of Medicine, second from left. They are: Dr. Cluny McPherson, MD' 01, St. John's, Newfoundland; Dr. Percy Leslie, MD '96, Montreal, and Dr. Saul Bonnell, MD '96, Vancouver.

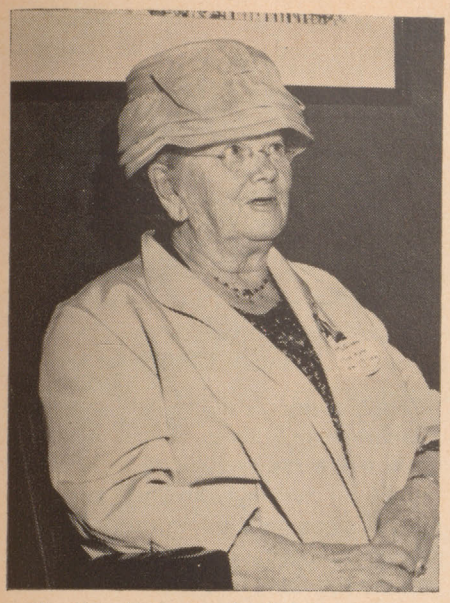

Mrs. George A. Christie, BA '06, Port Hastings, Cape Breton.

SPRING-TIME IS REUNION-TIME *for McGill's senior graduates. They return to the campus to join in the Convocation festivities. This year, 27 graduates from the classes of 1911 and earlier were entertained by the University and the Graduates' Society. They attended Convocation May 31 on the lower campus, and sat in a special reserved section; they attended the Principal's garden party in the afternoon. The previous day, the officers of the Graduates' Society held a tea in Martlet House and The McGill News camera was on hand to preserve this delightful event.*

Three graduates from the class of BSc '06: left to right, Duncan McLachlan, Ottawa; Henry Hadley, Argenteuil, Que.; and Everett Kirkpatrick, Montreal.

Miss Kate McQueen, BA '06, Vancouver.

Robert J. Harper, BA '01, Port Perry, Ont.; Gordon McMurtry, BA '01, Montreal; the Hon. Mr. Justice Miller Hyde, BA '26, BCL '29, Montreal, president of the Graduates' Society of McGill University.

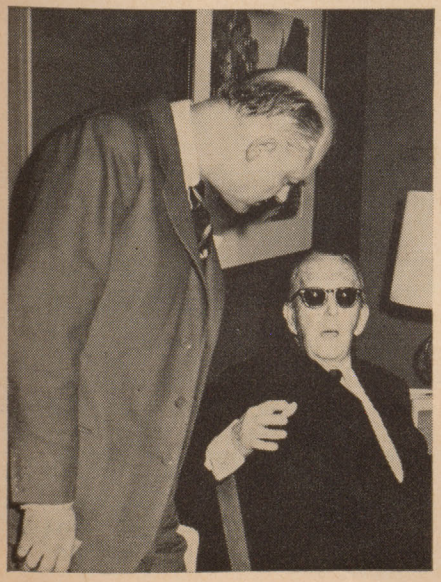

Miss Helen Braidwood, BA '06, Montreal.

Mrs. Milton Jack, BA '01, Hatzic, B.C.; Miss Esther Smith, BA '01, MA '06, Quebec City; Miss Mary Flint, BA '01, Stanstead, Que.

G. Percy Cole, BSc '03, MSc '06, Mystic, Que.; Joseph Presner, BSc '06, Montreal; J. Gilbert Turner, MD '32, Montreal, executive director of the Royal Victoria Hospital and vice-chairman of the Graduates' Society Reunion Committee.

Mr. Justice Hyde and Dr. Richard Monahan, MD '06, Montreal.

WHERE ARE THEY NOW?

Faculty of Arts

Anyone having information which may help to trace these lost graduates is invited to fill out the form below and return it to Records Department, The Graduates' Society of McGill University, 3618 University Street, Montreal 2, Que. Your help and co-operation will be appreciated.

1934: Thomas Guthrie Gascoigne.

1935: Mrs. Fred W. Doherty (Maxime Munroe).

1936: Seymour Samuel Fels & Mrs. Fels (Edith Dorfman, BA '37), Gwendolyn Mary Baird, Charles Goldstein, William Smith Sutherland.

1937: Mrs. Rushton Coulborn (Florence Matts, SocWk '21), Mrs. P. Douglas Garton (M. Joyce Kearney), William R. LeGrow, Herbert Frederick Asquith Smith, Margaret H. Trueman.

1938: Hugh Fleming Clancy, Annie Eleanor Crack, Harry Lindley.

1939: Phyllis Maureen Elizabeth Bates, Gerald William McKee, Mrs. Eugene Melinkoff (Olive Shanks), Mrs. Edward Ostergard (Williamina I. Catherine Lynn), David Buchanan William Reid (also MA '46), Mrs. D. P. Scott (Mary Margaret Lois Anderson), Mrs. Ian D. Vessie (Estelle Evelyn Auclair).

1940: Albert Carl Beich, Ruth O'Connell, Harold Leslie Titus.

1941: Frances Christine MacLatchy, William Walter Dodds.

1942: William Randolph Douglas, Constance H. Elizabeth Silver.

1943: Donald A. Blanchard, Roderick Ross MacDonald (also MA '46), Sarah Schwartz.

1944: Edna Agranovitch, Thomas Walter Bauer, Mary Simone Kenyon, Mrs. Ariel Gideon Loewy (Edith Bronstein) & Mr. Loewy, BSc '45, MSc '47, Mrs. Mary Robb (Mary Gentles).

1945: Raymond Claude Cagne, Shirley Home, Robert Harold Ker, Joan Marion Philpott, Devota M. Reid.

New Residences . . .

(*Continued from page 26*)

number of undergraduate scholarships, particularly on the national level and suggested that the University should be in a position to provide residence accommodation to these students, many of whom are quite young.

An outstanding feature of the new residences is the fact that each student will have his own room. The residence committee, in its study, has determined that the individual room type of residence, while slightly more costly, is to be preferred from the point of view of comfort, general discipline, tidiness and study habits of the occupants.

In its report, the committee said it had tried to strike an even balance between economy on the one hand and appearance on the other. Economies had been effected wherever possible while at the same time an attempt had been made to preserve the character of the residences as homes in which the university students would be pleased to live.

Provision has been made in each residence for a member of the University faculty to reside on alternate floors, and he will be responsible for supervision and counselling of student residents on their personal or academic problems.

Seven Floors

Each residence block will contain a basement and seven floors. The first floor will serve as a social and cultural centre for residents and will contain a library, common room, meeting and television room, games room, lounge and snack bar, in addition to cloak rooms for men and women guests and administrative offices.

The basement, which will be partially excavated, will have a large room for storage space, automatic laundry facilities for the residents, supplementary bedrooms for students and living accommodation for a housekeeper and janitor.

The six bedroom floors in each building have been designed to reduce noise and traffic along the corridors to a minimum. The bedrooms are placed along the outside walls and are divided off by the washrooms, service closets and stairways, which form a central block with corridors on each side. This scheme, in effect, divides each floor into four groups of 9 separate bedrooms.

Dining Hall

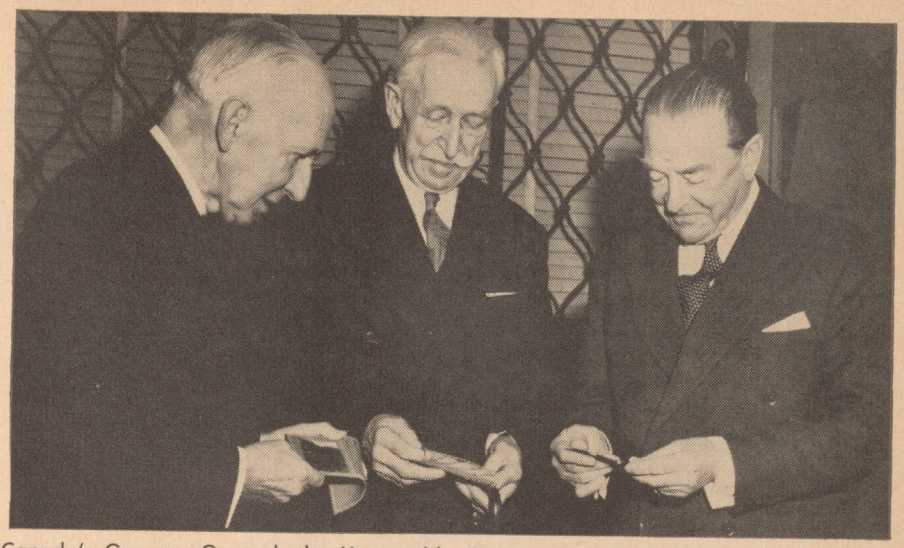

Situated in the centre of the quadrangle to be formed by the four new residences, the Dining Hall will be a circular, glass-enclosed building. The lower floor of this two-storey structure will contain the main entrance lobby, staff offices and cloakrooms, in addition to complete food storage and cooking facilities. The upper floor will consist of four dining halls, one for each residence, separated by movable partitions. The serving area will occupy the centre of this floor, with two cafeteria-style service counters.

This building will be erected along with the first three residences and facilities will be made ready for servicing the first residents in 1962.

BA Curriculum . . .

(*Continued from page 10*)

from inside the Faculty. "Structural defects in Faculty organization — both a cause and an effect of specialization", it is alleged, "are a major obstacle to the restoration of collective Faculty responsibility for the formulation and administration of the curriculum." The Dean is gratified that his own Faculty has risen above this difficulty and that it has embarked, for itself, on the best kind of reform; liberal reform on conservative principles.

Canada's Governor-General, the Honourable Georges P. Vanier, LLD '60, Visitor to the University, was joined by his two predecessors at a unique ceremony held at the Montreal Men's Press Club January 18. Earl Alexander of Tunis, LLD '46, right, the Press Club's first life Member, presented special Life Membership cards to His Excellency and to the Rt. Hon. Vincent Massey, C.H., LLD '33. Both Earl Alexander and Mr. Massey were official Visitors to McGill University when they held the vice-regal post.

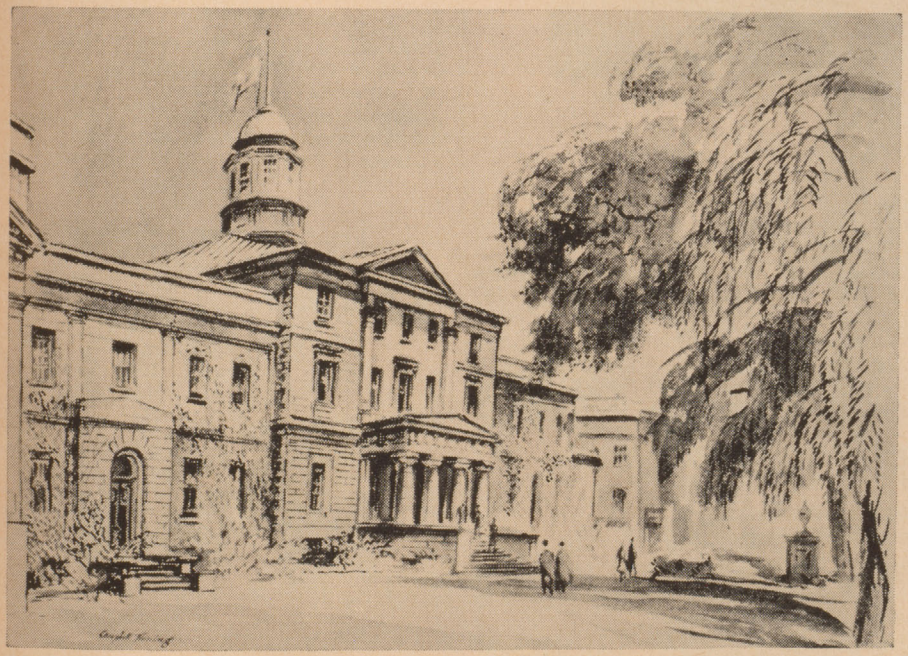

Photo by Dwight E. Dolan

Sierra Leone . . .

(*Continued from page 18*)

lines. Gradually more and more Africans were brought into the government, and later direct franchise was considerably extended. In 1958, a new constitution provided for an all-African executive council chosen mainly from the elected House of Representatives. Sir Milton Margai, leader of the majority Sierra Leone People's Party, became Premier, although the British-appointed Governor still had wide powers. Finally in 1960 the Premier became Prime Minister presiding over a cabinet; and after a conference in London, the date for full independence was set, April 27, 1961, only a few months after the independence of Nigeria in October, 1960.

Sierra Leone is primarily an agricultural country, with the majority of people farming small holdings, growing local subsistence crops of rice and cassava, but in the past few years about £5,000,000 worth of palm kernels, coffee, cocoa, piassava, kola nuts and ginger have been exported. Cattle, goats, sheep and pigs are reared mainly in the Northern parts of the country. Inshore fishing is quite extensive and there exists a growing future in tuna fishing both for domestic and export use. The principal natural resource of Sierra Leone, however, is the abundance of minerals. Diamonds, iron and chrome ores are mined commercially providing three-quarters of the country's exports and a major source of government revenue.

During the month of April, the Alma Mater Fund office sent out a most attractive mailing-piece entitled "Why hail Alma Mater?" with a reproduction of the above painting of the Arts Building by Campbell Tinning, Montreal artist. Many graduates have made inquiries concerning the availability of reprints of the painting suitable for framing and the Graduates' Society has made arrangements to supply them in limited number. The size of the reprint, including a plain white border is 13¾ inches by 11 inches and the price is $2.00 per copy, cost of mailing included. Orders with remittance may be sent to the Graduates' Society of McGill University, 3618 University Street, Montreal 2, Que.

The Scope of SCOPE . . .

(*Continued from page 16*)

director of the National Gallery of Canada), Dr. Evan Turner (Director of the Montreal Museum of Fine Arts) and Prof. W. O. Judkins (Chairman of McGill's Fine Arts department) opened the exhibit, which was well received by the C.B.C. and the Montreal press.

At the end of our year, the Students' Executive Council voted SCOPE $1,000 with which to start a collection of paintings, eventually to hang in our new Students' Union. With this sudden reminder that we must now find these paintings, the committee bids McGill adieu for another season.

WHERE THEY ARE
and what they're doing

Being a compendium of what has reached us since the last issue. *The McGill News* would like to be more complete in its coverage and would be grateful to branch secretaries, and other graduates, for collecting and forwarding any worthy news items they see.

'03

George Percy Cole, BSc '03, MSc '06, of Montreal, has been made a fellow of the American Ceramic Society.

'12

William B. Scott, BCL '12, LLD '56, of Montreal, has been appointed Chief Justice of the Superior Court of Quebec.

'14

Shirley G. Dixon, BA '11, BCL '14, of Montreal, has retired as chairman of the board of Courtaulds (Canada) Ltd.

'16

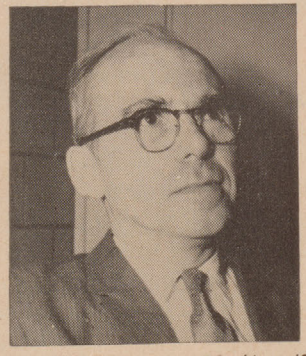

Philip S. Fisher, BA '16, of Montreal, has retired as president of the Southam Co. Ltd. and has been elected chairman of the board of directors of the same company.

'17

R. E. Heartz, BSc '17, of Montreal, has been appointed chairman of the board of The Shawinigan Engineering Co. Ltd.

Louis de Gonzague Prévost, BCL '17, of Montreal, has been appointed head of the Province of Quebec censorship bureau.

R. Laurence Weldon, BSc '17, MSc '20, of Montreal, has been elected to the board of directors of Canadian Celanese Ltd.

Dr. J. B. Normington, BSc/Arts '31

'18

William R. Way, BSc '18, of Montreal, has been appointed senior vice-president of the Shawinigan Water and Power Co.

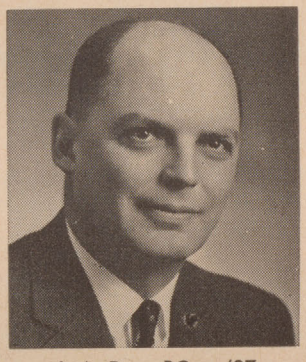

'19

Graham F. Towers, BA '19, LLD '44, of Ottawa, has been elected chairman of the board of The Canada Life Assurance Co.

'20

Karl O. Elderkin, BSc '20, has retired as President of Bowaters Engineering and Development Inc., in Calhoun, Tenn.

Gordon M. Pender, BCL '20, has been appointed a judge of the Magistrates' Court, Montreal region.

J. A. Ross, BCom '27

'22

George F. Benson, Com '22, of Montreal, has been elected chairman of the board of The Canada Starch Co. Ltd.

Sidney Buckwold, BCom '22, of Saskatoon, has been appointed a consumer representative on the National Productivity Council.

G. Blair Gordon, BSc '22, of Montreal, was named campaign chairman for the Quebec division of the Canadian Arthritis and Rheumatism Society's annual campaign.

E. P. Taylor, BSc '22, of Toronto, has been appointed an industry representative on the National Productivity Council.

'23

Thomas W. Eadie, BSc '23, of Montreal, has been appointed to the board of directors of the Royal Trust Co.

Leon Levinson, BA '23, of Montreal, has been elected a fellow of the Royal Society of Arts.

William F. Macklaier, BCL '23, of Montreal, has been elected a director of Moore Corp. Ltd.

Francis J. Toole, BSc '23, MSc '26, PhD '29, has been appointed vice-president (academic) of the University of New Brunswick, Fredericton, N.B.

'24

Isidore J. Charness, BCL '24, of Montreal, has been appointed Queen's Counsel by the provincial cabinet.

'25

Feldman: To Allan, BA '49, and Mrs. Feldman, a daughter.

Flanagan: To Peter, BSc/Agr '52, and Shirley (Palmer, BHS '52), a daughter.

Flood: To Frank P., MD '38, and Mrs. Flood, a son.

Foster: To Bruce, BEng '50, and Barbara (Dawson, BSc/PhyEd '51), a daughter.

Frank: To Esther (Kisilevsky, DipPT '56), and Dr. Harold Frank, a daughter.

Gerstel: To Samuel, BA '51, and Mrs. Gerstel, a daughter.

Giacomin: To Peter, BEng '48, and Mrs. Giacomin, a son.

Gillett: To David, BEng '50, and Mrs. Gillett, a son.

Gilmour: To Roy, BCom '49, and Marion (Moulton, BCom '48), a daughter.

Godel: To Morris, BSc '54, and Mrs. Godel, a son.

Goffman: To Irving J., BA '54, and Mrs. Goffman, a daughter.

Goldberg: To H. Leonard, BSc '49, DDS '55, and Mrs. Goldberg, a daughter.

Gomberg: To Charles, BSc '47, and Barbara (Rosen, BA '50, BSW '51), a son.

Gore: To James D., BCom '47, and Mrs. Gore, a son.

Gossage: To Robert, BCom '52, and Mrs. Gossage, a daughter.

Gould: To Gwendolyn Mae (Williams, BA '49), and T. Garfield Gould, a son.

Graham: To Lindsay, BSc '53, MD '55, and Mrs. Graham, a daughter.

Graydon: To Philip, BEng '55, and Mrs. Graydon, a son.

Greenberg: To Ben, BA '54, BCL '57, and Mrs. Greenberg, a son.

Grivakes: To Tass, BA '54, BCL '57, and Mrs. Grivakes, a son.

Gualtieri: To Antonio R., Arts '53, Div '55, BA '60, and Mrs. Gualtieri, a daughter.

Hall: To William W., BSc/Agr '55, and Margaret (Entwistle, Teach '51), a son.

Hallward: To Hugh, BA '51, and Martha (Fisher, BSc '52), a son.

Hardman: To Jeff Graham, MD '43, and Ann (Perry, BSc '42), a son.

Haslett: To Jane (Mulholland, BA '58), and Mark Haslett, a son.

Hawkings: To William, BEng '53, and Mrs. Hawkings, a son.

Heineman: To Harriet (Goldman, BFA '52), and William M. Heineman, a daughter.

Hogan: To John T., BSc '52, MD '56, and Mrs. Hogan, a son.

Huestis: To Douglas W., MD '48, and Mrs. Huestis, a daughter.

Hughes: To Kelvin J., BEng '57, and Mrs. Hughes, a son.

Hutchison: To Richard A., BA '57, and Patricia (Mowat, BA '56), a daughter.

Ingleson: To Gordon, BEng '53, and Mrs. Ingleson, a daughter.

Jason: To Marvin, BEng '53, and Mrs. Jason, a daughter.

Johnston: To Carlyle, BA '50, BCL '53, and Alice (Stewart, BA '50, BSW '51, MSW '54), a son.

Jones: To William Meredith, BSc '52, MD '54, and Mrs. Jones, a son.

Joy: To Richard, BEng '45, and Mrs. Joy, a daughter.

Kaplowitz: To Gita (Kahn, BCom '55), and Isaac Kaplowitz, a son.

Kastner: To John W., BSc '49, and Mrs. Kastner, a daughter.

Kaye: To Carl E., DDS '59, and Merran (Evans, BA '54), a son.

Kennedy: To David, BEng '52, MEng '53, and Carol (Davies, BSc '53), a son.

Kilbertus: To Michael, BEng '48, and Mrs. Kilbertus, a son.

Knox: To Stanley H., MD 48, and Mrs. Knox, a daughter.

Lafond: To Pierre, BArch '53, and Mrs. Lafond, a daughter.

Lambie: To Anthony, BCom '52, and Mrs. Lambie, a son.

Larsen: To Jane (Elliot, BSc '43), and Carl Larsen, a daughter.

Latimer: To Rad, BSc '53, and Mrs. Latimer, a son.

Lawson: To Norman, MSc '58, and Sara (Grisdale, BSc/Agr '59), a daughter.

Layne: To John H., BEng '49, and Mrs. Layne, a son.

Lazier: To Frederick C., BCom '50, and Eleanor (Laing, BA '43, MA '48), a son.

Legg: To Thomas H., MSc '56, PhD '60, and Mrs. Legg, a daughter.

Levine: To Marilyn (Gilletz, Teach '54), and Daniel Levine, a daughter.

Levinson: To Edward, BSc '49, MD '53, and Mrs. Levinson, a daughter.

Lindsay: To C. Gordon, BEng '48, and Mrs. Lindsay, a son.

Logan: To Norman S., BSc/Agr '53, and Mrs. Logan, a son.

Lowi: To Naomi (Paltiel, BSc '46, MD '51, MSc '55), and Beno Lowi, a son.

Macdonald: To Allison D., MD '44, and Mrs. Macdonald, a daughter.

MacKay: To John, BEng '51, and Mrs. MacKay, a son.

MacKeracher: To Dorothy (Greetham, BSc '56), and Kenneth MacKeracher, a daughter.

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

THEY'RE ALL OUT OF STEP

BUT SMITH...

That's according to Smith, of course. Actually it's Smith who's 'way out of step — all the others know the value of reading the B of M Business Review from cover to cover. This concise monthly spotlight on the business scene is invaluable in keeping you abreast of Canadian economic affairs. Make it a point to read it every month. There's a personal copy available for you — even if your name *is* Smith. Just drop a line today to: Business Development Department, Bank of Montreal, P.O. Box 6002, Montreal 3, P.Q.

LEONARDO DA VINCI *possessed what was possibly the most imaginative and versatile mind of all time. He was, among other things, an artist, an engineer, and an inventor. Reproduced here are original sketches by Da Vinci for a foot-propelled paddle boat, showing details of gear mechanism, paddles, cam, and fly wheel.*

IMAGINATION

In their offices and drafting rooms and in their huge, all-enclosed yards, Canadian Vickers put imagination and creative skills to work. Here, ships are built on a year-round basis . . . passenger ships, destroyer escort vessels, tankers, tugs, ferries, dredges, scows . . . all built by Canadian Vickers to play an important role in our economy.

In their shops, Canadian Vickers also design and manufacture machines and equipment for every imaginable industrial need . . . thereby fulfilling their pledge: "If Industry Needs It . . . Canadian Vickers Builds It . . . Better."

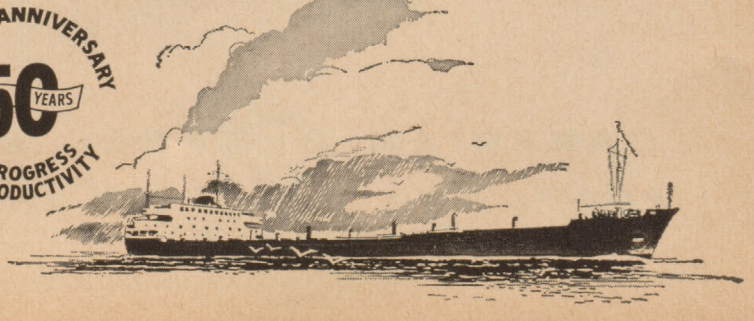

Ships • **Industrial Boilers**

FIFTIETH ANNIVERSARY 50 YEARS OF PROGRESS AND PRODUCTIVITY

Ore carrier built by Canadian Vickers for service on the Great Lakes

The meter that measures our standard of living

It measures kilowatt-hours ... and as the kilowatt-hours grow, it indicates the ever-greater role of electricity in making our lives easier and more enjoyable.

Abundant low-cost electricity probably contributes more to our standard of living than any other factor. It creates opportunity for industry and business ... it speeds the production of goods ... it opens the way to hundreds of thousands of better-paying jobs for Canadians.

Kilowatt-hours cost so little—but think of what they can do. In the home, low-cost electricity can bring a world of convenience, comfort and service. Planned lighting brings glare-free new pleasure and charm to every room—at the flick of a finger. In the kitchen and laundry electrical appliances save time and toil. Television and many other products contribute to our leisure and entertainment.

Are *you* making full use of inexpensive electricity?

LIVE BETTER ELECTRICALLY

To make full use of modern electrical equipment—in home, office or factory—an adequate wiring system is essential. Your local power company, provincial Electric Service League or any qualified electrical contractor will assist you in planning to "Live Better ... Electrically."

CANADIAN GENERAL ELECTRIC COMPANY LIMITED

Manufacturer of equipment that generates, transmits and distributes electricity ... and the wide variety of products that put it to work in home and industry

The SUN LIFE AGENT IS EXPERT, TOO!

Yes, in planning a man's estate, the life insurance agent can work closely with the lawyer, the accountant and the trust officer in providing the client with the best possible advice. For every estate needs dollars that will be immediately available to meet death taxes and other expenses attending death and so preserve the other assets of the estate. These are the dollars which life insurance can provide.

And remember, when you are dealing with the Sun Life, you are dealing with one of the world's great life insurance companies. Sun Life maintains 150 branch offices in key cities in Canada and the United States, with agency representation from coast to coast. With a wide variety of up-to-date policy plans, and with highly qualified representatives, Sun Life is in a position to offer the very finest in life insurance service.

SUN LIFE ASSURANCE COMPANY OF CANADA

The promise of DISCOVERY

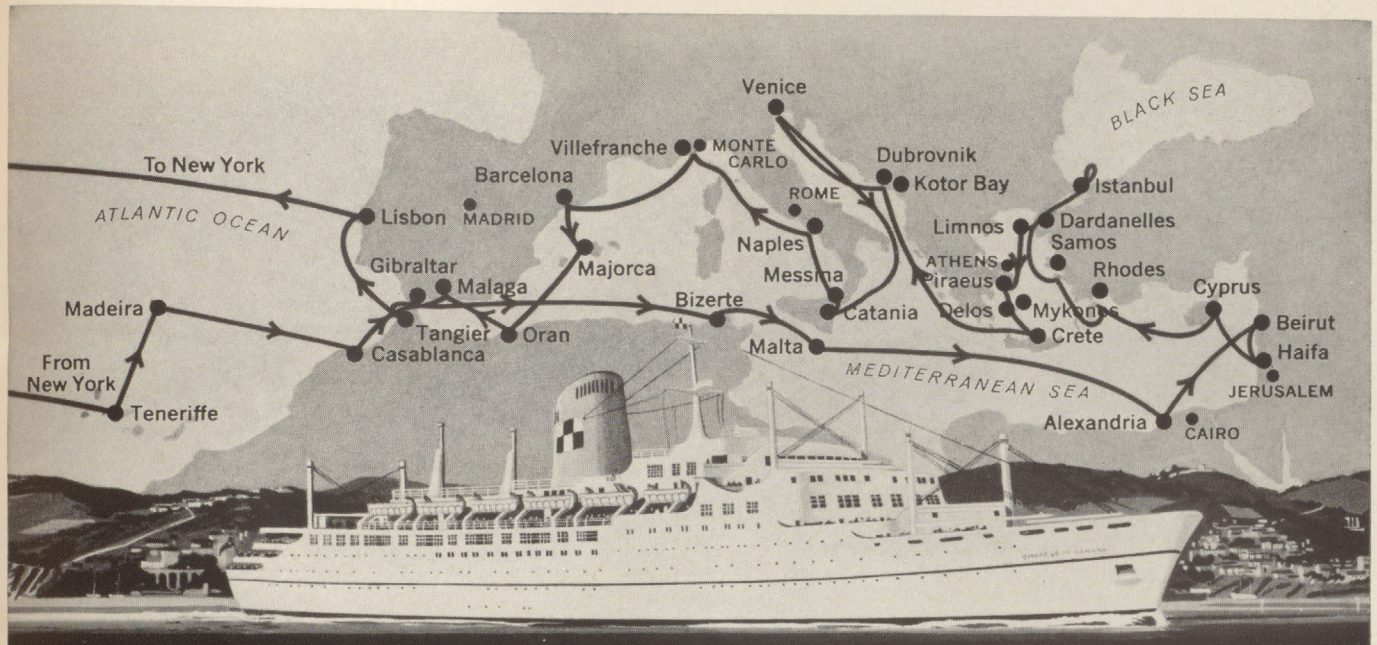

THE GENIE OF THE OLD FAIRY TALE, who sprang out of a bottle found in the sea, could shape the future in his giant hands. Today's genies come out of the laboratories, where scientists discover new materials and methods that shape modern technology and improve our way of life. Cyanamid needs well-educated Canadians eager to share in important Cyanamid developments relating to mining, paper-making, plastics, textiles, pharmaceuticals, general industry and agriculture. At Cyanamid of Canada they will find that career opportunities hold bright promises of personal accomplishment.

Announcing the new Empress of Canada fabulous Mediterranean-Greek Isles Cruise

61 days. From New York February 9, 1962

Never before a Mediterranean cruise so all-encompassing! 30 ports, including the storied Greek Islands of the Aegean Sea

Plan now to be along on the most exciting Mediterranean cruise ever! Two full months of exploration of the world's most fascinating sea, at its best in sunny Spring!

THE SHIP—the gleaming new 27,300-ton Empress of Canada on her gala maiden Mediterranean voyage. Spacious, air-conditioned, stabilized, designed for every cruising comfort, stocked with the world's epicurean delights.

THE CRUISE—a never-to-be-forgotten panorama of the Mediterranean, the sights, sounds, colors of 60 centuries of history from the Stone Age to World War II. You'll visit 30 ports, see beauty spots from the Canaries to the legendary islands of the Aegean Sea. Every one of the 14,240 miles is timed to give you the most daylight hours ashore. And at night your ship is your hotel! Shore visits up to 4 days; excursions if you wish to Cairo, Jerusalem, Rome, Madrid, Monte Carlo.

FARES—from $1675. Because this will be a most sought-after cruise, plan to make your reservation soon!

Itinerary: Mediterranean-Greek Isles Cruise

New York • Teneriffe • Madeira • Casablanca
Gibraltar • Bizerte • Malta • Alexandria • Beirut
Haifa • Cyprus • Rhodes • Samos • Dardanelles
Istanbul • Limnos • Piraeus • Delos • Mykonos
Crete • Kotor Bay • Dubrovnik • Venice • Catania
Messina • Naples • Villefranche • Barcelona
Majorca • Oran • Malaga • Tangier • Lisbon
New York

THE McGILL NEWS

McGILL U. LIBRARY
OCT 11 1961

DIRECTORY OF BRANCHES OF THE SOCIETY

CANADA

NEWFOUNDLAND

President — Mr. Albert Vivien, (B.Sc./Agr. '49), c/o Central Mortgage & Housing Corp., St. John's, Nfld.

PRINCE EDWARD ISLAND

President — Dr. Frank MacMillan (M.D. '42), 76 McGill Ave., Charlottetown, P.E.I.
Secretary — Mr. George D. Wright, (B.Sc./Agr. '52), P.E.I. Frosted Foods Ltd., Box 576, Charlottetown, P.E.I.

HALIFAX

President — Mr. Allan F. Duffus, (B.Arch. '38), 69 Birmingham St., Halifax, N.S.
Secretary — Mr. J. W. Ritchie, (B.Sc./Agr. '51), Eastern Securities Ltd., Halifax, N.S.

EAST NOVA SCOTIA

Vice-President — Dr. Thomas W. Gorman, (M.D. '44, M.Sc. '49), P.O. Box 460, Antigonish, N.S.

CAPE BRETON

President — Mr. C. M. Anson, (B.Sc. '25), Gen. Manager, Dominion Steel & Coal Corp. Ltd., Sydney, N.S.
Secretary — Mr. J. R. Wallace, (B.Eng. '40), Dir. of Research, Dominion Iron & Steel Ltd., Sydney, N.S.

NEW BRUNSWICK

President — Dr. Willard Miles Jenkins, (M.D. '08), Gagetown, Queens Co., N.B.
Secretary — Mr. Robert G. McLeod, (B.Com. '52), c/o Irving Oil Co. Ltd., Saint John, N.B.

QUEBEC CITY

President — Mr. Lionel Roussin, (B.Com. '33), 819 Ste. Foy Road, Quebec, Que.
Secretary — Mr. Pierre Leduc, (B.Eng. '50), 2510 Des Hospitaliers, Quebec, Que.

ST. MAURICE VALLEY

Vice-President — Mr. W. Nelson Crutchfield, (B.Com. '34), 1102 Maple Avenue, Shawinigan Falls, Que.

DISTRICT OF BEDFORD

President — Mr. W. T. Ward, (B.Eng. '48), 111 Grove Ave., Granby, Que.
Secretary — Mr. G. E. Cotter, (B.Eng. '51), 43 Elgin St., Granby, Que.

ST. FRANCIS DISTRICT

President — Rev. Donald Stirling, (B.A. '54, B.D. '58), Box 700, East Angus, Que.
Secretary — Dr. Ronald Kouri, (B.Sc. '57, D.D.S. '59), 410 Vimy St., Apt. 2, Sherbrooke, Que.

MACDONALD COLLEGE

President — Mr. D. Grant Ross, (B.Sc./Agr. '56), 592 Queen St., Greenfield Park, Que.
Secretary — Miss Pauline A. Corby, (B.Sc./H.Ec. '57), 4750 De Courtrai Ave., Apt. 21, Montreal, Que.

MONTREAL

President — Mr. Peter Turcot, (B.Com. '47), Turcot, Wood, Power & Cundill Ltd., 360 St. James St. W., Montreal, Que.
Secretary — Mr. Thomas J. McKenna, (B.C.L. '46), Stewart, Crepault & McKenna, 507 Place d'Armes, Montreal, Que.

ALUMNAE SOCIETY, MONTREAL

President — Mrs. Robert B. Stronach, (B.A. '43, B.L.S. '44), 630 Grosvenor Ave., Montreal 6, Que.
Secretary — Mrs. Richard Gilbert, (B.A. '54), 134 Beverley Ave., Montreal 16, Que.

NORANDA

Vice-President — Mr. Clayton E. Anderson, (B.Sc. '19, M.Sc. '20), Noranda Mines, Noranda, Que.

OTTAWA VALLEY

President—Mr. Ralph M. Johnson, (B.Eng. '49), R.R. No. 1, Box 390, Davidson Drive, Ottawa, Ont.
Secretary — Mr. Donald Diplock, (B.A. '42), 30 Woodlawn Ave., Ottawa, Ont.

UPPER ST. LAWRENCE

Vice-President, Canada — Mr. Thomas D. Dailey, (B.Com. '42), 107 King Street West, Brockville, Ont.
Vice-President, U.S.A. — Dr. Munroe M. Kissane, (M.D. '40), 24 Terrace Street, Malone, N.Y.
Secretary — Mr. Alan H. Hall, (B.Arch. '50), R. R. No. 3, Collins Bay, Ont.

LONDON, ONT.

President — Mr. G. M. Hobart, (B.C.L. '52), 516 Grosvenor St., London, Ont.
Secretary — Mr. Edward G. Blake, (B. Com. '49), 450 Sherene Terrace, London, Ont.

HAMILTON

President — Mr. C. V. Corbet, (B.Com. '34), 1316 Pigott Bldg., 36 James St. S., Hamilton, Ont.
Secretary — Mrs. C. L. Bates, (B.A. '30), 87 King St. W., Dundas, Ont.

SARNIA

President — Mr. George E. Bawden, (B.Eng. '50), 634 Beach Lane, Sarnia, Ont.
Secretary — Mrs. Kenneth J. Radcliffe, (Physio. '48), 1286 Ridgewood Drive, Sarnia, Ont.

WINDSOR-DETROIT

President — Mr. K. J. Wood, (B.Sc. '25), 37 Esdras Place, Riverside, Ont.
Secretary — Mr. J. L. Glos, (B.Arch. '55), 2193 Lincoln Rd., Windsor, Ont.

PORCUPINE

President — Mr. Wendell B. Brewer, (B.Com. '23), 217 Way Ave., Timmins, Ont.
Secretary — Mr. J. W. Thomson, (B.Eng. '38), 162 Tamarack St., Timmins, Ont.

KIRKLAND LAKE

President — Mr. Gerald V. Kearns, (B.Com. '24), P.O. Box 428, Kirkland Lake, Ont.
Secretary — Mr. J. Murphy Gamble (B.Com. '29), Caswell Construction Co. Ltd., Kirkland Lake, Ont.

SUDBURY

Secretary —Mrs. Eric G. Swaine, (B.Sc./H.Ec. '50), 452 Westview Drive, Sudbury, Ont.

NIAGARA FRONTIER

President — Mr. Donald O. D. Ramsdale, (B.Eng. '33), 157 Highland Ave., St. Catharines, Ont.
Secretary — Mr. J. K. Abel, (B.Eng. '47), 117 Glenwood Ave., St. Catharines, Ont.

TORONTO

President — Mr. A. H. Wait, (B.Com. '33), Clarkson Gordon & Co., 15 Wellington St. W., Toronto, Ont.
Secretary — Mr. C. F. Gross, (B.Eng. '51), 50 Maitland St., Toronto, Ont.

TORONTO ALUMNAE

President — Mrs. Edgar Brodie, (B.A. '36), 104 Glendora Ave., Willowdale, Ont.
Secretary — Mrs. P. L. Burgess, (B.A. '46), 26 North Hills Terrace, Don Mills, Ont.

GRAND RIVER VALLEY

Vice-President — Mr. Howard S. Matthews, (B.Com. '23), RR No. 5, Guelph, Ont.
Secretary — Mr. Peter H. Sims, (B.Com. '55), 130 Aberdeen Rd., Kitchener, Ont.

WINNIPEG

President — Mr. G. S. A. Bacon, (B.A. '30), Great-West Life Assurance Co., 60 Osborne St. N., Winnipeg, Man.
Secretary — Mr. Allan A. Park, (B.Eng. '49), Dominion Bridge Co. Ltd., 702 Canada Bldg., Winnipeg, Man.

NORTHERN SASKATCHEWAN

President — Dr. A. R. Byers, (B.Sc. '32, M.Sc. '33, Ph.D. '36), 661 University Drive, Saskatoon, Sask.
Secretary — Dr. M. A. Baltzan, (B.Sc. '49, M.D. '53), 408 MacMillan Bldg., Saskatoon, Sask.

SOUTHERN SASKATCHEWAN

President — Mr. Hugo R. Holland, (B.Eng. '33), 2377 Cameron St., Regina, Sask.
Secretary — Mrs. Florence Blair, Suite 3, 2700 McCallum Ave., Regina, Sask.

NORTHERN ALBERTA

President — Mr. Anthony F. Salvatore, (B.Eng. '49), Suite 104, 10443 - 123rd St., Edmonton, Alta.
Secretary — Mr. G. K. Greaves, (B.A. '42), Upper 12208—102nd Ave., Edmonton, Alta.

SOUTHERN ALBERTA

President—Mr. Robert W. Bion, (B.A. '53), c/o W. C. Pitfield & Co. Ltd., 405A 8th Ave. S.W., Calgary, Alta.
Secretary — Mrs. Barbara Weyman, (B.A. '48), 9 Glamorgan Drive, Calgary, Alta.

TRAIL AND DISTRICT

President — Dr. F. L. Wilson, (M.D. '33), 24 Hazelwood Drive, Trail, B.C.
Secretary — Mr. G. J. Hood, (B.Sc. '48, B.Eng. '52), 2262 Thompson Ave., Rossland, B.C.

VANCOUVER

President — Dr. E. C. McCoy, (B.A. '34, M.D. '39), 5358 Angus Drive, Vancouver, B.C.
Secretary — Mrs. Isobel Merton, (B.A. '29), 4655 W. 6th Ave., Vancouver, B.C.

VICTORIA AND DISTRICT

President — Mr. R. Ian Ross, (B.A. '41), 1509 Shasta Place, Victoria, B.C.

UNITED STATES

BOSTON

President — Cmdr. Eric Parnell, USN (Ret.), (B.Sc. '21), 62 Hume Ave., Medford 55, Mass.
Secretary — Dr. Ruby G. Jackson, (M.D. '50). 1101 Beacon St., Boston, Mass.

NEW YORK CITY

President — Mr. Lew Schwartz, (B.A. '27), 12 Park Rd., Scarsdale, N.Y.
Secretary — Mr. Robert Currie, (B.A. '37, M.A. '39), New York Telephone Co., 140 West St., New York 7, N.Y.

ROCHESTER

President — Dr. John B. Feltner, (M.D. '37), 700 Main St., Rochester 11, N.Y.

PHILADELPHIA

President — Miss Sara W. Hill, (B.A. '25), Folly Hill, 423 Ithan Ave., Rosemont, Pa.
Secretary — Dr. I. Nathan Dubin, (B.Sc. '35, M.D. '39), 755 Beacon Lane, Merion Station, Philadelphia, Pa.

PITTSBURGH

President — Dr. W. W. G. Maclachlan, (M.D. '07), 1133 Wightman St., Pittsburgh 17, Pa.
Secretary — Dr. Ned J. McCague, (M.D. '40), Mercy Hospital, Pittsburgh 19, Pa.

WASHINGTON, D.C.

President — Dr. Basil Darwent, (B.Sc. '41, Ph.D. '43), Dept. of Chemistry, Catholic University of America, Washington 17, D.C.

CHICAGO

President — Mr. G. Leslie Laidlaw, (B.Com. '23), 208 South LaSalle St., Chicago, Ill.
Secretary — Mr. David G. Scott, (B.Com. '32), 925 Forest Ave., Wilmette, Ill.

MINNESOTA

President — Mr. G. J. Dodd, (B.Eng. '40), Container Division, St. Regis Paper Co., 4300 Olson Highway, Minneapolis, Minn.
Secretary — Mr. James E. Kerns, (B.Eng. '50), 4336 Mackey Ave., Minneapolis 24, Minn.

CONNECTICUT

President — Mr. Vincent Giedraitis, (B.A. '51), 105 Church St., Wethersfield, Conn.
Secretary — Mrs. F. G. Charters, (B.A. '23), 58 Flagg Rd., West Hartford, Conn.

VERMONT

President — Dr. F. J. M. Sichel, (B.Sc./Arts '28), Dept. of Physiology, College of Medicine, University of Vermont, Burlington, Vermont.
Secretary — Dr. W. B. Durrell, (M.Sc. '48 -Mac), Dept. of Animal Pathology, Hills Agricultural Science Bldg., University of Vermont, Burlington, Vermont.

NORTHERN CALIFORNIA

President — Dr. Alan F. Morrison, (M.D. '39), Box 396, Oakdale, Calif.
Secretary — Mr. Harold A. Calkins, (B.Sc. '12), 5840 St. Paul Court, Oakland, California.

SOUTHERN CALIFORNIA

President — Mr. Arthur J. Hicks, (B.S.A. '26, M.Sc. '31), Consul of Canada, Canadian Consulate General, 510 West Sixth St., Los Angeles, Calif.
Secretary — Mr. Dennis Murch, (B.Com. '51), 3838 W. 58th Place, Los Angeles 43, California.

WASHINGTON STATE

President — Dr. John J. Callahan, (M.D. '42), 208 Cobb Bldg., Seattle, Wash.
Secretary — Dr. Frederick E. Geisert, (M.D. '53), 5211—57th Ave. S., Seattle 18, Wash.

GREAT BRITAIN

President — Lt.-Col. H. H. Hemming, O.B.E., (B.A. '14), 3 Clements Inn, London W.C. 2, England.
Secretary — Miss Julyan Fancott, (B.A. '60), 14 Campden Grove, London W. 8, England.

FRANCE

President — Mr. Georges Sahovaler, (B.A. '48), 78 Ave. Gambetta, Paris XX, France.
Secretary — Mr. Laurence R. Reusing, (B.Com. '49), 16 rue d'Assas, Paris VI, France.

MEXICO

Vice-President — Mr. Leo M. Roy, (Science '27), President, Pan-American de Mexico Life Insurance Co., P.O. Box 139 — Bis, Mexico, D.F.

WEST INDIES

BARBADOS

President — Dr. E. B. Carter, (M.D. '18), Villa Nova, St. John 2, Barbados.
Secretary — Mr. S. Ivan Smith, (M.A. '55), Bellairs Research Institute, St. James, Barbados, W.I.

JAMAICA

President — Dr. Ivan E. R. Parris, (M.D. '28), 21 Seymour Ave., Kingston 10, Jamaica.
Secretary — Mr. H. Clinton Douglas, (B.Sc./Agr. '55), Ministry of Agriculture and Lands, Hope Gardens, Liguanea, Jamaica.

TRINIDAD

President — Dr. Sam Ghouralal, (M.D. '49), 129 Henry St., Port of Spain, Trinidad, W.I.
Secretary — Miss Cynthia E. Dhein, (B.Sc./H.Ec. '47), 32 Ariapita Ave., P.O. 5, Port of Spain, Trinidad.

SOUTH AMERICA

President — Mr. Kenneth H. McCrimmon, C.B.E., (B.A. '13), Caixa Postal 4965, Rio de Janeiro Brazil.

ABOUT OUR COVER

The McGill campus in summer. A rural oasis in the heart of Montreal. An escape from the hard, concrete sidewalks, the flats and the apartments, the shops and the offices. Freedom for young legs to run, safe from the ever-present automobile and truck. Space to breathe and to play. When our cover photograph was taken, the Conferences of Learned Societies was well under way (see pages 9 to 13), in various university buildings. But mothers, with their future scientists, engineers, and doctors, enjoyed the sun on the lovely campus.

The McGill News is published quarterly by the Graduates' Society of McGill University and distributed to its members. The copyright of all contents is registered. Authorized as second-class matter and for payment of postage in cash, Post Office Department, Ottawa. Please address all communications to: *The McGill News*, 3618 University Street, Montreal 2. Tel. VI. 4-6311.

WE DON'T GROW BRAINS

"You can grow corn or potatoes, but you cannot grow brains. Brains come hard and they come high!"

Sir William Osler

What the CBC can do—and has been doing for twenty-five years — is provide programs that stimulate and enrich the mind. For instance . . .

TELEVISION

Close-up • Inquiry • Festival • Fighting Words • Nation's Business • CBC Newsmagazine • Explorations • The Nature of Things • Viewpoint • UN Review • The Lively Arts • Quest • Citizens' Forum School Broadcasts

RADIO

Architects of Modern Thought • Canadian Political Profiles • Critically Speaking • University of the Air • An Introduction to Criminal Law • Weekend Review • Wednesday Night • Roving Reporter • Around the World • Radio International • Byline • Capital Report • Concert Time • School Broadcasts

All these programs can be seen and heard this fall on CBC's radio and TV networks.

M.G.H. — A New View

The sketch of the Montreal General Hospital reproduced in this issue of McGill News through the pleasantly inquisitive industry of Dr. Bensley (Page 7), has a special attraction for those interested in the history of the Hospital. I had thought that our iconography of the building was complete, but this sketch, unnoticed by us, was lying all the time in the Viger Album at the Quebec Seminary.

The rather severe simplicity of the Hospital had not then been relieved by the addition of the two wings which were to begin its later expansion. One can almost feel in its plainness an expectancy of its long life of usefulness.

That the spire of Christ Church in the background should have caught the eye of the artist tells us of "le bon vieux temps" of Montreal, when the countryside lay open above the lower town; when the church on Notre Dame Street was still able to watch across the fields the hospital, which owed so much to the beneficence of those who before it had shared in the building of the church itself.

Both buildings now have gone; the one was burnt in 1856, to reappear three years later as Christ Church Cathedral, but now standing well out in the country itself; the other had its reincarnation in 1955, on the slopes of Mount Royal.

H. E. MacDermot, MD '13

Montreal 16, Que.

More About Scope

The semi-humorous report by the 1960-61 Chairman of SCOPE (McGill News, Summer Issue) has forced me to write you with a review of history.

SCOPE was conceived and initiated by a Commerce student, its objectives and purposes defined by a Law student and its program and organization capably carried out by an Arts student.

For last year's chairman to imagine that in 1952 the SEC had nothing to spend $500 on indicates a lack in the very commodity his committee is furthering — scope. The 1960-61 program was an admirable effort and one which I hope will be expanded in the next 10 years.

May I suggest that the best way to enlarge a budget is to "woo and win" the favor of the financial member of the SEC. The success of art and culture in Florence in the 1400's came from the purse of Lorenzo de 'Medici, as well as his mind.

LET'S FACE THE ISSUE

THE PHOTOGRAPH at the top right-hand corner of this page, taken in front of Harvard University's Massachusetts Hall, provides us with a happy combination of names. Both Dr. James and Dr. Ralph E. McGill, publisher of the Atlanta Constitution, were awarded honorary degrees of Doctor of Laws at Harvard's Commencement Day June 15; they were among 12 distinguished men who received the accolades of that famed university from President Nathan Pusey. Dr. James also delivered an address at the university's alumni reunion the same day: his timely and significant utterances are reproduced on pages 14 - 17.

Harvard's citations for her honorary degree candidates are the soul of brevity: they compress, in a single short statement, the epitome of long years of activity and outstanding service in the world community. The citation for Dr. James was a fine example:

"Political-economist, scholar-leader of a distinguished university, protagonist of higher learning throughout the world."

★ ★ ★

SEVERAL MISCONCEPTIONS about graduate engineers are exploded in the survey conducted last Spring among members of the class of '52 (see pages 27 - 29). The majority, apparently do *not* migrate to the U.S.A., nor is there a significant exodus out of the engineering profession into other fields. The author of this interesting exposé, Vincent Jolivet, graduated as a civil engineer — '52, of course — and has broadened out into the field of teaching.

After graduation from McGill, Dr. Jolivet went on to Harvard University, where he received his Master of Business Administration and a Doctorate in finance. Since 1956, he has been Associate Professor of Finance at the University of Washington (Seattle). During the present year 1961-62 he is a Professor at the Management Development Institute at Lausanne, Switzerland. He is married and has three sons.

Dr. Jolivet's active academic career since leaving McGill has not interfered with his abiding interest in the university and he has been the very model of a modern class secretary.

★ ★ ★

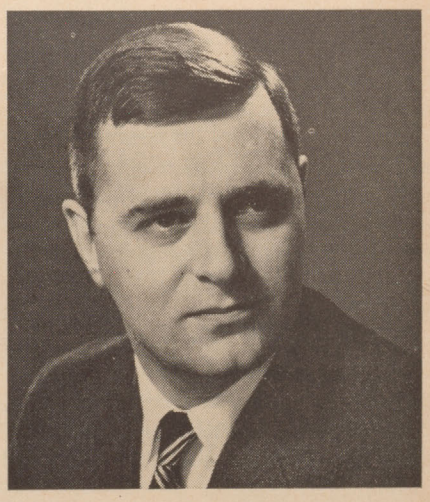

OUR METICULOUS READERS may remember that, in the Spring 1961 issue of The McGill News, we published a letter to the editor entitled "Premature Unveiling". The letter, written by R. J. Harper, BA '01, of Port Perry, Ont., recalled the famous incident at the turn of the century when the regal guardian of the portals of Royal Victoria College was stripped of her shroud by exuberant students before the appointed day of her unveiling. "The statue of Queen Victoria had been sitting in front of R.V.C. for several months, shrouded from sight and awaiting its overdue unveiling," Mr. Harper pointed out, "and it occurred to some bright mind to unveil it . . . with all due deference: heads uncovered, at attention, the National Anthem and cheering." It is a criminological truism that the culprit will return to the scene of his misdeed, and sure enough, last Spring, during the senior graduates' reunion, three of the "bright minds" were caught by our camera paying homage to their Queen (see photo right, bottom). G. Percy Cole, BSc '03, MSc '06, Mr. Harper, and Dr. Cluny Macpherson, MD '01, took part in the celebrated affair. All of which gives us an excellent excuse to draw attention to the Fall Reunions October 20, 21, about which more can be found on pages 25, 26.

★ ★ ★

SPEAKING OF REUNIONS it must be admitted that the topic for the second annual seminar, "Mankind in the Atomic Age", was chosen well before Mr. Khrushchev made his explosive disclosure that the Soviet Union was resuming nuclear tests. There is now great public concern over the problems of the atomic age as a result of recent developments, and the Graduates' Society is most delighted to have such a distinguished panel of McGill men participating in the seminar.

JAMES, McGILL

JOLIVET

VICTORIA AND FRIENDS

WHAT HEARS the MARTLET

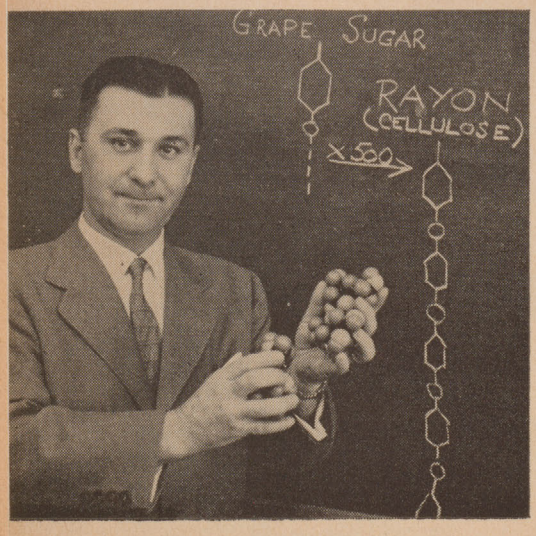

Avicel and Battista

WE HAVE RECENTLY had news from Philadelphia's American Viscose Corporation that Dr. Orlando A. Battista, BSc '40, has been promoted to manager of Corporate Applied Research. Dr. Battista, who joined American Viscose immediately after he graduated with first class honours in chemistry, has had a most prolific career: in addition to publishing 14 scientific papers in his specialty, cellulose chemistry, he has written seven books, the latest of which, "Toward the Conquest of Cancer", is due for publication in September.

The range of Dr. Battista's interests are obviously not confined to cellulose Chemistry, as the titles of his books will indicate: "The Power to Influence People", "God's World and You", "The Challenge of Chemistry", "How to Enjoy Work and Get More Fun Out of Life", "Commonscience in Everyday Life", and "Modern Drugs: Chemistry's Challenge To Psychotherapy".

Our informant in Philadelphia modestly describes Dr. Battista as "one of the inventors of Avicel, American Viscose's new microcystalline cellulose, which is expected soon to find many uses in the food, pharmaceutical and cosmetic industries". But Dr. Battista and Avicel were the subject of a "Special Report" in the June 2 issue of Life Magazine.

Dr. Battista at Work.

Avicel, according to Life Magazine, is an edible cellulose which, theoretically, should prove to be the final answer to the "dream diet". It is *not* tasty, it is *not* nutritious, it is totally lacking in calories and vitamins, and in fact it has no food value whatever. "What it does do is keep the stomach from feeling lonely". As a result it may enable millions of overweight people to diet without the usual fierce hunger pangs.

"Tests show that the new product can be used, either as a fine flour-like powder or in the whipped gel state, in almost every kind of conventional mixed food. It can replace a sizable portion of the calorie-laden ingredients in candies, pretzels and snack items without at all affecting the flavor. A one-calorie cookie is easy to make. Cellulose chocolate cake with cellulose chocolate icing has only 85 calories per slice instead of 270.

"In salad toppings, puddings, soups and desserts the cellulose cuts sharply into the amounts of starch and fatty oils used. With a bit of butter or margarine flavoring added, the gel itself will serve as a spread for bread with 90 per cent fewer calories than the 'other spread' — either one . . ."

Apparently, nearly 1,000 food firms across the United States have sent for samples of the cellulose and "within their heavily guarded test kitchens are striving to gain 'lead time' on their competitors". According to Life Magazine, however, some nutrition experts question whether any cellulose product can do all that Avicel's proponent's say it can. They point out that every previous attempt to use cellulose "fillers" in weight reduction has proved unsatisfactory.

The magazine quotes Dr. Herbert Pollack, of the American Diabetes Association as saying: "The whole point ought to be to re-educate people's eating habits — to eat two pancakes instead of six — rather than to rely on what may prove to be another fad and perhaps even a digestive tract irritant."

The inventor of Avicel, Dr. Battista, is a native of Cornwall, Ontario, and he received his D.Sc. (honoris causa) from St. Vincent College, Latrobe, Pa. He is married, has two children and lives in Drexel Hill, Pa.

A Prize for Cronyn

A CLIPPING FROM a New York newspaper (dated early June) imparts the intelligence that Hume Cronyn, Arts '32, was awarded the 1961 Barter Theatre Award for his "outstanding contribution to the theatre" with his performance in a play called "Big Fish, Little Fish". Robert Porterfield, founder and director of the Barter Theatre in Abingdon, Virginia, made the announcement.

Cronyn, who has made a distinguished name for himself in U.S. theatre, joins such illustrious previous Barter award winners as George Abbott, Helen Hayes, Ralph Bellamy and Ethel Merman.

What does the award consist of?

1. An acre of land on the side of a mountain in Abingdon.
2. A Virginia ham.
3. A platter to "eat it off of".
4. The privilege of selecting an actor and actress for jobs at the Barter Theatre during the summer.

Citations by Cattley

PROFESSOR R. E. D. CATTLEY, head of the Classics Department at the University of New Brunswick in Fredericton has for many years had the responsibility for preparing citations for his university's honorary degree candidates. Last Spring he had an opportunity to exercise his pungent humour and eloquent prose on two McGill people: Louise Manny, BA '13, of Newcastle, N.B., and Professor Max Cohen, Faculty of Law, both awarded Honorary LLD degrees.

About Professor Cohen, who delivered the Convocation Address at the ceremony on May 18, Prof. Cattley had this to say:

"As you will be his audience this afternoon it is superfluous for me to praise his mercurial intellect when it will shortly be its own panegyrist.

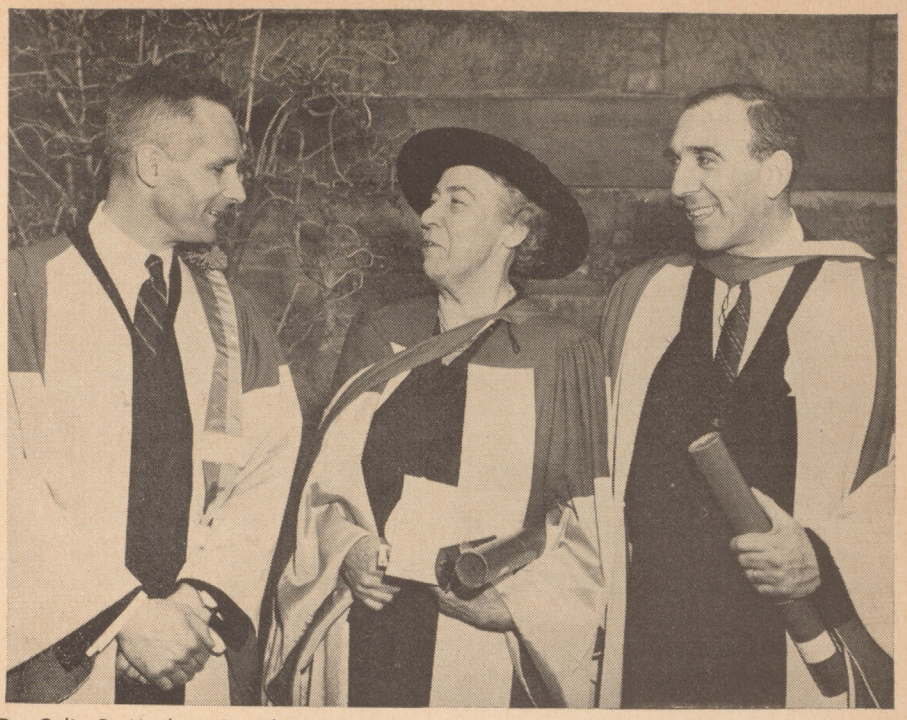

"But I will hazard a guess that if it be Cohen the Jurist who addresses you he will not be dry but dynamic; if Cohen the Professor, not boring but brilliant; if Cohen the Commentator not prosy but prophetic; if Cohen the Panellist, not coy but challenging; if Cohen on Foreign Affairs, not cautious but contagious (for he is then likely to speak on the subject of his proudest Labours, the United Nations, and his enthusiasm will be catching).

"But if it be just Maxwell Cohen himself, then whatever his theme, and however seasoned with Cohen humour, salted with Cohen wit, or (to sound a kindred note) pungent with Cohen puns, its message, like its author, is certain to be memorable."

Professor Cattley's tribute to Louise Manny, the librarian who helped found and now directs Lord Beaverbrook's Old Manse Library in the "north-shore" city of Newcastle, contained these words:

"Two slim but invaluable publications are the scholarly evidence for a career dedicated to the Wooden Ships and Iron Men, to the coasts, the hinterland and the fabulous river* which, by habitation as by record, she has made her own. In her *Ships of Kent County* and *Ships of Miramichi* she has garnered, with painstaking accuracy and relentless research, the details

*The Miramichi River

Dr. Colin B. Mackay, President, University of New Brunswick, Miss Louise Manny, BA '13, Professor Maxwell Cohen, Faculty of Law, McGill University.

and, where possible, the destinies of those storied craft which made our golden epoch. But romance is for ever flouting her historian's stern economy. The passing glint that she vouchsafes of the boisterous celebrations at a launching, or of ravages by gale and fire, flushes to a generous glow as the names of such master-builders as Bowser and Desmond, and of those nigh legendary owners, the Jardines, the Cunards, the Gilmours, the Rankins, the McLeods and the Burchills, swell the roll.

"A catalogue so exacting would have crushed all but a Manny. She who had thundered (and thunders still) at 'our thousand dollar kitchens and our ten dollar libraries', was forced to begin her researches in a neighbouring country, for lack of facilities in her own. And then she found a patron of libraries and learning who, like herself, had come to Newcastle as a child and was determined that his childhood home and its glories should never be forgot.

"And so, with Lord Beaverbrook's backing and her own devotion, she came to embrace not only the ships and the shipbuilders but also the breed that cut for them the lumber and sang their lumberman's songs. Before the latter Homers of those tough crews had all passed into limbo she had caught their accents on her ubiquitous disc and tape, and given permanence to their crude ballads by a hundred broadcasts and an annual festival — the only non-professional Eisteddfod of folklore in North America."

Breaking a Barrier

MCGILL MEDICAL GRADUATES can now practice in Central Africa — thanks to Walter A. Wasdahl, MD '54. Dr. Wasdahl, who is now at Harari Hospital, Southerton, Salisbury, Southern Rhodesia, is the first U.S. citizen outside of the mission field to be licensed to practice medicine in Southern Rhodesia and he is justifiably proud in having broken a "medical licensure barrier".

In February of 1960, Dr. Wasdahl decided to apply for the position of senior house surgeon in neurological surgery in European and African Hospitals in Salisbury. He responded to an advertisement in the Journal of the American Medical Association signed by a Mr. L. F. Levy, F.R.C.S., a neurosurgeon. He was informed by Mr. Levy that he was acceptable. Shortly after, however, he received a letter from the secretary of the Medical Council of Southern Rhodesia that

"under no circumstances" could he practice because his medical degree was not on the accepted list.

Dr. Wasdahl soon found out that provincial universities in Canada, such as the University of Manitoba were on the list but only after provincial registration. In Manitoba this required Licensure by the Medical Council of Canada; proof of intent to become a Canadian citizen; a diploma denoting membership in the College of Physicians and Surgeons in Manitoba; and over $300 in fees. Dr. Wasdahl was able to overcome these hurdles, and, in his own words, here is the rest of the story:

"After acquiring the L.M.C.C. and membership in the College of Physicians and Surgeons of Manitoba, and getting the Canadian citizenship waived, Mr. Levy informed me that he was conducting a daily lobby at the Ministry of Health in my behalf, and thus I finally became 'legal'. This had taken the better part of one year but I was on my way prior to having this on paper. I arrived in Salisbury after being snowbound a week in New York City, lost in Rome, awed in Khartoum, Sudan, and amazed at initial impressions of Central Africa.

"To add further to my amazement, I obtained a copy of the Central African Medical Journal and found there a report of the transactions of the Medical Council of Southern Rhodesia. It stated that 'after consideration, it was agreed that the M.D. degree from McGill University should qualify the holder for registration in Southern Rhodesia as a medical practitioner'. After a year of obstacles, they had changed a law, I might say in my behalf, and I was 'legal' without the licensure by the Medical Council of Canada, the College of Physicians and Surgeons membership, Canadian citizenship, etc. This was what I would call 'doing it the hard way'.

"But in retrospect, a law had been changed to allow graduates of my alma mater reciprocity in Central Africa and the opportunity to practice in this beautiful country. Though the Medical Council of Southern Rhodesia has not yet recognized any U.S. schools, the machinery is already working, and I feel that my efforts have not been wasted. Needless to say I feel a deep sense of accomplishment even prior to beginning work here.

"This country is desperately short of teachers, doctors, and I might say 'understanding' in these days of trial for Africa and the Africans. The opportunities in medicine, surgery, and especially pathology and clinical research, are unlimited here and with time, more personnel, and fewer barriers, these opportunities may be realized."

When the Medical Historical Club of Toronto dedicated a memorial cairn to Sir William Osler on July 12, McGill University was well represented at the ceremony, which took place at Sir William's birthplace, Bond Head, some 40 miles north-west of Toronto. The photograph above, taken after the dedication, shows, left to right: Dr. Wilder Penfield, Honorary Consultant, Montreal Neurological Institute and a Governor of McGill; Mrs. Feindel; Dr. William Feindel, William Cone Professor of Neurology and Neurosurgery; Dr. C. B. Farrar, of Toronto, who dedicated the cairn; Mrs. Penfield; and Dr. E. H. Bensley, associate dean, Faculty of Medicine. Dr. Farrar obtained his MD degree from Johns Hopkins University in 1900 and was an undergraduate student when Osler was at the latter institution. Dr. Farrar received an honorary Doctorate of Science from McGill at a special convocation held in June. (See Campus section).

A National Leader

ONE OF MCGILL'S more active women graduates is Mrs. Saul Hayes, (Beatrice Rosenbaum), BA '33. This year, she has been elected to several important offices: she is national president of the largest Canadian women's organization, the National Council of Women of Canada; she is president of the Montreal Citizens Committee and chairman of the Quebec Regional Employment Committee, a committee of the Unemployment Insurance Commission.

Mrs. Saul Hayes

Since graduation, Mrs. Hayes has made valuable contributions to community life in Montreal. She had the distinction of serving as a Class C City Councillor representing the City Improvement League, she has been active in the University Women's Club and in McGill's Alumnae Association.

In 1956, McGill University commissioned Mrs. Hayes to do a portrait of the university's founder, James McGill, which was presented to a school bearing his name in his native Glasgow, Scotland.

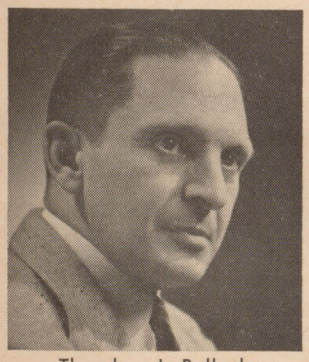

Life and Liszt

SOON TO APPEAR in the book-stores is a fascinating book about the great Hungarian pianist-composer-teacher Franz Liszt. The book contains the memoires of Arthur Freidheim, the Russian-born pupil of Liszt, later to become his secretary and ultimately the leading exponent and authority on his "Master's" music.

But what is of particular significance to The Martlet is the fact that Freidheim's recollections, under the title "Life and Liszt", were compiled, edited and introduced by Theodore Lafleur Bullock, Arts '22, former music critic, public relations man, civil servant and retired Colonel of Quebec's Royal 22nd Regiment.

It is also of more than passing interest that Col. Bullock is married to Ellen Ballon, D.Mus '54, another distinguished concert pianist whose interest in music at McGill and in other parts of Canada is well-known to us all.

"Life with Liszt", however, adds a great deal to the literature about a musical giant and such other notable figures of 19th century music as Paderewski, Hoffman, Rachmaninoff, Kreisler and Caruso — not to mention Wagner, Gounod and Cesar Franck.

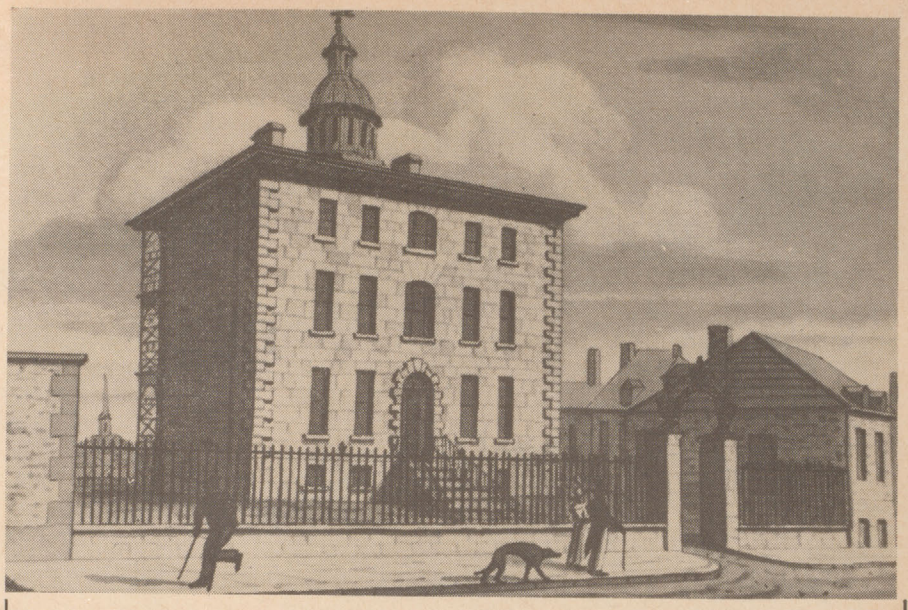

Theodore L. Bullock

Col. Bullock's intelligent introduction pays tribute to Freidheim, the artist and the man, his "integrity and idealism". He has edited the manuscript carefully and the book makes interesting reading for such lay musical minds as that of The Martlet. The book has been issued by Taplinger Publishing Co. Inc., New York, in this, the 150th anniversary of Liszt's birth.

Hear, Hear!

OTOLOGY, ANYONE? The Department of Health and Welfare announced recently that $31,100 has been awarded to the Department of Otolaryngology at McGill.

The grant will help finance the study of the electrophysiological responses of guinea pigs to continuous noises. It is hoped that eventually the studies will lead to a better understanding of the processes involving acoustic shock and noise, in regard to induced hearing loss to workers in industry.

THE SKETCH reproduced above is the earliest known picture of the Montreal General Hospital. Those especially interested in the history of the Hospital were unaware of the existence of this picture until a few months ago. It shows the Hospital as it was in 1826, when its building was but five years old.

Located on Dorchester Street in the St. Lawrence suburbs, this original building, measuring 76 feet by 40 feet, consisted of two stories with a basement and attic and was capable of housing 72 patients, or in an emergency, 80. A cupola was provided "to serve as an ornament to the building and to give light to the operating room."

The corner stone was laid on June 6, 1821 and the Hospital began work with the admission of its first patients May 3, 1822. In later years many extensions were added to this small structure, but in 1826 only the original building had been erected. The picture shows the front of the Hospital facing Dorchester Street. The main entrance with its rather ornate gateway is clearly visible, as is the iron fence which had been the gift of John Molson. At the rear are galleries for patients.

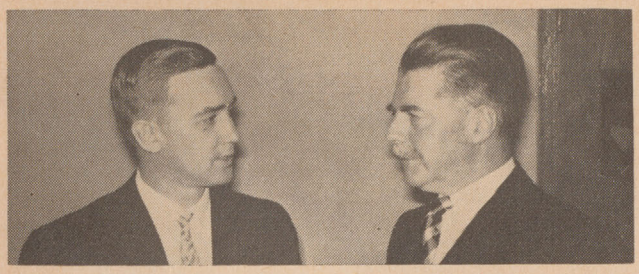

To the left of the Hospital, Christ Church can be seen in the distance on Notre Dame Street. There were then no large buildings between Dorchester and Notre Dame Streets to obstruct the view. The inclusion of Christ Church in the drawing is most appropriate since members of this church played a large part in the founding and continued support of the Hospital.

This newly discovered picture is a reproduction of a sepia sketch by John Poad Drake in the Viger Album at the Quebec Seminary, Laval University. It was traced and identified with the kind assistance of Mr. Pierre Brunet, Assistant Dominion Archivist and the Reverend Honorius Provost, Archivist of the Quebec Seminary.

The reproduction published here has been made from a photograph generously supplied by L'Inventaire des Oeuvres d'Art, Musée de la Province de Québec. It represents the Montreal General Hospital at a much earlier date than any picture published heretofore. That it should have been overlooked by medical historians for so many years is not surprising. The Viger Album containing the sketches of John Poad Drake has received little public attention and prints of Drake's sketches are extremely rare.

Dr. E. H. Bensley
Associate Dean,
Faculty of Medicine.

Summer On the Campus

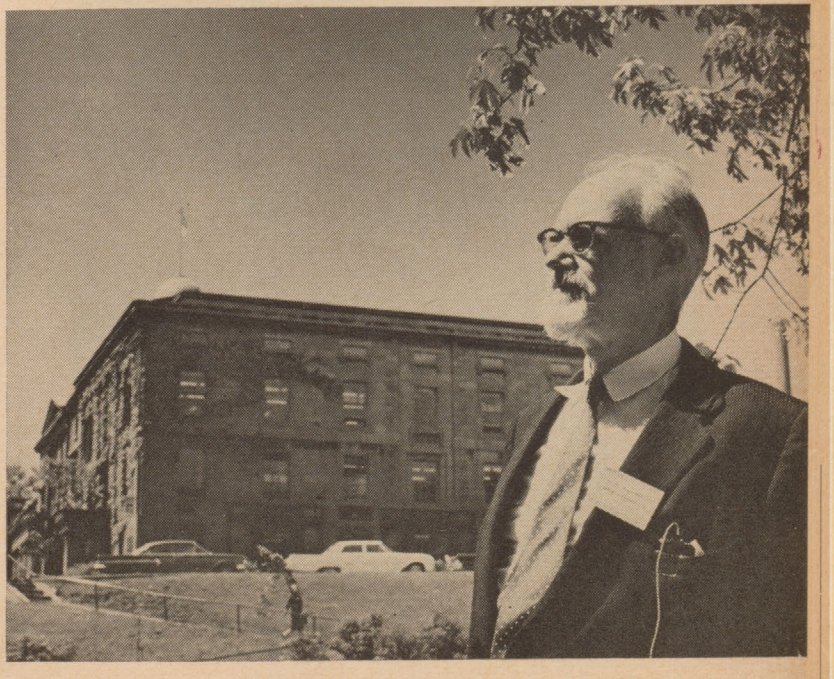

Canada's R.C.M.P. performed the famous Musical Ride on the lower campus, in front of the Redpath Library, for delegates to the 18th International Congress of Pure and Applied Chemistry in August.

Colin McDougall, McGill's Registrar sums up an active summer at the University. Photos accompanying this article were taken during the Conference of Learned Societies, June 1 to 16.

LET US GLANCE at the scene on McGill's campus during this summer of 1961. It is true that the vast bulk of undergraduate students have departed for their summer jobs; and in this regard it is worthy of note that in Canada the student is more dependent on summer earnings than in any other country of the world. The majority of graduate students, however, are still at the University, carrying out their researches or theses in their accustomed laboratories or libraries.

And the professors? Some of these are doing the same thing; released from teaching duties they are able to surge ahead with their vital researches. Others have departed for distant libraries, institutes, or congresses being held throughout the world. Research and scholarship are the heart and lifeblood of a university's physiological system; and it is during the summer that time is available for these essential, creative activities. It cannot be otherwise; a university will be little more than a teaching academy unless time, help, and assistance are given to research. It seems unnecessary to add that members of the academic and administrative staff are busy in their own offices with preparations for the session which will commence in September. Building and building planning proceed apace; thousands of applications for admission have to be assessed and decided upon.

Prof. A.R.M. Lower, Queen's University, President, The Royal Society of Canada.

A television crew makes preparations for an outdoor interview on the steps of the Macdonald Physics Building.

What are the visible activities on the campus? First, the University plays host each year to numerous academic congresses, meetings and seminars. This year McGill, together with its two sister institutions, the University of Montreal and Sir George Williams University, was host to the annual Conference of Learned Societies from June 1 to 16. More than thirty societies met, and two of the largest, the Royal Society of Canada, and the National Conference of Canadian Universities and Colleges, were among those meeting at McGill. In all, about 3,000 delegates, representing all the major universities, as well as various governmental and scientific institutions, met in Montreal. The City of Montreal, with traditional hospitality, held a reception at the Chalet. On a perfect June evening, with thousands of delegates thronging the balustrade of the look-out, it was striking to see the new face of Montreal mirrored in the glance of Canada's scholars and academic leaders as they gazed down at what must surely be one of the most dramatic vistas in the world. The Third

CBC television reporter Andy Little interviews Dr. D. S. Johnson, head of the Meteorological Satellite Laboratory of the United States Weather Bureau.

Professor Nathan Keyfitz, University of Toronto, chats with two representatives of the University of Toronto Press: Miss Frances Halpenny, Editor, and Hilary Marshall, Sales Manager.

World Congress of Psychiatry, attended by another 3,000 delegates, coincided with the Conference; and at a special Convocation on June 7 McGill enrolled three distinguished psychiatrists among its roster of graduates.

Hard on the heels of the Conference of Learned Societies, from June 19 to 23, came the annual gathering of the Canadian Society of Radiological Technicians. Commencing in the second week of August, the campus was alive with thousands of delegates to the Eighteenth International Congress of Pure and Applied Chemistry. From August 6 to 12 this assembly devoted itself to a busy scientific programme.

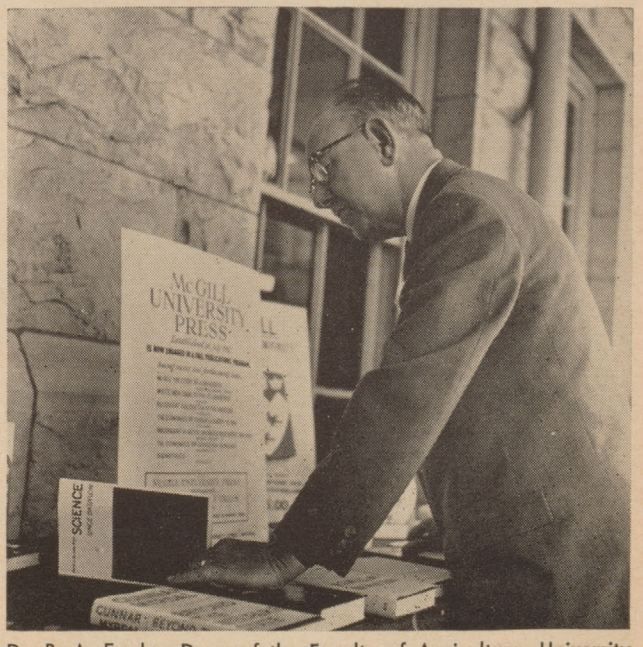

In addition to congresses of this kind, the University's class-rooms and residences were thronged with students attending various summer schools and courses. The venerable French Summer School (ici on parle français seulement) met this year from June 27 to August 9. More than 140 students, all majoring in French at different universities, and drawn from seven provinces and thirty states of the U.S.A., attended this summer's session to increase their special knowledge of this subject.

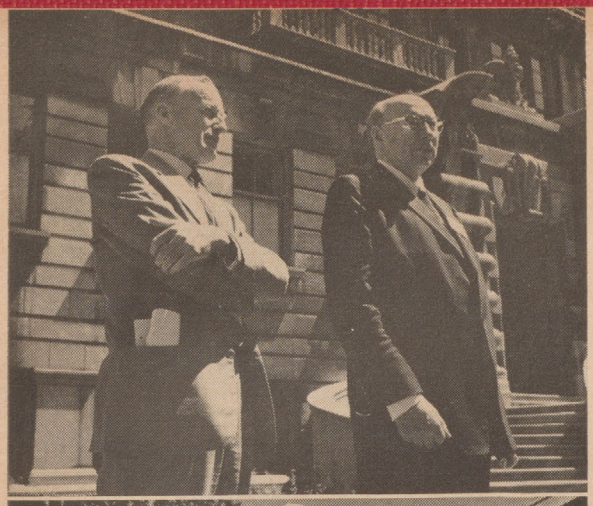

Publishers' book display: for delegates to the Conference of Learned Societies in the McConnell Engineering Building.

Dr. B. A. Eagles, Dean of the Faculty of Agriculture, University of British Columbia, examines a book display arranged by McGill University Press.

Dr. George Laurence, Atomic Energy of Canada Limited, Chalk River, Ont., and Dr. G. M. Shrum, Dean, Graduate Faculty, University of British Columbia.

Professor Geoffrey Davies, Department of History, University of British Columbia, and Prof. Stuart Ryan, Faculty of Law, Queen's University.

Dr. G. F. G. Stanley, Royal Military College, Kingston, Ont., and Dr. Mason Wade, Director, Canadian Studies Programme, Rochester University.

Dr. J. L. Locke, Dominion Radio Astrophysical Laboratory, Penticton, B.C., and Dr. D. W. R. McKinley, National Research Council, Ottawa.

At Macdonald College, the annual Summer School of Education, which opened this year on July 3, was expected to enrol some 300 teachers, returning to the class-room to take refresher work or to gain further credits toward higher degrees and teaching certificates. The professional courses in teaching ended on July 29, while the university credit courses and the graduate seminars leading to the M.A. degree in Education continued until August 5. As in previous years, a number of visiting lecturers were invited to Macdonald College to instruct in their respective specialties. Visitors this year included Dr. J. Wrigley of the Institute of Education, University of London; Professor M. Toombs of the University of Saskatchewan; Professor Sheila O'Connell of the University of British Columbia; and Mr. R. Magnuson of the University of Michigan.

Another highly specialized summer school, sponsored by the University's Arctic Meteorology Research Group, took place at Stanstead College from July 6 to 20. The Seminar on the Stratosphere and Mesosphere, fourth in the series of meteorological conferences begun in 1955, brought thirty-five professional meteorologists to the Eastern Townships community. Five McGill scientists, and a number of visiting experts, delivered lectures and conducted discussions on problems of the upper atmosphere.

A number of other Schools, of specialized interest, also take place on the McGill campus during the summer months. From May 9 to June 2, the University's School of Commerce sponsored the seventh annual Accountancy Summer School. This year, forty-five students from all parts of Canada, most of whom are studying for their C.A. degree through correspondence, took this opportunity of engaging in a period of intensive lectures and study on a full-time basis.

The thirteenth annual Industrial Relations Conference, run by the University's Industrial Relations Centre, was held on June 6 and 7, on the general theme "Changing Patterns in Industrial Relations". Directors of companies, industrial relations managers, and union personnel, a total of 156 persons, joined in the sessions which were designed to attempt an analysis of technological change in

industry and the resulting impact on collective bargaining.

Four separate seminars make up the annual Staff Development Institutes, now in their fourteenth year, under the sponsorship of the Applied Psychology Centre of McGill's Department of Psychology. From May 23 to 27 the Job Evaluation Institute was held on the campus. The other sessions were: Personnel Interview Workshop, June 19 to 23; Wage and Salary Administration Seminar, September 11 to 15; and Human Engineering Seminar, September 13 to 23. Since the establishment of the Staff Development Institutes, more than 1,200 representatives of industry and government have participated in the various courses.

The summer is also the period in which the University's off-campus research activities are most vigorously pursued. Members of the staff and student assistants, forming part of the Jacobsen-McGill Arctic Expedition, were on Axel-Heiberg Island in the far north gathering a variety of scientific data; others were on Devon Island on an Arctic Institute research project, studying basic productivity of the ocean in relation to the effects of the ice-cap; while at Schefferville, a party was continuing the Geography Department's studies on permafrost. In the south, a team was at work at the Bellairs Research Institute in Barbados; and in western Canada, the meteorologists' Hail Study Programme was being conducted from the R.C.A.F. station at Penhold, Alberta.

These, then, were some of the University's activities, both on and off the campus during the summer months; and underlying each one of them was the rising sense of anticipation, shared by every member of the staff, for the next sessions, always different, always the same, which commenced in September.

TOP: Dr. C. F. Klinck, English Department, and Dr. W. K. Ferguson, History Department, both of the University of Western Ontario. Dr. Ferguson is President of the Canadian Historical Association.

BOTTOM: Dr. G. Herzberg, National Research Council, Ottawa, and Dr. H. G. Thode, Professor of Chemistry, McMaster University, Hamilton, Ont.

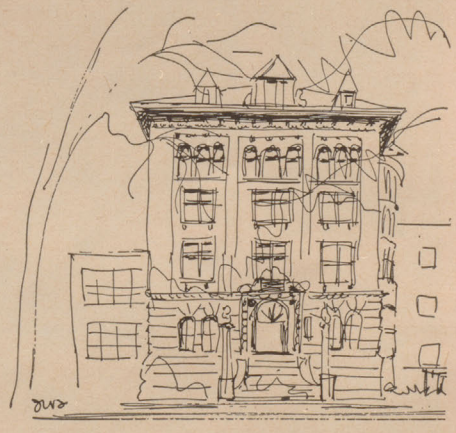

We Must Demonstrate To The Curious

An Address by Dr. F. Cyril James,
Principal and Vice-Chancellor, McGill University,
President, International Association of Universities,
at Harvard University's Alumni Reunion,
Commencement Day, June 15, 1961

THIS AFTERNOON I stand here in the modest role of university president — and any other member of any university will tell you that this is the lowest form of academic life. Has it not been said often that a Dean — whom some think nearly as bad — is a man not clever enough to be a Professor but much too clever to become President? In my own case, indeed, if you follow that line of argument to its conclusion, I am the lowest of all university presidents since, when I was elected to the Presidency of the International Association of Universities in Mexico, last summer, the local newspapers dubbed me "el Rector de los Rectores" . . .

. . . Since, by the friendly grace of its President and the Corporation, I have today become a graduate of Harvard University — by that shorter residence and lesser effort that is pleasantly implicit in the words *honoris causa* — I should like to discuss with you, my fellow alumni, the great importance of North American universities to the rest of the world. What is the impact of their activities on the hundreds of millions of people who live — often on an annual income of less than one hundred dollars a year — in the underdeveloped areas of Africa, Asia and South America?

Let us begin by realising, as Owen D. Young pointed out a generation ago, that Canada and the United States are too rich to be loved by the rest of the world. Your country boasts of the highest standard of living in the world; mine brags that it has the second highest. Between us, we consume more than one-third of all the goods and services produced on this globe although our population numbers less than one-tenth of mankind. We believe — or should I say we like to think? — that we are using our great wealth to develop on this continent a pattern of happy, healthy and democratic living that the rest of the world will want to emulate. The Pakistani, in winter weather colder than Boston's, is not so sure about that as he sits in a cotton dhoti beside a small dung fire and eats a meagre mess of pottage. The Chinese refugee who has come with his great heritage of culture to the slums of Hong Kong is equally doubtful, and there are millions of men and women from Africa to Indonesia who are utterly ignorant of North American ideals but resent bitterly our fabled luxury. We are too rich to be loved — and from many parts of the world the U.S.S.R. looks more attractive simply because, out of the poverty of the period from 1917 to 1935, it has by harsh economic discipline made such great leaps forward.

If we, Canadians and Americans, want to attract the world to our ideals, we must demonstrate those ideals in a practical way. If we are Christian communities, we can never forget the second of Christ's great commandments: "Thou shalt love thy neighbour as thyself", even though that neighbour be a Samaritan. I would go further, if we are to prove to the rest of the world the truth of the ideals that we profess, the universities of North America are our most effective ambassadors. Many of them are already doing much. The Michigan Report on

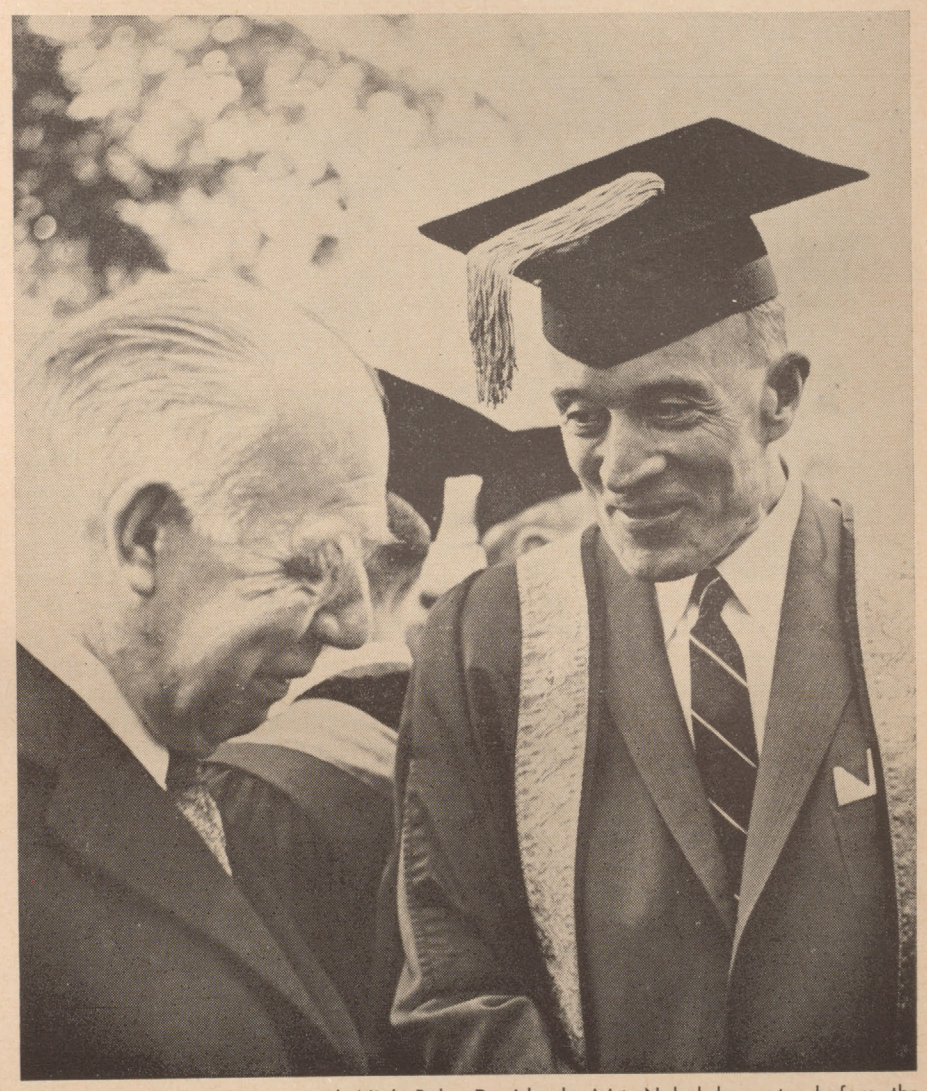

The International Programs of American Universities is an impressive record — but careful study of its pages and further reference to the more recent Morrill Report on *The University in World Affairs* indicates clearly that there is much more to be done.

It is my experience — and I know many of the universities on this continent — that all of them are eager to play a part, as missionaries of North American ideals, to help the rest of the world. There are, however, three practical difficulties and we must face them squarely.

Larger sums of money must be provided

The first of these is *Money* — more money for education and more money for foreign aid programmes. Both Canada and the United States are beginning to tackle this problem realistically, and the funds provided for higher education within our borders — by government, corporations and individuals — are greater than ever before. We have been less generous in providing money to finance the things that universities can do to enhance the reputation of North America throughout the rest of the world. Although, it ill becomes a Canadian, whose dollar has floated to a premium on the flood of American investment in Canada, to say what the United States should do. Canadians do read *The New York Times* and watch television so that we are well aware of the difficulties that President Kennedy's Foreign Aid Programme is encountering on Capitol Hill. We know even more intimately the same kind of problem in Ottawa.

Having been privileged during the past ten years to visit many of the underdeveloped countries — to talk with statesmen and university men, as well as with the man (and sometimes the woman) in the street — I am convinced that Canada and the United States will need to provide larger sums of money than they have yet provided if they really wish to convince the rest of the world. Within our own countries, each of us long ago decided that it was unreasonable — even unjust —to allow one man to enjoy a standard of living hundreds of times higher than another. By income taxes and succession duties, on the one side, and social

Dr. F. Cyril James chatting with Niels Bohr, Danish physicist, Nobel laureate, before the ceremonies at Harvard University's Commencement Day, June 15. Dr. James was awarded the honorary degree of Doctor of Laws. Dr. Bohr and the Earl of Home, Secretary of State for Foreign Affairs in Great Britain, were also among recipients of honorary degrees.

We need tens of thousands of Canadians and Americans in every university city who will welcome foreign students as personal friends, who will spend time and effort to show them the real quality of our political and social institutions.

legislation on the other, we have worked out a more egalitarian pattern. For how long can we refuse to apply the same principles on a global scale? Whether we talk of individuals or of nations it is not the scale of consumption, but the scale of contribution, that measures greatness.

Another principle that can be exported

There is also another principle of our domestic pattern of life that can be exported. A generation or more ago, assistance from government to individuals was largely governed by patronage. Aid was given only to those who showed adherence to the right party. This idea is not dead. At the present moment a Royal Commission is investigating the subject of political patronage in Quebec, and I have heard that there are still some cities in this country where vestigial traces of the old habit can be discovered. By and large, however, assistance is now rendered by government on the basis of need. Our unemployment insurance, our old age pensions, our schools, our hospital services — all of these are available to every member of the community without reference to his race, colour, religion or political creed. Why, then, do we channel our foreign aid so largely to those nations that promise to support us in international politics, and only give reluctantly to the uncommitted? Might it not be wiser — especially in the field of education — to channel a larger part of the available money through the United Nations Special Fund or through Unesco, so that its use might be entirely free of political pressure? The schoolboy was not entirely right when he wrote "Throw your bread on the water so that you can eat cake", but the taint of self-interest poisons the Christian ideal of charity.

Money, then, is the first essential if our universities are to be put in a position to demonstrate our ideals to the rest of the world, but the second is *Men* and the kind of men that we need cannot be bought with money.

All of us realise that only by active personal contact of one man with another can ideals be transmitted. It is by the character and actions of men and women that the quality of a nation's ideals is measured.

Canada and the United States need larger numbers of men and women who are willing to go to the less comfortable places of the world and to share the daily tribulations of life, in their desire to help. It is not enough to make quick trips by jet plane. It is often unwise to seek the isolation of an air-conditioned room when those with whom one is working must endure the tropic heat and humidity. The great medical missionaries who went from Harvard to China, the humbler but efficient colonial administrators who went from Great Britain to Africa and India, owed much of their influence to the fact that they lived with the people, loved them and tried to understand them as fellow human beings. There are still men who follow this great tradition. Earlier this year I met young graduates from Harvard, Yale (and I might modestly add McGill) who were teaching English in a Chinese College in Kow Loon — and the high regard in which they were held by their Chinese colleagues was evident. We need more such men — many, many more than have yet come forward — and they must be recruited from among the ablest of our professors and our graduates. It is useless to send the second best!

But we also need men at home in North America, as well as in distant parts of the world. Thousands of foreign students come, each year, to Canadian and American universities. Many of them are the ablest young people of their generation, carefully selected by their governments and destined after their graduation from our universities to play a significant role in the development of their countries in future years. How often do they return home, ignorant of the better qualities of North American civilisation and embittered against us?

Classroom and laboratory are not enough

It is not enough to admit them to our classrooms and laboratories. We must admit them to our homes and to our family life. We need tens of thousands of Canadians and Americans in every university city who will welcome these foreign students as personal friends, who will spend time and effort to show them the real quality of our political and social institutions. In terms of its impact upon the future pattern of world affairs, this extra-curricular education can be much more important than all the classes that the foreign student takes during his years at a North American university.

Let us never forget that this need for men is urgent. In this generation the world is changing more rapidly than at any previous time in history. New nations are coming to birth, hundreds of millions of people are getting the opportunity to think, to choose, to decide. Tomorrow may be too late for us to decide on appropriate action because it is in the minds of the youngsters now in school or college that the future ideology, and pattern of society, will be decided for large areas of Africa, Asia and South America.

All of us realize that only by active personal contact of one man with another can ideals be transmitted. It is by the character and actions of men and women that the quality of a nation's ideals is measured.

The third requirement — *Ideals* — is already inherent in what I have said about the need for money and the need for men. As Dr. Grayson Kirk pointed out the other day: "We must be able to demonstrate to curious, skeptical, even unfriendly observers that our system can produce — and has produced — a society worthy of respect, friendship and possibly emulation".

Only through the universities of our countries — through the professors, students and graduates — can we hope to do that. If our universities do not hold fast to the highest ideals of our civilisation, if they do not strive to educate an *élite* that shall provide leadership for the whole community, where else can we look? I know from personal experience that the universities of the world are today looking at one another more closely than ever, and working together more frequently. The great reputation of Harvard throughout the world — the many things that Harvard has done to help younger and poorer universities in distant lands — is just as significant a part of the American image throughout the world as the actions of the Government of the United States. I have been in distant parts of the world where such names as Conant, Pusey and Galbraith are better known than those of Cabinet Ministers at Ottawa or Washington.

Canada has been aided by U.S. universities

Canada has been aided more generously by the universities of the United States than any other country. May I then, as a Canadian, express the hope that all the universities of North America, from both sides of the border, will make as great a contribution, with equal understanding and friendship, to the peoples of the younger nations of the world? Professors and students can do much to realise that hope, but little will be achieved unless the mighty army of university alumni give their solid support to the effort — both as members of the university and as citizens prominent in the world of affairs. Only in this fashion shall we be able "to demonstrate to the curious" that our society prizes its liberties above its comforts, that our ideals are more than a cloak for our selfish interests.

"Mankind looks to the University"*

"At this moment in the history of the world, universities have an opportunity to play a more significant role in world affairs than at any time since the thirteenth century. Today, in many parts of the world, the university (rather than the church or government) is the keeper of the national conscience. The philosophy that it holds, and teaches, soon becomes the philosophy of the nation. Today the university — and the whole educational pyramid of which it is the peak—is recognized to be one of the most powerful factors in economic development. Today, in every country of the world, mankind looks to the university not only for the highly educated men and women that modern society needs in rapidly expanding numbers, but for the research upon which the health, the security and the happiness of the nation must depend.

"When I make these claims for the university, I am not thinking solely of the administration and the faculty. Students are important members of the university and, in these days of selective admissions, the students are likely to be the hand-picked flower of their generation. This is as true at Moscow or Tashkent as it is at Harvard or Cambridge. But the alumni—more numerous than students and faculty — are equally a part of the university. The university is a great family of many members but it is the alumni who show forth in practice the principles that it teaches. This may be specially important in the case of Harvard since it is generally understood that some Harvard graduates hold positions of no small significance in the Government of the United States."

*Dr. James addressing the 121st meeting of the Harvard Alumni Association June 15. Seated in front is Judge Henry J. Friendly, New York City, of the U.S. Court of Appeals for the Second Circuit and President of the Harvard Alumni Association. In back, left to right, Devereux Josephs, New York City, Chairman of the Board, New York Life Insurance Company and President, Harvard Board of Overseers; and Aaron Copland, Composer, who with Dr. James, was one of the honorary degree recipients.

World Psychiatric Congress

MONTREAL WAS THE site early in June for the Third World Congress of Psychiatry, which was attended by nearly 3,000 delegates from 62 countries.

This marked the first time a North American city was chosen for the international meeting, which was sponsored jointly by the Canadian Psychiatry Association and McGill University.

Among the highlights of the week-long session was a panel discussion on the creativity of science, featuring three world famous scientists: Dr. Linus Pauling, of the California Institute of Technology, Dr. Albert Szent-Gyorgi, Hungarian-born bio-chemist of the Marine Biological Laboratory, Woods Hole, Mass., and Lord Adrian, vice-chancellor of Cambridge University.

Dr. Pauling, winner of the 1954 Nobel Prize for his work on the forces holding molecules together, told a large audience in the Sir Arthur Currie Gymnasium that "in much of our thinking we are groping to find out what needs to be done, rather than how it needs to be done". He suggested that students try to get their subconscious mind to work on unsolved problems. "Some of the most significant new ideas in science involve the recognition of new problems".

Dr. Szent-Gyorgi, who holds the coveted Nobel award for his work on biological combustion in 1937, stressed that misplaced ideas about democracy have greatly hampered outstanding creativity in the West, for "Nature is not democratic, and as far as the intellect is concerned, does not make us all equals". Dr. Szent-Gyorgi also said that "if we spent half as much money and thought on the outstanding as we have on the retarded, leadership would not be such a scarce commodity".

The most potent factor in promoting new discoveries, according to Lord Adrian, winner of the Nobel prize in 1932 for his work on the formation of neutrons, was the introduction of some new technique or piece of equipment. "Every kind of science will stagnate without a new outlook from time to time — all I want to emphasize now is the importance of the tools we must use to look for new facts".

Special Convocation

MCGILL HELD A special convocation early in June to honor three distinguished representatives of the psychiatric profession. In Montreal to attend the World Congress of Psychiatry, were the Hon. Walter Maclay of London, England, Dr. Clarence Farrar of Toronto, and Dr. Henri Ey of Paris.

Dr. D. Ewen Cameron, chairman of the organizing committee of the Congress and director of the Allan Memorial Institute of Psychiatry, presented the candidates to Principal and Vice-Chancellor, Dr. F. Cyril James for honorary Doctor of Science degrees.

Dr. Maclay is former principal medical officer of the British Ministry of Health and was one of the persons responsible for the English Medical Health legislation affecting the treatment of mental disorders and mental defects.

Dr. Farrar is professor emeritus of the University of Toronto and editor-in-chief of the American Journal of Psychiatry.

Dr. Ey is one of the founders of the

Three leading delegates to the World Psychiatric Congress in June were honoured by McGill at a special convocation in Redpath Hall. From the left: Dr. F. Cyril James, principal and vice-chancellor, who conferred the honorary degrees of Doctor of Science; Dr. Henri Ey, France; Dr. Clarence B. Farrar, Toronto; Dr. Walter Symington Maclay, Great Britain; Dr. D. Ewen Cameron, Director of the Allan Memorial Institute of Psychiatry, who presented the candidates.

International Organizing Committee for World Congresses of Psychiatry and its present secretary-general, as well as medical director of Hôpital Psychiatrique de Bonneval, in Paris.

Psychiatric Research Expands

PLANS FOR A $1,400,000 expansion program at McGill's Psychiatric Research centre were announced in June at the Third World Congress of Psychiatry.

Chancellor R. E. Powell, in an address at the opening of the sessions, told the 3,000 delegates that work on the new building would be started within a few months. To be located near the Allan Memorial Institute of Psychiatry, which harbors McGill's department of psychiatry and the treatment centre for mental illness at the Royal Victoria Hospital, it will occupy 45,000 square feet of space.

The funds for the expansion come from the provincial government and an anonymous donor. More details are to be announced later.

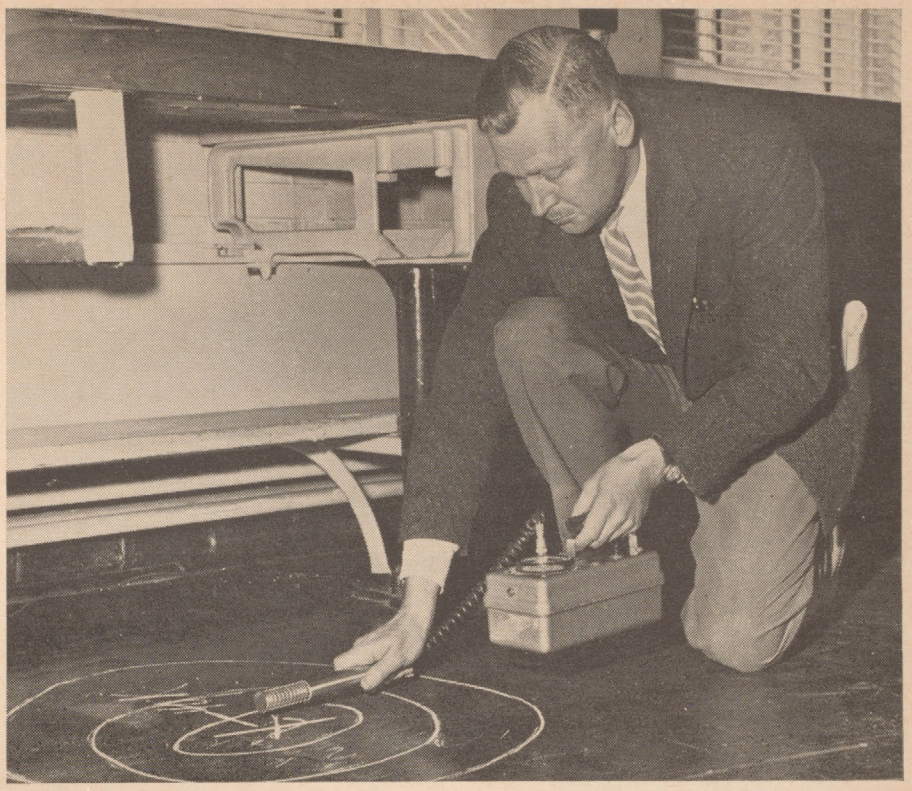

Space and the Chemists

THE TIMING of the second successful orbital space flight of Russia and the opening of the 18th International Congress of Pure and Applied Chemists was excellent, Dr. Leo Marion, PhD '29, senior director of the National Research Council, told delegates from Russia and scientists from over 30 countries early in August. Amidst laughter and applause, Dr. Marion, chairman of the organizing committee of the Congress and newly elected president of the Chemical Institute of Canada, said that he wondered if the timing had been carefully planned.

Nearly 3,500 chemists and physicists were in Montreal to attend the week-long meetings, held at McGill University, Université de Montréal and the Queen Elizabeth Hotel.

About 50 invited lecturers conducted the sessions and 1,000 contributed papers were presented at the meetings. Lectures were given by Nikolai Semenov of the Russian delegation and Sir Cyril Hinshelwood of Oxford University, Nobel Prize winners and Prof. F. S. Dainton of Leeds University, among other well-known scientific personalities. Sir Cyril disputed Sir Charles P. Show's theory of two cultures in the world — the one of science and the other of the humanities, and their lack of communication. The details of the humanities may escape the scientist and the details of science may escape the humanist, but in general there is communication and exchange of ideas, he said. Sir Cyril also said that scientific discoveries are more dangerous in the hands of the politician than in the hands of the scientist.

Postmaster General William Hamilton gave a welcoming address to the delegates on behalf of the government of Canada. Governments, he said, "when they support scientific unions, are not being philanthropic but helping an activity that is of vital concern."

Prof. Elton Pounder measures radiation in the Macdonald Physics Building, on the spot where Lord Rutherford spilled radium solution in experiments more than 50 years ago. The Geiger counter showed higher than normal radiation at this point, but well below danger level.

Shades of Rutherford

LORD RUTHERFORD's ghost is still at McGill.

That is, until the Canadian Army decontamination experts moved in recently. They conducted a clean up of radium found in the laboratory where Lord Rutherford had worked more than 50 years ago. But remnants will always remain.

Discovery of the radium was made by a graduate student who, carrying a geiger counter, noticed the needle of the counter jump as he walked along a corridor of the Macdonald Physics Building. Investigation showed that there were three "hot spots" — areas where the radium had been spilled and had never been cleaned up.

Prof. Elton Pounder of the physics department said that the radiation was not sufficiently strong to be dangerous.

Lord Rutherford made McGill University famous throughout the world in the field of atomic physics with his proof of the spontaneous disintegration of atoms. His discovery won him a baronetcy, a Nobel Prize and the directorship of Cambridge's famed Cavendish Laboratories.

Macdonald Graduation

"POWER, not ethics, is the essence of politics." These were the words of Dean H. Noel Fieldhouse, Dean of the Faculty of Arts and Science, and guest speaker at Macdonald College's June graduation exercises. "The term 'power politics' is as redundant as 'wet rain'

— there is no other kind of politics. We must not apply the standard of personal morality to our political dealings."

Dean Fieldhouse addressed 340 graduates, one of the largest classes in Macdonald's history. The ceremonies, held on June 5, were forced inside the rink by rain.

Prof. David Munroe, director of the Institute of Education, said that although most members of the class would remain in Quebec to teach, 150 more teachers were needed by the Protestant School Board in the Fall. But Prof. Munroe expressed optimism too — teaching graduates are now considering their work a permanent career.

Dr. Wilder Penfield spoke at the graduation dinner of the Institute. Dr. Penfield stressed the need for the spirit of religion, saying that although science and technology have advanced rapidly in the past 100 years, the knowledge of the mind and spirit of men is still extremely small.

Better Farming Day

HUNDREDS OF QUEBEC farmers were the guests of Macdonald College early in July. "Better Farming Day" was observed at the College with tours of the college farm, visits to the dairy barns, agronomy fields, beef cattle, experimental piggery and poultry buildings.

Demonstrations were given in recommended seed varieties, commercial versus certified seed, vegetable and fruit varieties, virus-free strawberries, and on the feeding value of forage crops.

Dean H. G. Dion welcomed the visitors, and Mr. W. E. Henderson of the Canadian Seed Growers Association spoke on "World Seed Year — Its Purpose and Objective".

A highlight of the day was a giant barbecue.

MUP's First Publication

MCGILL UNIVERSITY PRESS, scarcely a year old, recently published its first book. "Recurrent Dislocation of the Shoulder" is a study of the disorder made over a 25-year period by Dr. H. F. Moseley, director of the Royal Victoria Hospital accident service.

The book contains a compact stereoscopic viewer accompanied by five reels in a specially designed pocket in the back cover. Medical illustrations in black and white as well as colour are also included. The first monograph, that of the medical faculty, appears on the cover.

University Press is under contract to publish eight more books, and is presently negotiating 21 more contracts.

Dr. William Cone Memorial

A GRATEFUL PATIENT recently donated a memorial window to St. Andrew's United Church, Westmount, in memory of the world famous neurosurgeon Dr. William V. Cone, neurosurgeon-in-chief at the Montreal Neurological Institute until his death in 1959.

William V. Cone was born in Conesville, Iowa, in 1887, and was educated at the University of Iowa and Columbia University. He taught at both institutions before coming to McGill in 1928. In 1935, he was appointed associate professor of neurosurgery, later became associate professor of neuropathology, and finally professor of neurosurgery. Dr. Cone was outstanding in surgery, teaching and administration.

Principal speaker at the memorial service was Dr. Wilder Penfield, another eminent neurosurgeon, who came to McGill in 1928 with Dr. Cone. Dr. Penfield said that the religion of medicine, which has served physicians so long in the practice of their art, is not outmoded. He went on to describe Dr. Cone as a man who was "dedicated to human compassion, and to the achievement of excellence in his profession."

The window, designed and executed by craftsmen in Wales, illustrates the image of Christ as physician and healer. The inscription reads: "The great physician, always near."

Goldenberg Scholarship

ALAN Z. GOLDEN, third year law student at McGill, has won the Maurice Goldenberg Memorial scholarship. The award, established by H. Carl Goldenberg, a McGill law graduate of 1932, in memory of his father, is open to any student in arts, science or law. Valued at $200, it is designed to foster studies in government, constitutional law or public administration.

A memorial window in honour of the late Dr. William V. Cone, neurosurgeon-in-chief of the Montreal Neurological Institute, was unveiled at St. Andrew's United Church, Westmount, late last June. Among those participating in the service were, left to right above, Dr. Wilder Penfield, former head of the Institute, Dr. Francis McNaughton, assistant director of the M.N.I., Dr. J. Preston Robb, associate professor of neurology, Dr. Gerald W. Halpenny, associate professor of medicine, who is President of the Canadian Medical Association, and Rev. Dr. D. M. Grant, minister.

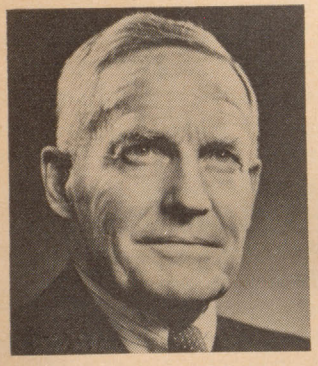

Obituaries

George C. McDonald

GEORGE CROSS MCDONALD, BA '04, M.C., C.A., a former President of the Graduates' Society and a member of the Board of Governors of McGill University from 1932 to 1944, died in Montreal August 2 at the age of 78.

Mr. McDonald, founder and senior partner of McDonald, Currie & Co., a leading Canadian firm of chartered accountants, was born in Montreal and attended Montreal High School before entering McGill, Mr. McDonald was active in football and hockey, and in 1908 coached the McGill football team.

During the First World War he served as a captain with the McGill contingent, C.O.T.C., later joining the Princess Patricia's Canadian Light Infantry, and ended the war with the rank of major, second in command of the regiment. He was twice wounded, and was awarded the Military Cross.

George C. McDonald

A former officer in his Regiment recently recalled: "In the heat of battle, this smiling red-headed handsome soldier, by his very presence, could calm the situation and put fighting battle into everyone."

Prior to the war, Mr. McDonald had organized and delivered the first lectures in accounting and commercial subjects at McGill. His interest helped to establish the School of Commerce.

Throughout his life, Mr. McDonald was devoted to McGill. Prior to the First World War he was active in efforts to revive the Graduates' Society and served as its president after the cessation of hostilities.

Mr. McDonald was a president of the Canadian Club of Montreal, president of the Montreal Board of Trade and later of the Canadian Chamber of Commerce. He was also president of the Quebec Institute and of the Dominion Association of Chartered Accountants, now known as the Canadian Institute of Chartered Accountants. His interests were also in the fields of hospital administration and international affairs, and he served on several Royal Commissions and publicly appointed bodies that guided Canadian and Quebec policies.

Mr. McDonald's associates remember him as a "ruthless critic of incompetence and crookedness", governmental and private, as one who uncompromisingly spoke his mind on honesty and efficiency. This quality was always tempered by a warm concern over the welfare of his friends, associates and fellow citizens and there were many instances of his unsolicited generosity toward others.

Allan A. Magee

LT. COL. ALLAN ANGUS MAGEE, QC, BA '15 (ad eun), prominent lawyer and company executive, died in Montreal early in June.

Born in London, Ont. in 1881, Col. Magee was educated at London Collegiate, the University of Toronto and Osgoode Hall.

Allan A. Magee

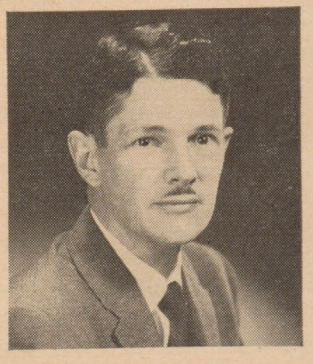

He was called to the Ontario Bar in 1905 and the Quebec Bar in 1910. He joined the law department of the Canadian Pacific Railway in 1905 and later left to become associated with the late John W. Cook, QC, in private practice in Montreal until the latter's death in 1936. He then became senior partner in the firm of Magee, Nicholson, and O'Donnell. At the time of his death, he was senior counsel to the present firm of Byers, McDougall, Johnson, Casgrain and Stewart.

Col. Magee was a former governor of McGill University, a director and chairman of Texaco Canada Ltd., Zellers Ltd., and a director and vice-president of Staniforth Lumber and Veneer Ltd. He was actively interested in many welfare agencies as well.

During the First World War he was a colonel, commanding the 148th Battalion C.E.F. and served in France, Belgium and Germany as General Staff Officer with the Fourth Canadian Division and the Headquarters of the Canadian Corps. He was awarded the D.S.O. and was twice mentioned in dispatches.

Col. Magee was senior executive assistant to the Minister of National Defence during the Second World War and was awarded the C.B.E.

Kelvin Sproule

Kelvin Sproule

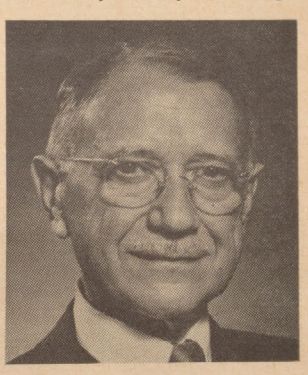

KELVIN SPROULE, BEng '36, MSc '37, died on August 9, 1961, at the Memorial Hospital for Cancer and Related Diseases, New York, at the age of 48 years. Since graduating in metallurgy he had been employed by the International Nickel Company, in Copper Cliff and New York. Mr. Sproule made many significant contributions to the extractive metallurgy of nickel. He was the senior inventor of the Sproule-Harcourt process which, in the 1940's, revolutionized the treatment of nickel-copper ores.

An enthusiastic supporter of McGill, he was active in Graduates' Society work in Sudbury, Ontario, and New York, where he was Honorary Treasurer of the McGill Society.

Son of the late Professor Gordon Sproule of the Department of Metallurgy and of Mrs. Sproule (Helen Freeze, B.A. '04), he is survived by his widow, the former Phyllis Turner, B.A. '36, and children David, Jane and Gordon of Summit, New Jersey, and by his mother and his brother Robert, BEng '37, of Montreal.

Dr. Otto Maass

One of Canada's most brilliant scientists, DR. OTTO MAASS, MSc '12, former chairman of McGill's department of chemistry and internationally known physical chemist, died in Montreal early in July at the age of 71.

Dr. Otto Maass

Born in New York of Dutch and German parents, Dr. Maass moved to Montreal with his parents at an early age. He attended Montreal schools, and received his master of science degree from McGill in 1912. He studied at the University of Berlin until the outbreak of the First World War, whereupon he accepted a lectureship at McGill. He won his PhD degree from Harvard University in 1919.

Returning to McGill in 1923, he was appointed Macdonald Professor of Physical Chemistry and in 1937 became chairman of the department. Dr. Maass became very interested in the basic problems of the pulp and paper industry during his early research projects, and this led to his appointment as general director of the Pulp and Paper Institute of Canada in 1940. During wartime he was engaged by the Federal Government as director of Chemical Warfare and Smoke, assistant president of the National Research Council, and scientific advisor, Chief of General Staff, Department of National Defence. At the conclusion of the war he was appointed scientific advisor, Special Weapons, Chief of Staff. His retirement from McGill and the Pulp and Paper Institute led to his appointment as principal research officer, division of chemistry, National Research Council, in 1955.

Dr. Maass was honored by many Canadian and U.S. universities. He was made an honorary life member of the technical section,

Recollections of "Stephie"

Leacock, the Teacher and the Man, As remembered by Howard O'Hagan

Second of Two Parts

ONE QUALITY distinguished Leacock's lectures from those of the average: they were not boring. He would not permit them to be because he would not be bored himself, which is, perhaps, why throughout the course he held Political Science at arm's length, when he could.

When examination time came close, it could be put off no longer. Often outsiders set the examinations and then Leacock's ability to steer us towards the questions likely to be put was uncanny. In a paper of five questions, he would probably have predicted three. As a student of human nature, he made it a point of pride to know well the preferences of the off-campus examiner.

The examinations which he himself set and marked, were the ones we feared. Half of their questions might well be based upon obscure foot-notes. The results, as they emerged after he had corrected the papers, were sometime surprising. In the old Arts Building a stairway led up to a seldom-used second storey. One theory among us was that in the dead of night, when the building was otherwise deserted, "Stephie" would return to it and toss the written papers up the stairs. Coming back and collecting them in the light of day, he would accord the highest marks to those which had sailed the highest. The fact is that each student usually got what he deserved — in the long run.

The tortured hand-writing he frequently encountered, gave Leacock pain. He disdained to use a typewriter and his own hand-writing — I was to receive letters from him over many years — seemed to be drawn by a brush, each character distinct and upright, marching across the paper as if to the sound of drums and bugle.

One afternoon after going over a mid-term series of tests, he stood for a few moments in silence behind the lectern. Always, except for the occasion of our first meeting, when he had arrived late in class, Leacock wore a gown, its shoulder stuffing usually showing. As a rule, he entered from the back of the room after we were seated. Now he waited to speak, gown pushed back, thumb in the arm-hole of his vest. Before him was his sheaf of yellowed, dog-eared notes. These, at the beginning of each lecture, he would slam down upon the lectern. Not once had I seen him turn a page of them, but like his gown, they were a professor's proper appurtenance.

When at last Leacock spoke, I was his victim. "Mr. O'Hagan," he said, "I have read your paper and am constrained to remark that, while your hand-writing is painstaking enough in its way, it has a peculiar cussedness."

Due to his connections beyond academic circles and abroad, Leacock brought many figures of note to the McGill campus. One of these was Sir Ernest Shackleton, pioneer of the Antarctic. Leacock spoke to John Dwiggins, a member of the class and one of the editors of THE McGILL DAILY. He hoped that Sir Ernest's visit would receive a good notice in the paper. The next morning, the write-up appeared. That afternoon, a folded copy of the DAILY in his hand, and in a voice to rival that of a tugboat's captain, Leacock demanded, "Mr. Dwiggins, was it *you* who wrote this piece on Sir Ernest Shackleton?"

Dwiggins — a pale young man behind thick-lensed glasses — appeared to sink in his seat as he hoarsely admitted his guilt. Leacock, after a pause, replied in a lower tone of voice, "Well, Mr. Dwiggins" —he honoured the conventional prefix of "Mr." only in the class-room — "I would like your permission to show it to Sir Ernest as an example of the type of writing that we here at McGill are able to turn out." I heard Dwiggins' sigh of relief from across the room.

In classes Leacock — a Ph.D., we addressed him as "Doctor Leacock"— was no martinet. His personality imposed itself. In other classes, we might whisper and pass notes to one another. In Leacock we had a master before us and we listened.

OUTSIDE OF CLASS he was easily approached and often addressed student dinners, though by the end of the day he must have been weary of the obstinate vacuity of the undergraduate face. He frequently remarked that the ideal university would have no students — only a long table, chairs and a few professors. Not that he had unconditional reverence for scholarship as such. Himself a "Ph.D.", he said, "When you can put 'Ph.D.' after your name, it merely means that you are full up. You can take no more."

"Today when I remember him I am most apt to recall his lonely figure walking down the snowy campus, pulling young Stephen after him. He walks away from me, head bowed as with a burden. Above him the westering sun glints on the barren branches of the maples. Stephie walks on. He is still walking, on and on into the years, leaving sunshine and the tonic of laughter behind him."

Stephen Leacock, by Canadian sculptress Elizabeth Wyn Wood. The original bust is in the Public Library, town of Orillia.

Rising to his feet at an undergraduate dinner — black tie aslant, stiff shirt front bulging — he did not hesitate to begin by reminding us that he was speaking without charging his usual fee — just as in class, mid-way through his lecture, he might pause, take from his vest pocket his turnip-sized gold watch and bend his head for a moment to listen to its ticking. Then he would gravely say to us, "You have already received what my salary entitles you to. The rest of the hour is 'gratis', given to you from the goodness of my heart."

One place where he did not have to rise to his feet, nor look down upon a sea of faces, was "The Prince of Wales". This was a popular beer tavern a block down McGill College Avenue from the University. On a rare spring evening — it was invariably in the spring — Stephie would come in and sit down alone, smoking his stubby, black pipe. Soon he would be joined by some of "the boys" as he called us. On one of those evenings, not likely to be forgotten by those who were there, it had been announced in the papers that a local brewery had inserted stamps under the caps of a limited number of its bottles of ale. The finder of each stamp would receive five dollars upon presenting it to the brewery. Each of us, of course, brought with him an opener and insisted, over the protests of the staff, upon opening his own bottle of ale at the table.

A chuckle, a guffaw, a ho-ho-ho, came from Stephie's table. He had drawn a lucky bottle and held up the little blue stamp for all of us to see, his brown moustache stretched wide with his grin, this though he needed five dollars no more than he did a bout of hiccoughs. But, after all, it was a game, of sorts, and he had won. He at once ordered "drinks for the house". We opened bottles feverishly, far into the night. No other stamps were found.

LEACOCK WAS A HUMORIST, by inspiration and by profession, but before that he was one of God's most precious creations: a kindly man and, incidentally, a professor who would go out of his way to do a good turn for a student. Two of these had the idea of starting an "independent" literary magazine. It would carry the name of "McGill" but would be free of student-body control. Controversy was keen. One day in the hall of the Arts Building, Leacock stopped one of the editors-to-be. "If you publish that magazine of yours," he said, "I'll write for it — and I'll write for it for nothing." The magazine died aborning. Contributions from Stephen Leacock might have kept it afloat in London, or Timbuctoo, but not at McGill where he was part of the day's routine.

In the early spring of 1924 — I had graduated in Arts but was still at McGill, taking Law,— I read in the papers that the Canadian Alpine Club was to attempt the next year, 1925, the first ascent of Mount Logan in the Yukon. At 19,850 feet, it is Canada's highest peak and second only to Mount McKinley on the continent. Having climbed a few mountains, I thought I would try to go on the expedition. When I told Leacock of my interest, his enthusiasm was immediate and far outranked my own — though he knew no more of my climbing than my ability to mount the stone steps of the Arts Building. He at once, in his laborious longhand, sat down and wrote a series of letters on my behalf to members of the Alpine Club with whom he was acquainted. Once I said to him, "Doctor Leacock, if I go on the Mount Logan expedition . . . " He interrupted me: "O'Hagan, it is not *if* you are going, but *when*. Further, I have mentioned you as one of the possible leaders." I was aghast at this suggestion. It would destroy whatever chance I had. Yet it would have been in character for him to have made it— as a humorist.

His letters, nevertheless, bore fruit. It was Stephie himself, however, who, in his charity, robbed me of what opportunity I might have had of reaching the summit of Mount Logan because, when the Committee invited me to the try-outs behind Mount Robson, B.C., in that summer of 1924, I was far away in England—and he was the means of my being there.

A few weeks after we had first discussed Mount Logan, Leacock stopped me on the steps of the Arts Building and suggested that I cross over to England and persuade farm-hands there to emigrate to western Canada. He told me that he had already talked over the matter with Edward — later Sir Edward — Beatty. Mr. Beatty was

the President of the Canadian Pacific Railway. I protested that I knew nothing of farming except what I had seen out of the train window when travelling across the prairies.

"Pshaw, O'Hagan," Leacock replied, "there's nothing to farming. I was once a farmer myself. Think of all the people who do it, all over the world. I'll get you a book to read."

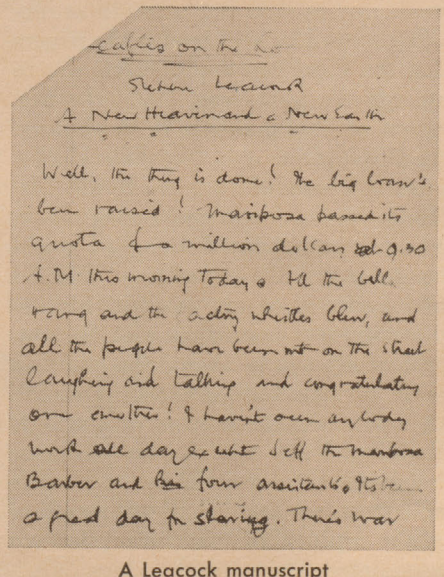

He did not find the book for me, but he had made an appointment which I was to keep with Mr. Beatty the next morning at nine-thirty in his office above the Windsor Street Station. On parting, he added, "I want Mr. Beatty to see that we produce something besides scholars at McGill." The import of his remark touched me when I remembered that a month before Leacock had sent his leading honours student to Mr. Beatty with a view to a job with the CPR upon graduation. The interview was not a success. But Stephie was not yet beaten. He would now confront the railroad president with one of his less exotic specimens.

Apparently Mr. Beatty — a short, thick-set man, hands in his pockets, legs straddled and a hundred yards of red carpet in front of him — agreed with Leacock that I was not a scholar. At any rate, I sailed for England late in May and spent three uneasy months touring the country-side and trying to keep a jump ahead of irate farmers who regarded me as some one expressly sent to stir up discontent among their hired help. Mount Logan was farther away than ever. It was climbed the next spring with the loss of two lives during the expedition's return to civilization.

LEACOCK HAD one undying enmity: government ownership. He was a "CPR man" and would not travel, if he could avoid it, on its competing road, the government-operated Canadian National Railways. One summer in the '30s, years after I had graduated from Law, I was working as a Rocky Mountain guide out of Jasper, Alberta, on the Canadian National. Leacock was a keen fisherman and, hearing that he was coming out west, I wrote to him at his summer home on Old Brewery Bay, Lake Couchiching, near Orillia, Ontario, to invite him to stop off and try his luck. He replied to the effect that, if I would move my outfit down south to Banff or Lake Louise, he would heartily favour the proposal. Those two points, he explained, were not on a government-owned road.

It may have been on this westward journey, or on another, that Leacock visited Victoria, capital of British Columbia on Vancouver Island across the Strait of Juan de Fuca from the towering Olympic mountains of Washington State. It is in Victoria that I am writing this brief remembrance of my old professor. Today it is a town of about one hundred thousand with a slow pulse. Its residents, who take a step just once in a while, are mostly civil servants, retired Englishmen and their wives living behind neatly clipped hedges, pensioners and a dowager here and there. Leacock gave his impression of the city during an after-dinner address, appropriately enough in Vancouver, Victoria's rival on the mainland. "In Victoria," he said, "the people turn over in the morning to read the daily obituary column. Those who do not find their names there, fall back and go to sleep again." His words have endured over the years until, at least in Canada west of the Rockies, they have become the tag to be put on any small, sleepy town.

Perhaps it is different now, but thirty and more years ago most professors existed for the student only during lecture hours. After that they were no more until their next appearance. If they had wives, children or duties off the campus, the student was seldom aware of it. They existed for him and that was all.

A Leacock manuscript

This was not so with Stephie. We all knew that he had a public life beyond the University. In addition, we had an intimate glance into his home-life each Monday, Wednesday and Friday, his lecture days. On those winter afternoons, at precisely 4:10 o'clock, a nursemaid would come by the Arts Building with his four- or five-year-old boy, drawn on a flat sled. Dismissing the nursemaid, Stephie would bend over his young son to see that he was well-bundled against the cold and, picking up the rope, pull the sled down the long avenue of the campus under the leafless maple trees to Sherbrooke Street and west along it home.

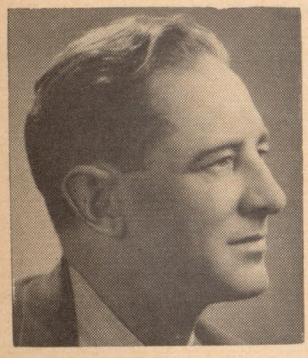

IT IS NOT FOR ME to go into Leacock's background. Ralph L. Curry, in his biography *Humanist and Humorist* published recently, has covered it fully. There was sorrow in Leacock's life, plenty of it. It showed at times in his attitude on leaving the class, hunched, notes clasped to his side, face slightly averted, his eyes clouded with a distant scene.

I last saw him at the University Club on Mansfield Street, Montreal, where he had invited me for "tea" in the spring of 1943. He was no longer the burly man I had known. He had shrunk. His hand, when he shook mine, was fragile as a bird's claw. His full head of hair and his moustache were grey. His voice was hoarse. Born in 1869, he was then 74 — and still smarting from his enforced retirement from McGill, due to age, nine years before. Throughout his life he had not spared his vocal chords. A year later, in 1944, he died of cancer of the throat.

Today when I remember him I am most apt to recall his lonely figure walking down the snowy campus, pulling young Stephen after him. He walks away from me, head bowed as with a burden. Above him the westering sun glints on the barren branches of the maples. Stephie walks on. He is still walking, on and on into the years, leaving sunshine and the tonic of laughter behind him.

1961 Reunion Will Feature Seminar

SEMINAR CHAIRMAN

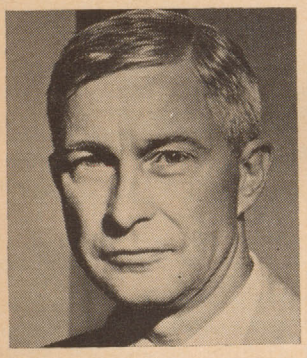

PROF. HUGH MACLENNAN,
Associate Professor of English,
McGill University.

PROF. F. R. SCOTT, Q.C.
Dean of the Faculty of Law,
Macdonald Professor of Law,
McGill University.

DR. WILDER G. PENFIELD, O.M.
Honorary Consultant,
Montreal Neurological Institute,
Governor, McGill University.

PROF. JAMES W. MILLER,
Macdonald Professor of Philosophy,
Chairman of the Department,
McGill University.

MANKIND
in the
ATOMIC AGE

Second Annual Reunion Seminar
For returning graduates
Friday, October 20, 1961

McGill University

Seminar Luncheon - Redpath Hall,
12.30 p.m.

Seminar - Physical Sciences Centre
Auditorium, 2.00 p.m.

DR. O. M. SOLANDT, O.B.E.,
Vice-President, Research and
Development, Canadian National Railways,
Lecturer in Physiology,
McGill University.

Reunion Weekend, October 20, 21, 22. will see another record-breaking number of graduates from the classes of 1911, 1916, 1921 and the other five-year classes up to 1956 returning for the festivities. The second annual Reunion Seminar promises to be a significant event on the program. This year's seminar, "Mankind in the Atomic Age" is outlined above.

Weekend activities begin on Friday noon with a special luncheon in Redpath Hall for those participating in the Seminar, which will be held in the Physical Sciences Centre Auditorium. Friday evening is open for the individual classes to hold their first function.

On Saturday morning, many classes will be taking a campus tour and at noon, a pre-football game luncheon will be held in the Sir Arthur Currie Gymnasium. Tables will be set up for each of the individual classes, and this popular event provides every opportunity for graduates to visit and chat with old friends and classmates. Following the luncheon, graduates will adjourn to the reserved blocks of seats in the Stadium to witness the McGill-Toronto game.

Each year, Dr. James holds a reception in Redpath Hall in honour of the classes of 20 years ago and earlier, immediately after the football game. Saturday evening, returning graduates will hold their class dinners, cocktail parties, etc.

Following is a list of those classes planning to hold reunions this year, and the individual plans available at the date of publication:

Arts '11 — Chairman: Mr. H. Herschorn. Class Reunion Banquet to be held at the University Club on Saturday evening.
Science '11 — Chairman: Mr. Wm. I. Brebner. Plans include a tour of Montreal and a Class Dinner.
Architecture & Science '16 — Chairman: Mr. Stanley A. Neilson. Plans well under way for Class get-together as well as a tour of Montreal and the Seaway.
Medicine '16 — Chairman: Dr. Alton Goldbloom. Programme indefinite.
Arts & Science '21 — Chairman: Mr. L. Eric Reford. Class dinner on Saturday night.
Commerce '21 — Chairman: Mr. W. W. Werry. Programme indefinite.
Dentistry '21 — Chairman: Dr. G. M. Hale. Programme to tie in with the Montreal Dental Club — Annual Fall Clinic.

Medicine '21 — Chairman: Dr. Walter de M. Scriver. A medical programme at the Montreal General Hospital on Friday morning and a Class get-together on Saturday Evening.

Arts & Science '26 — Chairman: Mr. C. L. Copland. Committee: Mr. W. J. C. Hewetson, Mr. L. M. Becker. A Class dinner on Friday evening and a Campus Tour on Saturday morning.

Dentistry '26 — Chairman: Dr. Walter E. Charland. Plans indefinite.

Law '26 — Chairman: Mr. Peter J. Usher. A Class get-together at the Law Building on Saturday morning and class reception on Saturday night.

Medicine '26 — Chairman: Dr. Clifford B. Smith. Plans indefinite.

Arts & Science '31 — Chairman: Mr. A. N. Edson. Committee: Mr. E. G. Collard, Mr. Nathan Levitsky, Mr. Bob Picard, Mr. Fred Stone. Plans indefinite.

Architecture '31 - '41 incl. — Chairman: Mr. Louis B. Magil. Committee: Mr. C. Aspler, Mr. R. P. Fleming. Plans well under way.

Commerce '31 — Chairman: Mr. Aubrey Shackell. A class reunion dinner to be held on Friday evening.

Dentistry '31 — Chairman: Dr. Austen W. Oliver. Plans indefinite.

Engineering '31 — Chairman: Mr. S. J. Hungerford. Plans indefinite.

Medicine '31 — Chairman: Dr. Josephus C. Luke. Committee: Rep. for American members — Dr. D. Alan Sampson. Class get-together on Friday evening. Medical Programme on Saturday morning and a class reception on Saturday evening.

Commerce '36 — Chairman: Mr. L. T. Ellyett. Committee: Mr. Hugh Savage, Mr. Bob MacDuff, Mr. Ward O'Connor, Mr. Norm Jennison, Mr. Gordon Howard, Mr. John Lewis. Mr. Jim Tildesley. Programme indefinite but will include a visit to the Campus and a Class Dinner.

Social Work Reunion

The Social Work Alumni will hold their second annual reunion on Friday and Saturday, October 20 and 21. On Friday, following the Graduates' Society Seminar on "Mankind in the Atomic Age" there will be registration at 4:00 p.m. Coffee will be served. At 8:30 p.m. Dr. Julia Henderson, Director, Bureau of Social Affairs, United Nations, will address a public meeting in Moyse Hall. Dr. Henderson will speak on "Community Development from an International Perspective — Implications for North America". Saturday morning the Social Work programme will continue with a meeting for Social Workers and Related Professions and then they will join the other Reunion Classes for the Football Luncheon and the Football Game.

McGill's Championship Team

Our championship football team looks forward to seeing many graduates in the stands on the following dates:

Saturday, October 14th vs. Western

Saturday, October 21st vs. Toronto (Homecoming)

Saturday, November 11th vs. Queen's

Why not organize a group and purchase a block of seats for each game? The cost is small but the enjoyment great.

Excellent seats available at $1.50: $2.00 and $2.50 per game. Contact – Ticket Supervisor, 475 Pine Avenue West, VI-4-6311, local 363.

Don't forget the pre-game luncheons in the Sir Arthur Currie Gymnasium — Meet and greet old friends here then watch an exciting game. Your support *is* needed to help us retain the Yates Trophy.

Dentistry '36 — Chairman: Dr. I. Ivan Guilboard. Programme to tie in with the Montreal Dental Club—Annual Fall Clinic.

Engineering '36 — Chairman: Mr. Keith W. Shaw. Committee: Mr. Bill Carter, Mr. Hector Esdaile, Mr. George Goodfellow. A stag dinner to be held on Friday evening — guest of honour — Dr. J. B. Phillips. Saturday a cocktail party will be held for classmates and wives.

Law '36 — Chairman: Mr. James P. Anglin, Q.C. Plans indefinite.

Medicine '36 — Chairman: Dr. Rocke Robertson. Committee: Dr. Reg. Anderson, Dr. Harold Elliott, Dr. Myer Golfman, Dr. Hall McCoy, Dr. Hollie McHugh, Dr. Jon Meakins. Cocktails and Buffet Supper at Queen Elizabeth Hotel on Thursday evening. Friday a tour of the Montreal General and in the evening the Class Reunion Dinner at the University Club. Guest Speaker — Dr. Sclater Lewis.

R.V.C. '36 — Chairman: Mrs. J. P. Anglin. Plans indefinite.

Dentistry '41 — Chairman: Dr. F. Owen Frederick. Programme to tie in with the Montreal Dental Club — Annual Fall Clinic.

Engineering '41 — Chairman: Mr. W. M. Hayman. Plans indefinite.

Medicine '41 — Chairman: Dr. R. Alan Bourne. Committee: Dr. Guy Joron. Friday evening a cocktail party for classmates and wives. On Saturday evening an official Reunion Party — dinner and dancing at the Mount Royal Hotel.

R.V.C. '41 — Chairman: Mrs. W. A. Jones. Committee: Mrs. D. L. Lindsay, Mrs. Boyd Morrison, Mrs. J. Oles, Mrs. George Parker. Class dinner on Friday evening at the Atwater Badminton and Squash Club.

Commerce '46 — Chairman: Mr. D. P. Durnford. Plans indefinite.

Engineering '46 — Chairman: Mr. W. F. Corkran. Committee: Mr. Jack Stonehewer, Mr. Myer Richler, Mr. Dick Balfour, Mr. Leo Hammerschmidt, Mr. Jim Raymond, Mr. Jim Keith, Mr. Phil Laporta. Plans well under way.

Architecture '51 — Chairman: Mr. K. I. Robb. Plans indefinite.

Arts, Science & Commerce '51 — Chairman: Mr. Gordon Empey. Plans indefinite.

Dentistry '51 — Chairman: Dr. H. I. McLeod. Plans indefinite.

Engineering '51 — Chairman: Mr. Harry Kennedy. Committee: Mr. Bob Kruyt, Mr. George Lee. Stag party on Friday evening at the Engineers' Club. Campus tour on Saturday morning and Banquet and Dance at the Ritz Carlton on Saturday Evening.

Law '51 — Chairman: Mr. Paul V. V. Betts. Plans indefinite.

Medicine '51 — Chairman: Dr. Hugh R. Brodie. Committee: Dr. Leon Heller, Dr. Edward C. Percy, Dr. Donald Hillman, Dr. Albert Cloutier. Cocktail party on Friday evening followed by a dinner. Saturday evening, dinner and dancing at the Ritz Carlton.

Architecture '56 — Chairman: Mr. Michael Fish. Programme to include social get-togethers, a Learned Conference and a Class Meeting.

Commerce '56 — Chairman: Mr. Mitch Klein. Plans indefinite.

Engineering '56 — Chairman: Mr. R. Hanna. Committee: Mr. Ian Rutherford, Dr. David McCall, Mr. Bill Perus, Mr. Graham Ross, Mr. Louis Hollander, Mr. David Bowles, Mr: Gordon Currie, Mr. Hawk Johnsen. An informal get-together on Friday evening. Saturday morning a tour of the Campus and Engineering Building and in the evening a Class reception and Banquet.

Law '56 — Chairman: Mr. Pierre Legrand. Saturday evening a cocktail party and dinner at the Queen Elizabeth Hotel.

Medicine '56 — Chairman: Dr. John Oliver. Plans indefinite.

R.V.C. '56 — Chairman: Miss Catherine O'Brien. Plans are well under way.

Macdonald College Reunion

The Macdonald College reunion will be held on Saturday, October 14, 1961. This reunion is for all Macdonald graduates with special emphasis on the honour years — 1956, '51, '46, and back at 5-year intervals. Complete details of the program were not available at press time. The reunion chairman is Willard C. Davidson.

Almost ten years after graduation
An enterprising class secretary
Takes a look at his contemporaries
To see how the world has treated them

ENGINEERING '52 - TEN YEARS LATER

By Vincent Jolivet

Is it true that a large percentage of our engineers go south to the United States as soon as they are draft-free?

Is it true that many engineering graduates drift out of engineering and into other fields?

The answers to these and other questions were sought during the past year in a survey of the Engineering Class of 1952. Answers to the mail questionnaire were received from 50 per cent of the class — 112 replies out of the 225 members of the class.* Although there is a possibility of bias in the results obtained, the sample gives an adequate cross section of the class.

Where are they?

In answer to the first question raised, only eight per cent of the class — 19 out of 225 — are now residing in the U.S.A., with a further six per cent living in a number of other foreign countries. Although 32 members of the class have left Canada, 24 were originally from outside this country. Thus, the net loss is only three and one-half per cent of the class. This is the breakdown of current location:

Quebec	118
Ontario	48
British Columbia	6
Prairie Provinces (Alta. 4, Man. 2)	6
Maritimes (Nfld. 3, N.B. 2, N.S. 1)	6
TOTAL CANADA	184

Of the 41 graduates living outside of Canada, 19 are in the U.S.A., three in the West Indies, two in France, two in Iceland, and one each in Mexico, Peru, West Africa, Belgium, England and Indonesia. There are nine for whom no address could be found. It should be noted that over half the class stayed in Quebec, and one-fifth went to Ontario.

What are they doing?

Eighty-four per cent of the 112 respondents report that they are still doing engineering work although many are also involved in other activities such as management or sales. Of the 94 still doing engineering work, 88 per cent say that it is primarily in the branch in which they graduated. Typical job titles held are design and maintenance engineer, project engineer, sales engineer, plant industrial engineer, district manager, and section leader. Fourteen of the 112 are either presidents, managing partners, directors, or general managers of their firms. What of those not doing engineering work? These 18 men are mostly in sales and business administration, but they include one ship broker, two data processing specialists, and one professor of finance.

Of the 112 respondents, 90 are employed by private firms, many with well-known names such as Imperial Oil, Normetal, DuPont, Marconi, Shawinigan Water and Power, and Consolidated Paper. Four are self-employed as consulting engineers. The other 18 are employed by branches of government such as the Post Office, a provincial Department of Health, the Navy and Air Force, the Department of Transport, the C.N.R., hydro-electric commissions, and universities. Generally speaking, the respondents work for large enterprises, as shown below:

More than 500 employees	72 (65%)
100 to 499 employees	19 (17%)
Less than 100 employees	20 (18%)
	111

What are they earning?

The question on income in the survey was purposely left somewhat vague so as not to discourage answers to so personal a question. The results are shown in Table 1. In view of the

Table 1

Annual Income	*Civils*	*Elect.*	*Mech.*	*Chem.*	*M.&M.**	*Total*	
Less than $4,000	0	0	0	1	0	1	(1%)**
$4,000 to under $8,000	6	3	11	2	4	26	(28%)
$8,000 to under $12,000	14	17	14	4	3	52	(56%)
$12,000 and over	5	1	6	2	0	14	(15%)
	25	21	31	9	7	93	

*Mining and Metallurgical engineers were combined.
**The one man earning less than $4,000 is a foreigner working in his home country.

*Some statistics in this article are based on slightly smaller totals since some questions were unanswered. The location of the members of the class is based on the entire class list.

small sample for each branch of engineering, the lack of precision, and the possible bias (those earning less are less likely to have answered), no conclusions are drawn from the information in the income table, and the reader is asked to keep these deficiencies in mind when interpreting the information. It was interesting to note from the questionnaires that of the 14 men earning over $12,000, seven are owners of the firms for which they work, two work overseas, one teaches, two work for relatively small firms, and only two work for large corporations (one of which is government-owned).

Graduate work

Thirty-nine of the 112 respondents have continued their education and taken graduate work; 17 of these men have obtained a total of 20 degrees between them. The degrees are: doctorates, 2 (one in chemistry, one in finance); masters in engineering or applied science, 8; masters in business administration, 3; diplomas in business administration, 5.

Personal information

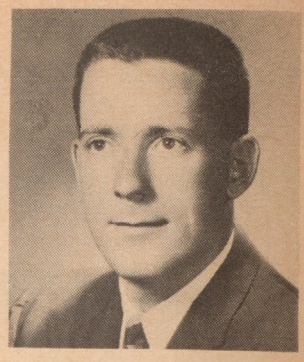

The typical class member is married and has two children. Ninety-two per cent of the respondents (102 out of 111) are married; ninety-five per cent of those married have children, ranging in number from one to six, half of them having two. The civils and chemicals appear to be the most prolific, averaging 2.6 children, whereas the class average is 2.3 children per family.

Approximately two-thirds of the respondents own their home, and the same proportion own securities. Sixty-five out of 99 own their home, and 61 out of 97 own stocks and/or bonds.

Drinking Habits

Ninety-four members of the class reported on their drinking habits, and only two claim to have stopped drinking, although eight said that they have never indulged. The rest are quite evenly divided between those drinking less, the same and more than they drank as students. The mining and metallurgical group, however, provides some interesting statistics! (See Table 2).

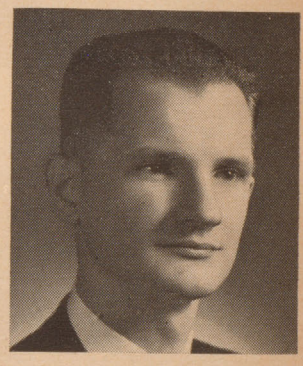

Turning to the other extreme, 97

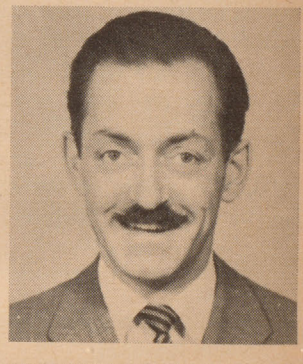

GRAHAM J. MacHUTCHIN is President of Diamond Flooring (Toronto) Limited and Duron Company Limited, plastic coating contractors in Montreal and Toronto. After graduation, he joined Diamond Flooring Limited, Concrete Flooring Contractors, as technical sales representative and became Vice-President of that firm in 1956. In November 1957, he purchased one-third interest in the latter firm, and in February, 1958, he formed Diamond Flooring (Toronto) Limited, purchasing controlling interest in the latter firm in December 1959. He formed Duron Company Limited in March, 1960. He was born in Granby, Que., is married and has one son.

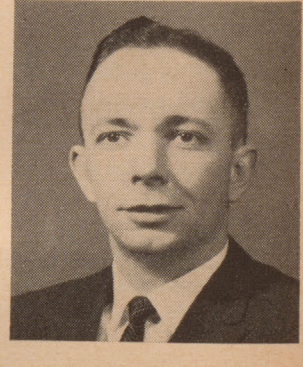

COMMANDER G. L. HOPKINS, R.C.N., is now serving as Assistant Director of Officer Personnel (Electrical and Ordnance specialists) at Naval Headquarters, Ottawa. A native of Climax, Sask., he graduated from Royal Roads, B.C., in 1943 and has served with the R.C.N. ever since. He entered McGill in Electrical Engineering in 1949 while undergoing hospital treatment in Montreal as the result of a serious flying accident while serving with Fighter Squadron 803 in Dartmouth, N.S. He is married and is the father of twin sons.

MAURICE M. MACK, a mechanical engineer, joined the Bell Telephone Company on graduation as a service representative, but left shortly after to join his father's small window-cleaning establishment in Montreal. With two younger brothers, he expanded the business to include janitorial services and complete maintenance work, and he is today President of Empire Maintenance Limited, with branches in Toronto and Sherbrooke, Que. Eight years ago his firm employed 20 people; today, there are some 500 employed in the firm. He has been married for four years and has no children.

PAUL THIBAULT is a partner in a Montreal firm of consulting engineers under the name of Huza-Thibault. Prior to setting up his own company he was employed as a mechanical engineer by Wiggs, Walford, Frost and Lindsay from 1952 to 1957. Born in Levis, Que., he served for five and one-half years with the Engineers Branch of the R.C.N. during the Second World War. The work of his present firm takes him from Chalk River, Ont., to London, England. He is married and the father of three girls — "all future engineers."

D. KEITH McMULLAN, who received his degree in chemical engineering, is Assistant Superintendent of the High Explosives Department, Canadian Arsenals Limited, Valleyfield, Que. His first job was with Abitibi Power and Paper Co., Sturgeon Falls, Ont., working on process problems in the corrugating and hardboard mills. He joined his present firm in 1953 as a Technical Supervisor. Born in Quebec City, he is married and the father of a boy, 7, and a one-year-old daughter.

members reported on their church-going habits, with the following results:

Attend regularly	54 (56%)
Attend occasionally	33 (34%)
Never attend	10 (10%)
	97

In politics, the 70 respondents showed some preference for the Liberal Party, but a large number failed to answer the question, which may indicate that the majority of the members of the class are independents:

Liberal	27 (24%)
Independent	19 (17%)
Conservative	12 (11%)
Party *out* of power	3 (3%)
Party *in* power	1 (1%)
Democrat	3 (3%)
Republican	2 (2%)
"Disillusioned"	2 (2%)
Social Credit	1 (1%)
No answer	42 (37%)
	112

Golf, skiing and swimming are by far the favorite sports mentioned by those answering. Golf was mentioned 34 times; skiing, 26; swimming, 19; tennis, 9; fishing, hunting, curling and boating, 6 times each. Other sports mentioned once or twice were baseball, hockey, shooting, volleyball, skating, snowshoeing and motorcycling.

Less than half of the respondents said that they participate in civic, charitable, or similar organizations. Forty-two apparently belong to such groups as church charitable organizations, Red Feather, community associations, Boy Scouts, and Kiwanis (mentioned three times and the only service club mentioned). Thirty-seven said that they do *not* participate in such activities; the remaining 33 gave no answer.

THE ENGINEERING GRADUATE OF 1952

A Composite Picture

• He holds a responsible job as an engineer in a large Canadian corporation located either in Quebec or Ontario.

• He earns somewhat less than $10,000 a year, is married and has two children.

• He owns his own home and a few securities, drinks about the same as he did when a student, and is independent politically.

• He goes to church regularly and in his spare time he plays golf, skis and swims, but he is not very active in civic or charitable organizations.

• On the whole, he is satisfied with his life, and thinks his choice of engineering was a wise one.

Satisfaction of graduates

The second to last question in the survey was: "Are you pretty well satisfied with your life so far?" This evoked the following answers:

Yes	90 (90%)
Not particularly one way or the other	8 (8%)
No	2 (2%)
	100

The last question was: "If you had to start over again, would you take engineering?" The answers indicate satisfaction with the respondents' original choice:

Yes	92 (92%)
Maybe	3 (3%)
No	5 (5%)
	100

Of the five men who answered "no", one added that he would take "the fastest course possible instead", one said he would take business or law, one preferred journalism, and two medicine. It is interesting to note that not a single respondent indicated that he would not go to a university as an alternative.

Table 2

Drinking	*Civils*	*Elect.*	*Mech.*	*Chem.*	*M.&M.*	*Total*
Never Have	3	1	4	0	0	8 (8%)
Stopped	1	1	0	0	0	2 (2%)
Less	8	7	7	4	1	27 (29%)
Same	8	6	12	3	0	29 (31%)
More	5	5	9	3	6	28 (30%)

Physicists' Prize

DOUGLAS BEDER, BSc '61, of Montreal is this year's winner of the Canadian Association of Physicists' prize.

Mr. Beder placed first among 38 candidates who wrote the national examination conducted by the C. A. P. in March for honours Physics graduates.

This group photograph of the Honorary Degree recipients at Spring Convocation was taken in front of the Redpath Library. From the left: Dr. F. Cyril James, Principal and Vice-Chancellor; Dr. J. E. Wallace Sterling, President, Stanford University, California; Prof. C. N. Hugh Long, MD '28, Yale University; Hon. Francis Lacoste, French Ambassador to Canada, who delivered the Convocation Address; Dr. W. A. Mackintosh, Principal and Vice-Chancellor, Queen's University; Hon. A. D. P. Heeney, BCL '29, Canadian Ambassador at Washington; R. E. Powell, Chancellor of McGill University, who conferred the degrees; Dr. Clive H. Carruthers, who was made Emeritus Professor of Classics. Prof. Long received an Honorary DSc degree and the other candidates were awarded Honorary LLD degrees.

A number of officers of The Graduates' Society were proud parents at Spring Convocation and The McGill News camera captured this rare moment in a unique "family" portrait. From the left: Charles W. Peters, BA '61; Charles H. Peters, BA '28, First Vice-President; Peter B. M. Hyde, BA '61; The Hon. Mr. Justice G. Miller Hyde, BA '26, BCL '29, President of the Graduates' Society; Anne Margaret Lafleur, BA '61, daughter of John T. Lafleur, BA '37, General Secretary, who was not present for the photograph; A. Deane Nesbitt, BEng '33, Chairman, Alma Mater Fund; and Arthur R. Nesbitt, BA '61.

Spring Convocation 1961

SENIOR DIPLOMATS from France and Canada were among five persons granted honorary doctorates on May 31, when more than 1,300 students received diplomas at McGill's annual Spring Convocation (See photo top left).

For many graduates this was a proud day as they saw their sons and daughters march to the platform on the sunny lower campus, where Dr. F. Cyril James, Principal and Vice-Chancellor, waited to receive them for the "capping" ceremony. (See photos bottom left and right).

Honorary Degrees

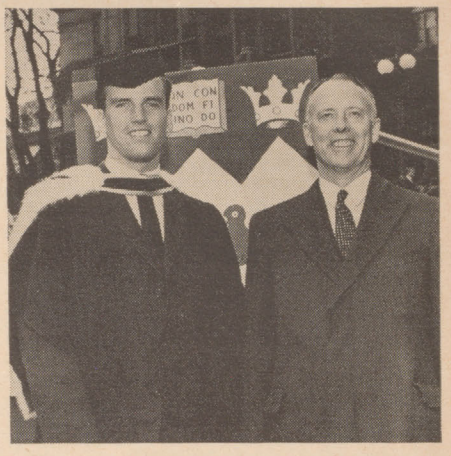

Honorary LLD's were conferred upon the Hon. Francis Lacoste, French ambassador to Canada, Arnold Heeney, BCL '29, Canadian ambassador to the United States, Dr. W. A. Mackintosh, principal of Queen's University, and Dr. J. E. Wallace Sterling, Canadian-born president of Stanford University. The degree of doctor of science was granted to Dr. C. N. H. Long, MD '32, former lecturer at McGill, and now chairman of the department of physiology at Yale University. Also honoured was Mr. E. M. Shilstone, a lawyer from the Barbados, who was granted an honorary degree of Master of Arts in recognition of his contribution in the establishment of McGill's Bellairs Research Institute in the Barbados.

Emeritus Professor

Prof. Clive H. Carruthers was made emeritus professor of Classics. Prof. Carruthers has had a long and distinguished career, having served on McGill's faculty for 41 years. Born in Toronto, he was educated at the University of Toronto (BA, MA), Oxford (BA), and the University of Chicago (PhD). He was appointed assistant professor of Classics at McGill in 1920, associate professor in 1926, and full professor in 1929. Prof. Carruthers was made chairman of the department in 1950, a position he held until his retirement in 1956. He continued to teach until this year on a post-retirement basis.

Danny Mettarlin, BA '58, BCL '61, A. H. Mettarlin, BA '23, BCL '26, are practising notarial law together in Montreal.

Gordon Eberts, BA '61, E. H. Eberts, BA '28, BCL '31.

Lorne Stuart Webster, BCom '30, Susan Webster, BCom '61, P. S. Gregory, BSc '11. Mrs. Webster is the former Mary Florence Gregory, BA '38.

Mrs. Martin C. Raff (Edith Dorsey, BA '61), Louis M. Dorsey, BA '29.

Mrs. Stewart Large (M. Elizabeth Bradshaw, BA '52), Richard Bradshaw, BCom '61, Fred W. Bradshaw, BSc '25.

Obituaries — *Continued from Page 21*

Canadian Pulp and Paper Association in 1937, in 1944 he received the Tory medal of the Royal Canadian Society, in 1946, he was made commander of the Order of the British Empire, in 1947, the U.S. Medal of Freedom with Bough, and in 1955 he was made an honorary member of the Chemists Club of New York, the only Canadian to be so honoured.

Dr. Maass was a Fellow of the Chemical Institute of Canada, the Royal Society of Canada and the Royal Society, London, England.

John E. de Belle

JOHN E. DE BELLE, MD '26, former director of the Montreal Children's Hospital, died in Montreal on August 12th.

Dr. de Belle was born in London in 1901, came to Canada in 1912 and was educated in Montreal. Upon graduation from McGill, he joined the staff of the Royal Victoria Hospital as medical assistant to the supervisor. He was especially interested in hospital administration. In 1937, Dr. de Belle was appointed general superintendent of the Children's Memorial Hospital, and was later appointed executive director of the same hospital, which by then had become the Montreal Children's Hospital. Except for a time when he served with the Royal Canadian Navy as a surgeon commander during the war, Dr. de Belle was associated with the hospital until his death.

John E. de Belle

He served on the boards of the American Hospital Association, the Canadian Hospital Association, the Montreal Hospital Association, the Canadian Physiotherapy Association and the Cancer Aid League.

College Board Results

TWO HUNDRED Montreal high school students have been accepted at McGill as a result of their standing in American College Board tests.

Seventy-five of these students have been awarded entrance scholarships on the basis of the tests, held for the first time this year. Walter K. Molson, Director of Admissions for McGill, announced that the 200 students who have been accepted must also attain satisfactory marks in the matriculation examinations.

The American College Board tests were written in March by nearly 1,300 Montreal high school students. One was in English, one in mathematics, and three tests in subjects chosen by the candidate. The tests, marked by IBM machines in Princeton, N.J., can be written at any North American high school without any preparation.

Grant for Nursing

THE ESTABLISHMENT of a master's degree in nursing will be financed by a grant from the W. K. Kellogg Foundation, Dr. F. Cyril James, principal and vice-chancellor announced recently.

The grant of $195,000, to be extended over a five-year period, will enable Canadian nurses to remain in Canada for post graduate training.

The new degree will involve a two-year academic course with opportunity to complete most requirements in the first year. The course will be administered by the Faculty of Graduate Studies and Research.

ROYAL TRUST

ABOUT IT"

CANADA'S LEADING EXECUTOR AND TRUSTEE
OFFICES ACROSS CANADA AND IN LONDON, ENG.

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

GENERATING EQUIPMENT

DISTRIBUTION EQUIPMENT

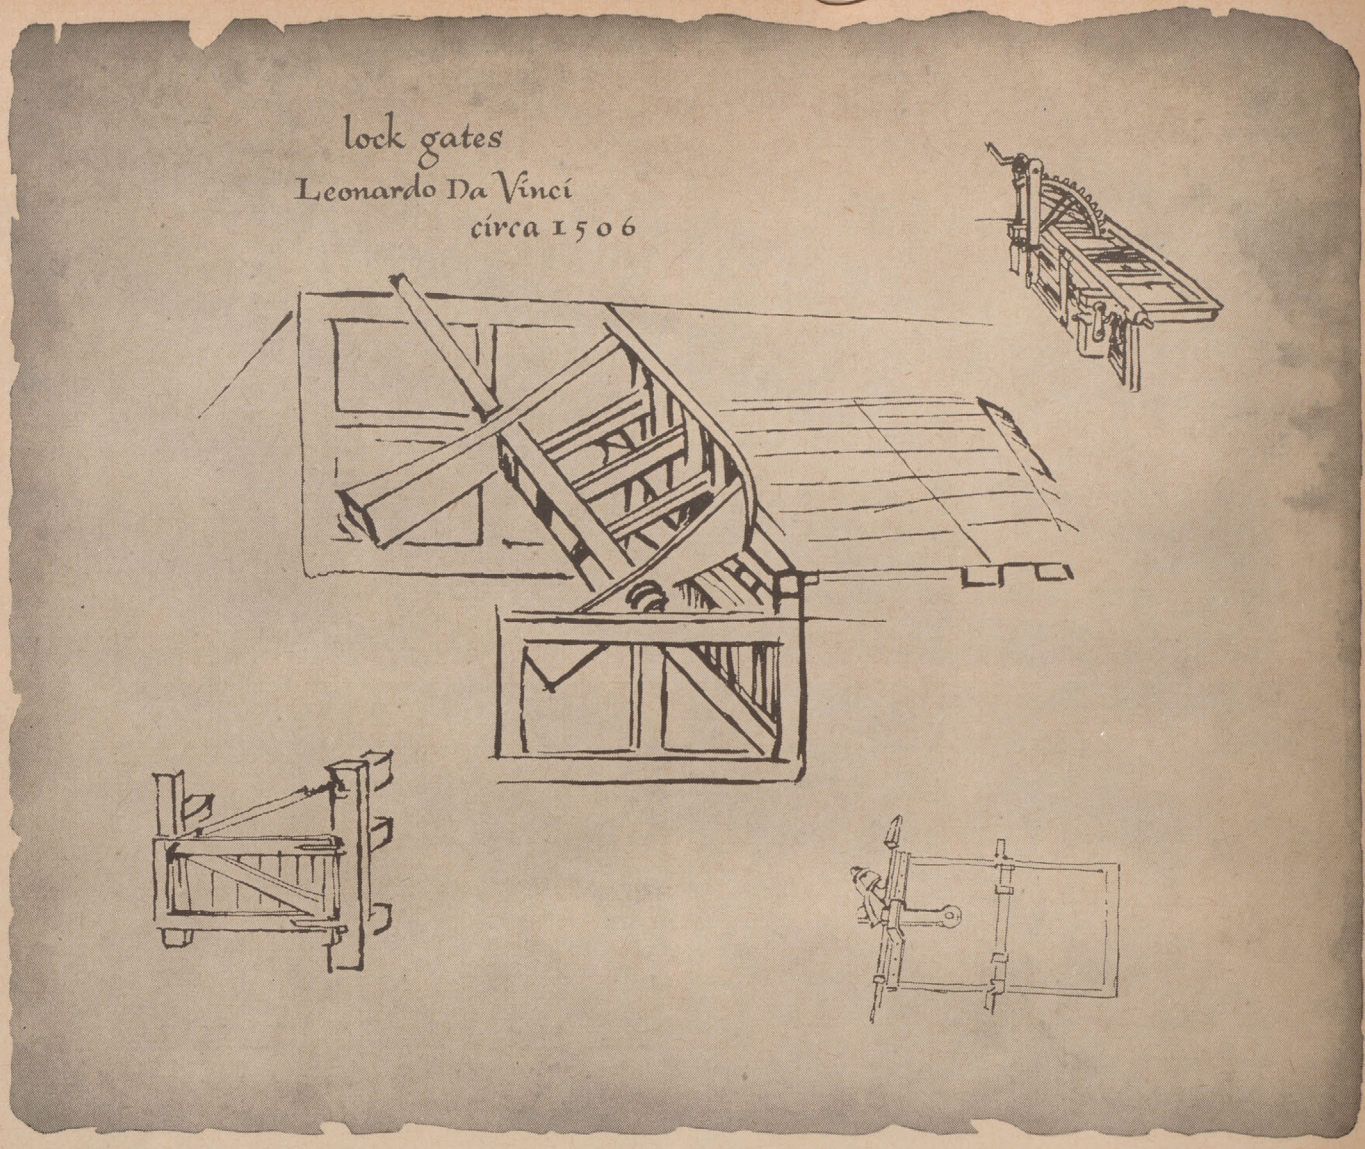

PRODUCTS FOR THE HOME

PRODUCTS FOR INDUSTRY

Canada's oldest and largest manufacturer of electrical equipment that generates and distributes electricity, and the products that put it to work in home and industry.

CANADIAN GENERAL ELECTRIC
COMPANY LIMITED

Progress Is Our Most Important Product

LEONARDO DA VINCI, *artist, engineer, inventor, possessed what was probably the most versatile and imaginative mind the world has ever known. Reproduced here are original sketches of various types of Lock Gates designed by Da Vinci.*

VERSATILITY

FIFTIETH ANNIVERSARY 50 YEARS OF PROGRESS AND PRODUCTIVITY

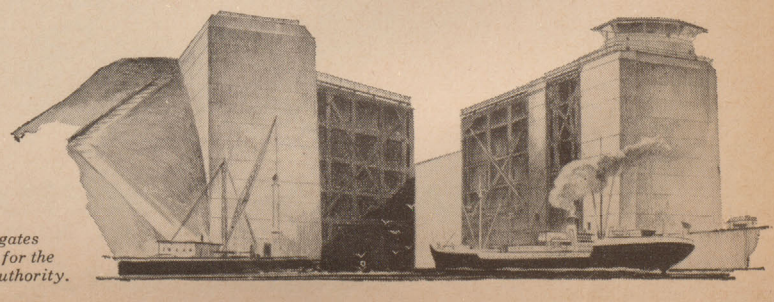

In manufacturing machinery and equipment for all types of water control, like the lock gates shown below, Canadian Vickers again demonstrates the range and versatility of its operations. Machines, both large and small, and equipment for every imaginable industrial need, are designed and manufactured in Canadian Vickers' shops, thus fulfilling their pledge: "If Industry Needs It . . . Canadian Vickers Builds It . . . Better."

Ships • Special Machinery & Equipment • Marine Equipment • Mining Equipment
Industrial Boilers • Chemical Process Equipment • Hydraulic Machinery • Pulp & Paper Equipment

CANADIAN CV VICKERS LIMITED

MONTREAL • TORONTO

MEMBER OF THE VICKERS GROUP

One of the many sets of lock gates built by Canadian Vickers for the St. Lawrence Seaway Authority.

"ROYAL" MANAGER (left) TALKS SHOP WITH WESTERN TUGBOAT OWNER

The Royal Bank manager "gets the picture"

. . . *because he sees your business from both sides of his desk.* Here he is, "on location", for a close-up look at tugboating, getting first hand knowledge of day-to-day operations. This "outdoors" habit is typical of the Royal Banker everywhere . . . a desire to know more about a customer's business in order to serve him better. This active interest may be something you can use in *your* business.

THE ROYAL BANK OF CANADA

The SUN LIFE AGENT IS EXPERT, TOO!

Yes, in planning a man's estate, the life insurance agent can work closely with the lawyer, the accountant and the trust officer in providing the client with the best possible advice. For every estate needs dollars that will be immediately available to meet death taxes and other expenses attending death and so preserve the other assets of the estate. These are the dollars which life insurance can provide.

And remember, when you are dealing with the Sun Life, you are dealing with one of the world's great life insurance companies. Sun Life maintains 150 branch offices in key cities in Canada and the United States, with agency representation from coast to coast. With a wide variety of up-to-date policy plans, and with highly qualified representatives, Sun Life is in a position to offer the very finest in life insurance service.

SUN LIFE ASSURANCE COMPANY  **OF CANADA**

The promise of DISCOVERY

THE GENIE OF THE OLD FAIRY TALE, who sprang out of a bottle found in the sea, could shape the future in his giant hands. Today's genies come out of the laboratories, where scientists discover new materials and methods that shape modern technology and improve our way of life.

Cyanamid needs well-educated Canadians eager to share in important Cyanamid developments relating to mining, paper-making, plastics, textiles, pharmaceuticals, general industry and agriculture. At Cyanamid of Canada they will find that career opportunities hold bright promises of personal accomplishment.
